

Dedication

We dedicate this book to those of the "Old Guard"

By this we mean, to those old pioneers who bravely faced an antagonistic world with a new science which by virtue of their courage, faith and perseverance has been made a reality

48575

Foreword

This is the 12th annual "Osteoblast." It has not been compiled without much diligent labor, and deep meditation.

If you should discover that it is imperfect, remember that perfection is an ideal, not a reality.

If perchance you should find a page, a paragraph, or a phrase that does not meet with your approval, forget it and look for one that does.

It is our hope that as you turn these pages you will live again in memory some of our various mutual experiences.

With this last thought in mind we submit this volume, and extend our heartiest greetings

Doctor Andrew Taylor Still
Founder of the Science of Osteopathy, and
President of the American School of Osteopathy,
we, of the classes of nineteen hundred and
eighteen, wish to extend to you our most profound
respect and admiration, which deepens more and
more as we grasp the great truths presented by you

Elective Staff

R. D. STEPHENSON
Editor-in-Chief

The Laurel

"Their temples wreath'd with leaves that still renew;
For deathless laurel is the victor's due."—*Dryden*

The leaves incorporated in the decoration of this book are a representation of those of the bay-tree, or bay-laurel (*Laurus nobilis*). This is the true laurel of the ancients and the poets.

By the ancient Greeks the laurel was called *Daphne*, and was held sacred to *Apollo*. Berry-bearing twigs of it were wound 'round the foreheads of victorious heroes and poets; and, in later times, the degree of *Doctor* was conferred with this ceremony. Thru the succeeding ages the laurel has prevailed as a symbol of victory and honor, and has been used in the conferring of various academic degrees.

Thus we deem it fitting that those in the ranks of *Osteopathy* shall be honored with the laurel, for we are seekers of truth and will assuredly be victorious.

"In eastern lands they talk in flowers,
And they tell in a garland their loves and cares;
Each blossom that blooms in their garden bowers,
On its leaves a mystic language bears."

—*PERCIVAL*

Oh, long will our hearts with memory be filled
 For here have our doubtings and troubles been stilled
 We can go from thy shadow to do what we will,
 But thy teachings and precepts will be with us still.

"The atmosphere
 Breathes rest and comfort, and the many chambers
 Seem full of cheer."
 — LONGFELLOW

"His home, the spot of earth, supremely blest,
A dearer, sweeter spot than all the rest."

— MONTGOMERY

"Once, (says an Author: where I need not say)
Two trav'lers found an Oyster in their way;
Both fierce, both hungry; the dispute grew strong,
While scale in hand, Dame Justice passed along,
Before her each with Clamour pleads the laws
Explained the matter, and would win the cause.
Dame Justice weighing long the doubtful right
Takes, opens, swallows it, before their sight.
The cause of strife removed so rarely well,
"There take" (says Justice) "take ye each a shell
We thrive at the court house on fools like you,
'Twas a fat oyster — live in peace — Adieu!"

— VOPE

"Mildly and soft the western breeze
Just kissed the lake, just stirred the trees,
And the pleased lake, like maiden coy,
Trembled but dimpled not for joy."
— SCOTT

"Changeless march the stars along,
Changeless Morn succeeds the Even;
And the everlasting hills,
Changeless watch the changeless heaven."
— KINGSLEY

**"By Wisdom wealth is won;
But riches purchased wisdom yet for none."**

Declaration of Principles

"Osteopathy is the name of a new school of medicine, discovered by Doctor Andrew Taylor Still, which is based on certain fixed and definite principles, the development and application of which has been the study of the practitioners of Osteopathy.

"The fundamental principles of Osteopathy are based on a new conception of the physical body of man. This conception is the result of the practical study of the anatomy and physiology of the body itself, and postulates that since the body is essentially mechanical in its anatomical aspects and vital in its physiological processes, it should be regarded as a vital-mechanical organism in the etiologic diagnosis and treatment of its disorders.

"Osteopathy is a school of the healing art which teaches:

"First:—That the human body is a self-reparative and self-recuperative vital organism.

"Secondly:—That by virtue of these attributes the organism contains actively and potentially the essential means or measures for growth, development, repair and cure.

"Thirdly:—That normal circulation, nervous equilibrium, and chemical coördination are the essentials of health.

"Fourthly:—That ill-health is most frequently initiated by some active or predisposing mal-adjustment of structure, such as bone, muscle, ligaments, or other soft tissue of the organism, by trauma, environment, infection, improper diet, or other abnormal factors, so that vascular tissue, nervous structure or chemical force is impaired. Osteopathy recognizes the facts and importance of surgery and toxicology.

"Osteopathic physicians give prime attention and consideration to the diagnosis and mechanical adjustments by manipulation of vertebral abnormalities (mal-adjustments), on account of the direct anatomical and physiological relationship of the spinal nerves to the vascular, chemical and organic control of the vital mechanism. Adjusting and maintaining the adjustment (mechanically) of all anatomical tissues of the human structure in their distinct normal relationship of part to part, and the part to the whole, is the characteristic field of osteopathic endeavor.

"From this point of view it is evident that the normal functioning of the body depends on the principle that the correct adjustment of the mechanics and the vital processes to each other and to the body as a whole, is necessary in order that the functions of self-repair may continue along normal lines.

"Osteopathy recognizes that form may disturb function and it also recognizes that function may disturb form. Form, or structure, and function are inseparable.

"Osteopathy recognizes the following causes which may affect either form or function: trauma, deformities, incorrect postures (which result in marked or slight disturbances in the relation of the anatomic parts of the body), environment, nutrition, habit, thought, sanitation, occupation, economic circumstances, infection, immunity, heredity, and such other factors as may influence or disturb our physical well-being.

"Osteopathic treatment being based on these facts and principles is directed to the adjusting of the anatomy and physiology of the body to their normal relations and with due regard to sanitation, hygiene and environment."

NOTE:—The above articles are copyrighted by The Illinois Osteopathic Association, and are used here by permission of Dr. Canada Wendel, President of that association.

History of Osteopathy

Doctor Andrew Taylor Still was born in Jonesboro, Lee County, Virginia, on the 6th day of August, 1828. At the age of nine years he moved with his parents to the northern part of Missouri, his father, the Rev. Abram Still, having an appointment there as a missionary. In 1853 he went with his father as a physician and missionary to the Shawnee Indians in Kansas.

It was here that he met with conditions which gave him opportunities to go deep into the study of disease, and human anatomy, as well as to do considerable original research work. Being of a mechanical turn of mind he eventually became convinced that disease could be treated and cured by the adjustment of the body, and without the aid of drugs. In 1874 he made this discovery known, and asked to be allowed to explain the science in Baker University at Baldwin, Kansas, in which place he then lived. He was refused this privilege by the authorities, and officials of the church accused him of being a pretender of Christ for asserting that he could cure disease by laying on his hands.

In 1875 he left Kansas and came to Kirksville, Mo., and here started to practice Osteopathy. Although he was at first considered fanatical and crazy, he eventually became recognized as a great healer, and Osteopathy gained a firm hold. His practice grew to be so extensive that he had to teach his sons the new science in order that they might assist him. In this way it became known that it was possible to impart his knowledge to others, and it was decided to establish a school for this purpose, so that the science might be perpetuated and humanity benefited.

The first school building, a small frame structure which is still in existence, was soon found to be much too small to accommodate the numbers that crowded in to study and apply themselves to this new science, and it was moved out of the way to make room for a new building of brick which has since been added to.

The American School of Osteopathy was incorporated in May, 1892, and was re-chartered in October, 1894. The first class, consisting of seventeen members, was graduated in 1893, the course then being of only one year duration.

The course of study has gradually been extended from one to two years, then to three years, and in 1916 a four-year course was established.

The classes graduated from the American School of Osteopathy are as follows:

1895 . . . 26 members	1903 . . . 262 members	1910 . . . 154 members
1896 . . . 48 "	1904 . . . 263 "	1911 . . . 183 "
1897 . . . 48 "	1905 . . . 248 "	1912 . . . 191 "
1898 . . . 136 "	1906 . . . 266 "	1913 . . . 213 "
1899 . . . 185 "	1907 . . . 183 "	1914 . . . 203 "
1900 . . . 317 "	1908 . . . 107 "	1915 . . . 199 "
1901 . . . 334 "	1909 . . . 136 "	1916 . . . 223 "
1902 . . . 269 "		

School

“Uneasy lies the heads of all that rule,
His, worst of all whose kingdom is a school.

Secretary and Treasurer.

GEORGE A. STILL
 Kirksville State Normal. B. S., Drake University, 1900; M. S., M. D., Northwestern Medical College, 1904; D. O., American School of Osteopathy. Surgeon-in-Chief, A. S. O. Hospital.

The A. S. O. Hospital

OUR HOSPITAL, the picture of which appears among the views, was erected during the years of 1905 and 1906, and has proved a wonderful success both as an institution for the care of the sick, as well as one of advantage to the students in the way of lectures and clinics.

The staff, which originally consisted of two A. S. O. students and one doctor, has in the face of many obstacles, progressed in efficiency, and gained in numbers to an enrollment of thirty-one nurses, six internes, seven doctors and surgeons (each a specialist in his line), besides various other officers and assistants. The institution is at present equipped so as to handle any condition that might be expected of a modern hospital.

In addition to the many cases of Scoliosis, Club feet, Pott's disease, Tubercular joints, Congenital dislocations, Tenotomies, Osteotomies, Fasciotomies, and similar operations which have been taken care of by Dr. Geo. Laughlin, and a few cases of a non-surgical nature by Dr. Ashlock; we will list those surgical cases which have been handled by Dr. Geo. Still during the past year. The list gives one a good idea of the varied nature of cases referred to him by practitioners and friends, and are given approximately in the order of their frequency, whether major or minor.

- | | |
|---|---|
| Childbirth laceration of perineum and cervix | Cysts, cystic degeneration, and infection of ovaries, requiring removal |
| Suspension of the uterus for prolapsus and mal-position | Carcinoma of uterus, requiring complete Hysterectomy |
| Adenoids | Carcinoma of breast, requiring removal |
| Pus tubes and salpingitis, requiring removal | Carcinoma of stomach, requiring removal or palliative operation |

A. S. O. NURSES

- | | |
|--|--|
| Infected tonsils, requiring incision, excision, or clipping | Caruncles of urethra |
| Floating kidney, requiring suspension | Gastric ulcer |
| Circumcision, both male and female | Genito-urinary tuberculosis |
| Biliary obstruction, requiring drainage, removal of gall-stones, or new opening into intestine | Ankylosis of joints |
| Myomata and similar benign tumors of the uterus, requiring partial removal | Hypertrophy of prostate |
| Hernias,—inguinal, femoral, and umbilical | Non-union of fractures, especially neck of femur being united by spiking |
| Variococele | Ptergiums |
| Enlarged turbinate processes, requiring cauterly or removal | Suspension of stomach for prolapsus |
| Deflected septum of the nose | Torticollis, (Nerve section and tenotomy.) |
| Hemorrhoids, rectal ulcers, and fissures | Nerve injection for tic douloureux and facial neuritis |
| Exophthalmic goiters, and simple goiters | Acute blood poison from small wounds and injections |
| Curettage for polyps, retained tissue, etc. | Bunions |
| Floating cartilages of joints, mainly knee | Benign tumors of the breast |
| | Bursae inflamed around joints |
| | General peritonitis |

Dr. George Still, Thwaites, Crawbuck, Turman, Dr. Tom. Ashlock, Peterson, Reid, Dr. Geo. Laughlin.

Hydrocele
 Amputation of limb for sarcoma and similar grave conditions
 Carcinoma of external surface, especially about face
 Tubercular glands of the neck
 Carcinoma of the intestines
 Carcinoma of the liver and bile passages
 Bone necrosis
 Intra abdominal adhesions
 Stricture pyloris
 Hair-lip, and cleft palate
 Plastic operations on scars from burns and other causes
 Fistula in ano
 Appendicitis. (The number of operations for appendicitis has been small, the reason for which is, that an attempt is made to avoid operation in those cases

than can be cured otherwise, and the list does not include those cases where the appendix was removed along with other operations such as pus tubes, suspensions, etc.)
 Tubercular cervical lymph glands
 Pus infections of various lymph glands
 Salvarsan injections
 Lipomata
 Carbuncles
 Varicose veins of legs
 Urethral stricture
 Retained testicle
 Bartholinian abscess
 Vasectomy
 Brain tumor
 Laminectomy
 Spina bifida
 Tumor of Cord

Dr. Geo. Still, Apgar, Starbuck, Clark, Crawbuck, Dr. Tom. Ashlock, Foley, Welch, Beal, Dr. Geo. Laughlin.

Removal of abdominal fat for pendulous abdomen.
 Sebaceous cysts
 Strabismus
 Ectopic gestation
 Removal of needles from hands, feet, and legs
 Gun-shot wounds
 Psoas abscess
 Tumor of parotid gland

In addition to the above list, of course, the various fractures, dislocations, etc., were handled, as well as simple wounds. In some instances these operations have been numerous, while in others, only one may have been performed during the year.

Geographically the patients have come from the following states.

Missouri	Minnesota	New England	Alabama
Kansas	Indiana	Maryland	Arizona
Illinois	Pennsylvania	West Virginia	Nevada
Iowa	Colorado	Idaho	Wyoming
Oklahoma	N. Dakota	Tennessee	Georgia
Ohio	Canada	Utah	N. Carolina
Montana	New York	Virginia	S. Carolina
Nebraska	Kentucky	New Jersey	Oregon
Michigan	Arkansas	California	S. Dakota
Wisconsin	New Mexico	Mississippi	Washington
Texas			

Hospital Staff

GEORGE A. STILL, M. S., M. D., D. O. . . . Surgeon-in-Chief
 GEORGE M. LAUGHLIN, M. S., D. O. . . . Orthopedic Surgeon
 FRANK L. BIGSBY, M. D., D. O. . . . Obstetrician
 JOHN N. WAGGONER, M. D., D. O. . . . Ophthalmologist
 S. S. STILL, A. B., D. O. . . . X-Radiance
 H. T. ASHLOCK, D. O. . . . Anesthetist and Ass't. Surgeon
 CORA GOTTREAU, R. N. . . . Superintendent
 ETHEL ROGERS, R. N. . . . Associate Superintendent
 JEANNETTE CARLEY, R. N. . . . Business Manager

INTERNES

Completing Service February 1, 1917
 Dr. Walter Thwaites, Dr. B. D. Turman, Dr. R. H. Peterson, Dr. M. J. Reid
 Entering Service February 1, 1917
 Dr. O. W. Apgar, Dr. M. B. Starbuck, Dr. D. J. Clark, Dr. W. E. Crawbuck,
 Dr. Walter K. Foley, Dr. H. W. Welch, Dr. F. J. Beal.

The Science of Medicine and its History

MEDICINE, as the word is commonly used, and understood, has in the past pertained more especially to drugs, and their application to the cure of disease; but the word in its broad sense means the treatment of disease, and is taken from the Latin word "Medicina", which means the art of healing.

It should, therefore, be of interest to the student of Osteopathy to follow this art, or science, down through the ages of the past marking the various theories, beliefs, etc., that have been prominent in the course of its development.

To do this would require unlimited study. We will, therefore, only make note of such facts as stand out most prominently, and give promise of the most interest.

To find a beginning for such a discourse is almost impossible for it seems that there is no place in history where medicine has not played its part, and where we cannot go back a few centuries farther and find its existence. In ancient India there was an association of medicine and religion, as was also with the ancient Egyptians, where the cure of the sick was entrusted, mostly, to the priests, the doctrine being, that each part of the body was under the influence of some planet. Therefore, it was necessary to administer such remedies as were under this same influence. The month, day, and hour of the day were also considered as they were believed to be under the influence of some star which, by exercise of this influence, might support or weaken the action of the medicine.

From the Homeric poems we learn that there was a system of medicine practiced among the Greeks of that time. The profession was organized, there was a system of treatment, and a nomenclature of parts of the body. However imperfect their science may have been, it shows us that we are, as yet, very far from the beginning. Besides medicine, as a science, mention is also made of "Asclepius", the God of Healing. The sick, after ablution, prayer, and sacrifice, were made to sleep on the hide of the sacrificed animal, or at the feet of the statue of the God while sacred rites were performed. During the sleep the appropriate remedy was indicated in a dream. A record of cures was inscribed on the walls of the temple, and it has been thought, that in this way, was introduced the recording of cases.

It is only from non-medical writers that anything is known of the development of medicine in Greece before the age of Hippocrates. Notes collected from historians and poets indicate the relation of the profession to society. There was the school of Pythagoras, of which the philosopher and several of his successors were physicians, but we do not know in what relation they stood with the later medical schools.

The medical art as we now understand it, and as practiced by the physicians, dates from Hippocrates, who reformed medicine during the fourth century B. C. Hippocratic medicine included four great characteristics, the first of which was the high conception of the duties of the profession, and that they should be free from the mysticism of the priesthood. The second was the skill with which the physician was taught to handle his tools. The third was the recognition of disease as a process equal with life, and governed by natural laws which could be known by observation; these observations lead to the fourth, which was the interpretation of symptoms in which the Hippocratic school was unrivaled. The actual science was limited, little advance was made in anatomy, physiology, or pathology; the doctrine was founded, chiefly, on observation. There prevailed a theory, which contended that the body consisted of four "humours", blood, phlegm, black bile, and yellow bile. A right proportion and distribution of these constituted health, and the contrary, disease. Hippocrates laid much stress on the healing powers of nature, which he did not claim was in itself sufficient to cure, but very effective. Treatment attached much importance to diet, and, in chronic cases, to proper exercise. Medicine was considered secondary, but not neglected. There were mentioned in Hippocrates' works two hundred and sixty-five drugs. Blood-letting was known, but not practiced to any great extent. The highest importance was attached to applying all medicines at the proper time, and the general principle of making all influences, external and internal, co-operate for the relief of the patient.

After Hippocrates the general conception of the physicians' aim and tasks remained the same,

but as knowledge increased, there was much divergence in theory and practice. Mention might be made of the writings of Aristotle which, though not strictly medical, contributed much to the science in the way of anatomy and physiology.

The century after the death of Hippocrates is a time almost blank in so far as medicine, as well as other sciences, are concerned, and, it is probable that it shared in the general intellectual decline after the Macedonian supremacy.

The conquests of Alexander and his successors did much in the way of dispersing Greek science throughout the world, and was effective in the establishment of many learned centers in which medicine was represented. Pergamum was noted among the first, but, eventually, gave way to Alexandria, and it is here that the real continuation and development of Hippocratic medicine can be traced. In one department the Alexandrian schools far surpassed the Greek original, namely, in anatomy. The dissection of the human body was assiduously carried on, as this was favored by the Egyptian custom of disemboweling and embalming the bodies of the dead. Organs were also examined by opening the bodies of living criminals, who had been condemned to death.

Two eminent names, Herophilus and Erasistratus, are prominent as leaders of the two earliest schools that arose in Alexandria.

Herophilus (335-280 B. C.) was a Greek who professed himself a close adherent of Hippocrates. He adopted the theory of the humours, was especially noted for his work in anatomy, and made extensive use of bleeding. He was placed by antique medical writers second only to Hippocrates.

Erasistratus (280 B. C.) was a rival of Herophilus. He did not adhere to the teachings of Hippocrates, and expressed independent views. He appears to have inclined more to the mechanical explanation of symptoms, and was the first to give anything like a rational theory of inflammation.

The Erasistrateans paved the way for an important school of Alexandria, known as the Empiric, probably founded by Philinus of Cos. This school rejected anatomy, and regarded inquiry into the cause of disease as useless. They based their whole practice on experience, to which they gave a special meaning. Thus, experience could draw from three sources: observation, history, and judgment by analogy. These three bases of knowledge were known as the "tripod" of the Empirics. The Empirics were very successful, and it is believed that a large part of the routine knowledge of disease, and remedies, which became traditional in the times of the Roman Empire, was derived from them.

The work of the Alexandrian schools was great and permanent. The greatest being the systematic study of anatomy, surgery, and obstetrics. The knowledge of function did not keep pace with the study of structure, and for this reason, the Empirics were able to dispense with anatomical knowledge.

As to Rome:—It cannot be said that, at any time, the Romans originated, or possessed, an independent school of medicine. They had, from early times, a complicated system of superstitious medicine and religion, but real medical science, in so far as can be traced, is an importation from the Greeks. The first Greek to migrate was Archagathus, which occurred 218 B. C. When Greece became a Roman province, numbers of physicians sought their fortunes in Rome. Among those to migrate was one Asclepiades, who was born 124 B. C. He introduced a system of his own, based on the Epicurean philosophical creed. According to this doctrine, disease depended upon the number, size, arrangement, and movement of atoms, of which the body, according to Epicurus, was composed. These atoms were presumed to be arranged into channels, or passages, through which the fluids of the body could pass. In the treatment of disease under this doctrine, much importance was attached to diet, exercise, passive movements, frictions, and the external application of cold water.

Themison, a pupil of Asclepiades, by modifying the teachings of his master, introduced a system of medicine known as Methodism. The adherents to this system agreed with the Empirics in their contempt for anatomy, and contended that it was useless to consider the cause of disease, or the organ affected. According to them it was sufficient to know what was common to all disease. Of these there were three possible forms: relaxation, constriction, or a mixed condition of the minute passages. Treatment was directed in an effort to cause relaxation of the body, if constricted, or constriction, if too relaxed.

Among the Methodists of the second century appears the name of Soranus or Ephesus, who is known by a work on the diseases of women, and which is the only work on that subject which has come down to us from antiquity. It is noted that he made use of the speculum, and it may be said here that forms of this instrument of a much earlier date have been found in the ruins of Pompeii.

The Methodic school, and theories, lasted for many centuries, but was not exclusive for there were a number of others which rivaled with it. Among these was the "Pneumatic School", according to the doctrines of which, the normal as well as the diseased actions of the body were referred to the "Pneuma", or Universal Soul.

From this period there seems to have been somewhat of a decline of the medical science. The moral integrity of the physicians became gradually degraded, and the profession split into a number of sects and systems. These were the conditions which existed when Galen (born about A. D. 130), possessed himself of all the anatomical and medical knowledge of his time, and directed his efforts to gathering up the scattered remnants of ancient medicine. He was a man devoted to anatomical and physiological research, and although he was compelled to make use of animals, he worked enthusiastically at dissection. His general physiology was based on the Hippocratic theory of the four humours, combined with the spirit "Pneuma" which penetrated and mingled with them. The body was supposed to have the properties: heat, cold, wet, and dry, in varying proportions, and its condition depended upon the mixture. Galen's theory of drugs was that they contained these same properties, and his principle of treatment was to cure by contraries.

The system of Galen was gradually accepted, and eventually enjoyed a great though not an exclusive predominance until the fall of the Roman Empire. It was followed by the Byzantine school, the writers of which were chiefly compilers and encyclopaedists.

The next step in the history of medicine, although it can hardly be called one of progress, commences with the rise of the Mohammedan Empire. The classical period of Arabian medicine begins with Rhazes (A. D. 925), who was a native of Persia. He followed, closely, the doctrines of Galen, and learned much from the teachings of Hippocrates. Rhazes practiced with much distinction at Bagdad, and was the first to describe Smallpox and Measles in an accurate manner.

The works of the Arabian writers have been numerous, but hardly worthy of note as they are chiefly Greek doctrines, modified to suit other climates and conditions, with some additional oriental views. In Physiology and Anatomy the Arabs decidedly declined, and in practical medicine no advance was made except the description of a few diseases unknown to the Greeks. Their relation with the far east enabled them to find many new drugs, and their knowledge of Chemistry enabled them to prepare new chemical remedies. So their only advancement was in Pharmacy, and the therapeutical use of drugs. The Arabs produced the first Pharmacopoeia, and were the first to establish Apothecary shops. Many of the present names, forms of medicine, and in fact, the general outline of modern pharmacy started with this people.

It will be of interest to go back a little and consider the condition of medicine in Europe after the fall of the Western empire, and before Arabian Science exerted a definite influence. This is called the Pre-arabian, or Salernitan period. It cannot be said that there was any real break, either in scientific, or civil history, altho the former is traced with much more difficulty than the latter, and in periods such as from the 5th to the 10th century, it is almost lost. Practically the only seats of medical, as well as other sciences, during these disturbed times, were in the monasteries, and altho there was no advancement, the science was saved from total oblivion, and many ancient writings were preserved. The Anglo-Saxon leechdoms of the 11th century, and many similar works which exist in European libraries, illustrate the mixture of magic, superstition, and relics of ancient science, which constituted monastic medicine. It was among the Benedictines that Monastic study first aimed at higher standards, and Cassidorus of the 6th century advocated the study of Hippocrates and Galen.

The school of Salerno, a most important source of medical knowledge during the middle ages, is involved in obscurity. Salerno was a Roman colony with a location noted for salubrity, and was at the end of the 7th century a Benedictine monastery. It the 9th century Salernitan

physicians were referred to, and a little later there are accounts of great and royal persons resorting to Salerno for the restoration of health. This school enjoyed a great reputation until the 12th or 13th century, when the introduction of Arabian medicine became fatal to it, and altho it actually existed until 1811, it was finally dissolved in that year by Napoleon I. It may be said that the Salernitan works were not much above compilations, based on the writings of Hippocrates, Galen and other Greeks, mixed with Methodic doctrines. The principle of treatment was based more on diet than on drugs, altho the art of preparing drugs had reached a high degree of complexity at Salerno.

Translations from the Arabian writers began about the middle of the 11th century, and from that time on Arabian medicine began to be introduced into the western world. Salernitan medicine held its own until the 13th century when it finally gave way to the Arabian, which, as has been pointed out, was their version of Greek medicine.

This coincided with the rise of several universities, the first of which, was the school of Montpellier; this school possessed a medical faculty as early as the 12th century. Besides the school of Montpellier, which became distinguished as one of a practical and empirical spirit, there was Paris which remained dogmatic, and there was also Bologna, and Padua in Italy, the former adhering to the Galenical theories, while the latter became more progressive.

Arabian medicine existed supreme until the period of the revival of learning when the classics began to be taken up and studied in their original language. However, there was no revolution in medicine. It remained dogmatic as it had been thru the middle ages, but when the original works of Hippocrates, and Galen, as well as other Greek writers were brought to light they were found to be far superior to the incorrect compilations and modified versions that had, up to this time, been accepted as standards. These classics tho exerted a germinative influence that started the mind of man away from the former dogmatic theories, and paved the way for the scientific progress that has prevailed up to the present time. Thus started the fight against the Arabian and medieval teachings, but, according to Janus Cornarius, Arabian medicine prevailed until sometime in the 16th century. Galenic medicine then became triumphant.

The first to accept the original Greek classics was probably the schools of Italy, and those of England. France remained dogmatic; while Germany became stirred by the teachings of Paracelsus, who was a radical theorist of this period.

The nature of the two rival systems may be illustrated by the controversy which arose about the rules for bleeding. According to the Arabians, a vein for the operation was selected at a distance from the organ affected; while the Hippocratic and Galenic rule held that the location of the operation should be near the affected organ. Pierre Brissot (1470-1552), a professor in the university of Paris, upon trying to introduce the latter method was expelled from Paris. His attempt was considered a revolt against the authority of the Arabian masters. Following this the Galenic method was prohibited by law. Upon these trifling questions controversies arose which lasted many years, and such personages as the Pope and Emperor became concerned, but, it is thought, to have assisted largely in the eventual downfall of Arabian Medicine.

Paracelsus (1491-1541), who was mentioned above, was a German learned in all the medical science of the day. He exhibited much independence of thought, and personal arrogance, and contended that his shoe-buckles were more learned than Galen and other of the ancients. He cast what he classed as "dogmatic medicine" from him, and founded a dogma of his own. Paracelsus' doctrine, according to German expositors, was based upon the views of the Neoplatonists.

According to their view, the human body was a "microcosm", which corresponded to the "macrocosm", and contained in itself, all parts of visible nature, sun, moon, and stars. To understand the nature of man and how to deal with it, it was necessary to study nature and not anatomy, which Paracelsus utterly rejected. Life was a perpetual process controlled by the indwelling spirit "Archeus", and disease according to Paracelsus, was not natural, but spiritual. Nature was sufficient for the cure in most diseases, art being necessary only when the body became exhausted. It then became desirable to administer such remedies as would be antagonistic, not to the disease in a physical sense, but to the spiritual seed of the disease. These remedies he termed "Arcana", a word which corresponds to the modern term "specific drugs". Paracelsus

was much learned in the science of Chemistry, and introduced many drugs, both metallic, and vegetable. Among the latter was the tincture of Opium, which still retains the name he gave it;—Laudanum. The German historians hold that the revolt of Paracelsus did much to advance the science of medicine, and find in his writings many anticipations of truths of later times. Antimony was first used by Paracelsus, and was used extensively by his followers, but when introduced into France gave rise to bitter controversy, and led to the expulsion of men of rank from the Paris faculty. In England, chemical medicine was first heard of during the reign of Elizabeth, and was in a like manner condemned.

It must not however, be understood from the above that Paracelsus was the founder of Chemical medicine; for from this time it is possible to trace many chemical practitioners, many of whom did not mention Paracelsus in their writings. These chemical practitioners, altho much condemned by the orthodox Galenists, withstood these attacks and eventually, made permanent that portion of medical science.

The period of the revival of learning is responsible for what we now know as modern medicine. Anatomy was revived and given more attention than at any previous time which necessarily led to a much clearer idea of Physiology. Clinical instruction was introduced in the hospitals, and also inspections of the dead were made to ascertain the nature of the fatal disease. Thus was the science of morbid anatomy ushered in.

Medicine in the 17th century continued to advance. New diseases were discovered, and the development of physical and mechanical science introduced new lines of thought with respect to medicine which eventually led to the discovery of the circulation of the blood by William Harvey. (Published in 1628).

Two important schools were established in the 17th century:—The iatro-physical, and the iatro-chemical. The tendency of the former was to explain the actions and functions of the body on physical and mechanical principles. The movements of bones and muscles were referred to the theory of levers, and the processes of nutrition and secretion were shown to be dependent on the tension of vessels. The iatro-chemical school, tho noted for the use of chemical medicines, was also instrumental in introducing a theory of pathology entirely different from the old "humoural" pathology. This was based upon supposed chemical changes in the body including fermentation in the stomach.

Sydenham (1624-1672) was a prominent physician of this period, as was also his associate and defender, John Locke. Sydenham followed Hippocrates closely in some of his views, especially, in regard to the curative powers of nature, but he did not allow his mind to become enslaved to either the classical, or chemical systems, which divided the world at that time. His conception of disease was that it is an effort of nature to restore health by the elimination of morbid matter. He recognized many diseases as what we now call "specific" and not due to the alternation of the "humours" as taught in the old schools. Sydenham laid much stress on the natural processes as shown in disease as well as health, and showed that by studying these processes profitable results could be obtained. Thus, it was he that turned men's minds from all former hypotheses to a more unbiased study of natural processes.

From this time, altho the dogmatic spirit long prevailed, the canonical authority in medicine was at an end.

In the 18th century medicine is notable for the striving after complete theoretical systems. Thru the influence of Sir Isaac Newton the iatro-physical school took on a mathematical aspect. A number of writers undertook to give mechanical and mathematical explanations of fevers, action of poisons, menstruation, and other phenomena concerned with the body functions in disease and health.

Among the most noted of these writers was Mead (1673-1754), who in his "Mechanical Account of Poisons" explained the effect of poisons as acting only on the blood. Later, he changed his theory, taking into consideration what he termed "nervous liquor".

Herman Boerhaave (1668-1738) was a noted professor of medicine at Leiden. He made a special study of microscopical anatomy, and followed Hippocrates and Sydenham closely with regard to natural processes.

Friedrich Hoffman (1668-1738) was a professor in the University of Halle, as was also his rival, Ernest Stall (1660-1734). Hoffman's system and theories were based on a complete theory of the universe. Life depended upon the universal ether which animals breathed in, and which then diffused throughout the body. A portion of it would accumulate in the brain where it would generate the "nervous fluid". Upon this theory did Hoffman explain life, health, and disease.

Stall's system had little or nothing in common with Hoffman's. He worked upon a theory of "Animism". The soul was accountable for all the body functions of man, while other creatures were subject to mechanical laws. Symptoms of disease were explained as attempts of the soul to rid itself from morbid influences.

We now come to two men of special note:—Albrecht von Haller (1708-1777) and Giovanni Morgagni (1682-1771). Haller is noted for his work in physiology. He was the first to define irritation as a property of muscle and distinct from sensibility which is a property of nerve. This gave the basis of the present theory regarding the activity of animals. Morgagni remains prominent to our own time for the work he did in microscopical anatomy, pathology and his descriptions of post-mortem changes.

There follows the names of a number of men who introduced, or tried to introduce, theories, and systems, of their own. Of these theories the one presented and practiced by S. C. F. Hahnemann (1753-1854), is probably of the most interest. His theories gave the basis for Homeopathy. Hahnemann based his medicine entirely on his knowledge of symptoms. He rejected anatomy, and also the curative powers of nature. His theory of disease was a very crude one, and in his treatment he explained that he depended on a law that in order to get rid of a disease it was necessary to administer a remedy that would act as near as possible like the disease, and thus cure by substitution. He also developed the theory of "potentiality":—that is, that drugs gained in strength by being diluted, and he used his drugs in highly diluted forms. Altho this was his conception of the therapy of drugs, nevertheless it may clearly be seen that the survival of his theory, and the strength of his doctrine, depended upon the apparent beneficial results obtained. His cures tho were not positive, but negative, in as much as the apparent results were not due to his therapy, but to the fact that fewer of the sick succumbed to the effect of powerful drugs.

Altho medicine in the 18th century was split into these various systems, it nevertheless, advanced. Anatomical, physiological, and pathological research were assiduously carried on and the accumulation of positive knowledge progressed.

This brings us up to the 19th century, which time, altho strictly speaking is not modern, presents the period thru which the development of medicine far surpasses anything in the past. Many names stand out prominent throughout the 19th century on account of their owner's work in the advancement of medicine. Among these may be mentioned the works of Virchow, Darwin, Bernard, Helmholtz, Pasteur, Koch, Metchnikoff, Ehrlich, Cohnheim etc., all of which are familiar to the student of medicine.

The influence of Darwin, and his "Origin of Species" the discoveries of pathogenic germs; the modern conception of inflammation, natural resistance, hygiene, sanitation, infection, etc., have all had their effect on modern medicine, and have all been instrumental toward giving us a better knowledge of disease, and the way it should be treated.

Summing up all that history has been able to show us as to the development of medicine; considering all the great reformers including Hippocrates, Galen, Paracelsus, Sydenham, Hahnemann, and the rest, and comparing them with what Andrew Taylor Still has given the world in the way of a theory and therapy, surely places him in a class far ahead of the rest. It remained for him to demonstrate that it was not within the power of man to cure disease with drugs, or otherwise, only in so far as he could remove the cause, and assist nature. That the powers of cure were within the body itself, and, the sphere of the physician was not to cure, but to remove the predisposing factors, and assist nature in building up and maintaining body resistance and the cure would follow as a natural process.

Special Work in Dissection at the A. S. O.

Exhibits Being Prepared for A. O. A. Convention at Columbus, O.

This spring there are fourteen tables in the dissection room with fourteen prosectors. Each of the prosectors in addition to their regular work as assistants in the laboratory will be responsible for a special anatomical demonstration which when completed will be taken to Columbus, O., in August to be given at the National Osteopathic Convention there.

In addition to the regular work in the laboratory and the special demonstration, Messrs. Dowell, Edwards, Rausch and Kilman are working on special demonstrations for the A. O. A. Convention. On one subject Dowell and Edwards are demonstrating the nervous system and the arteries. They will also display some special regional dissection. Messrs. Rausch and Kilman on another subject are demonstrating the muscles and organs, together with some regional demonstrations. Mr. Ihde, Mr. Eades, and Mr. Templeton are also working out special dissection of the nerves and vessels of the face, nose and throat. Dr. H. V. Halladay, who has charge of the above mentioned work, has almost completed the dissection of the nervous system of an infant, which will be mounted and displayed whole.

The student prosectors and those doing the special work make a total of 130 working in the laboratory at this time.

Much of the interest displayed in the dissection laboratory is due to the efforts and work of Dr. H. V. Halladay along this line. Dr. Halladay, who has had charge of the laboratory for the past two or three years has made a special study of anatomy and has a practical knowledge of the work. He has made numerous changes in the laboratory since taking charge of the work and devotes his entire time to making the work of interest to the students.

Students

"Exhausting thought, and having wisdom with each studious year."

BOOK TWO

OSTEOBLAST

To the Freshmen

Hail! you jocund jolly freshmen,
 Glad to see you starting in,
 Hope you master every subject;
 If you do, you're bound to win.
 With your over-load of Text-Books,
 Made the book-man glad—I wot,
 Heaps of knowledge 'neath their covers,
 True—but Wisdom—can't be bought.

Mother tied your tie—and kissed you,
 Said, "Be good, my little Pet."
 Hadn't been in town ten minutes
 Till you rolled a cigarette.
 See a shingle in your britches—
 Mightly glad you had a thought,
 Pretty place to put some padding,
 Rest assured we will warm that spot.

Scorned and scoffed by Upper-classmen,
 Sure you're in a comely role,
 Yet you need humiliation
 For your egotistic soul.
 One faint ray of hope I give you,
 (Since "a freshman" means "a dunce")
 All the wise old heads that teach you
 Were lowly freshmen once.

—GEORGE.

Class History, January, '21

It was on a bright and sunny Monday that the Wabash and O. K. Railroads ushered into Kirksville and the A. S. O. the class of January 1921. We all made a desperate effort to be on time for the first class altho our efforts in this direction have since failed.

Prof. Lane looked around for several minutes before he discovered the Freshman class. Our numbers were few but he could tell by our appearance that we were mighty. Dr. Hamilton lavished upon us some good advice about going to everything to which we were invited. The most inviting prospect at this time was a mob of upper classmen who held in their grasp those compact cellulose structures, paddles, for the Freshmen boys. They made a desperate fight thru the crowd—some got thru without being hit, but the last one more than got his share.

The following Friday the illustrious Juniors informed us that we should have green caps by Monday morning. Some took this suggestion seriously while those who did not just missed having their "crops" cut.

The third Friday of school we were awakened out of our dreams by a terrible noise and yelling "Let's Go." When a mob of Juniors roared in our ears it did not take much persuasion to induce us to follow. We ascended the stairs to Memorial Hall and witnessed a fierce and savage scrap between the Juniors and Seniors.

The following week great excitement over the pushball contest began to prevail. Posters were printed and some of our boys spent one night in destroying those the Juniors had posted. The long looked-for day finally dawned and most of the classmen had a vague expectation that classes would be broken up so remained at home quietly slumbering thru it all.

The parade for the contest took place in the Square and both classes were there to support their men. The Junior girls wore green and gold caps and pennants, while the Freshmen girls piled in a jitney arrayed in carmine and gray. After reaching Still Field the excitement reached a climax and yells and cheers filled the air. We lost with a score of 3-0, but, nevertheless, felt proud of the fight our men put up.

Saturday evening, after the contest all grievances and sorrows were forgotten when we met at the Junior-Freshmen reception. Dr. Chas. Still welcomed us into the ranks of Osteopathy and we were glad we were here for four years.

Our class is comparatively small in numbers, but we hope to go down in history as the class which was small but mighty.

Class History of 1920

On September 11, 1916, dawned a mile-stone day for the American School of Osteopathy, a most momentous day, for it introduced to the world the first four year class to enter the A. S. O. The outlook was not overwhelming. A very small company of Freshmen assembled to get first instructions and run the gauntlet of curious eyes and vigorously wielded paddles. Since that day, even to the present time, our class has grown little by little until now it has reached a very fair size.

As a whole, we don't lay any particular claim to individual size and brawn. Came the pushball contest at last, when the weight we didn't have meant so much; and they wouldn't let our football men join in the up-roar! Otherwise this tale might have been very different. They substituted a cane for the pushball and the cane was almost instantly broken. Then they substituted a football for a cane—and our football artists were not there! Oh well, who cares if we did lose the rush? Our girls got the drum, anyway, and, moreover, the pirate flag of the Juniors CAME DOWN. Brains accomplish more than brawn every time. Incidental to class hostilities there was some misunderstanding over the matter of Freshman caps, posters, etc., and from the ranks of the Junior class appeared a band of tonsorial artists who wanted to get their practice in early. We wish them continued success. The thing which seemed to perturb them most was the fact that our men had the originality and nerve to paste the posters in broad daylight,— a thing which had never been done before.

After all this, just to show us that they didn't mean it, the Juniors gave us a most clever and enjoyable entertainment and dance one evening. A little later the class held a picnic and dance at the lake. Late in November, Mrs. Moore entertained the women of the class in a most delightful way. This is the whole of our social calendar. You see, we believe in devoting most of our time to study instead of play and we are planning to turn out an unusually large number of A Plus students. We've got to if we keep up to our record of football players; and you know we are going to play a very large part in making a football team which will put the famous 1902 team completely in the shade.

The consciousness of what great things the future will demand of us is reacting on the class mightily, giving to all its members sedateness and dignity worthy of a P. G. Why, Dr. Gerdine thought we were Seniors and never realized the difference until Dr. Halladay interrupted his lecture to explain the true state of affairs.

Out of all this school life we are getting the true spirit of Osteopathy. The Old Doctor must like us because he voluntarily gave us a talk the day he had his picture taken with us. And I think anyone who has ever attended one of our brilliant anatomy quizzes or, better yet, one of our gloriously harmonious class meetings will unreservedly endorse this sentiment regarding us: There isn't a class like us in school.

L. E. S.

Laudamus

What need to praise our class abroad,
As class Historians do?
What need to laud our valiant acts?
We have achieved, and facts are facts,
And all we said could never make
The past a bit more true.
Our splendid work, our worthy deeds,
Are all the praises '20 needs.

Rather we sing the praise of him
Whose work has brought us here.
The man who risked his life, his name,
To help man-kind—no thought of fame—
He bids us worthily advance
The work he holds most dear.
Give praise where 'tis supremely due.
Dear Daddy Still, all goes to You.

Class History, January, 1919

*Here's to dear old daddy Still,
Who founded a science without use of a pill,
In whose footsteps we follow and strive to be
Proficient in the study of Osteopathy.*

From the North, South, East and West, perfectly eligible prospective doctors came straggling in, all intent upon the same mission, to master the science of Osteopathy.

Within a few days the officers were elected, and we, the last three-year class, settled down to the general routine of our studies; regardless of the many interruptions caused by the upper classmen. They imposed the terrible affliction of "paddling" upon our boys, and broke up school with their untiring yells of "Let's Go."

A "Get-acquainted" party was our first gathering, held the 17th of February. Here we discovered that our associates for the next three years, were all jolly good sports, as well as of intellectual inclinations.

The day of the pushball contest was one never to be forgotten, damp and cold, but nevertheless the entire class was full of "pep" for the game. The Juniors out-matched our boys in both weight and size, and with little effort, defeated us with a score of four to nothing. That night a general celebration was enjoyed by all classes when they rushed the town. Theatres, restaurants and drug stores all adapted themselves to circumstances in a wonderfully co-operative manner.

February 26th, the Juniors tendered us an enjoyable reception at Heinzman-Swigert Hall.

We had the best time during our first semester on a class picnic at Ownbey's Lake, members of the class, their families and friends being present. Sports of all kinds were indulged in and the very best of "eats" disappeared.

The remainder of the term was devoted to hard work, preparatory to examinations.

On September 13, our second term of school opened with the usual vim and readiness for work. Our roll was somewhat diminished, twelve members having dropped out, some on account of sickness, others to resume the study of the science later, and others for various reasons. Six new members from other schools helped to fill the vacancies. New officers were elected with George A. Bridges, President; J. R. Bancroft, Vice-President; F. S. Boals, Treasurer; Beth E. Pettit, Secretary.

On October 25, we enjoyed a class social at Heinzman-Swigert Hall. An interesting program was given by talent in the class. Refreshments and dancing followed.

Our class, although one of the smallest in the school, is well represented in all athletic activities; football, baseball and basketball. We also claim the distinction of being the "best class in school," having been conferred this degree by a member of the faculty.

H. C. B.

To the Juniors

One higher step in the Realm of Reason.
 Another stride toward the Door of Thought.
 The same old Classmates, yet another season
 With joyous days of Freshmanhood forgot.
 The bright and hopeful days that lie before you;
 The satisfaction of the days behind,
 O! Fate and Chance I humbly implore you
 Unto this Junior class, be kind—be kind.

The Stern, relentless Hand of Time has taught you
 That every hour has a priceless worth,
 And every idle moment too has brought you
 No nearer to the nobler things of Earth.
 That wisdom can be neither bought nor stolen,
 That every thing worth having must be earned,
 That true success is not what wealth you roll in,
 But satisfaction of Life's lesson learned.

—GEORGE.

June Eighteen

'Most every college now and then
Has trouble, friends, I ween,
By taking in just such a bunch
As our class, June, Eighteen.

The Freshmen get a taste of hose
Besides their caps of green;
The cane rush makes the classes foes,
Whatever it may mean.

We plant a flag in solid rock
And guard it with great care;
High up in amphitheater
Our brilliant colors glare.

We never do much breaking school,
The Faculty does this;
The Freshmen finish up the job
When their instructors miss.

Doc Warner calls us down a bit,
And drapes his graceful "figger"
In poses startling and unique,
Then swings his feet with vigor.

He twists his spine to right and left,
And never has a lesion;
Then calls the roll with diligence,
Like Postum,—“There's a Reason.”

Gerdine puts us to mental tests,
“In general,” “you might say,”
But has to “catch an early train,”
And leaves us acting gay.

Professor Lane benignly smiles,
When we are in North Hall.
He gives free talks on Sunday School
And kindred subjects all.

S. S. Still just shakes his head,
When Juniors pay a call;
And wishes he were in Des Moines,
Or some place just as small.

Dear Pee Wee cried his eyes 'most out.
When we left him for good,
And we felt equally as bad,
As he well understood.

EDWIN B. ADAMS Springfield, Ohio
Ohio Northern Univ.

“In friendship we find nothing false or insincere; everything is straightforward and springs from the heart.”

“Babe” is one of our star athletes, of whom we are justly proud; nor do his studies suffer thereby. He is an able student and “Wag’s” right hand man. He has served in football, baseball and on the Board of Control. Baseball Capt. '17 and Mgr. '18.

T. WAYNE AMMERMAN Atlantic City, N. J.
Iota Tau Sigma

“I'm sure care's an enemy to life.”

“Old Doc” is perhaps the most punctual of all in class attendance. Has served on the Board of Control. He is already getting used to a Ford, so that he may use it in his future practice.

J. K. ANDERSON Bronson, Mich.
Hillsdale College
Western State Normal School
Alpha Tau Sigma

“There is no substitute for thoro-going, ardent and sincere earnestness.”

“Jake” is an ambitious pedagogue from “Mich.” As can be seen, he talks little and thinks much. If he keeps up his enthusiasm for Osteopathy, Michigan will have another good osteopath about June, 1918.

PRENTISS A. ANDERSON Clarkston, Wash.
Lewiston State Normal
Atlas Club

“He was a scholar and a ripe good one.”

A tripper of the light fantastic. Has assisted in Biology. Between times he puts on an act entitled, “P. A., The Boy Bandit.”

THOS. E. ASHTON Upper Sandusky, Ohio

*"His air, his manner, all who saw admired.
Courteous, tho' coy, and gentle, tho' retired."*

Ashton is always on the front row. From what we can learn, he intends to be a surgeon; and he surely does cut up—a cadaver.

REX G. ATEN Houston, Tex.

Rice Institute
Theta Psi

"Since we cannot get what we like, let us like what we get."

Outside of bragging about his state, "Tex" has no bad faults. He was our class President in 1916, and has served in baseball and basketball.

MRS. M. HARRISON BARTON Evanston, Ill.
Graduate Nurse

"Age cannot wither her, nor custom stale her infinite variety."

"Aunt Henrietta" is a true sport and has a heart of youth and gold. She is a prime favorite of our athletes and impartially wears all their favors.

W. HILLARY BAKER Owensboro, Ky.
Kentucky Wesleyan College
Atlas Club

"Diligence is the mother of good luck."

"Jake" is little of stature but big of heart, a hard worker and capable student. He comes from the Blue Grass State and is a reliable judge of fast horses and good-looking women.

BENJ. D. BAIRD Jerseyville, Ill.

*"A cheerful heart and smiling face,
Pour sunshine in the darkest place."*

"Benny" likes to make a noise; his favorite pastime is stamping his feet to remind the bell when to ring. If really hard up for something to do, he studies diligently (but Kirksville is a fairly big place, you know).

WILLIAM E. BETTS Summit, N. J.
Atlas Club

*"Cultivate not only the cornfields of thy mind,
but the pleasure grounds also."*

"Bill" plays in the band and has assisted in Histology. He was a fairly well-behaved lad until he met a certain blonde lady from Miss. Hard luck, Bill!—but why be a recluse?

A. F. BERKSTRESSER Ft. Scott, Kans.

"I do know of these, that therefore only are reputed wise for saying nothing."

"A. F." is very quiet, but if you notice, you will always find him present and intent upon his business. There is no detail that is not worthy of his attention, if it deals with osteopathy.

GLENN E. BIGSBY, Kirksville, Mo.

"The secret of success is constancy to purpose."

Don't think Glenn has crossed the divide because of the absence of his picture. He positively refused. He has made quite a student of himself by frequent application to the front row.

CLARA L. BEALAFELD Verona, Pa.
Pittsburg Academy

"Remember that, if you expect to be a successful woman, you must always show your feelings, and hide your opinions."

Clara failed to appreciate Kirksville at first, but has decided that the A. S. O. is not so bad. She has a partiality for front seats, athletic boys, and the Pennsylvania Dutch.

ANNE BREKKE Nielsville, Minn.
Crookston College
Moorehead Normal School
Stillonian Club

"It is not enough to speak, but to speak true."

"Brekke" brought the spirit of the western plains into her school work, and her many friends will testify to her frankness, sincerity and loyalty. She devotes her time solely to Osteopathy.

C. H. BRUNSON Lawrenceville, Ill.
Atlas Club

*"I dare do all that may become a man,
Who dares do more is none."*

"Bruns" is one of our most conscientious students, never missing a lecture. We often wonder what Vincennes has that interests him so much,—but anyway, if it interests him, it must be all right.

DALTON MEAD BURNETT Underhill, Vt.
Wesleyan Univ.
Beta Theta Pi
Atlas Club

"A friend to me is one to whom you never need to explain things."

A perfect gentleman and a good student, who has never entered into an argument during his entire school days. He is extremely gentle in the presence of the ladies.

BERNARD D. BOATRIGHT Cordele, Ga.
Alabama Polytechnic Institute
B. S. E. E.
Chi Delta

"Do the best you know, that you may know better."

"Boaty" is the man around town. "Let's have another one, fellows, for I'm the Canadian Club Kid." He comes from the Sunny South, where they have aluminum roads and lamp posts set with rubies.

JAS. A. BOWMAN Roanoke, Va.
Atlas Club

"Nothing ever comes to one that is worth having, except as the result of hard work."

"Little Bow" is one of Dr. Lane's "highbrows". He's a cheerful soul, and radiates intelligence and good nature. He is always on tap for work, but hikes for the station at vacation time.

LUELLA BRINK Pittsfield, Ill.
Central Wesleyan College, B. A. 1913
Delta Omega

"Has the happy faculty of doing things well."

She is one of the many girls in the June 1918 class who dotes on dissection and has braved it a second time. Her class work is of high grade. A girl who wears well.

AMY M. BUDD Middletown, N. Y.
Stillonian Club

"Serene, I fold my hands and wait."

Being an only child, she is so badly spoiled that she won't have a roommate; therefore, we are unable to ascertain whether or not she really has any faults.

ALMA M. BREEDEN Charleston, Ill.
Delta Omega

*"Men, dying, make their wills, but wives
escape a work so sad,
Why should they make what all their
lives the gentle dames have had?"*

Mrs. Breeden has assisted in Biology. She is here for work, regular and otherwise. She has the highest "batting average" in special classes, her closest competitor having given up the race.

L. C. BREEDEN Charleston, Ill.

*"For who did ever yet, by honour, wealth or
pleasure of the sense, contentment find."*

"L. C." doesn't find it so difficult to keep up with his classes, but "keeping up with Alma" is a different proposition. He is quiet and attentive and will make a success of whatever he undertakes.

R. P. CUNNINGHAM Bloomington, Ill.

"It is not good that man should be alone."

With the exception of a few trips to Novinger, Russell is a model young man. Since he married, you hardly ever find him at the Owl, and he says, "This is the life."

I. I. CHAMBERLIN Oberlin, Ohio
Whitworth College
Oberlin College
Stillonian Club

"How far can I praise him."

Leaving the field of successful practice, Chamberlin came to us to equip himself for a greater work, which is not hampered by limitations. He has assisted in Histology.

GENA CREWS Danville, Va.
Roanoke College
Univ. of Virginia

*"Men may come and men may go, but I go on
forever."*

WANTED—by a young lady—a domestically inclined man who needs constant care. Attracting qualifications:—A1 cook (extravagance unlimited), delightful southern brogue (mixed with Yankee and Irish), and a musical laugh easily reaching high G.

WM. H. CARR Princeton, W. Va.
Concord State Normal School
Atlas Club

*"They love the least that let men know their
love."*

"Sister" Carr is a perfect lady—but the ladies like it,—and he is a perfect gentleman as well. He sings in the Glee Club and sits in the heavy-weight row in class.

J. BRAYTON CAHILL Cleveland, Ohio
Atlas Club

"I cannot hide what I am."

The Cleveland lad behind the red bush—he of the loud socks and passionate neckties, who sits among the "heavies" in Lane's class, goes hunting, burns shoes and "rescues" dogs.

W. C. CHAPPELL Buffalo, N. Y.

"I am monarch of all I survey."

"Chap" has the correct mental attitude all right, and is bound to make a successful osteopath, because he will never give up until he does. He is not so strong on society, but is "right there" for athletics.

ROY L. CALDWELL Knobnoster, Mo.
Warrensburg State Normal
Phi Sigma Gamma

"On their own merits, modest men are dumb."

However quiet in the classroom, Roy is popular and sociable among the fellows. He is one of our best athletes, having served in baseball and as baseball manager of June '18.

ROLLA H. COWGER Minneapolis, Kans.
Alpha Tau Sigma

"Once you are married, there is nothing left for you—not even suicide—but to be good."

"Khaki" is another Kansas product and a mighty good one, who tends to his business and leaves others' alone. He is handy at scraping chins and holds down the tenor end of the band.

A. E. CHARBONNEAU Concordia, Kans.
Holy Cross College (grad.)
(St. Cesaire, P. I.)

"He enjoys an existence untroubled by envy or strife."

"Charby" distinguishes himself in the dissection room—it's funny how he could get away with two buckets, isn't it? A quiet, straightforward student he is, with a sense of humor.

CECIL S. COMPTON Newton, Ia.
Normal School of Physical Education,
Battle Creek, Mich.
Alpha Tau Sigma

"Instruction ends with the schoolroom, but education only with life."

After tiring of school teaching and physical culture, "Comp" decided to become an osteopath. He does not believe in worrying about the future and we think that he has no cause to do so.

RAYMOND F. CLARK Syracuse N. Y.
Syracuse Univ.
Phi Delta Gamma

"My kingdom for a horse"

"Pewee" is quiet and unobtrusive. He has served in baseball. He is reputed to be quite a fusser, particularly in the city of Millard; and what about those St. Louis trips, "Pewee"?

CHARLOTTE L. CLAYPOOLE Columbus, O.
B. Ph. Ohio State Univ.
Univ. of Grenoble, France
Kappa Kappa Gamma
Axis Club

"They are never alone that are accompanied by noble thoughts."

An appreciative sense of humor lies behind that quiet smile of hers. With her previous study and travels to give her a broader foundation, we hardly need to wish her success as a D. O.

BONNIE ZOE COLE Sidney, O.
O. W. N. Conservatory of music
Stillonian Club

"God helps them that help themselves."

She frankly admits that diagnosis and treatment are fascinating subjects. Her friends, through chilled experience, agree that she is practicing hydrotherapy without laying on hands; yet stimulation is invariably effected by her ingenious method.

PAUL J. DODGE Malden, Mass.
Andover Acad.
Wilbraham Acad.
New England College of Languages.
Atlas Club

"I can study my books at any time for they are always disengaged."

"Sweet and low"—his stature is low, but his tenor voice is sweet. His technique and self-confidence are already well developed; why, even now he has a waiting list.

JOE H. DANGLER Goshen, Ind.
Iota Tau Sigma

"He knew what's what, and that's as high as metaphysic wit can fly."

"Joe" was one of our wildest animals until he returned from Indiana Christmas time. Since then he has cut out all of his bad habits and started to organize the Better Brothers Bible Class.

ROY C. DUNSETH Peoria, Ill.
Bradley Polytechnic Institute
Illinois Univ.
Atlas Club

"I awoke one morning and found myself famous."

You want to ask this member of the firm of Dunseth and Anderson where to find free board in Kirksville. Roy can sure elucidate, if induced to talk. He is a Biology assistant.

PAUL DEEMING Brookfield, Mo.
Phi Sigma Gamma

*"Sage he stood,
With Atlantean shoulders, fit to bear the
weight of mightiest monarchies."*

Paul is the very essence of good-humor. Has served in football and baseball. Now and then in class he'll answer, "I don't know, Doctor," more impressive than any explanation.

JAMES EADES Roanoke, Va.
National Business College
Atlas Club

"Vaulting ambition overleaps itself."

This gentleman, Dr. Lane tells us, is a "highbrow." His idea of a good time is a midnight lunch. He has been class President, and is Vice-President of the Kirksville Auxiliary.

WM. S. EALY Sycamore, Pa.
Waynesburg College
Phi Sigma
Atlas Club

*"In every nook, both great and small,
It is industry that supports us all."*

Ealy has assisted in Chemistry. His motto is, "Don't be too hasty, but get there." He attends strictly to his own business and his good traits are more conspicuous than his faults.

A. P. EDWARDS Winterset, Ia.
Acacia Club

"The greatest of mankind is man."

"A. P. E." cuts up all sorts of "monkey-shines", but is, nevertheless, a diligent student and has assisted in Histology. He is renowned for his power of extracting money from the unsuspecting public.

JOHN M. EDMUND Grand Island, Nebr.
Grand Island College
Nebraska State Univ.
Theta Psi

"I am the very pink of courtesy."

John M. is a real asset to the class. He was class Vice-President, has a scholarship in Biology and has assisted in Histology. He played guard three years on the state championship football team.

NELLIE FITCH Prairie City, Ill.
Macomb, Ill., State Normal School
Axis Club

*"Still in thy right hand carry gentle peace, to
silence envious tongues."*

She pours oil on troubled waters wherever she goes and hides her own troubles behind a smile. Ask her how it feels to get \$2.00 for a treatment, and what she did with it.

J. E. FREELAND Effingham, Kans.
"Had it ever occurred to you that this world is not made up of snaps?"

This is another Sunflower, who turned his face toward ours one morning in September, 1915. Did you ever notice his watch chain? Every link was contributed by a fair damsel,—Nuf sed!

ANNABELLE E. L. FLINT Lenox, Mass.
Axis Club
"Pleasure and action make the hours seem short."

One of our younger students, but she has already learned to handle men with gloves until she has become well acquainted with them—when it comes to dissection.

J. E. GUMBERT Verona, Pa.
Atlas Club
"I am not lean enough to be thought a good student."

—but that is where "Gummy" fools you, for his standard of scholarship certainly ranks high. He is a Keystone in athletics, has served in baseball, football and on the Board of Control.

J. R. GORSLINE Aledo, Ill.
Alpha Tau Sigma
"The man who wins is the man who works, Who neither labor nor trouble shirks."

"Mother" is famous for his oratorical ability, but he never displays it. His attention is equally divided between osteopathy and football—and he is a star in each.

MRS. LAURA A. GUILBERT Concordia, Kans.
"With common sense and some uncommon too, She smiles and conquers all the tasks of life."

Mrs. Guilbert is an ideal representative of her home state, sunny in disposition, with a keen sense of humor and a sympathetic insight into the needs of others.

SAMUEL C. GUILBERT Concordia, Kans.
Atlas Club
"For I profess not talking; only this— Let each man do his best."

"Sammy" has served in football and indulges in other athletics. He has lots of the right kind of "pep" and applies it as thoroughly to studies as he does to recreation.

JESSIE L. HASKINS Granville, N. Y.
Middlebury College, A. B.
N. Y. State Teacher's College
Sigma Kappa Alpha Kappa Delta
Axis Club
"Gentle thou art, and therefore to be won."

Jessie is quiet and sticks closely to her work, but is not "agin" a reasonable amount of the frivolous life. She is an optimist and is the "Funny" girl on the Osteoblast staff.

A. M. HACKLEMAN Indianapolis, Ind.
Ewing College
Atlas Club
"Each mountain is a challenge to climb."

The doctor is one who practices what he preaches and makes the sincerity of his character felt. If earnest work and professional appearance count for success, then his is assured.

E. MARTHA HAWKINS Mt. Vernon, Ill.
Southern Ill. Normal Univ.
Axis Club

"And she would talk, ye gods, how she would talk."

Martha is a sure-enough live wire and a certain cure for the blues. She always has to rush to school—but she gets there just the same. Nothing escapes her observation.

RALPH W. HOWES, Ord, Nebr.
Acacia Club

*"He is complete in feature and in mind
With all good grace to grace a gentleman."*

Ralph has a scholarship in Histology. He is not conspicuous as a "rough neck", but does appear in the limelight when called on for information. He has an attractive wife to keep him good-natured.

H. P. HOPKINS Perry, Mo.
Atlas Club

"Jesters do oft prove prophets."

"Pete" works on the theory that care's an enemy to life, and consequently, he is in a continual state of good humor. He enjoys everything as it comes, be it work or play—or noise.

W. GALE HAWKINS Kirksville, Mo.

"His worth is warrant for his welcome hither."

Gale has, at times, a noisy disposition; he likes to push over seats in North Hall and, by way of variety, to go out on the porch and pull away at his double-action pipe.

CARWIN H. HANCOCK Dallas, Tex.
Atlas Club

"For a light heart lives long."

When Pete arrived, he surely was wild and had everything but the six-shooter to be a finished product, but will now stand without hitching. He is the A. S. O. Cheer Leader.

GILBERT E. HOLT Payette, Ida.
Atlas Club

"His worth is warrant for his welcome hither."

Our trombone artist, besides being a first rate man with the "Janes", can really accomplish something on that old slip horn of his. He is in the band and has been our class treasurer.

FRANCIS P. HORAN Portland Ore.
Theta Psi

"He makes a July's day short as December."

"Pat" has assisted in Chemistry. He is one of the most dependable men in class. We all have ideas as to true comfort—"Pat" would say it was Southern comfort. Good luck, "Pat", old top!

CARL R. IBACH Preston, Minn.
Atlas Club

"I would rather go to Moberly than most any place I know."

"Eb's" long suit is buying books; his favorite expression, "Now, listen." He likes the middle of Jefferson St. on certain summer nights. His avocation (or vocation) is scrubbing the Tri Sigma porch, or "taking trips."

CLIFFORD J. IHDE Pierson, Ia.
Morningside College
Phi Delta Gamma

"He hath an excellent good name."

"Cliff" is a hard-headed and good-natured lad. He is sure enthusiastic about osteopathy and his dissection manual demonstrates his general ability.

MRS. ELIZABETH JOHNSTON Trenton, Tenn.
Delta Omega

"It is not enough to speak, but to speak true."

The "eternal question mark" is a serious-minded and devout upholder of osteopathy; and her inquiries are always instructive. "Dr." Johnston's only worry is lest the M. D.'s steal our osteopathic fire.

OMAR L. JORDAN Plainfield, Ind.
Indiana Univ.
Iota Tau Sigma

"He hath a daily beauty in his life."

"Jerry" plays in the band. He has specialized in scientific and modern treatment of good-looking girls. Needless to say he has some practice, but does not allow it to interfere seriously with his work.

C. O. JAYNE Washburn, Mo.
Missouri Institution for the Blind
Stillonian Club

"Genius is the ability to do hard work."

With mind alert and ear attentive, he never fails a lecture. He takes in the facts and stores them away in his memory cells. He therefore need have no fear of test or quiz.

ALTA JAYNE Washburn, Mo.

"The hand that made you fair, hath made you good."

Alta does not look like a rugged mountaineer, but she is from the Ozarks, and is getting "a-holt" of osteopathy. Her memory is of the indelible variety, which seems to be a family trait.

J. LELAND JONES Tucson, Ariz.
College of Puget Sound, (Tacoma, Wash.)

"The unknown are better than the ill-known."

Leland has the honor of being the proud father of our first class baby. He gave up ministering to men's souls to care for their bodies and seems content with the change.

J. EARL JONES Parsons, Kans.
Iowa State Agricultural School
Acacia Club

"My man's as true as steel."

Earl has served as Histology assistant, class president, treasurer of the Osteoblast, and on the Board of Control, and served in all with credit. He believes it a fine plan "to laugh and grow fat."

PAUL K. JONES Mountain Grove, Mo.
Univ. of Missouri
Theta Psi

"To be merry becomes you best."

"P. K." is a member of the Glee Club. He has some funny stories about "frogs two feet long" and "barefoot niggers playing football";—another as good, Keller, and the hat is yours.

EDWARD P. KANE Toledo, O.
St. Johns College
Toledo University
Atlas Club

"Thou hast metal enough in thee to kill care."

"Eddie's" characteristics are a permanent smile and an Irish wit. It'll be all right, Eddie, if you don't try that parlor trick of the molten lead and the paraffin mold.

ROBERT M. KING Sidney, O.
Iota Tau Sigma

"Take a fellow of plain and uncoined constancy, for he perforce must do thee right."

"Heavy" is the only living "embryo-osteopath" who doesn't deny having lived in the state of Ohio. He attends class quite regularly. At one time, King took quite an interest in "naps."

JAS. R. KIDWELL Jackson, Miss.
Millsaps College
Southern Dental College
Theta Psi

"Speak freely what you think."

"Jim" has assisted in Bacteriology. If he can't cure his patients, he'll talk them out of their ailments, for the best thing Jim does is talk—and ask questions. Go to it, "Jim."

JOHN KECKLER Hagerstown, Md.
Chi Delta

"All angels have red hair."

"Keck" is class historian. He's some book salesman. His favorite song is "There's a girl in the heart of Maryland;" even though he is not a Caruso, he can get the sentiment out of it.

MARTHA J. KNAPP Frankfort, Ind.
Axis Club

*"A cheerful girl with a winning smile,
A willing worker all the while."*

Cupid played an early part in Martha's career, and he is still busy. Being rather small and frail, she has decided on a tall, muscular assistant to handle her heavy patients.

GEO. H. KRAUSS Jersey City, N. J.
Theta Psi

"I know the gentleman to be of worth and worthy estimation."

George's environment and circumstances in N. J. have taught him to evade mosquitoes and "duck the cops". Such training will be of great value to him during his "starvation period" in practice.

BENEDICTA LEWIS Lake Preston, S. Dak.
A. B. Yankton College
Delta Omega

"We do ourselves the most good doing something for others."

We wish more of our number had the unusual ability that Miss Lewis has. She, too, was a school teacher until she saw a wider field of service in relieving human ills.

E. V. LANGE Pratt, Kans.
Baker University

"Shut up in measureless content."

Lange is recognized as being a model husband—though he seems a bit large for a model. You can pick him out by his sideburns and moustache. He is among those "also there" at every lecture.

KATHARINE F. LAWRENCE Cambridge, Mass.
A. B. Smith College
Radcliffe College
Axis Club

"She that riseth late must trot all day and scarce overtake her business at night."

Very interested in athletics, especially basketball; yet an active worker, having the following to her credit,—class secretary, Osteoblast staff, Associate Editor Neuron, Secretary Kirksville Auxiliary. Only one with Katharine's level head could handle all she does.

BERTHA M. LISTER Lyons, Ia.
Rockford Training School for Nurses
Axis Club

"The most certain sign of wisdom is a continued cheerfulness."

Bertha is one of our all-around students, and the standard of the class is higher because she is in it,—even if she isn't a seventh daughter (ask her what that means).

BERTRAM R. LEER South Bend, Ind.
Univ. of Michigan
Phi Sigma Gamma

"Count that day lost whose low-descending sun Views from thy hand no worthy action done."

"Grandpa" discusses philosophy and religion and is reputed to be the cause of his frat brothers indulging in "Prayer meetings." When vacations come, and we see him leave on the first train,—we wonder?

N. P. MCKAY Russiaville, Ind.
Indianapolis College of Pharmacy
Alpha Tau Sigma

"The good I stand on is my truth and honesty."

"Mac" is a great fusser and is fond of dancing, especially with tall dames. He is a good student, although he invariably gets "fussed" when called upon; cheer up, Mac, that blush is becoming!

JOHN R. MILLER Fredonia, N. Y.
Acacia Club

"Would you praise Caesar, say 'Caesar'—go no further."

"I have done more for the good of this class than any other member. I have discovered that empty heads can be kept from aching by hard study." J. R. has assisted in Histology, and was Associate Editor of the Neuron.

M. EARL MOATS Missouri Valley, Ia.
Agricultural College, Lincoln, Nebr.

*"He used to deal with shoats,
But now he's busy as can be
Studying Osteopathy."*

Earl is a good worker. Between classes he surely does enjoy having a wrestling match. Just look at the end of the heavy-weight row and you'll see his blonde head any school day.

HAROLD L. MILLER Alma, Mich.

"In faith, he is a worthy gentleman, exceedingly well read."

"H. L." is one of our three "millers" and bears out their reputation of being intellectual "highbrows." This year he has been more jovial than usual; cause,—a baby boy.

G. A. W. MCCALL Waukomis, Okla.

"I know the gentleman to be of worth and worthy estimation."

Here's a man that sticks to work and duty at all times. Those who have worked with him unconsciously feel the enjoyment that he gets out of it, and are inspired thereby.

CHRISTIE MACKENZIE Ploto, Minn.
Axis Club

"A happy man or woman is a better thing to find than a five pound note."

"Mack" is equally popular with boys and girls and willingly aids both during the trials of a quiz. She is an A-1 student.

FREDERICK W. MUMMA Dayton, O.
Atlas Club

"To thine own self be true, and thou cannot then be false to any man."

Frederick is too tall ever to have been a cigarette fiend and he is too quiet to belong among our "rough-necks." He has never been known to fall down in a quiz.

ROY N. MILLER Steelton, Pa.
Elon College, N. C.
Atlas Club

"The early bird gets the worm."

"R. N." is a chesty man from Pennsylvania, for five years physical director in college. He is a splendid student. Incidentally, he will never be shot at sunrise,—he gets up too early.

MRS. LUTIE B. MOSLEY Carthage, Ill.

"She bore a mind that envy could not but call fair."

Mrs. Mosley is the kind of student that we are proud to claim in June '18. She is serious-minded and reserved, but her appreciation of the humorous is not stunted for a' that,—and her smile is infectious.

MINNIE E. MAURER Canton, Ohio.
Delta Omega

*"She that was ever fair and never proud,
Had tongue at will and yet was never loud."*

You may be sure that her technique will be just right before she gives any treatments, and that her dignity will be a valuable aid to her in the field.

JOHN T. MEARNS New York, N. Y.
Theta Psi

"He is no less than what we say he is."

"Lefty" came to us from the most elite part of the "cultured yeast", the official hub of the Universe. He represents six foot odd of sociability, good humor and scholarship. He has served in basketball.

GEO. A. MERCER Savannah, Ga.
Woodbury Forest, Georgia Tech.
Kappa Alpha
Theta Psi

"Thy greatest help is quiet, gentle Bess."

"Joe" came to us with grim determination to master the most modern science and to fulfill the obligations of a dutiful husband. What he lacks in stature, he makes up in quality.

C. E. MORELL Kirksville, Mo.
Baker Univ., Kans.

"Greater men have lived, but greater photographers never."

"Snapshot Bill" and his camera are familiar objects around school. But for him, most of our kodak albums would not have been. He is a personal friend of "Daddy" and a loyal osteopath.

MRS. M. GRAY NEWBURN Hastings, Nebr.
Nebraska State Univ.
Stillonian Club

"Albeit unused to the melting mood."

She left the ranks of suffrage to join those of osteopathy. From the firmness of her mind, we know that it is only because osteopathy appealed the stronger that she is with us.

GEORGE C. NEAL Cleveland, Ohio.
Tri-State Univ.
Sandusky Business College
Alpha Tau Sigma

"He was a gentleman on whom I built an absolute trust."

George has been class vice-president, on the Board of Control and class parliamentarian and is business manager of the year book. He is strong on personal appearance and fussing.

BESSIE NUDD LaHarpe, Ill.
Old Normal, Normal, Ill.

"A fair, sweet girl, with rich brown hair."

The midnight oil she often burns,
As perfect lessons thus she learns.
All human ills will have to flee,
For a wondrous doctor she will be.
Competent, helpful, never blue,
Her virtues are many, her faults are few.

ETHEL H. NORRIS Eastbourne, Eng.

"Sir, as I have a soul, she is an angel."

Miss Norris has brought to our school the finest type of student and Englishwoman. She always sees the best in everybody and everything. She is an accomplished artist, but too modest to admit it.

LAVINA E. OLNEY Ottumwa, Ia.
Christian College
Parsons College

*"All the treasure that I find
Is to maintain a quiet mind."*

LaVina inherited her professional bent from her mother, who is one of the best osteopaths in southern Iowa. Next to her work, LaVina enjoys a good time as much as any of us.

VINCENT A. O'ROURKE Concordia, Kans.
Chi Delta

"Any color, just so it is green."

"Gus" has the name of being a fine dancer, and has even received the title of "Dancing Professor." Of an afternoon, you'll find him assisting in Bacteriology lab., helping to enlighten the Freshmen.

FLORENCE W. OWENS Richmond, Va.
Axis Club

"Life is not so short but that there is always time for courtesy."

Florence has improved this year—she no longer eats her breakfast during the first period. There is only one city worthy of her future services—ask her what it is.

HARVEY J. PIERCE Dayton, Ohio
Univ. of Illinois
Phi Sigma Gamma

"Love me, love my dog."

Harvey stays in the summertime to take dissection and manage "The Shack", playing the Normal School as a sideline. He is going to conquer Osteopathy too.

MRS. MARGARET PIERCE
Jennings Seminary
Springfield, Ill.

*"I have no other but a woman's reason,
I think so because I think so."*

Mrs. Pierce is one of the busy women in our class, dividing her time between homemaking and Osteopathy. She manages both well and has time for social activities besides.

MRS. LEAH PURKITT
Paris, Tex.

"Virtue is like a rich stone—best plain set."

Not many know her intimately, but these favored few report that she is an interesting and entertaining talker. She has a delightful southern accent, and can tell stories superbly.

JOSEPH POCOCK
St. Michael's College
Chi Delta
Toronto, Can.

"She is miles and miles away."

"Joe" has served in football and baseball. He sure likes to make those trips that go through St. Louis. He is a fusser—which is natural in a "good looker"—and is a student to boot.

SELMA QUADE
Milwaukee State Normal
Axis Club
Waterloo, Wis.

"A good laugh is sunshine in the house."

"Sally" is some proud of the home town, where she claims they make everything from Corn Flakes to earthquakes. She says she's not yet won over to being called "Quaid" (see "Waggoner's pronouncing Dictionary").

HAROLD E. REUBER
Alpha Tau Sigma
Preston, Minn.

"Thy modesty's a candle to thy merits."

If the convolutions in "Rube's" brain were as kinky as his hair, we would think it might be hard for him to think straight. He is a great admirer of the fair sex.

MINNIE L. RENNICK
Quincy, Ill.

"Frosty, but kindly."

Miss Rennick had one ambition in view when she came to Kirksville and is bent sincerely, constantly and enthusiastically on attaining that ambition. This same determination of purpose will make her most successful in the field.

MORRIS G. REIGART
Harrisburg Business College
Phi Sigma Gamma
Steelton, Pa.

*"He's little, but he's wise.
He's a corker for his size."*

"More" likes to answer in Dr. Warner's class, but hesitates when it comes to giving the answer—perhaps for the same reason he did last summer as a book salesman confronted by a screen door.

W. B. ROBEN
Atlas Club
S. Ryegate, Vt.

*"I will believe thou hast a mind that suits
With this thy fair and outward character."*

He has one chief hobby and rides it to death; it consists of getting the "gang" and expounding various theories concerning the best manner of telling a good story. Such fluency will surely entertain his future patients.

J. WM. ROBERTS Roodhouse, Ill.
Acacia Club

*"I am not of that feather to shake off
My friend when he must need me."*

All the fellows lost their hearts to Bob when they saw what a sweet girl he made. Osteopathy is his main diversion with a particular partiality for dissection.

T. A. RIEGER Erie, Pa.
Atlas Club

"An honest man, sir, is able to speak for himself."

"Ted" is the handsome lad from Penn. State. He claims he represents 300,000 people, but we have our "doots." He sure likes to fuss, but thinks studies must have attention too.

GUY L. RUMELHART Albion, Nebr.
A. B. Nebraska Wesleyan Univ.
Acacia Club

*"The man that hath no music in himself,
Nor is not moved with concord of sweet sounds,
Let no such man be trusted."*

"Rummy" has assisted in Histology. He is one of our gifted musicians, holding forth in the A. S. O. Glee Club, and wielding a clarinet in the Band. He is equally proficient in class.

S. T. ROULSTON Boulder, Colo.

"Few words and mighty deeds."

Formerly "Rouly" was a particular admirer of Minnesota. Now his attention is divided between "Boneology" and "Normalology". As a student of the former, he will more than earn his sheep-skin.

W. G. ROSENCRANS Robinson, Ill.

*"'Tis curiosity—who hath not felt
Its spirit, and before its altar knelt."*

"Rosie" is a tall, lank and lean seeker of our chosen profession. At times he may appear to be asleep, but nevertheless, is strong on the "Herlock Sholmes" stuff.

RUSSELL I. RILEY Mears, Mich.

"I hear, yet say not much, but think the more."

Riley's desire seems to be industry. He gave up the rule of the rod to propagate the "rule of the artery", since that "is supreme" he will hardly turn his allegiance elsewhere, hereafter.

MOLLIE L. SNYDER Huntington, Penn.

*"I would that my tongue could utter
The thoughts that arise in me."*

Miss Snyder joined our ranks this year. Her previous activities have been many and varied; and with a deal of practical experience she is the better qualified to enter the osteopathic profession.

JOSEPH J. STEWART Youngstown, O.
Canfield Normal School

"Arms and the man I sing."

"Stew" is sure a war-horse of the class and dearly loves to have the Freshmen "start something". He believes that it is a good plan to think twice and then keep still; except in a quiz.

H. H. STEWART Washington C. H., O.
Bernarr MacFadden

*"'Handsome Harry' was most wary,
Lest we know his name."*

In spite of his reticence, we have learned that he sometimes bets on ball games, that he has delved deep into the mysteries of psychotherapy and that he is a good student.

F. M. STOFFER Athens, Texas
State Manual Training Normal,
Pittsburg, Kans.
Iota Tau Sigma

"Your fair discourse hath been as sugar."

"Stoff" previously specialized in "Owl Salesmanship." After spending a year in the Kansas City School of Osteopathy, he came to a "regular" school to complete his education.

F. W. SHANNON Delaware, Ohio
Ohio Wesleyan Univ.

"All wise men lose their hair."

Shannon and Wycoff believe that physical development is a necessary adjunct to intellectual growth, and accordingly, they seek to attain this aim by frequent wrestling bouts. Shannon is also active in advancing the intellectual side.

HARVEY C. SALMEN York, Nebr.
Phi Delta Gamma

"He hath a stern look, but a gentle heart."

"Sister" Salmen hails from the West and is quite renowned as a piano player. He is right at home in the dissection room and could give pointers to anyone seeking reliable information.

E. M. STEELE Wilmington, O.
B. S. Carnegie College
Miami Univ.
Stillonian Club

"Words are easy, like the wind."

"Andy" has assisted in Histology. He may be found in his room 'most any time outside of class hours, but—"don't shoot, Mister, oh! please don't!"

WM. C. SCHLEY San Francisco, Calif.
Manor College
Univ. of Switzerland

"My intents are fixed and will not leave me."

"Bill" has served in football. He has had numerous twinges of heart trouble, but this year he got the real thing and has found an absolute "specific". She couldn't resist.

E. I. SCHINDLER St. Louis, Mo.
Missouri Institute for the Blind
Stillonian Club

*"In thy face I see
The map of honour, truth and loyalty."*

The invincible trio of patience, perseverance and pluck will ultimately lead to success. Schindler possesses the above trio plus a bright mind. The future holds many good things in store for him.

JAS. H. STROWD Durham, N. C.
Trinity College
Atlas Club

*"God bless thee, and put meekness in thy mind,
Love, charity, obedience and true duty."*

"Jake" is Sales Manager of the Osteoblast. His main purpose in life is keeping up with Esther. Between doing that, working on the year book, and pursuing Osteopathy, he's a mighty busy man.

RUBYLEE STEED Red Key, Ind.
Marion Normal College

*c—Good sir, give me good fortune.
s—I make not, but foresee.
c—Pray, then, foresee me one.*

If "Steedie" attracts patients as she does men, her success is assured. You wouldn't think such a slight person would be able to tackle ailing "heavy-weights",—but, remember, it's skill that counts.

MAX K. SELLERS Cherokee, Ia.
Atlas Club

"When you look sadly, it was for want of money."

This little fellow from Iowa has a wonderful tenor voice. He is ready for anything at any time,—and his idea of real excitement is a speedy elevator ride.

HAZEL V. SHACKELFORD Missouri Valley, Iowa
Delta Omega

"Better to have danced and flunked than never to have danced at all."

But "Shack" never flunked. She is one of the few who shine both in the classroom and the ballroom. Although it is evident that she studies, we can't figure out just when.

VERNE B. SMITH Boone, Ia.
Iowa State College, Ames, Ia.
Alpha Tau Sigma

"Nowhere so busy a man as he was there."

"Smithy" has proved proficient as Circulating Manager of the Neuron. He hates to have to put business before the social life and therefore has to keep going constantly in order to accomplish both.

F. HOYT TAYLOR Mt. Pleasant Mich.
Central State Normal
Theta Psi

"I am a dreamer of dreams."

"Nemo" is a natural-born student, with a keen insight into business,—even if he has shown himself worthy of being named after the God of Sleep.

ESTHER A. TAFT Norfolk, Nebr.
Axis Club

"If I do vow a friendship, I'll perform it to the last article."

Early last year "Big Taft" contracted an acute case of "Jimmies", which later became chronic. She is a fine student and a good prosector. She plans to go South and we hope she will like it and meet with success.

H. R. THOMAS Jackson, O.
Atlas Club

"I am weary; yea, my memory is tired."

Thomas is so quiet and unobtrusive that we hardly realize his presence in the class unless the roll is called. His languid manner in quizzes is deceiving, because you'll always find him alert to the interesting points in his work.

FRANK L. TITWORTH Knoxville, Tenn.
Mayville College
Atlas Club

"Frame your mind to mirth and merriment."

"Warm" doesn't know the meaning of "worry", but is well acquainted with the verb "to fuss." He has assisted in Chemistry and Histology laboratories, plays in the band and is a real student too.

CHAS. C. TALIAFERRO Orange, Va.
 B. S. Princeton College
 LL. B. Univ. of Va.
 Kappa Alpha
 Iota Tau Sigma

"Love me, love my dog."

We all await the look of hopelessness that appears on the instructor's face when they read "Tally's" name from the roll-call. He is very fond of dancing, but never overlooks his studies.

MILDRED TUTTLE Rockland, Me.
 Axis Club

"She wears the rose of youth upon her."

Mildred has the distinction of being Dr. Waggoner's assistant, when he forgets his roll-book. She believes in the motto, "Bring a student back with you." She has a winning personality and we wish her all success.

RUPERT J. VALLENTINE Jerseyville, Ill.

*"A trusty villain, sir, that very oft
 Lightens my humour with his merry jests."*

"Vally" is a poetry-and-song artist of fine calibre and he will "shoot all of it or any part." Yet "Vally" believes that school work should come first and recreation afterward.

R. W. VANWYNGARDEN Newton, Ia.
 Hope College, Holland, Mich.
 Alpha Tau Sigma

*"This honest creature doubtless sees and knows
 more, much more than he unfolds."*

"Van" both invites and bears acquaintance. He is from a state which he feels sure is the best in the Union, just as Osteopathy is the only profession. The word "worry" is not in his vocabulary.

EUNICE VANWINKLE Waverly, Ill.
 Illinois Women's College
 Illinois Wesleyan
 Kappa Kappa Gamma
 Axis Club

*"She is of so free, so kind, so apt, so blessed
 a disposition."*

"Rip" is constantly "making faces", but her idea is not malicious, merely an Osteoblastic necessity. She carefully nursed the incipient stages of the A. S. O. Glee Club before it became virulent.

MARIE VERHEY Pella, Ia.
 Axis Club

*"Silence is the one great art of conversation.
 He is not a fool who knows when to hold his
 tongue."*

Marie is an unobtrusive and effective force in our class. Although she has met with set-backs in health and work, she has persisted, and is successfully winning out.

WARD H. VENTRESS Monmouth, Ill.
 Monmouth College
 Chi Delta

*"The good die young, I do not feel well my-
 self."*

Both Ward's parents are Osteopaths and he is more than content to follow father and mother's footsteps. He assisted in Bacteriology and did good work on the Osteoblast staff.

CLARKE M. VANDUZER Silver Creek, N. Y.
 Theta Psi

"But I am constant as the northern star."

This is a very gifted gentleman, even to his name. He has a well-earned "rep" in basketball and baseball and is at present assistant manager of the basketball team. Furthermore, he is an excellent student.

RUSSELL W. WARTERS Martinsville, Ill.
Phi Sigma Gamma

*"Oh, inexpressible as sweet
Love takes my voice away."*

It took Russell a whole week to go home to vote; but then he is always looking for an excuse to go back there. Russell is notorious as a fusser.

W. E. WRIGHT Esbon, Kans.
Atlas Club

"I embrace this fortune patiently, since, not to be avoided, it falls on me."

Wright is still suffering from growing pains, but they do not interfere with his constant good humour. He is a good man on the football field, but is even better at absorbing Osteopathy.

WINIFRED WEBER St. Louis, Mo.
Stillonian Club

"Marks, not men, have always been my aim."

Miss Weber places Osteopathy ahead of all other diversions, and her work shows it. She is a true intellectual "heavy weight", and is always ready to help another.

MRS. ALDA WENTWORTH New York, N. Y.
Farmington State Normal
Delta Omega

"Laugh and the world laughs with you."

Mrs. Wentworth believes in the science of good humour and in serenity of mind. She is not a fatalist, but simply refuses to worry over past, present or future.

RHODA E. WARD Camden, N. J.
Stillonian Club

"There is nothing in life but labor."

The silver brook may babble on, the thrush may chant his lay; But these can have no charm for me, "sans" Osteopathy.

JANE B. WILSON Cambridge, Mass.
A. B. Radcliffe College
Mass. College of Osteopathy
Axis Club

"Whatever of goodness emanates from the soul, gathers its soft halo in the eyes."

Jane is exceeding wise, fair-spoken and persuading. She is never too busy to lend a helping hand and whatever she undertakes will be done well. She's sure to make a brilliant record.

MABEL WARTIG Hamilton, Mo.
Warrensburg State Normal

"If you stop talking when you tell all that I don't know, you won't say much."

In getting the work, "Polly" is one of our stars. She claims to have a natural and acquired immunity against Bacillus Cupidus Lanceolatus. She has been class secretary and is on the Osteoblast staff.

MATTIE WILSON Blandinsville, Ill.

*"Pensive maid, devout and pure,
Noble, steadfast and demure."*

Although naturally shy, Mattie has the happy faculty of making friends and keeping them. She is a student of the first order and represents a fitting partner to the firm of Wilson and Nudd.

BYRON R. WYCOFF Oakland, Calif.
Univ. of Calif.

*"All the courses of my life do show
I am not in the roll of common men."*

Mr. Wycoff has been a government school teacher in the Philippines and Cuba. He has been twice around the world, and decided that Kirksville was the best place to get his D. O.

B. F. WENDELL Newman, Ill.
Atlas Club

"He reads much; he is a great observer."

Frank's blood supply is wonderful and makes itself conspicuous every time one of the fair ones happens to glance at him. He is a steady, quiet student and will most certainly make good.

GILBERT H. WHITE Marion, Ill.
Phi Sigma Gamma

*"Kindness in women, not their beautiful looks,
shall win my love."*

"Gil" is our financial Croesus. He is reported to be swinging a home-building proposition in his native town for the purpose of storing away the heart he has won.

L. M. WILLIAMS Indianola, Ia.
Alpha Tau Sigma

"Be governed by your knowledge."

If "Sokes" becomes as clever at learning technique, as he is at rattling the drums, he will be a practitioner whom his Alma Mater may claim with pride. Between study and music, he has few spare moments.

EVERETT W. WILSON Sabina, O.
Mount Morris College, Ill.
Univ. of Nebraska
Alpha Tau Sigma

"Come, let us reason together."

When it comes to a question of "pep", Willie is right there, but his best efforts he reserves for Osteopathy. He is a good man on the basketball team, is President of the Y. M. C. A. and is on the Osteoblast committee.

JOHN O. WILLEY Gardiner, Me.
Rensselaer Polytech
Mass. College of Osteopathy
Iota Tau Sigma

"A learned spirit of human dealings."

Willey made dissection, at one of the tables in the "dog-house", prove very Eddy-fying; he knew some things that Gray neglected to mention. He belongs to the firm of "Tally" and Willey.

M. L. WILT Goshen, Ind.
Iota Tau Sigma

"A very valiant gentleman, i' faith."

"Brick" is the man with the golden locks and radiant smile. His only peculiarity is that of being loud and boisterous. He would easily qualify for Cheer Leader.

RALPH E. PEARSONS Rutland, Vt.
Theta Psi

*"It must have been
A fearful pang that wrung a groan from him."*

"Sammy" is a student and a patriot. He spent last summer on the border. He has served in football and showed his nerve at Westminster by playing the game through with a broken scapula, and he tackles his studies with equal grit.

Class History, June, 1918

Only one short year and a half ago it was, when some one hundred and seventy units strong marched on to Kirksville, and mobilized into what was soon to be the grand old class of June '18. The mills of the gods grind exceedingly fine and our number has now been diminished to one hundred fifty-eight. The standing of the class, as a whole, has been materially strengthened during the past semester by the addition of the following members:—P. J. Dodge, Mollie L. Snyder, F. M. Stoffer, C. C. Taliaferro, Jane B. Wilson, and J. W. Willey.

The ruling passion of the class has ever been the study of Osteopathy and other allied sciences, such as the Movies, the Terpsichore, and the Eternal Feminine. Even so, and it matters little, for has not Omar said:

“Ah, make the most of what we yet may spend,
Before we too into the dust descend.
Dust into dust and under dust to lie,
Sans Wine, Sans Song, Sans Singer, and Sans End.”

Up from the ranks have risen three men, whom the class chose to honor by electing to the office of president in succeeding semesters. These are R. G. Aten, Jas. Eades and J. E. Jones, the present incumbent, and they have all served us faithfully and well.

In the matter of pushball contests (so-called), we have been rather fortunate. The first one was a tie with the odds in our favor and the second, A Prehistoric Encounter with an Axe Handle, simply a walk away, the final score being six to nothing.

In the inter-class baseball games, altho we had mothered practically the whole Varsity in the persons of Aten, Gumbert, VanDuzer, Clark, Pocock, Adams and Caldwell, still we had enough big-league timber left to annex the championship.

Again speaking of athletics, we do not have much fear for the future as long as we continue to send forth our heroes of the past:—Deeming, Gumbert, Pocock and Adams to the gridiron and VanDuzer and Mearns to the enclosed court.

Among athletes and crooks there is honor we are told, but not being so sure about others, we refrain from attempting to set forth, in an abbreviated manner, the social lights as well as the best looking men and women in the class. Personal modesty also forbids this.

After the aforementioned pushball contest this past October, it was up to us to entertain and get acquainted with the Freshmen. We took a great deal of pride and pleasure in presenting them with a Big Time Act of Character Impersonations, followed by a dance supplemented with punch and cookies—if you were lucky. The main object of the party was to get acquainted and who knows a better way to get acquainted with anybody than to step on his or her toes?

Sh-h-h-h-h, Wag has his roll book, I believe. Too true!

Adams?—here; Ammerman?—here; Anderson?—present; Baker?—at my seat, Doctor; Bigsby?—ye'r; Miller?—Always present, Doctor. Well now, Mr. Miller, just tell us what this is all about, will you?

J. W. K.

Vis Medicatrix Naturae

“Nature will heal!” the ancients heard the cry,
And soon the parching fever had passed by,
Leaving no baneful weakness in its train.
They knew that what made healthy people ill
Could never work in the diseased a cure;
Instead of potions and a coated pill
They gave good food and running water pure.
“Nature will heal!” in superstitious time
The grafters stilled the slogan so sublime,
And charmed the weak world with their wily works.
Tho nature still gave out her sure relief,
The quacks assumed the honor she should have.
The guileless public clung to its belief
And rubbed its aching joints with useless salve.
“Nature will heal!” the truth arose again,
And Doctor Still took up the old refrain
And voiced it in a new and startling guise.
The world, persuaded, listened to his plea,
The pill-box rule received a sudden shock;
And now the way is cleared for you and me,
For dear old “Daddy” builded on a rock.

M. W. June '18

January '18

We surely have a brainy class
 There is no use to doubt it
 We pick up everything quite fast
 Though former love is routed.
 We love our dear professors, all,
 When they begin to lecture;
 But sure we don't like them a'tall
 When with a quiz they bless yer.
 Sometimes we can't tell what they're at
 They say our names so queerly
 Now Mrs. Bradt is always "Brat"
 Tho they don't mean it, really.
 In Library Hall we sit and stew
 In toxins like to kill us;
 It were enough to make us blue,
 And give us cyanosis.
 But still we live and ever thrive
 Through all our tribulation;
 As Osteopaths, we will survive
 Most fit in evolution.

E. E. D.

R. M. ASHLEY Chillicothe, Ohio
 Denison Univ., B. S.
 Kappa Sigma
 Iota Tau Sigma

*"The reason firm, the temperate will,
 Endurance, foresight, strength and skill."*

Denison U. lost a good man when "Bob" left. He was the captain of our football team, and has served as baseball manager and on the Board of Control.

M. H. BEATTIE Norwalk, Ohio
 Acacia Club

"None but himself can be his parallel."

"Little Beattie", judging from his former success, will surely make good as a doctor. Besides, he's a "wind-jammer". He has served on the Board of Control and in class baseball.

H. K. BALDWIN R. N. Brooklyn, N. Y.
 Acacia Club

"Whoso findeth a wife, findeth a good thing."

"Baldy" is a graduate from the Bellevue Hospital, N. Y. City. When it comes to knowing all about table technique in the "Gyn. Lab.", well, believe me, he's right there.

CHAS. H. BEATTY Lewistown, Mont.

*"Tho modest, on his unembarrassed brow
 Nature had written—Gentleman."*

Charlie will long be remembered for his famous tubercle slide. He has a scholarship in Bacteriology. We suggest that, on his next trip to "St. Louie", he take along a life preserver.

LINNIE K. BLACK Austin, Minn.
Winona, Minn., State Normal
Nashville Agricultural and
Normal Institute, Madison, Tenn.

"Too low they build who build beneath the stars."

Linnie takes a lively interest in class affairs, and hung onto our bank roll during the fourth semester. Her cheerfulness and optimism have won a place in all of our hearts.

JOHN R. BLACK Washburn, Ill.
Nashville Agricultural and Normal In-
stitute
Monmouth College, Monmouth, Ill.
Union College, College View, Nebr.

"Who does the best his circumstance allows."

John R., one of our "old reliables." He comes early and stays late, so long as the issue is one osteopathic. His characteristic disposition will surely win for him the confidence of his patients.

F. LOUIS BUSH Syracuse, N. Y.
Chi Delta

"Great thoughts, great feelings came to him, like instincts, unawares."

F. Louis has assisted in Physiology and has secured a scholarship in Bacteriology. He's a good student, but can't resist the ladies, especially the Freshmen and Normalites.

CHESTER E. BELL Magnetic Springs, Ohio
Alpha Tau Sigma

"Few things are impossible to diligence and skill."

Bell hails from Magnetic Springs and, from appearances, he retained enough to hold us all. He was our second class president, has served in class baseball and has assisted in Bacteriology.

MRS. NORTON J. BURTT Kirksville, Mo.
Kirksville State Normal School
Sigma Sigma Sigma
Axis Club

*"Domestic happiness, thou only bliss
Of Paradise that hath survived the fall."*

Her sweet smile and pleasant manner have ever been an inspiration to her classmates. She was our class treasurer during the troublesome times of our first semester.

NORTON J. BURTT Peoria, Ill.
Notre Dame Univ. and St. Mary's,
Kansas

*"A guardian angel o'er his life presiding,
Doubling his pleasures, and his cares dividing."*

N. J. is one of the most favored of our class, having already assisted one summer at Macon. He early fell a prey to Cupid's wiles and was gobbled up.

MRS. NELLIE BRADT Hagerstown, Md.

"She was a lady of high degree."

She is a whirlpool of energy and will power, and is sudden death to obstacles. Has officiated as class treasurer and on the permanent Osteoblast committee and is securing our advertising. She is a credit to our class.

W. S. BROWN Horton, Kans.

*"Formed on the good old plan,
A true, and brave, and downright honest man."*

"Brownie" lived in great style while his wife was in school, but since then has had to "batch it". He never misses a class and sure gets his share of the work.

JAS. W. CLIMER
DePauw Univ.
Sigma Nu
Theta Psi
Indianapolis, Ind.

*"The falcon and the dove sit there together,
And the one of them doth prune the other's
feather."*

"Jimmie" was a member of the Board of Control the first semester. He's some "fusser" and very gallant to the ladies, but his ardor is often chilled by "Stop!"

ALFRED B. CARSON
Iota Tau Sigma
St. Louis, Mo.

"Man is man, and master of his fate."

"Tape" is one of our best students. He doesn't care for wine. He loves the women and his favorite song is an original parody on "The Glowworm."

A. C. COUPLIN
St. Paul, Minn.

*"Thou villain base,
Knowest me not by my clothes?"*

"Coup" hails from one of the "Twin Cities" and says he's proud of it. He doesn't have much to say, but he can make a few words go a long way.

J. J. CLARK
Acacia Club
Northampton, Mass.

"Hear ye not the hum of mighty workings?"

John is a gentleman, but he swears at Kirksville's mud. He loved us not, at first, but is now firmly attached to the A. S. O. He is our fourth president, has assisted in Pathology and has a scholarship in Bacteriology.

MABEL E. DAVIS
Independence, Kans.

*"Of many charms, to her as natural
As sweetness to the flower, or salt to ocean."*

Mabel is one of the best in the class, no question gets by her without a satisfactory answer. She juggled our coin thru the third semester, but we can observe no spinal curvature as a result.

EDITH E. DOVESMITH
Niagara Falls Collegiate Institute
Stillonian Club
Niagara Falls, N. Y.

"Her good humor is a fountain never dry."

She is quiet and unassuming, yet startles us with brilliant recitations; but O! that awful frown when Dr. Mary "hists" the window.

MARY P. FAWVER
Kansas City, Mo.

*"She doth little kindnesses which most leave
undone, or despise."*

"Doc Mary" hails from the windy plains of Kansas, hence her extreme fondness for a seat by an open window in 'sunshine or storm. She is our fresh-air regulator and believes oxygen is the only element known.

HOWARD P. FOLEY
Carthage College, Ill.
Phi Sigma Gamma
Plymouth, Ill.

"A man's a man for a' that."

No one would doubt "Pat's" nationality, and he would not have to smoke a clay pipe to prove it. He's a good fellow and always lines up with the bunch.

E. A. GADY Pine Village, Ind.

*"O bed! O bed! delicious bed!
That heaven upon earth to my weary head."*

We have the pleasure of seeing Gady in class quite frequently. His several sidelines indicate that he does not believe in letting school work interfere with his professional course.

EDWARD J. GAHAN Dushore, Pa.
Atlas Club

"And all may do what has by me been done."

"Eddie" is noted for his original research work in locating the pituitary body in the yolk-sac. He has assisted in Chemistry and prosected. He is a good student but, when he gets stuck, "let's George do it."

H. L. GORDON Brighton, Ia.

"Can any man have a higher notion of the rule of right and the eternal fitness of things?"

We know him as one who says little but thinks much, and when he talks,— just listen, if you would learn. His side line is Chemistry, in which he holds a scholarship.

ELLWYN D. GEORGE Wauneta, Nebr.
Kearney, Nebr., State Normal
Theta Psi

*"The poet in his art,
Must imitate the whole and say the smallest part."*

"Bud" sure possesses the "gift of gab" and can grin out loud. Besides these accomplishments he has prosected, assisted in Histology, and written a little poetry.

H. A. GORRELL Canton, Mo.
Christian Univ., Canton, Mo.
Kirksville State Normal School
Phi Delta Gamma

"He was so generally civil that nobody thanked him for it."

H. A. lives only a dollar and a half's worth from here, and wonders why every fellow can't go home as often as he. He says he already has a partner spotted.

H. S. HANSON Fargo, N. D.
N. Dak. Agricultural College
Iota Tau Sigma

"I am a gentleman." "I'll be sworn thou art."

"Swede" has been prominent in all student activities. He has served in baseball, also football, of which he was Ass't Mgr. He is a star on the stage, as well as on the dancing floor.

FRED C. HEINL Meriden, Ia.
Valparaiso Univ., A. B., B. Sc.

*"Experience join'd with common sense
To mortals is a providence."*

Fred is digging into osteopathy with the same zeal that has won for him his previous honors. "Kid" takes especial interest in Pathology, and is acting as assistant in the lab.

MRS. FRED C. HEINL Corydon, Ind.
Valparaiso Univ., B. S.

*"A perfect woman, nobly planned,
To warm, to comfort, and command."*

Mrs. "Fred" is not to be bested by her "hubby", and has proven her worth. With her knowledge and pleasant disposition she will surely keep up her end of the Heintl team.

HAROLD I. HARRIS Minneapolis, Minn.
Minnesota Univ.
Hamline Univ.

"But genius must be born, and never can be taught."

Harris is a star of the first magnitude in the anatomy class. He has assisted in Anatomy and has a scholarship in Chemistry. He loves quizzes, but sure hates to be tickled.

HOWARD R. JUVENAL Upper Sandusky, Ohio
Ohio Wesleyan Univ.
Acacia Club

*"These mark what ills the scholar's life assail,
Toil, envy, want, the patron and the jail."*

"Juvey" spends his summers managing the Pennsylvania R. R. He attends all classes and always holds down the same seat. He has assisted in Physiology and has a scholarship in Histology.

O. S. KELLY Oklahoma City, Okla.
U. S. Training Ship
Iota Tau Sigma

"The countenance is the portrait of the man."

Kelly has assisted in Lane's private lab. and directs our band. He's a shrewd guy and early found favor in the eyes of the Profs. by his ready response when quizzed.

ROBERT Q. KING Maitland, Mo.
Acacia Club

"A sense of justice is a noble fancy."

King is well by liked by all who know him and, although quiet and unassuming, he is "one of the boys." He successfully weathered us thru the storms of the first semester as class president.

EMMA M. LEDAHL Lake Preston, S. Dak.
State Normal School, Madison, S. Dak.
Delta Omega

*"Ye belles, and ye flirts, and ye pert little things,
Who trip in this frolicsome round."*

"Emmie Lou" is the choir of our class. She is Grand Editor of the Alpha and, from reports, puts out "some" paper. Her popularity indicates that she will be credit to the profession.

DOROTHEA LANGLITZ Harrisburg, Pa.

*"For blessings ever wait on virtuous deeds.
And tho a late, a sure reward succeeds."*

Dorothea comes to class as regular as clock-work, and leave it to her to write the lectures down verbatim. She is a conscientious student, and will sure be a winner.

H. C. LEOPOLD Fairbury, Nebr.
Alpha Tau Sigma

*"And wheresoe'er thou move, good luck
Shall fling her old shoe after."*

"Where there's a will, there's a way." Surely this can be said of "Dad." He is now representing us on the Board of Control, and was our vice president last semester.

GEORGE F. LONG Rochester, N. Y.
Chi Delta

"Discourse, the sweeter banquet of the mind."

Affectionately known as "Papa." He has served as prosector, on the Board of Control, in baseball and football, and has a scholarship in Bacteriology. He has also acquired a beautiful line of technique in "fussing."

CLELLA LEEPER Kirksville, Mo.

"Either never attempt, or else accomplish."

Clella and her ever cheerful smile are always a good tonic when you feel blue. She believes that energy and a well founded opinion are the things that move the world.

MAY LUITEN Glencoe, Minn.
Delta Omega

*"For she was jes' the quiet kind
Whose natures never vary."*

A quiet little Miss who moves among us with dignity. Tho most people refuse to pronounce her name correctly, it matters not so long as they tell her all there is to know about Osteopathy.

M. HART MILLER Kirksville, Mo.

"There is no knowledge that is not power."

Miller is a conscientious student, who would always recommend mother's milk for the baby. A man with a philosophy of life.

GEO. K. MEYER Grove City, Pa.
Grove City College

*"For his heart was in his work, and the heart
Giveth grace unto every art."*

George formerly "pushed a pencil" in Pennsylvania, but forsook his draughtsman's art for one of finer manipulations. He therefore catches the delicate shades of meaning of our instructors. He has assisted in histology and bacteriology labs.

T. I. MOFFET Hatfield, Mo.

"Strong reasons make strong actions."

"Tom" is a stalwart son of Missouri. He has assisted in Bacteriology. He is fond of the metropolis of Hatfield, his hobby is microscopy, and his favorite by-word is "bugs."

EMERY G. PIERCE Dayton, Ohio
Chattanooga Univ.
Phi Sigma Gamma

*"All things I thought I knew, but now confess
The more I know I know, I know the less."*

E. G. is a hard worker, and has secured a scholarship in Histology. He takes orders for treating tables and the Journal of Osteopathy. His specialty is hunting rabbits on cold mornings.

LOUISE H. PUMPHREY Middletown, Ohio
Antioch College
Delta Omega

*"Desire not to live long, but to live well;
How long we live, not years, but actions tell."*

She knows she does not know, and yet we know she knows. Tho' she is so modest and denies her intellectual ability, all evidence points to the contrary.

F. EARL RAMSEY Hookstown, Pa.
Ohio Northern Univ.
Grove City College, Ph. B. 1914

"On their merits, modest men are dumb."

While a good student, it is evident that technique appeals strongly to Ramsey. He is making it popular among the ladies, and proves himself a willing martyr as clinic.

LYMAN C. REGER Succasunna, N. J.
Coleman Business College, Newark, N. J.

*"Whatever he did was done with so much ease,
In him alone 'twas natural to please"*

A ready smile and unfailing good humor make him a valued member of the class. Judging from his extensive correspondence, his heart holds fond hopes of the Jersey shore. We heartily wish him success.

GEORGE T. RICKARD Niagara Falls, Ont.
Huron College, Western Univ., London,
Ont.
Atlas Club

"God bless thy lungs, good Knight—!"

George is a stickler for true knowledge, and in a quiz makes himself favorably conspicuous. He assists in Physiology lab.

DOROTHY G. SAWYER Augusta, Me.
Delta Omega

"The rule of my life is to make business pleasure and pleasure my business."

Dorothy's principal by-word is "Stop". Being very good natured and the baby of our class, she is teased considerably. We hope to hear of good results from Dorothy.

LULA E. SCHAFER Louisville, Ky.
Western State Normal, Bowling Green,
Ky.

*"I see, but cannot reach, the height
That lies forever in the light."*

This splendid personality commands our greatest respect and admiration. She faces all obstacles unflinchingly when others would surely give up.

MRS. ROBERTA G. SELLS Sterling, Colo.
Fremont, Nebr., State Normal School
Axis Club

*"Those graceful acts, those thousand decencies
That daily flow from all her words and actions."*

"Ann" is one of our best pals. Her family has taken a good deal of her time, yet she has managed to assist in histology and chemistry labs.

GUY PRESTON SHERRILL Temple, Tex.
Texas Univ., Austin, Tex.
Med. Dept. U. of Texas, Galveston,
Tex.
Phi Kappa Psi
Alpha Kappa Kappa (Med.)
Phi Sigma Gamma

"Witty, courteous, liberal and full of spirit."

"Sherry" is on the Neuron staff. His small stature and big voice command the attention of all. "Right there" for pep and putting things through.

RAY B. SMITH Blandinsville, Ill.
Alpha Tau Sigma

"Tis toil's reward that sweetens industry."

It doesn't matter whether he has just got up or is just going to bed, that same old smile and cheery "Hi, Doc" are always there and ready. Smithy will make some doctor.

R. D. STEPHENSON Omaha, Nebr.

"All good men are dead, and I'm not feeling well."

"Steve" has proved efficient in office, as well as a student of the profession. A mooted question in Anatomy or any of the ologies may be left to him. He's just as efficient with a pan of popcorn.

GERALD M. STEVENSON Port Byron, Ill.
Yankton College, S. Dak., B. A. 1910
Alpha Tau Sigma

"Such sweet compulsion doth in music lie."

"Little Steve" taught English and Music for five years. He has the "class spirit", and plenty of "pep". He is the organizer and director of the A. S. O. Glee Club and is our present class historian.

F. LELAND TEALL Syracuse, N. Y.
Theta Psi

"Why does one man's yawning make another yawn?"

Frank Leland forsook the past to join us and his future is promising indeed. He holds class honors in technique,—(ain't that right, Luke?)—and has served in class baseball.

J. W. TEMPLETON Ottumwa, Ia.
Parsons College, Fairfield, Ia.
Atlas Club

*"No wild enthusiast ever yet could rest,
Till half mankind were like himself possess'd."*

Jim has assisted in Anatomy and Physiology, and is treasurer of the Board of Control. He's a hard worker and a defender of all that is right. He's not posted on law, but knows what we want.

L. L. WADE Ashland, Kans.
Atlas Club

*"Happy am I, from care I'm free!
Why aren't they all contented like me?"*

The only thing Wade ever regretted in coming to Kirksville was that he couldn't bring his horses along. 'Tis not that he loves horses the less, but osteopathy the more, that he is with us.

NORMAN H. WRIGHT Louisville, Ky.
Zanerian Art College, Columbus, Ohio
Alpha Tau Sigma

*"Strongest minds are often those of whom
The noisy world hears least."*

Quiet, studious, thoughtful, ever pleasant, Mr. Wright is bound to be "all right" when he goes forth to battle against the ills to which human flesh is heir.

PERRIN T. WILSON Cambridge, Mass.
Harvard Univ.
Atlas Club

*"Whence is thy learning? Hath thy toil
O'er books consumed the midnight oil?"*

"Woodrow" is a natural diplomat, and showed his ability in this line as class president and president of the A. O. A. Auxiliary. He is the athletic editor of our year book.

A. M. FRIEND Grinnell, Ia.

"A little more sleep, a little more slumber."

Friend drifted in on us from the Des Moines school. He has been on deck quite regularly since his father made the mistake of trying to locate him in the A. S. O.

In Memory of
Addie S. Dunlap
 a member of
 The January, 1918, Class
 who died June the 14th, 1915
 at the age of
 28 years, 9 months, and 10 days

'18

History of January '18 Class

As we assume the senior dignity, it is well to glance back over the events and achievements of the stages preliminary to that honor. A year ago our class historian called attention to our budding spurs backing up our first spring crow. If now, that crow seems to have developed into the stentorian morning challenge of an adult shanghai, observe also a backing worthy of a Chinese gamecock. For the class of January '18 is doing things.

Our freshman scrap with January '17 was a 5-5 tie in a pushball contest, which is said to be "the cleanest and most sportsmanlike affair ever held at A. S. O." In the next fight, the corpse of Jan. '18 toted around the square by the freshies proved to be an avenging ghost, for we defeated them by a decisive score of two touchdowns. The reception the following night called forth much of latent talent in the class. It was here that "President" Wilson delivered himself of his maiden speech. *Vide supra.*

From our original roll we have lost nine. Six have come to us. Death has taken one, Mrs. Dunlap; also a wife, a father, and the mothers of two members of the class. Twenty-two are married. Burt and Baldwin have fallen before the wiles of the fair, and Leopold has become a father-in-law since our history began. The rest of the men are keeping more or less firmly in mind that splendid motto: Eternal vigilance is the price of bachelorhood.

*In der Stille der Eisamkeit
 Bildet sich der Geist,
 In Strome des Lebens
 Der Karakter.*

We have indeed lingered in solitude over our books, but, if Goethe spake true, *der Karakter* is assured and members of January '18 by their activity in school and community life. We are furnishing a full quota of laboratory heads and assistants, officers of the Board of Control and of the various clubs and fraternities. We have placed a goodly number of gridiron and diamond heroes, the largest percentage of A. O. A. Auxiliary members, and have registered the annual kick on the teaching of Technique. We are the favorite class of Professor Lane,—a distinction shared by every class that has entered A. S. O. since September, 1914. On the blackboards appear often the names of Black, the Spencer 'scope man, and Pierce of Woodin table fame. The class is represented in nearly every church in town in capacities ranging from audience to deacon or choir director. Wilson is prime mover and first president of the A. O. A. Auxiliary; Ashley captained the great 1916 football machine; Kelly is leader of the A. S. O. band; G. M. Stevenson, organizer and director of the Glee Club. Miss LeDahl, Ashley and Hanson have played leading roles in two I. T. S. plays, Mrs. Sells in one. "Buddy" George and Teall helped to make the Theta Psi play one of the finest local talent productions in years. The Delta Omega and the Elks minstrels featured largely in the work of Miss LeDahl, Stevenson, Ashley and Hanson.

Such breadth of interest we believe to be helpful in the development of personal power, in making the osteopathic physician something more than a mechanic. We hope and expect to find members of the class of January '18 not only successful practitioners, but real community leaders in civic advancement.

G. M. S.

'18

To the Seniors

Tho' the days of your school life are ended,
 And their Jollities sunk in the past,
 Tho' the stern hand of fate has descended
 And Realities faced you at last—
 Tho' Penury taunt and disgrace you
 And Poverty haunt and deride,
 Remember that Effort will place you
 In the realm of Success, to abide.
 Be earnest that no one may blame you.
 Be honest that none may belie.
 Be straight that the worst can't defame you,
 And mindful of all that defy.
 For this world is oozing with trouble,
 So meet it with smiles, not a curse,
 And Heaven's reward will be double,
 If not, it is Hell, and that's worse.
 Be calm, if Success overtakes you,
 Prepare for Adversity's call,
 Be true to yourself, for it makes you
 The happier man after all.
 And then, when the golden sun's sinking,
 And the Sand in the Glass has run low,
 Relapse into reveries—thinking
 Of the days spent in dear A. S. O.

GEORGE.

The Class of June '17

FIRST PLATE

FIRST ROW

- A. V. FISH, Kirksville, Mo., K. S. N. S., Stillonian Club, assisted in Biology and Pathology Laboratories, prosector summer '16.
 VERA BUCHHEIT, Mishawaka, Ind., Delta Omega.
 GRACE LULU STANFORD, Pittsfield, Pa., Delta Omega.
 SANKEY B. KIBLINGER, Oswego, Kans., Oswego College, Atlas Club.
 MRS. BELLE COLE DAVIS, Pawling, N. Y., Stillonian Club.
 JOSEPH E. KILMAN, Indianapolis, Ind., Indiana Univ., Beta Theta Pi, Atlas Club, Assistant in Chemistry Laboratory.
 HAZEL G. AXTELL, New Bedford, Mass., Stillonian Club.
 WILLIAM P. CURRIE, Montreal, Can., Atlas Club, British Ass'n., Scholarship in Anatomy.

SECOND ROW:

- FRANK L. YOUNG, Cleburne, Tex., Texas Univ., Phi Sigma Gamma, Football '15-'16, Baseball '14-'15, Board of Control '16-'17, Baseball Manager '17.
 TOM A. VOGEL, Columbus, Ohio, Ohio State Univ., Sigma Chi Delta, Atlas Club, President Board of Control '16-'17, Football '15-'16, Football Coach '16.
 P. D. SCHOONMAKER, Macon, Mo., Atlas Club, Sergeant-at-Arms June '17 class '15-'16-'17.
 F. E. LEMASTER, King City, Mo., Alpha Tau Sigma, Band '15-'16-'17.
 FRANCIS F. MARSEILLES, Kansas City, Mo.
 MRS. LAURA N. CHAPPEL, St. Louis, Mo.
 ELIZABETH E. LEONARD, Delaware, Ohio, Ohio Wesleyan Univ., Axis Club, Assistant in Gynecology Laboratory, Treasurer 1917 Osteoblast, Secretary of Neuron Staff '16-'17, President Axis Club 1917.
 SIMON P. MORLOCK, Morriston, Ont., Can., British Ass'n. Stillonian Club.

THIRD ROW:

- H. G. HAWORTH, Flat Creek, Alberta, Can., Atlas Club, class baseball.
 ARCHIE L. STOUT, Helena, Ark., President Arkansas Club, Class Yell Leader '15.
 MARTHA HERBERT, Trenton, Mo., Milton College, Neuron Staff third and fourth terms.
 AGNES RUNYEN, Union City, Ind., Scholarship in Chemistry.
 DONALD A. ATKINSON, Elkhart, Ind., Atlas Club, Assisted one year in Bacteriology Laboratory.
 C. L. FARQUHARSON, Wichita, Kans., Chi Delta.
 CUTHBERT D. SMITH, Kansas City, Mo., Dollar College, Scotland.
 EVERETT E. TRASK, Bellows Falls, Vt., Mass. College of Osteopathy, Iota Tau Sigma.

FOURTH ROW:

- C. HOWARD BOWMAN, Gouverneur, N. Y., Colgate Univ., Phi Kappa Psi, Atlas Club.
 HAZEL H. MULLENIX, Chicago, Ill., Delta Omega, Alpha Pi Phi.
 ROSE YOUNG KELLER, Elizabeth, N. J.
 N. W. DOWELL, Kirksville, Mo., S. W. State Normal, Okla., Gem City Business College, Acacia Club, assisted in Bacteriology Laboratory, prosector fifth and sixth terms, class baseball, Manager class baseball '15.
 JAMES H. MOORE, Seattle, Wash., Washington Univ., Scholarship in Chemistry.
 MARGARET L. MOORE, Seattle, Wash., Univ. of Puget Sound, Tacoma, Wash., Scholarship in Chemistry.
 RUTH E. HUMPHRIES, Malden, Mass., A. B. Mount Holyoke College, Delta Delta Delta, President Axis Club 1916.
 S. R. LASH, Lewistown, Pa., Westminster College, Pa., Alpha Tau Sigma.

FIFTH ROW:

- RALPH R. STERRETT, Clay Center, Kans., K. S. A. C., Alpha Tau Sigma, Vice-President June '17 class '16-'17, Circulation Manager of Neuron '15-'16, Vice-President Board of Control '16-'17.
 OLIN WILTON PRICE, Washington C. H., Ohio, Ohio Northern Univ., Alpha Tau Sigma.
 KARL W. GARMROTH, Payne, Ohio, Heidelberg Univ., Chi Delta, football '14-'15.
 F. V. DEVINNY, Lincoln, Kans., Alpha Tau Sigma, class baseball.
 CHAUNCEY M. LAWRENCE, Springfield, Ohio, A. B., Wittenberg College, Stillonian Club, Fellowship in Biology, prosector, '16, class President '15-'16-'17.

R. C. HART, Lamoni, Iowa, Maryville and Kirksville Missouri State Normal Schools. Alpha Tau Sigma, Scholarship in Histology, Board of Control, '16-'17.

THEODORE C. EDWARDS, Spokane, Wash., prosector '15-'16, prepared cadavers for the dissection '15 to '17.

HAZEL WAGGONER, Carrollton, Ill., Illinois Women's College, Delta Omega.

SIXTH ROW:

MRS. FLORENCE VAN D. CARSON, Evansville, Ind., assisted in Gynecology Laboratory.

ROY N. BLACKWELL, Cleburne, Tex., Phi Sigma Gamma, assisted in Chemistry Laboratory, football, Board of Control '15-'16, and '16-'17, football manager '16.

FRED S. EILER, Meadville, Pa., Theta Psi, Secretary and Treasurer of Penn. Club '16-'17.

HENRY H. SCHWARTZ, St. Paul, Minn., Assistant in Chemistry and Biology Laboratories, Scholarship in Physiology.

IRVIN W. ALEXANDER, Golden, Ill., Atlas Club, Western Illinois Normal, Assistant in Biology Laboratory, Baseball.

LOTTIE E. WRIGHT, Superior, Wis., Axis Club.

G. C. SAYRE, DETROIT, Mich., Phi Delta Gamma.

EVERETT D. CLARK, Galesburg, Ill., Phi Delta Gamma, Scholarship in Bacteriology.

SEVENTH ROW:

CHARLES F. M. HARBAUGH, Minneapolis Kans., prosector, '16, Band, first, second and third years.

NELSON H. CATHCART, Grand Rapids, Mich., Acacia Club, Secretary Y. M. C. A.

JOSEPH E. BUNKER, Otego, Kans., Phi Delta Gamma, Scholarship in Bacteriology.

EUGENE L. BUELER, Hammond, La., Phi Sigma Gamma, Board of Control '16-'17. Editor-in-Chief of Neuron, '16-'17, Art Editor 1917 Osteoblast.

FLOYD H. ATKINSON, Kewanee, Ill.

J. H. SPENCER, Gouverneur, N. Y., St. Lawrence Univ., Beta Theta Pi, Atlas Club, Sec'y. Y. M. C. A. Cabinet '16-'17, Sec'y Board of Control '16-'17

JAMES HENRY HESS, Kirksville, Mo., Kirksville State Normal School.

JAMES H. BELL, Newark, Ohio, Acacia Club.

EIGHTH ROW:

GEO. S. WATSON, Greystones, Ireland, St. Andrew's College, Dublin Ireland, Atlas Club, Assisted in Physiology Laboratory, Prosector summer '16.

LOWELL A. GLAZE, Cainsville, Mo., Missouri Wesleyan College, Acacia Club, Vice President of A. O. A. Auxilliary '16-'17.

HARVEY GUY SANDERFORD, Creedmoor, N. C., Univ. of North Carolina, Atlas Club, Scholarship in Practical Anatomy and Chemistry.

HERBERT E. FORSTER, South Bend, Ind., Phi Sigma Gamma, football two years, basketball two years.

HOWARD R. COATS, Belton, Tex., Phi Sigma Gamma, assisted in Histology Laboratory '15 and Physiology Laboratory '16.

GRANCE SANDS McDONALD, Kirksville, Mo., K. S. N. S., Scholarship in Chemistry.

MRS. CORA W. FOSTER, St. Joseph, Mo.

PAUL F. LACY, Portland, Ore., College Osteopathic Physicians and Surgeons, Iota Tau Sigma.

NINTH ROW:

E. LOLA CONOVER, Petersburg, Ill., Axis Club.

HALLIE HARLAN STUBBLEFIELD, Kirksville, Mo., K. S. N. S., Delta Omega.

GRACE T. HARNER, Athens, Ohio, Ohio Univ., S. W. Optical Co. of Kansas City, Mo.

N. W. GILLUM, Kirksville, Mo.

E. W. McINTOSH, Romeo, Mich., Albion College, Albion, Mich., Alpha Tau Omega, Atlas Club.

ROBERT LeROY SOUDER, Tiffin, Ohio, Heidelberg Univ., Ohio State Medical, Alpha Tau Sigma, Assistant in Chemistry Laboratory, Band '15-'16.

SECOND PLATE

FIRST ROW:

E. W. SHACKELFORD, Indianola, Ia., Simpson College, Alpha Tau Sigma, Assistant in Physiological Chemistry Laboratory.

LENORA BOND, Birmingham, Ala., Axis Club.

RANDALL O. BUCK, West Richfield, Ohio, Stillonian Club, Ohio Club.

W. S. McCLEERY, Lancaster, Ohio, Ohio Univ., Phi Delta Theta, Iota Tau Sigma, class baseball.
 H. H. MADDOX, Oakland, Ill., Eastern Illinois State Normal, Atlas Club, Scholarship in Anatomy.
 RALPH W. RICE, Hanford, Cal., Pomona College, Atlas Club, Assistant in Histology Laboratory, Scholarship in Chemistry, Chairman 1917 Permanent Osteoblast Committee, Y. M. C. A. Cabinet '15-'16-'17.
 ALICE MALONE, Lancaster, Ohio, Axis Club, class Vice-President '15-'16.
 JAY C. C. HENDRICK, Dayton, Ohio, Alpha Tau Sigma.

SECOND ROW:

HERBERT LIPMAN, Leeds, Yorkshire, England, Acacia Club, Class Historian and Poet '14-'15, Cheer Leader of Football '15, Baseball '16.
 ALLIE B. HERBERT, Trenton, Mo.
 GRACE LEWIS HURD, Washington, D. C., Chicago Univ., Delta Omega.
 J. A. HIRSCHMAN, Pierson, Iowa, Phi Delta Gamma, assisted in Chemistry Laboratory.
 BLANCHE BUGH RENNICK, Lewistown, Mo.
 J. H. SPRAGUE, Salamanaca, New York.
 C. W. HAMMOND, Grove City, Pa., Acacia Club, Fellowship in Bacteriology.
 S. B. GRISSO, Cerro Gordo, Ill.

THIRD ROW:

ALLEN B. AMES, Burlington, Vt., Mass. College of Osteopathy, Iota Tau Sigma.
 HARRY H. CAMPBELL, Akron, Ohio, Atlas Club.
 A. C. PETERMEYER, Clay Center, Kans., Acacia Club.
 MRS. M. J. CHASE, St. Louis, Mo.
 JOHN A. YODER, Fairview, Mich., Michigan State College.
 HUBERT L. BENEDICT, Hurricane, W. Va., Marshall College, W. Va., Atlas Club.
 LOUIS H. SMITH, Smithton, Mo., Stillonian Club.
 HARRY W. BLACK, Washburn, Ill., Illinois State Univ., Scholarship in Bacteriology.

FOURTH ROW:

C. A. WELKER, King City, Mo., Missouri State Univ., Chi Delta, class baseball. Band three years.
 BESS MCGREGOR SWANSON, Fairfield, Ia., National Park Seminary, Parsons College, Kappa Delta Phi, Axis Club, Sojourners' Club, Assistant in Gynecology Laboratory.
 GEO. W. READE, Durham, N. C., Trinity College, Alpha Tau Sigma.
 AARON B. JOHNSON, Aberdeen, S. D., Alpha Tau Sigma, Assistant Physiological Chemistry Laboratory, Basketball '15-'16.
 LAWRENCE MCFALL, Kewanee, Ill., Alpha Tau Sigma.
 L. A. MUNDIS, Iola, Kans., Atlas Club, Assistant in Bacteriology Laboratory.
 J. WILBUR DENNISTON, Waco, Tex., Acacia Club, Fellowship in Histology, prosector, band '14-'15, '15-'16, President of band '15-'16.
 STEVE M. FARNUM, Fall River, Mass., Greenwich College, Phi Delta Gamma, assisted in Pathology Laboratory.

FIFTH ROW:

MYRON R. RUNIONS, Pierson, Ia., Western Union College, LeMars, Ia., Phi Delta Gamma, Football, Class Baseball, Band.
 CHAS. C. BOYLE, Minneapolis, Kans., Kansas Wesleyan, K. S. N. S., Alpha Tau Sigma, assisted in Pathology Laboratory, Scholarship in Bacteriology, Class Baseball, Osteoblast Staff '17.
 R. E. OWNBEY, Kirksville, Mo.
 EDNA W. F. HOFNER, New Melle, Mo.
 ALLEN D. TOWNE, Kirksville, Mo., Stout Institute.
 NAT. W. BOYD, Harrisburg, Pa., Temple Univ., Philadelphia College of Osteopathy, Sigma Alpha Epsilon, Phi Sigma Gamma, President of Pennsylvania Club, Board of Control '16-'17, Business Manager of Neuron, Class Yell Leader '16-'17.
 ANNA G. TINKHAM, Methuen, Mass., Axis Club.
 LAUNCELOT E. JAQUITH, Toronto, Can., Atlas Club, Scholarship in Practical Anatomy Laboratory.

SIXTH ROW:

WILLIAM T. HARDY, Baring, Mo., Stillonian Club.
 PAUL A. REILLY, Austin, Minn., Atlas Club.
 BLANCHE B. MORELAND, Virginia, Minn., Axis Club.
 E. H. WEBSTER, Danville, Va., Hiram College, Alpha Tau Sigma, assisted in Chemistry Laboratory, Class Baseball.
 LEONARD C. MOOK, Pittsburgh, Pa., Alden Academy, Univ. of Pittsburgh, Stillonian Club, Prosector.
 CHARLES H. BEAUMONT, Providence, R. I., Mass. College of Osteopathy, Iota Tau Sigma.
 GROVER N. GILLUM, Kirksville, Mo.
 LUCIUS B. FAIRES, Endicott, Wash., Alpha Tau Sigma.

SEVENTH ROW:

M. R. MAXWELL, Robinson, Ill., Monmouth College, Monmouth, Ill., Stillonian Club.
 MARY A. ZERCHER, Topeka, Kans., Delta Omega.
 B. A. HARRY, Quitman, Texas.
 LAURA P. TWEED, Saginaw, Mich., Graduate Nurse, Saginaw Gen'l Hospital, Assistant in Chemistry Laboratory and X-Radiance, Scholarship in Practical Anatomy and Histology.
 HOMER N. TWEED, Quakertown, Pa., Scholarship in Practical Anatomy and Histology.
 GEORGE W. HOWARD, Scranton, Pa., Phi Sigma Gamma, Football three years, Board of Control '14-'15, Pennsylvania Club.
 LOUIS E. BROWNE, Princeton, Ind., Moores Hill College, Ind., Acacia Club, Scholarship in Chemistry, Board of Control '16-'17, Football.
 HOWARD T. TRELEAVEN, Kansas City, Mo., Central College of Osteopathy, Iota Tau Sigma.

EIGHTH ROW:

J. E. BOLMER, Lebanon, Ohio, Lebanon Univ., Atlas Club, Scholarship in Pathology, Class Baseball, Varsity Baseball, Athletic Editor of Neuron '16-'17.
 AUREL E. FOSTER, St. Joseph, Mo., three years in Academy of Sacred Heart Convent, assisted in Biology.
 JAS. M. TYREE, Webb City, Mo., Phi Sigma Gamma, Board of Control third and fourth terms, Class Treasurer two years, Business Manager Neuron third and fourth terms, Student Directory '16-'17.
 R. W. HILLRIEGEL, Passaic, N. J.
 R. D. HEYDENBURK, Bay City, Mich., Winona Academy.
 FRANK SNYDER, Stockton, Kans., Stillonian Club.
 NORVAL E. BROWN, Winchester, Ind., Phi Delta Kappa, Atlas Club, Indiana Club, Scholarship in Chemistry, Band '14-'15-'16-'17, Treasurer Band '16-'17.
 LORENZE A. RAUSCH, South Bend, Ind., Univ. of Notre Dame, Atlas Club, Football '12-'15-'16.

NINTH ROW:

MINNIE A. BOZARTH, Novinger, Mo., K. S. N. S.
 MRS. LIZABETH D. GEORGE, Sterling, Colo., Axis Club.
 LYDIA C. HUTT, Lawrence, Kans., Graduate Streeter Hospital and Training School for Nurses, Delta Omega, Class Sec'y. '15-'16-'17, Neuron Staff third and fourth terms, Osteoblast Staff 1917.
 LESTER R. MYLANDER, Oak Harbor, Ohio, Atlas Club.
 WILLIAM B. LAMB, Middletown, Ohio, Theta Psi, Class Baseball.
 HARRY J. CONWAY, Ottawa, Ill., Atlas Club.

History, June '17

Talk about summers being hot in Missouri! It was certainly cold enough at 8 a. m. on September 14, 1914 when we arrived, one hundred sixty-five strong, in Chemistry Hall, a shivering, shuddering bunch of Freshmen, surrounded by a whole school full of what seemed to us to be a bloodthirsty mob.

The necessary preliminary "paddling" over, we soon organized the class with D. C. Speck as President; Miss Bond, Vice-President; Lydia Hutt, Secretary; and James Tyree, Treasurer. These officers strove valiantly to steer us through the dangers of hair-cutting—for result—witness our abundance of hair.

Pushball proved disastrous, the Juniors proudly wearing our scalps; but they made up for our defeat by entertaining us royally the Saturday night following.

Our greenness faded rapidly and almost before we knew what was happening we found ourselves Juniors. It was we who instituted the Green Cap for the Freshmen badge, rather than "no hair", as formerly. We found pushball played with a football to be very strenuous and the game resulted in even honors for us and the Freshmen. Following this we entertained the Freshmen as Juniors usually do.

About this time we found work on the Osteoblast staring us in the face; and we surely broke the record on Osteoblasts, having had a \$2.61 refund to each of us! It was like finding a young gold mine!

In scholarship, June '17 has done her share; in athletics, we have furnished both quantity and quality; and matrimonially, we have been more than successful.

It is not without a tinge of regret that we look forward to leaving the good old Town, the College, the Faculty, and the students, especially those of our own class, with whom we have been so closely associated these three years. Our history here is ended but individually it has just begun, and having heeded the call of the "Old Doctor," we will do our best to perpetuate our science.

G.L.S.

June Seventeen

As you view the silvery brightness
Can your eyes withstand the sheen
Of the glories and the honors
Of the June class, SEVENTEEN?

We're the people, and we know it,
And we must respected be;
If you do not think we show it,
'Tis because you will not see.

In the school we've searched for knowledge,
And they've opened wisdom's tap,
Pouring forth a stream of science
Straight from our beloved "Pap."

We've absorbed, assimilated
All these lectures, that we could,
And you'll find, when we're real Doctors,
We will be a force for good.

Spreading news of our loved science,
Demonstrating how it's right,
You'll be proud to claim alliance
With the Purple and the White.

G. C. Mc.

 EUGENE D. PLATT, Atlanta, Mo., Mo. Valley Col. & K. S. N., Atlas Club, Pathology Laboratory, Fellowship in X-Ray.

History, January '17

February 5, 1915, was the beginning of a new era in the American School of Osteopathy, for it was then the class of January, 1917, was organized—the progressive class—the class destined to “do things.” Our capacity far exceeded our number, which was fifty-two.

After the task of organizing the *New Class* was accomplished, we made ready for the inevitable class fight, which we lost to the Juniors in the first pushball contest ever played in Kirksville. On the night following the game, the Junior-Freshman reception was held in North and Memorial Halls.

By the end of the first year we had lost several members, only to be replaced by the misfortune of some other class.

The third semester we met the large class of January, 1918, in a pushball contest, which was well planned. Although they outnumbered us, we made up for the deficiency in weight and the result was a tie. Following the contest, we entertained the Freshmen at Heinzman-Swigert Hall, where *real* class spirit and true fellowship were shown in every greeting.

Together with the staff members of the June, 1917 class, we successfully published a year book, which, under the wise supervision of the staff, came out free of debt.

We have been firm supporters of everything that would benefit the student body or the profession at large. To the places requiring *real* men and women, we have furnished the *best*.

As we look back over the three years, they seem far too short, but our history has only begun. The fifty-four now graduating will no longer make history as a class, but with our “Great General,” the beloved “Old Doctor,” we will do our part to perpetuate his name and practice the Truths of Osteopathy.

J. G. C.

FIRST ROW: Dr. Q. L. Drennen, Dr. C. J. Manby, Dr. D. A. Bailey.

SECOND ROW: Dr. T. H. Francis, Dr. Kate Calahan, Dr. A. D. Morrow.

THIRD ROW: Dr. N. K. Rankin, Dr. M. T. Boulware, Dr. P. A. Witt.

History of Fourth Year Class, September, 1916

On September 18, 1916, the second class to begin the fourth year work as now scheduled in the catalogue of the A. S. O., assembled in a well-appointed class room.

We numbered twenty-five. Many states were represented. Altho Dr. Charlie was the first of our professors to meet us, the feeling was not akin to our first meeting in Chemistry Hall as Freshmen. We were also allowed to leave our class room peacefully. We felt rather secluded at being given the Gynecology Laboratory room for our lecture room until one morning an honorable Senior remarked, "Do the fourth year people have gynecology all morning?" However the work received during the morning was very valuable and outlined at different periods as follows:

- Advanced Gynecology—Dr. Ella Still.
- Physical Diagnosis—Dr. Waggoner.
- Surgery—Dr. George Still.
- Dietetics—Dr. Henry.
- Technique—Dr. Earl Laughlin.
- X-Ray in the Treatment of Disease—Dr. S. S. Still.
- Proctology—Dr. Bigsby.
- Obstetrics—Dr. Bigsby.
- Comparative Therapeutics—Dr. Waggoner.
- Immunity and Infection—Prof. Lane.
- Eye, Ear, Nose, and Throat—Laboratory—Dr. Waggoner.

We are sure that the work has been of great practical value and hope that more Osteopaths in the field may avail themselves of the opportunity of taking the work offered in the fourth year at the A. S. O.

It might not be amiss to mention here the social time the class had among themselves on the eve of December 13, at the Alpha Tau Sigma Hall, where we gathered for a social evening of cards and dancing.

The following are the members who each in his place, helped make pleasant the fourth year:

FIRST ROW: Dr. O. C. Cole, Dr. G. K. Wilson, Dr. E. Laib

SECOND ROW: Dr. Elizabeth Crain, Dr. F. W. Griffith, Dr. Florence Town.

THIRD ROW: Dr. Dena Hansen, Dr. Jennie Chase, Dr. Mabel Gibbons.

Fourth Year Class History, Continued

Dr. Bailey, too young to practice, is waiting for Father Time. Meantime he is taking an A. B.-M. D. degree.

Dr. Calahan graduated in January, 1913, and returned to prepare to take the Indiana Board.

Dr. Crain also graduated in January, 1913, and wishes to return to practice with her husband in Indiana.

Dr. Cole has taken pleasure in assisting Prof. Lane in his laboratory every afternoon.

Dr. Chase:

“And good may ever conquer ill
Health walk where pain has trod:
As a man thinketh, so is he,
Rise then and think with God!”

Dr. Drennen is back looking after his farming interests.

Dr. Francis—one of our winning men on the football team this fall.

Dr. Gibbons—with both eyes turned toward the Penn. Board, but wishes to practice in the South, where it is warm.

Dr. Griffith returned because he could not take the Normal School with him.

Dr. Hansen, Dr. Ella’s assistant, expects to locate in Saskatchewan, Can.

Dr. Laib left during the holidays to practice in Ohio.

Dr. Morrow comes from Iowa after practicing there for sixteen years, but expects to locate in a city of greater size than his former location.

Dr. Munro, we found, attended class occasionally but objected to having his picture in another Osteoblast.

Dr. Manby represents our class on the faculty as an examining physician.

Dr. Manchester—“Gone, but not forgotten.”

Dr. Rankin expects to stay another semester—the reason? Still a mystery.

Dr. Russell prefers the Los Angeles School, altho he has been quite faithful about attending class.

Dr. Town—our class obstetrician.

Dr. Wilson we see most often on the football field and much of the success of our team last fall was due to his efforts.

Dr. Witt likes a green top table and a slippery floor and over-estimates a full house.

Dr. Boulware has returned to his southern home in Kentucky to practice.

Dr. Carson returned to settle the German War. Causes fully explained. Details and results mapped out, which may be expected to affect the world at large one hundred years hence.

J. M. C.

FRATERNITIES

-R.D. STEPHENSON-

This central section contains a collection of various symbols and logos. At the top left is a figure in a cloud. Below it is a shield with the letters 'A' and 'T'. To the right is a diamond-shaped emblem. The middle row features a laurel wreath, a fish, a shield with a cross, and another shield with a crown. Below the fish is a banner with the letters 'A' and 'D'. To the right of the banner is a shield with the Greek letters 'Γ' and 'Σ'. Further right is a stag's head with the number '464' above it and the letters 'BP' and 'OE' on either side. Below the stag's head is a Union Jack flag. At the bottom left is a shield with a star and the word 'STILLONIANS'. In the center is a large, dark, abstract shape. At the bottom right is a circular emblem with the letters 'P' and 'S' and the word 'SPIRIT'.

The Pennsylvania Club of the American School of Osteopathy is a permanent organization, whose primary purpose is to co-operate with and strengthen the forces of the Pennsylvania State Osteopathic Association, that it might thereby be the better enabled to overcome obstacles of the profession and to obtain better legislation.

The organization has another purpose however, that of Osteopathic Research. This work is headed by the Club's president, Mr. Boyd, who has from time to time secured the most able assistance of our faculty member, Dr. H. V. Halladay. This year our energy has been directed especially to the treatment of Hay Fever as outlined by Drs. Bailey, Edwards and Deason and thus far we have made fair progress and are inspired with the skill we have obtained. We hope that during the remainder of the year, we shall be able to improve in the technique given us and develop some of our own.

The Ohio Club

E. W. WILSON, *Pres.*

MINNIE E. MAURER, *V. Pres.*

G. C. NEAL, *Sec'y.-Treas.*

The Ohio Club, strong in its integrity, is still striving to accomplish things worth while.

The meetings held through the year were not for social purposes, but that we might show our appreciation and put our seal of approval upon the movement among the osteopathic physicians of Ohio toward a better legislation for the profession in Ohio.

Each student in the school, who hails from old Buckeye, and those who are anticipating Ohio as their adopted state in which to practice our profession, are considered active members of the organization.

The list below consists of those only who have been residents of the state.

Baseball

THE nineteen hundred and sixteen baseball season was a good deal of a disappointment to those of us who had had our hopes high from the no- defeat season of the previous year. Manager Ashley should receive our thanks for working out a snappy schedule, and had "Old Pluvius" kept his fingers out of the game so that the boys could have practiced more, and so that some of the schedule would not have had to be cancelled because of bad weather, we might have made a better showing, for it is apt to put a team off its stride when anything breaks in to change the regular order of things. But here we are in the second sentence making "alibis," and, take it from us, there were plenty of them served on a platter at the Owl Drug Store after each game we lost.

As usual, post-mortems were held after each game. These invariably showed that a wrong diagnosis had been made, but as to what the correct one should have been there was about as much difference of opinion as there were groups holding the post-mortems. But after the defeat by Kirksville State Normal School, everyone agreed that an inquest should be held at once. As an illustration of the general feeling we print the following conversation, which we are sorry to say has been sadly mutilated by the censor. A gentleman, not of the A. S. O., accosted us with: "Say, what t' **** is the matter with you fellers any way to let that sissy bunch lick you?" "Well, look at Neff. He pitched a fine game," was our humble reply. "Neff! Neff! that's what they all say; but look at the bunch of expert yaps he had to back him up. Blankety! blank! blank! (censor used these words in place of the original ones) you're a fine bunch of players! I could do better myself." We watched him thoughtfully for a while as he walked off in disgust. In our own hearts we knew that the Normal boys gave Neff very good support and were far from the bunch of expert yaps that our friend had seen fit to call them, and we were wondering what made him so particularly sore when a happy thought struck us. The next time he appeared we asked him in an off-hand manner; "By the way R— how much money did you loose on that game?" "Five dollars *****." (Note more work by the censor.)

We admit that the A. S. O. did not win as many games as she should have, but, take it from us, she gave Kirksville the best exhibition of baseball that ever graced its sun-baked mud when on May eleventh she went fourteen rounds with Warrensburg. This game was full of hair raisers as inning after inning the goose eggs were chalked up. Well, it got around to the fourteenth and Jack Conner announced that that would be the last. And then—Well its no use we can't describe it. We are just sorry for you if you were not there. We won. Enthusiasm ran high for the game the following day, but "Old Mutt Pluvius" put the "ras-pa-sas" on the whole thing by opening up with a down-pour.

ASHLEY
Catcher, Manager
Denison Univ., Ohio

GUMBERT
First Base
Verona High, Penna.

ADAMS
Left Field
Ohio Northern, Ohio

"Bob" is always to be depended upon and his judgment both as catcher and manager had a steadying effect on the whole team. He not only made a good back-stop, but that two-base hit in the ninth inning of the second K. S. N. S. game showed what he could do with the bat.

"Gummy" worked up quite a reputation for fast work on the bases. He takes mighty short steps but makes his legs go so fast that it almost makes one dizzy to watch him circle the diamond on a home run.

"Ned" covered left field in big league style and more than once he was accused of being a robber when he reached into the air and pulled down what looked to be a perfectly good hit.

WILSON
Captain, C. Field
So. Western U., Texas

FERGUSON
Coach
Nat. League Pitcher

YOUNG
Manager for 1917
U. S. Navy, B. B. Teams

"Chief" at the bat was sure to bring the grand stand crowds to their feet, for they always expected at least a two bagger, and "Keener" did not often disappoint them either. He plays the game hard in the field, at bat, or on the bases.

"Fergie" coached last year's championship team and we looked to him for a repetition of that record but luck ran against him and the breaks always went to help the opposing team.

"Jock" held down third sack during the 1915 season, and if he shows as much pep in managing the team as he did on the field we will surely have a fine schedule. Everyone was sorry that he was unable to come out for the 1916 team.

MCCRARY
Pitcher
Tenn. State League

ORRISON
Second Base
Ohio U., Ohio

ALEXANDER
Pitcher
Macomb Normal, Ill.

"Mac" got such a reputation last term that we looked for him to do wonders this season, but luck did not seem to be with him. Perhaps he missed "Freddie" in the back-stop position.

"Orrie" always keeps the gang on edge for he flops around just as if he never would stop a ball; but take it from us, if any one can way-lay the pill, he is the boy, for just as it is going by he reaches half an inch further and gathers it in.

"Alec" takes great delight in handing out strikes, and all you have to do is watch his face for that inevitable grin. In the second K. S. N. S. game he smiled so much that his face was not straight for three days.

CALDWELL
Pitcher
Warrensburg Normal

POCOCK
Right Field
St. Michael's, Toronto

HANSON
Catcher
N. Dakota Aggie

"Cald" pitched that fourteen inning game and had his old team-mates eating out of his hand during the entire game. This will be a record that will stand for some time, as it will be many a day before an A. S. O. pitcher has the opportunity to again hand out fourteen goose eggs in one game.

"Po" was a very safe man and no one worried when a fly went in his district, for they knew it would be gathered in, and a mighty pretty throw to second, third, or home would follow.

"Swede's" great ability at tearing off his mask and chasing fouls showed him to be a mighty fast man and reminded us of the speed he showed when circling the end in football.

O'CONNOR
Third Base
St. Michael's, Toronto

VAN DUZER
Second Base
Silver Creek High, N. Y.

ATEN
Third Base
Rice Inst., Texas

"Jack" connected with a ball at Westminster which "ran a-muck" and before it was gathered in, he found himself safely landed on third base, with a reputation that kept him on the jump in order to show the boys that he was "right there" as a ball player.

"Van" smiles as tho he just wanted to see how little he would have to move for the next one. To watch him on the diamond is all that is necessary in order to realize that he is "some pill chaser," and he will be expected to be on the job for two years more.

"Tex" is a hard worker and has a mighty good wing when it comes to getting the ball over to first. He and Jack had each other worried over the third base position and they both did so well, we figure that the race was a tie.

SALLENDER
Short Stop
Fort Madison, Iowa

"Sal" did not want to come out, but as the team needed him, he was persuaded to take his old job at short. We all like to see him play ball because he is so much at home on the diamond, and plays a mighty clean game. We extend our thanks to "Sal" and the boys that persuaded him to come out.

BATTING AVERAGES

Player	Times at Bat	Hits	Per-centage

Games Won—5

Games Lost—5

Football

Altho coach Vogel had been hard at work with his team for three weeks the nineteen hundred and sixteen football season, as far as the students were concerned, was not officially ushered in until Friday, October sixth; on which date was held one of the best mass meetings that has been staged at the A. S. O. in years. It worked up more pep in an hour than had been heard in North and Memorial Halls for many a day and well it might for just glance over the list of speakers: Dr. Charlie, Dr. Meacham, president of the A. O. A., Dr. Ashlock, whose practice as usual was better, his temperature being down to normal that morning, Rev. Acree, who by the way gave the livest talk of all, Jack Mills, Bob Ashley, and Tom Vogel. "Pete" Hancock and "Lip" Lipman were right on the job with Oskie-Wow-Wow's and "Now y'r sneezing's," and take it from us the crowd was worked into fine shape for the game with Parson's College the next day. In this game the boys hit their stride from the first whistle and altho A. S. O. played circles around her opponent, Hansen doing some particularly fine circling on end runs, it was an interesting game to watch. Probably the biggest piece of comedy in the whole season came in the last few minutes of play in this game when Davis was put in to see what he could do. He called a play that was misunderstood and found himself holding the ball with no one to give it to, so he tucked it under his arm and carried it thru for a good gain. Knowing that time would soon be up and wishing to spike as much fun as he could he at once called a regular quarterback sneak play and got away with it for a touchdown.

The next week the boys were busy down at Rolla annexing the Miners to the tune of 27 to 0. It surely sounded good to get that news for that bunch was about due for a drubbing and from all reports they were ready to stop when our boys had made the last charge. The game was marred (that is for Rolla) by poor little Maxfield. He seemed to have the itch or something, for while standing on the 57 yard line he kicked out that right leg of his and happened to come in contact with the pigskin that somebody had accidentally (?) put there. For a minute the crowd thought that he ought to be hurried to Macon, but when the ball cleared the bar for a goal from the 57 yard line, they had to pinch each other to make sure that they were not asleep. If we are not mistaken, this kick will stand as a record for some time. This game was the best handled in so far as the referee was concerned of any game in the series and well it might be for D. J. Henry, who officiates for Michigan, Carnegie Tech, Minnesota, and other well known institutions held down that job. He was very much pleased with the way A. S. O. played and even went so far as to say that there were three of our men, if not more, who could not be kept off any of the larger teams of the country. We knew it all the time, but it sounds rather nice to hear it from such a "big gun" in football as D. J. Henry. In fact, we believe, that we had a line that could not be surpassed by any of the colleges.

On October 28th, A. S. O. had a brain storm which broke in all its fury about the middle of the afternoon. People for miles around wondered what calamity was

approaching; but after about two hours the rumbling subsided and the outside world learned that the calamity had come to C. B. C. A list of those who starred in that memorable game, would include every player and every rooter, that was on Normal Field the afternoon of October 28th. It was a grand spectacle to see and hear, for everybody was bound to beat C. B. C. and 26 to 8 was entirely satisfactory. The work of Gumbert was particularly noticeable, for he seemed to advance the ball every time it was given to him, and once for sixty yards. Wilson too was "there a million" and made one of the most sensational tackles of the season when C. B. C. annexed one of our forward passes and started for a touchdown with no one but Wilson in the way. We don't yet know how it was done but with an extra lunge Wilson nailed his man and a burst of applause announced the fact that that danger was over. Captain Ashley was everywhere to be seen and the way he, time after time, smothered the plays in their mere infancy was a sight to behold.

The next three games were pretty easy picking for the teams were not in our class "A-tall." They were not without interest tho, for do you remember how Deeming forgot that he was playing football with the Vets and started to dance the Virginia Reel down the field? Several Vet men wanted him as partner but he did not take to the idea until three simultaneously asked him. Do you remember Adams coming around end every time for a gain and the speed he showed in passing opponents? Did you ever see such interference as was worked in this game? The boys began to show the effects of the "immunity and infection" that they had learned by hitting the tackling dummy day after day. Did you see Maxfield miss a goal in that Vet Game? Nix! And last but not least can you hear the cheer when the Vets' coach went in to finish the game? And then to think that that bunch annexed a fumble by Wilson and gave "Baldy" a chance to get an unearned touchdown. Do you remember the Omaha game where the boys just couldn't be stopped and made the game look like a track meet by piling up the record score for the season in Missouri, namely 108 to 0?

And then do you remember that sick feeling; that otitis externa, media, and interna; that cerebro-spinal paralysis when the news from Warrensburg came in? We knew the boys had a tough fight on their hands, but we did not count on those terrible forward passes and officials who cheered whenever odds went against us. But the symptoms have all cleared up and the best football team in the history of the A. S. O. ("doggon that 1902 or 1903 bunch whoever they were. That is ancient history and does not have to be included"): we repeat, the best football team EVER gets our sincere appreciation and thanks.

Football Schedule

October	7th, A. S. O.	57	Parsons College	0

Grand Total,	A. S. O.	358	Opponents	43

COACH

THOMAS A. VOGEL is a gentleman, a scholar, and an ideal football coach. He never asked a man to do what he himself would not do and thereby had the confidence of every man on the team. His popularity was demonstrated by his being elected captain for 1916, which position he gave up when he was appointed coach. He knew every angle of the game and showed good judgment in picking the right man for the right place. His experience in football was gathered in Eastern schools, Holy Cross in particular, and this coupled with his ability to handle men made him the most successful coach in years. We thank him for his untiring efforts and extend the appreciation of the entire student body.

MASCOT

BYRON BLEDSOE, aged five, was on hand every day to help the coach and once in awhile would take a swing at the dummy himself. He was always there with:

Oskie—Wow—Wow!
 Skinne—wow—wow!
 Osteopaths!
 Ribs raised, Bones set!
 We cure! You bet!
 Osteopaths!

CAPTAIN R. M. ASHLEY is always "there a million" in every thing he undertakes, and we take our hats off to him both as a captain and a football player. He never lost his head and was constantly outguessing the other team and thereby often smothering a play before it was well under way. His grit and determination was an example to everyone on the field and no opponent ever had occasion to complain of him, as he played an absolutely clean game.

G. K. WILSON has played well every year but we believe that this year was his best and that tackle in the C. B. C. game was a masterpiece of football. He was fast and except for a rare fumble played star ball. His broken field running was demonstrated in Warrensburg where in the last few minutes of play he broke away for a 55 yard run.

L. E. BROWNE was a consistent trainer and kept himself in shape at all times. This was demonstrated by the way he would gain ground whenever he smashed the line. His line plunging was really a feature of the season and was admired by everyone. We are sorry that he suffered a broken scapula but if it had to come we are glad it was in the last game so that he was with us all the season.

E. J. REMINGTON has probably attended more practice in the past three years than anyone else on the team and it is this kind of pep that wins in the long run. We appreciate his work and are sorry that one of the Omaha players connected with his clavicle.

R. N. BLACKWELL had a real job on his hands trying to get a schedule that would be interesting for the team this year. Most good teams are in a league and can not play independents, but he gave us a very good season and perhaps we may in the near future get in a regular high class league which would make it more interesting for the players and more exciting for the rest of the students.

M. R. RUNIONS has more than once been seen tearing down the field like a race horse. When he hit a man it was known too, for something happened. He always paid attention to the game and made a good steady player.

J. E. GUMBERT is built so that players have a hard time trying to tip him over. They get to him, but can't seem to stop his onward rush which, time after time, brought the crowds to their feet. The speed with which he got away and the fact that he never quit until the whistle blew made him the most consistent ground gainer on the team.

W. C. MAXFIELD proved to be a wall on the defense and a battering ram on the offense. He was always where the ball was and when carrying it, thought nothing of carrying a few opponents along too. The 57 yard place kick he scored in the Rolla game will long be remembered as will also his accuracy in all of his kicking.

L. A. RAUSCH was always in the thick of the game, from the time he went on the field, until the whistle blew to quit. We have seen many a drive hit him and go no farther for his weight and knowledge of the game, made a stone wall of his position. The harder the game the better he enjoyed it.

R. N. WALTON seemed to be a hard man to handle, for he is all muscle, and stands up under abuse like an old war horse. The man he played against always knew that there was a football game going on, and it was not one of those "After you, my dear Alphonse" kind either, but I am AFTER you. We have nothing but praise for the way he took care of his position.

J. POCOCK is just naturally a born punter, and gets the ball away in fine shape every time. In the Rolla game he averaged 50 yards to a punt, which is some record and yet was only just what he did all along. He had confidence that our stone wall line would hold to give him time and the boys had confidence in him, a combination which brought results.

H. L. KREIGHBAUM took a hand in the scoring game by dropping on a ball that Maxfield had kicked beyond the goal line. This was just one instance to show that he was always on the job and will bear watching in the next three years. He is a fine player and such a hard worker and good trainer, is bound to have an enviable record.

E. B. ADAMS played a fast game and, time after time, outran a man that should have had him. This was particularly noticeable in the Lombard and Kansas City Vets games, where he would get away for 20 or 40 yards at a time. In the Vets game he intercepted several forward passes and scored five of our touchdowns.

T. H. FRANCIS was interesting to watch for he seemed to have the clipping game down to a science. Do you remember how worried he had the C. B. C. players? After he had clipped his own man he would sneak up and clip any of the others that happened to be so foolish as to be standing. He had all of C. B. C. watching their heels and proved to be even more valuable than in his previous years, and, take it from us, that is saying a good deal, too.

G. W. HOWARD made such a good center that he never had to fear that anyone would cut him out. He displayed lots of pep and mixed it up every play with some poor fellow just so as to give his opponent something to think about. He played as good a game as anyone on the team, and we are sorry that this is his last year.

H. S. HANSON played in his old time form with lots of pep and plenty of speed. When he had the ball he was a mighty hard man to catch and when the opponents had the ball he was just as hard to dodge. His end runs were sure to bring deserved applause in the same way they did last year.

C. H. HANCOCK was never known to be quiet at any athletic contest and was therefore chosen as cheer leader to keep the grand stand noisy. He says, "Doggon man! the way that line held ought to make anyone cheer." Pete was always on the job and if all Texas steers are like him, let's have some more of them.

DR. H. T. ASHLOCK is as much of a football fan as anyone in the A. S. O. He is not only always on hand as "platform walker" at mass meetings, but is also right on the job when one of the boys gets hurt on the field. A game would not be complete without him.

TOP ROW—Hanson, Aten, Ashley, Maxfield, Kreighbaum, Mearns, Rausch,
 SECOND ROW—Remington, Caldwell, Runions, O'Connor, Young, Wilson, Adams,
 THIRD ROW—Gumbert, Johnson, Howard, VanDuzer, Garmroth, Morris,
 BOTTOM ROW—Manhart, Walton, Vogel, Blackwell, Browne, Forster, Drennan.

body. The arrangement of interclass contests is provided also by the Board, and the same methods employed that govern and further the intercollegiate games.

Since the date of organization, a great difficulty has been ever experienced in procuring sufficient substantial support from the student body, a financial deficit consistently marks the close of each athletic year, and the existence of such a condition, along with an annual augmentation seriously enhances the hope of a hardy old age by the Board of Control.

Moral support, however, is an abundant factor and insomuch as the hearty good wishes of the student body are therein concerned, the Board should progress magnanimously thru the imminent years of College Life at A. S. O.

Oh the cats on our back fence,
People say that they've got sense.

MUSICAL

R. D. Stephenson.

Music

MUSIC, AH! You ask, "What is music?" And we echo back to you, what is music? We turn for a definition and find that it means melody or harmony; but does that express it? Nay, nay, Pauline, we must search deeper than this to be satisfied. Is it real? If so, where is it? Of what does it consist? You may say, there is the instrument; and what is the instrument but a mechanical device. Again, there is the voice; but a mule has a voice. Possibly it is sound, harmonious sound if you please; and it can be explained that the north wind whistling in the chimney has these qualities.

The flat-dweller will say, it's the racket on the floor above. Father will say it's what keeps him broke, Marjorie's lessons are so expensive. The German will refer you to the little band on the corner, and the Italian will answer by grinding off another reel on a "da org." The small boy has an idea it's what puts the Deacon to sleep in church. The society aspirant will rave to you of some Prima Donna, because 'tis fashionable, and the money-chaser will tell you it's the jingle, jingle of the dollars as they rattle in his jeans.

From whence did it come? We know not. Follow it to the City, to the Continent, to Rome, to Greece, to Egypt. Then on, on back thru the ages you may chase, only to find, at the end of your journey, a Harp to repay you for your trouble.

We attempt to fathom its abilities, and find they are limitless. It will start somewhere in the lower segments of your Spine, sneak insidiously up, slip under your Diaphragm, tickle your Liver, then crawl under your Heart, and grapple with your Soul. It will pick it to bits and reassemble it, crumple it up and dash it with fury against a stone wall. It will spread it out, whiten it a little, and soar with it thru infinite heights. Then when your happiness seems supreme it will drop it into an infernal abyss to smolder in fire. It will swoop down and grab it, and lo and behold it is gone; then when you wake up you will find it intact, and be filled with wonderment.

It will make a man hate his wife, yea, verily, beat her unto submission; or will occasion him to slush over with undue affection. It will drive a man to drink Coco Cola, or will so excite his Parotid gland that he can compete with a camel. It can induce you to be measured for a dress suit, or you may wear your pajamas down to breakfast. It can make a philanthropist of you, or can make you forget your last month's grocery bill. It may even make a man of you if you give it a chance, or it can drive you into the depths of despair. And still you ask, "What is music?"

We do not know. We cannot tell you. For truly, what is music to one man is discord to another. Search your own Soul, scour it up a bit, then lift it up on a level with your highest appreciations, and that will be music to you.

And still you ask, "What is music?" We will echo back to you; The A. S. O. Band, The A. S. O. Orchestra, and The A. S. O. Glee Club.

A. S. O. Band

Neuron Extracts

RUSHING THE CARNIVAL

Friday afternoon the Lower Seniors, on mischief bent, lead by our old friend Lip, started out to see the carnival. It did not take long for the fellows to round up a good sized crowd. As they marched around the square, the ranks were swelled to a representative body of Osteopaths, and all classes were represented by the time the crowd reached the grounds.

The manager of the carnival started the boys at the minstrel show. Of course, the days of '49 were visited by some of the braver of the bunch and all got out alive.

The real sensation of the day was caused when one of the dignified Seniors endeavored to persuade the "Cigarette Girl" to reform by the Osteopathic Route. Of course he was after the job of treating her. But, fearing that a romance might result and, not being an experienced housekeeper, the fair lady decided it would be for the best interests of the Exponent of the Science if she would continue in what he so sincerely voiced "The Life of Sin."

The Spider Girl made a hit with some of the boys and enjoyed her Social Tea chats with the Ladies of the A. S. O. So enticing were her stories that a few of the girls are under surveillance, it being feared they might join her in the near future.

Lipp's "Old Time Sneezing Pep" was much in evidence and the management, as well as the students, thoroughly enjoyed the trip to Joy Land.

Mention should be made also of the fine work in the motordrome. "For Cheseese Sake" you ought to have seen dat boy and gal ride—mm, mm. "Let's go."

CANE RUSH

This being one of the great events in the routine of school life, much importance is attached to the *real party* and to the preliminaries. As usual, the Juniors took care of the preliminaries—and also the party. The streets leading to the A. S. O. were plastered with posters reflecting on the character and courage of the poor Freshies and inviting them to show their spirit and engage in mortal combat with the much-vaunted Juniors. Not being satisfied with this, the Juniors also stuck a gas-pipe in the middle of the campus (much to the disgust of Tom Vogel) and hung their colors on it. Naturally, they thought the Freshmen would try to pull it down and were prepared to defend the honor and fair name of June '18. June '20 refused to be dragged into such an undignified struggle, so the Juniors' hopes were crushed. Having nothing else to do, they decided that it would be the proper stunt to break school, which was done very nicely. A nice, warm time might have developed during this process, if the janitors had only possessed a sense of humor and not locked up the fire-hose.

Immediately after lunch, the Freshmen got their gang together and, between drums, horns and fireworks, they kicked up quite an uproar. That made the Juniors sore, so

they proceeded to show the Freshies just how it was done. After parading around the square fifteen or twenty times and, incidentally working the band to death, the two parties adjourned to the scene of combat, where they stalled around about an hour before getting down to business. It seems that the class committees had failed to provide a suitable cane, so a broom-handle was pressed into service. A broom-handle is a very delicate piece of furniture, so it didn't last long and the first half was finished with a football. By the time the second half started, some one had dug up a pick handle, and this was used with much better success. It didn't take long to show that the Juniors had quite an edge on their opponents and when the final whistle blew, they had dragged a howling horde of Freshmen over the goal line five times.

While all this was in progress, one enterprising Freshman thought he saw a good chance to put one over on the Juniors, so he got busy and the eyes of the returning crowd were greeted by the sight of large yellow posters describing the mental and physical qualities of the Juniors. This proved to be a horse on him, as he is now shorn even as the bleating lamb. Yea verily, the way of the transgressor is hard.

Everything is all settled now and the students may look forward to a long period of peace and quietude, unmarred by class brawls and the cry of "Let's Go."

NECK TIE CLUB

The Neck Tie Club, which has now been interpreted into Nu Tau Chi, belongs to the immortal class of June '17. It is an honorary Senior Fraternity established during the past year. Its membership is made up of those who have obtained merit in scholarship, athletics and "politics". Its design is to improve skill in science and to unite chosen friends.

The Nu Tau Chis have on the Board of Control, President "Tom" Vogel; Vice-President "Joe" Sterrett; and members, "Doe" Hart, "Gene" Bueler and "Nat" Boyd.

We are represented on the gridiron by Coach and Captain "Tom" Vogel and "Bub" Howard, "Deacon" Runions and "Garmy" Garmroth. "Herb" Lipman presides at the grandstand. This battery—"Irve" Alexander and "Liz" Bolmer—gives us a berth in baseball, as does "Ton" McCabe, ex-Baseball Manager. "Midget" Manhart manages A. S. O.'s basketball team. "Brownie" Brown is treasurer of our class, band and glee club.

Last year "Jim" Tyree was Business Manager of the Neuron and "Joe" Sterrett was its Circulation Manager. This year "Gene" Bueler is Editor-in-Chief, "Liz" Bolmer is Athletic Editor, and "Nat" Boyd is Advertising and Business Manager.

The other "Ties" not yet mentioned are "Ding Dong" Bell, "Joe" Bunker, "Cape" Capers, "Judge" Clark, "Connie" Conway, "Bobby" Cox, "Giant" Crosby, "Bill" Currie, "Fairy" Faires, "Farky" Farquharson, "Mitch" Mitchell, "Monday" Mundis, "My" Mylander, "Pat" Reilly, "Shug" Shugre, "Bob" Souder, "Arch" Stout, "Rip" VanVleck, and "Welk" Welker.

Kirksville A. O. A. Auxiliary

The American Osteopathic Association conceived the idea that it would be a fine thing to show the student while he was yet in school the benefits of organization so that when he went into the field he would at once cooperate with his fellow-practitioners and thereby more rapidly advance the science and profession of Osteopathy. With this in mind Dr. A. G. Hildreth of the Still-Hildreth Sanatorium, Macon, Missouri, was sent to present the proposition to the student body, and a mass meeting was called on the fifth of May, 1916. At this meeting Dr. Hildreth explained that the profession was interested in what we students were doing and wanted to do all in its power to make us more efficient doctors, and wanted our assistance in maintaining the standards that the American Osteopathic Association stood for. He read a letter from Dr. C. A. Pengra of Portland, Oregon, which explained the objects of the movement and asked for our cooperation. The matter was discussed and it was decided that, as the Board of Control handled all student activities, that body should take up the responsibilities as a temporary committee on arrangements for a permanent organization.

On May eighteenth when Dr. Hildreth was again in town he talked the matter over once more with the result that we set to work getting members so that those who intended to join could do so and have a vote in the election which was to take place the next day. The following day, May nineteenth, a meeting was held with the president of the Board of Control, Ned Engler, in the chair. The following officers were elected:

- President—Perrin T. Wilson, January 1918.
- Secretary—Katherine Lawrence, June 1918.
- Treasurer—Herbert L. Benedict, June 1917.
- Vice-President—F. J. Beal, January 1917.
- Vice-President—L. A. Glaze, June 1917.
- Vice-President—G. M. Stevenson, January 1918.
- Vice-President—J. Eades, June 1918.
- Vice-President—T. C. Holmes, January 1919.

And so the first student A. O. A. Auxiliary was set in motion. As the election was held so near the close of school there was little that could be done but get more members and begin to formulate plans for the coming year.

Dr. Hildreth had previously explained that one of the privileges would be that each Auxiliary member would receive, each month, a copy of the Journal and those who joined before the close of school had the pleasure of starting in with the summer numbers. During the vacation the executive committee worked out a plan with the National organization whereby we could have four successful field doctors a year as delegates to come and tell us of the things we would meet in the practice of Osteopathy.

In the fall the vice-presidents went to work rounding up new members with the

result that it was not long before we reached 350. The first meeting was held on October seventeenth and was a grand success. The A. S. O. band was there to give us a good send-off after which the minutes of organization were read by the secretary, and an election was held for a vice-president to represent the class of 1920, with the result that Miss Slocum was given the honor. Dr. Charlie Still gave a particularly fine talk after which Dr. Reid Kellogg told of some of the things that he had seen done by that subdivision of Osteopathy known to the public as Zone Therapy. Dr. A. G. Hildreth was then introduced who, in behalf of the National organization, brought us a welcome which made us feel that we really "belonged". He told some of the interesting results of pure, unadulterated Osteopathy and said that although other systems can diagnose with delicate accuracy, yet in method of actual treatment Osteopathy is unsurpassed.

The second meeting was held on December fifth, and nearly five hundred attended, showing that the student body is increasingly conscious of the importance of the Auxiliary and the advantages it offers. The A. S. O. Glee Club appeared for the first time at this meeting and received the hearty applause that it deserved. Dean Laughlin spoke on the value of organization both to the individual and to the cause of Osteopathy as a whole, and said that 100 per cent membership should be our goal. Following his talk the audience rose and led by the Glee Club, sang the first verse of America with a vim that made North and Memorial Halls fairly shake. Dr. Canada Wendell, President of the Illinois Osteopathic Association, then told of the fight in that state to obtain a satisfactory legal recognition. He told how much had been accomplished through the concerted efforts of the Illinois Osteopaths which could not have been done by individuals. In spite of a heavy annual due nearly every practitioner in his state is a member of the state organization and every one of them is ready to stand together in any difficulty for the good of Osteopathy in Illinois.

The third meeting is to come some time in February and the last one in April. These meetings are being looked forward to with a good deal of interest for the ones already past have proved the value of the organization. Membership is increasing every month and we predict a great future for the Kirksville A. O. A. Auxiliary.

The 1918 Osteoblast Crab

Compartment collected and compiled with great cunning by a committee of crazy crumbs in collaboration with a company of callous croons, Compelled by conflicting circumstances and consciences to come to certain conclusions which contain condensations of the complete caboodle; calculated to corrupt without consideration; conforming to no conglomeration of caustic and crabbed counsels; complacently condoning criticism and concealing all consistency with contempt.

RULES OF ETIQUETTE GOVERNING THE CLASS ROOM

1. When entering the class room during the session you should always be talking loudly, or whistling, or if you have a little vocal talent, sing an aria from one of the latest Italian Operas. This manner of entrance is very desirable, not only because it will attract the attention of everyone in the room, but it will also give you a grand entree.
2. After having slammed the door, walk to a convenient seat, assuming all the while a bored expression of disinterest, as though you had just bought the school.
3. If there is but one seat unoccupied, and several persons to be seated, rush madly for it and loudly assert your right to it. If you happen to knock anybody down in the hurry, tramp on him; he should not be in the way.
4. If the temperature of the room is uncomfortable secure a chair and draw it up to the radiator. No matter if you do block the aisle; it was only put there for your special benefit, anyway.
5. Strike up a conversation with anybody in the class, the farther away the better. If the Professor or any student has the effrontery to remonstrate, freeze him with an icy stare. You have paid your tuition and are entitled to some privileges besides being flunked.
6. After you are tired of annoying those about you who have been trying to get something out of the lecture, dig around your pockets and find an isolated piece of candy, or some paper, sticks, or other material that make great shooters. It is always fun to hit a bald head, or a fair maiden intent on her notes. You might even find some paper that you could tear up and scatter on the floor, as a carpet for your feet. You might take a medium sized bite of Horse-shoe, lean your head over on the seat in front of you and "let 'er drizzle". Always remember the janitors need exercise, and besides, the class rooms are well drained.
7. It is well to remember that nothing is so appreciated as art, so if you have any ability along that line there is no better time and place to exercise it than during the class hour, with a dull knife upon the back of the seat in front of you. Furniture is cheap nowadays, and manufacturers have such little sense of decoration, anyway.
8. When class is over make a grand rush for the door, grabbing a cigarette on the way, for you know that in an hour the smoke in the hall will have almost subsided, which would be very detrimental to health, if continued for any length of time.

Linnie, why don't you leave John alone? If he wants to fight, it's no skin off your nose.

Now, Nellie, what's in a name? Don't let your angry passions rise just because the Professor calls you Brat for Bradt once in a while.

OUR OSTEOBLAST

This Osteoblast's a great invention;
 The school gets all the fame;
 The printer gets the money,
 And the staff gets all the blame.
 The world, tho' old, yet, likes to laugh.
 New jokes are hard to find.
 The whole of the '18 class,
 Can't tickle every mind.
 So if you meet some ancient joke
 Decked out in modern guise
 Dont frown and call the thing a fake
 Just laugh—don't be too wise.

A PLEASING SPECTACLE

(Dr. George and Dr. Ella standing together)
 Junior (From Boston)—"You don't often see two such great Osteopaths together.
 It is somewhat of an impressive spectacle is it not?"
 Dr. Ella (aside)—"He is the impressive sight so I must be the spectacle."

We sympathize with you, Veronica, for we realize that if the wheels of matrimony run according to Hoyle you will, eventually, see where the bliss comes in.

Mabel is some Obstetrician. She never leaves the field of battle, but camps right on the job.

IMAGINE IF YOU CAN—

Burkstresser with a clean collar on,
 O'Rourke with a hod,
 Wycoff with a date,
 Baird with an "A",
 Mrs. Johnston cutting class,
 No nodding in Warner's class,
 Earl Jones in the High Jump,
 Chamberlain in knickerbockers,
 Miss Owens without a sandwich,
 Dodge sitting with the fellows,
 Boatright at prayer meeting,
 H. H. Stewart in the Girl's Glee Club,
 Cowger with short black hair,
 Mac Sellers weighing 200 pounds,
 Brott refunding tuition for holidays,
 No smoking at ten-minute period,
 Lane calling the roll,
 Gerdine without a walking-stick,
 The dog surviving a Physiology Lab.

What a privilege to have such an angel in the class. Remember, "Dovie," as you sail through infinite heights, we were all together in Kirksville, once.

O, Mary, how you do twist and twist. But then we know you will get unraveled some day, and take the kinks out of other people.

TAKE HEED

Just keep the heart a beatin' warm,
 However bad your busted;
 Look for the rainbow in the storm
 But, keep your spine adjusted.

Be brave to battle with the strife;
 Be true when people doubt you.
 Don't think a lesion means your life
 But, see there's none about you.

And, when its time to shuffle off,
 And you are past reflection,
 Just put your trust in Providence,
 And your body in dissection.

PRACTICAL ANATOMY

The class in Anatomy had a rare opportunity to study the structures of the throat, recently, when Morrell went to sleep in class. The class was compelled to stuff their ears with cotton before attempting a close examination of the yawning cavity.

Now, Mrs. Heint, who said Fred had anything to do with Dr. Tucker's resignation, and, besides, you shouldn't argue with your husband.

Some people claim you are a good Chum, Dorothea. But why do you persist that the hypophysis, and epiphysis, are the same? You know it isn't so.

KINDLY NOTICE:

- My Scholastic Standing—Mrs. Johnston.
- My Wonderful Voice—Salmen.
- The Pushball Score—Class of June '18.
- My Atlas Pin—Esther Taft.
- My Clever Puns—Mabel Wartig.
- My Dates—Mildred Tuttle.
- My Girl Back Home—Gumbert.
- My Happy Ha Ha—Charbonneau.
- My "I" Sweater—Mildred McKoin.
- My Atlas Pin—Luella Brink.

Dr. Henry (at 9 A. M.)—"Those roughneck Seniors are an awful nuisance."

THE TURKEY DINNER

L. C.—"See what I've got!"

Mrs. L. C.—"Why, that's the neck, see there's the Cauda Equina."

EXTENSOR, FLEXOR—(WHERE IS IT?)

Dr. Waggoner:—"Freeland, give the relations of the radial artery."

Freeland:—"Well,—ah—er—r—um—The extensor flexor pollicis—um—and the—."

We've only one kick to make on you, May; you make too much racket. You'll have to cut out the noise if you ever expect to succeed.

Remember the day High Henry landed on you in Chemistry Hall, girls? But then what of it, High was probably jealous, that's all.

A JANUARY EIGHTEEN AUTO.

If I wished to make an automobile I could find plenty of material for its construction in the January, '18 Class.

For the body of the machine I would use Pierce's feet, and Al Carson's ears for the mudguards; both are sufficiently large. Templeton and Leopold would make splendid axles because they are so well seasoned. Gahan's neck would make excellent tires, for it is all rubber. Dorothy Sawyer would do for the steering wheel, she is so easy to turn. For the crank, Mrs. Pumphrey is one made to order; G. K. Meyer would answer for the "honk-honk," as he has such a good whistle. For brakes, I would use Gady, he's always broke; "Emmy Lou" would make a serviceable windshield, she is so transparent. For the headlight I would use Gordon's dome, it's such a good shiner, Climer would furnish the wheels, he has plenty of them. And Heint would make a splendid tool-box for he is always loaded with material. For the hammer to put the machine together with I should use (?)—She is a good knocker. For cushions any member of the class would do, they have been sat on so many times, by the Faculty, in the last two years, they actually feel like upholstered furniture. For air to fill the tires, O. S. Kelly could furnish enough for a whole garage.

Bob.:—"Oh, I know you."
 Titsworth:—"Who am I?"
 Bob.:—"Nobody."
 Titsworth:—"Good Heavens; I'm discovered."

What a model you are for attention, Louise. One can almost see the lecture shooting into your receptive cranium. Soak it up, you'll need it all some day.

O Sell'sy, what enticing lips; talk about chemical affinity,—it's an "also ran". Be more conscientious, Sell'sy, when you jump onto the human spine.

STAKE RACES

N. B. PUBLIC:

Anatomy Race Course is henceforth open only to Trotters. No others are fast enough. Careful, semi-annual experiments have shown that the public likes good trots. There are more breaks in the preliminaries, furnishing the necessary excitement for other competitors. Judges will award stakes to the driver with most nerve. Good field assured this season.

Hospital ready.

S. S. STILL,
 DR. POTTER.

Juniors, Jolly Juniors, we,
 Used to fun and Jollity,
 Never known to care a pin,
 If we're late, or, if we're "in";
 On our way rejoicing run
 Right thru classes, games and fun,
 Say! '18 is going some.

Dr. Hamilton: (in Physiology)—"Adams, where does the alimentary canal begin?"
 Adams: (Promptly)—"In the ear."

We say Lula amounts to something in a class fight. If all the women were like her, there would be no opposition to suffrage. We're all for Lula.

MORE HYMNS FOR THE A. S. O.

Gee, that must have been some sunset that looked like a drunkard's stomach!

ITEM

Mrs. Barton of the Junior class has been appointed assistant to Dr. Lane in the Pathology Department, and has assumed her duties. It is understood that in case of Dr. Lane's inability to officiate, Mrs. Barton will substitute.

DUKE'S MIXTURE

Wright after the bell rung for Chappell the Crew-s-tarted for the Free-land where there was a Clay-poole, upon the Brink of which the Miller held forth. Most of the bunch went in a Carr, but Thomas rode a Cole Black Steed, and William-S-trowd off with a Kane.

Arrived, Ho-ran for fuel, Bradt an armful and started to Burrn-ett. The Baker furnished the grub so we layed to. Moff-et, but it made Sherr-ill,—Ril-ey-s-tomach I guess; Jone-s-ays, "Wyc-koff it up, and Ihde Pump-hrep-s-tomach out before she gets it, maybe Hein'l do it." Reger saw Barton Eade-s-ome White fish, and Wartig Stoff-er-self with Cunning-ham.

The feast ended, Wilson being a Fisher, tried to catch a Salmen, Will-ey do it we asked? No, he was a poor Dangler, he yelled Long for Mumma, and fell in. Quade said, "He Went-worth trying to save," but Shann-on the bank said, "Van Wink'le Wade Moseley in and grab him, and Shakle-ford in and help."

Flint, and her Friend Steele, Dodge-d behind a Bush and started to spark; he tried to Holt her hand, and said, "Oh you Le-Dahl! come be my Valentine, if you Wilt Nudd your head, and I will Neal with you in the Temple (t) on the Ca-hill, with the Moats around it, and we'll take a Howes in Compton." She exclaimed, "Leop-old man, your a Keckler; I need a Knapp; don't think cupid is Bowman enough to Pierce my Rummel-hart, and you shouldn't Leer at a Jayne so; Me-yer smart; you can't Kid-well enough to Harris me; don't Krauss my path again." They denied it, but Dun-seth, "Clark Saw-yer, don't think you Ke-lly to us."

Gah-an Burtt, a Coupl-in league says, "Say Tits-worth a million, let start a game," so Po-cock-ed himself in one seat, and Han-cock-ed himself in another, then with Chamberl-in, and Bruns-on the job, the game started. Fitch proclaims, that Ed-wards the Betts, and Ed-mund his own business, and inquired, "Has-kins anted? if not she better Hawk-in-s-omething and play." "It's Mc-call," shouted Hansen. It was Cald-well, but George heard Ram-sey that Carson should have Fo-ley down his hand, and Ash-ley down his, and Charbonn-eau take the rake-off. Ol-ney kicked because Lang had a King, and swore O'Rourke was a Schindler and a Snyder, and was Roben her outright. Robert-s-ays, "Tut Tutt-le-edle girl; Van Duz'er with a cold soue." Hein'er, Purkitt, or someone heard Riegart Teal Newburn, that Roulston was Owen-s-omething like two-bits, and that M-earns Maur'er nearly as much as the whole caboodle. Weber yelled, "Who are the honest players here?" and Ventress says, "Dav-is, Lew-is, and Norr-is." Mer-cer-tainly raised Morr'ell than all the rest. Guilbert inquired of his Budd, "Mc-El-wee get in?" but Breeden says, "not by A-dam-s-ight," and fired them out. Fauver says, "Who Sells the chips," but Lang-litz into her, and the Sellers had to quit business. Could Bald-win? never, with Bigsby and Jord-on to things like they were. Ammerman pulled A-ten spot and placed it on Gady, and says, "I-bach you with all Mc-Kay-l," but Luiten says, "I Beat-y don't win."

After the game Taliaferro says, "I ha-V-an Wyn-garden, bring the Boat-right around and we'll all go over." Hackleman and Lawrence got full, then Gorrell

inquired, "Mac-Ken-zei sing?" Warters says, "No," so Ander-son-rouously bellowed Steven's-on-ata, and Ashton yelled, "Brekke-toff." Lister asked, "May I chew your Gum-bert," and it gave Stewart Reiger-gitation of the mitral. Johns-ton-gue got sore, she said Bealafeld bit it. Taft got a Re-nnich, so Taylor told Berkstresser to Reub'er neck, but not to Schaf'er.

Ealy, Deeming it time to Wendel our way home-Ward, so stated, so Ju'en-al the rest started. On the way Hopkin-s-aw a Cow-ger-ted up with a Gors-line, eating Ver-hey out of a Rick-ard-ently chewing away. Gord-on ahead exclaimed, "See that Brown Dove-Smith! there on the tree, she's a pretty Baird, but you'd have to be some Climer to catch her."

Copy-Writ-ed by R. D. Steph en Son.

Babinski's Sign

You can lead a man to college, but you cannot make him think.

Irrelevant drowsy Junior that in amphitheatre sat—If a bone should run from collar to elbow, wouldn't it be humerus?

Full many a gem of purest ray serene
The dark unfathomed caves of ocean bear;
Full many a sawed-off, shrimpish freshman, green
May raise a lofty pompadour—with care.

Dr. Johnson: (In Bacteriology)—"Mr. Cunningham, what is the bacteria in sour milk used for?"

Cunningham:—"Pancakes."

Dr. Waggoner:—"What do you mean by the Great Anastomotic Vein of Trolard, Mr. Rieger?"

(Long Pause)

Dr. Wag:—"Where are you Rieger?"

(Short Pause)

Ted:—"I DON'T KNOW DOCTOR."

PERFECTLY DUMB

Dr. Bigsby:—"What are dumb rabies?"

(No response)

Dr. "Big":—"The type Seniors have just before State Board Exams."

Dr. Bigsby:—"Does lumpy jaw infect man?"

Howes:—"Yes."

Dr. B.:—"What man?"

Howes:—"Hu-man."

Soule:—"Say, 'Killy', that spinous process is awfully sore, must be a lesion."

"Killy":—"Well we can fix it then. Sit down to the doctor. Second Dorsal eh?"
(After 10 minutes.)

"Killy":—"Look at this, Welch. See if you can fix this lesion. I've worked at it for 10 minutes, and I can't get it.

(Dr. Welch takes a hand and a look.)

Welch:—"After clearing field of operation."—"Sore here? Say, Soule, do you know you have a pimple on this spinous process?"

(Kilman goes to see his girl.)

Van Winkle

If all the people who knock the Osteoblast were put in a straight line they would reach from Kirksville to the North Pole.

If all the people who praise the Osteoblast were put in a Ford runabout there would be plenty of good seats left.

If all the brains used upon this book had been concentrated on study we could have obtained an A. B. degree in one month.

There is a good fellow named Lane,
 His presence we count as a gain,
 He left the old Medics to teach "Osteopathics"
 Just how to be doctors of fame.
 There's some things about us he likes
 And some things he can't like he slights,
 But others annoy him, in fact, almost fuss him
 And those are the things that he fights.
 On blackboards he doesn't like dirt,
 They make him to sputter and spurt,
 Refuses to lecture, gives us anorexia
 In case he to silence reverts.
 The janitors all, we exhort
 That one of them be a good sport,
 Bring in an eraser, of chalk be the chaser,
 And so a disaster abort.
 And so he smiles and he frowns,
 And his voice in exultant tones 'bound,
 Applause loud harasses the neighboring classes,
 In laughter they all swell the sound.
 This same good old fellow named Lane
 Says sometimes he has quite a pain
 Osteopathy's close, and just one little dose
 Makes him ready again for the game.

HIGHEST AMBITIONS OF SOME OF OUR CLASSMATES

- | | |
|-----------------------------------|------------------------------|
| To get a grade in Chemistry. | "Pete" Hopkins, |
| To slumber, undisturbed in class. | Morrell, |
| To get up in time for Breakfast. | Miss Owens, |
| To be aristocratic. | "Polly" Wartig, |
| To get a girl. | "Sammy" Guilbert, |
| To be popular. | Rubylee Steed, |
| To be a missionary. | Katherine Lawrence, |
| To pass in SOMETHING. | "Bill" Schley, |
| To be an orator. | J. R. Miller, |
| To maintain peace and quiet. | J. E. Jones, |
| To have a good time. | Hazel Shackelford, |
| To hold his job. | Business Manager Osteoblast, |
| To know everything. | Mrs. Johnston, |

Dr. S. S.:—"How many have a Howell?"

Dangler:—"Our baby has."

Dr. Bigsby:—"How would you treat Hydrophobia?"

Keckler:—"Send the patient to a Keely Institute."

Bill Carr came to school one morning with two young ladies (superfluous information). He had not had any breakfast, (reason also superfluous), and had just finished enlightening the young ladies on the subject when Dr. Earl passed, playing solitaire in his new car.

First Lady:—"There goes Dr. Earl with an empty car."

Second Lady:—"Well, he has nothing on us."

One morning June '18 was particularly anxious to hear about the duck eggs, and showered Dr. S. S. with notes. He finally remarked that he did not know it was note day, but that many seemed to have notes due that day.

Dr. S. S.:—"Name the 44 things that pass thru the apex of the Thorax, Mr.—er—Hancock."

Pete:—(sotto voice)—"One esophagus and 43 biscuits."

Dr. Henry:—"What is the difference in the physiological effect of wood and grain alcohol?"

King:—"Grain alcohol has a more soothing effect."

Dr. Henry:—"You want to be sure and label your soothing syrup, correctly."

Dr. Bigsby:—"Name one kind of tubercle."

Fisher:—"Malaria, or military."

Why is tetanus more common in women than in men?

TO CRAM OR NOT TO CRAM

To cram or not to cram,
That is the question;
Whether 'tis nobler for the soul to suffer
The pain and anguish of a "C."
Or, cram until the birds of morning
twitter
And get an "A", I ask, thee,
Which is fitter?

Mabel loves to potter, potter, potter, but she never potters so potteringly as when she potters along with a Potter.

It is rumored that the Men's Pan-Hellenic has arranged to hold their first taffy pull.

FROM START TO FINISH

He lay on his bed with a terrible pain;
The Groans he could hardly restrain.
Came the Allopath; 'tis Peritonitis.
Came the Homeopath: No,—just Nephritis;
Take the pills, per directions given,
Pink just after meals; blue, at 'leven.
Soak your feet; remove your clothes;
Along t'ward midnight you'll doze.

A Groan; Groans; Worse;
No sign of abation,
What in creation,
Much consternation.
To the 'phone; dread mingled with wrath.
Is this Dr. Jones, the Osteopath?
He comes; behold! He is here,
Countenance made especially to cheer.
Straight to the bedside,
Queries to the point.
What? It can't be so,
He says it is a joint.
Up the Spine, just so far;
Here 'tis; Third Lumbar.
Simple twist,
Silence! hist!
In it pops,
Up he hops.

Hurrah! he cries, for the Osteopath;
He cures without pills; it's no bluff.
Maybe it's a hard and a thorny path,
But honestly, truly, it's me for that "stuff."

In Kirksville he lands. Where will he stay?
Looks them over, decides, the Y. M. C. A.
That Morn, the Thirteenth of September,
Ah! that's a day he will ever remember.
With heart quaking, knees shaking, head aching,
He descends with the bunch to Chemistry Hall.
Hears Prof. Lane open up;
In formalities not partaking:

"The Amoeba is a Unicellular Animal."
It's over; they scramble, then amble,
In bunches, in pairs, 'way up the stairs,
To a place high, near the sky.
To the Amphitheater renowned;
Where a science profound,
Anatomy, is propounded, sounded,
Hounded, 'til 'tis thoroly grounded.
Dr. S. S. opens up with a smile all his own,
Discusses awhile the subject of bone.
Then drifts, and in phrases he coins
A line or two in regard to Des Moines.
Then there's "Pee Wee," Chemistry, Lab's,
And then he may take a few dabs
At study. And along toward midnight
Crawls to bed; joy mingled with sorrow,
He feels he's done all in his might;
There's nothing to do 'till tomorrow.
So the days pass at a terrible rate,
Troubles accumulate, do not abate.
In Bacteriology he looks for a Bug,
Expects to find one big as his Mug.
Sees a little bunch, has a little hunch;
Consternation! beyond imagination;
He's told these creatures
Inflict injury on man or preachers.

Then there's tests.
Oh, what pests;
A guy's head feels like hornet's nests.
He meets Doc. Hy', with an awful sigh,
It brings tears, and fears, as he hears
Doc. mumble clear and low,
It merely takes up H two O.
Comes Bigsby, to tell what prevails
While Kids are in utero, and such tales.
And when Wag. starts to rag,
He fair gives one a jag,
Then a jar;
When he yells, "Where's the ganglion Impar?"
Well! here comes Dr. von L.
He takes a seat, then starts to tell,

To repeat, all about Neuritis,
 And Anterior Poliomyelitis.
 Dr. Ella comes next;
 Why on Earth should a uterus be flexed?
 Then it's Halladay with his junk,
 And the dope Laughlin hands out—
 Well, it's not bunk.
 Now he watches Dr. Geo. Still,
 Whittling away with amazing skill.
 But hold! 'tis noon, who thot it so late.
 There's a terrible pain in his pate.
 So with Head whizzing, Brain sizzling,
 He eats and thinks of his fate.
 Then takes a sneak
 Down to Technique.

On thru the days, one like the other;
 Exam's draw near, oh, what a bother.
 But with Potter near,
 And McLaughlin handy,
 Why fear? why you're a dandy.
 Why sigh? Why cry?
 You'll be an Osteopath bye and bye.

So, on thru the mess does he go;
 Is eventually turned out
 A finished D. O.

R. D. S.

EVERY LITTLE MOVEMENT
 Every little movement has a meaning all its own;
 Every pain and trouble by some lesion can be known;
 And every backache that comes stealing
 O'er your being, must be revealing
 All its reason in some extremely
 Little lesion, all, all, its own.

IN BACTERIOLOGY

Miss Leeper:—"Dr. Bigsby, what is this here tetanus?"
 Dr. Bigsby:—"A disease that goes especially hard with women."

Mary had a little lamb,
 Lank and lean and bony;
 When Mary started in A. S. O.
 She swapped it for a pony.

SOME SHAPE

Dr. Waggoner:—"Mr. Carson, describe the ovary, as to its shape."
 Carson:—"Ah, er,—Well, its shaped like a nut."

CIGARETTE CURE

Dr. Hamilton:—"The application of dilute AgNO₃ is very effective in stopping the cigarette habit."
 Beatty:—"Say, Doctor, where can you buy that stuff?"

THE SENTIMENT OF SOME STUDENTS

Anything the Faculty's fur, I'm agin.

Dr. Tucker:—"Mr. Clark, what effect would a wrinkle in the diaphragm have upon the Oesophagus?"
 J. J. Clark:—"Would stop the passage of air and interfere with respiration."

WHAT WOULD YOU SAY?

Wag:—"Mr. Hansen, what would you say if I asked you to name the muscles of the forearm? Remember there are ladies present."

WELL COVERED

Dr. Hamilton:—"Mr. Lawrence describe the covering of the ovum."
 Lawrence:—(red face, etc.) "Its covered with simple squamous epithelium."

P. T. Wilson says, "Dr. Hansen gets my goat." Ask him why.

A DEMONSTRATION IN EMBRYOLOGY

J. CLARK MAKING A STREAK FOR HOME. (Note The Homesick Facial Expression.)

A. S. O. STUDENTS ISOLATE A NEW GERM
BACILLUS CUPIDUS LANCEOLATUS

- I Group:—Cardiac.
- II Habitat:—Warm climates, especially common around A. S. O.
- III Culture:—Grows best on special preparation of heart muscle at 37 degree C.
- IV Morphological Characteristics:
 - 1. Form:—Bacillus, Lancet shaped.
 - 2. Grouping:—Diplo.
 - 3. Flagellated:—Pleomorphic, involute.
 - 4. Relation to free oxygen:—Aeromantic.
- V Pathogenesis:—Produces disease called "Love."
- VI Causes:
 - 1. Predisposing:—Weak heart muscle.
 - 2. Exciting:—Moonlight, Music and Flowers.
- VII Symptoms:—Blushing, stammering, insomnia, loss of appetite, green eyes, more wait, rise in blood pressure.
- VIII Diagnosis:—Difficult to secure history from patient. Symptoms the only aid.
- IX Treatment:—Abortion difficult, Neglective treatment is best.
- X Etiology:—Incubation period indefinite. Onset may be slow or sudden, virulence variable. Greatest in vicinity of A. S. O.
- XI Prognosis:—Depends on finances of victims.

QUOTATIONS

"Oh, call it some other name, for 'friendship' seems too cold."—Taft and Strowd.
 "The greatest man may ask a foolish question now and then."—J. R. Miller.
 "Grades don't make the man, but they help in getting by State Board."
 "Beware of little losses; a few C's may flunk a whole class."
 "Know more than the professor does if you can, but do not tell him about it."
 "Cut, and the world cuts with you; Grind and you grind alone."
 "Pull is the keynote to success."
 "Be still, poor grind, and cease repining,
 In Doc's red book your grade is shining."

ON THE O. K. LINE

1st A. S. O. Tourist:—"Let's get off and walk."
 2nd A. S. O. Tourist:—"What is your hurry?"

AT THE STUDIO

Mr. High:—(Behind the camera preparatory to taking Emma Lou's photo)—
 "She's got a genuine cowhide." (Later) "I mean the new year book."

THE OSTEOBLAST EMBYRO

THE REASON

The woman was long and lank and lean;
 She looked as tho better days she'd seen.
 I opened the door and welcomed her in,
 And Dr. Brown gave her a friendly grin.
 After we'd been talking for a while,
 She said as her face lit up with a smile,
 "Dr. Brown, I want to ask you a question—
 Why is there so much indigestion?"
 Then a change came over his face,
 Of the old merriment you could see no trace.
 At last, he calmly raised his head,
 And slowly but emphatically he said,
 "Well, some people eat entirely too much,
 While others eat things they shouldn't touch;
 Some people naturally haven't good health;
 Others eat sweets because of their wealth.
 But I'll answer your question as you requested—
 'Tis because more food isn't digested."

STUDENT LIFE IS ONE BAD DREAM AFTER ANOTHER

ACUTE RHOMANTIC FEVER

Very common. Two or three per cent of cases admitted to Hospitals. Micro-organism not demonstrated. Acts like other acute diseases. Comes on suddenly, runs definite course, and shows symptoms that lead us to believe that it is acute.

CAUSES:—Exposure, fatigue, overwork, cold, worry, age, most common in young (between 10 and 30), occasionally in older. Sex, either. Season, spring. Exciting—is infection, thot to enter by way of the oral aperture.

Rhomantic Fever is that disease, either acute or chronic, whereby a toxin is produced which has a special affinity for one of the opposite sex.

SYMPTOMS:—Breaks out periodically. Is common. Skips from one to another. Anyone may get well. Infectious. Becomes worse with each succeeding attack and usually shortens life. Heart lesion may result. Eruption of the head affecting brain. Frequently causes softening of the brain. Disposition to fresh air and exercise, especially long walks. More or less depression of spirit. Dislike for groups of people. Loss of sleep and toxins give anemic appearance. Heavily-lidded eyes. Insomnia and loss of appetite. Chapped lips and cold sores. Particularly hard on knee joints, also affects shoulder and elbow joints. Heart murmurs and palpitation. Causes valve of pocket-book to leak, and the coughing up of large boxes of candy at more or less periodic intervals.

Course:—Usually not more than a few weeks, but may last several months, or even for life.

Prognosis:—Few deaths and only a few cases leave a permanent affection.

Complications:—Bad effects more than in all other acute diseases.

TREATMENT:—Most can be done before disease becomes settled, not much afterward. Most effective treatment is preventive. Proper precautions at the onset may abort the fever. Prevent heart complications if possible. Use packs to keep the heart warm. If murmur disappears heart complications are cured.

FAMILIAR FACES

DOCTOR DIPPY'S DOPE

Advice of all kinds bought, sold, and exchanged. Each remark packed in a separate package, wrapped and delivered, freight prepaid. Prices vary with the complexity of the problem.

Address:—Dr. W. W. Dippy, Dope Avenue, Kirksville, Missouri.

Branch Offices:—Macon and Moberly, Missouri.

Dear Doctor:

I am a young man of Scandihovian descent and am in love with a swell doll. What shall I do?

H. S. H., Fargo, N. D.:

If she is one of those dolls that shut their eyes at the right time, grab her. If she always keeps her eyes open leave her alone.

J. L. J.:

Yes, the milk should be heated nearly to the boiling point before feeding. Yes, Mellin's Food is good for adults, too.

Miss A. E. L. Flint:

Certainly, my dear young lady, if your studies interfere with your social duties, drop the studies. This new fad that studies should come first is entirely wrong. Yes, if you forget your muff and your hands get cold it is permissible that the young man should hold them.

Mr. Leer:

No, most girls admire beauty more than brains. Judging from your picture you should be able to take your pick.

P. K. Jones:

In reply to your query of how to hold the girl of your choice, I cannot do better than to refer you to the methods in vogue in the City of Novinger.

Either ask Mercer or refer to the Cosmopolitan's Frontispiece (any issue). Unless you have wooden arms you should be able to carry out these instructions.

Miss Steed:

No, the idea that red-headed men are hot-tempered is all bosh. Red hair denotes a warm heart and generous hand.

Miss Moreland:

Yes, we think you are right. A change every six weeks is often enough. Men are so monotonous and you know "variety is the spice of life."

R. D. Stephenson:

Yes, blonds may be light-headed, but then, Steve, (I might as well tell you) you can't be kept in the dark all your life.

Dr. Warner is quite acrobatic;
He posess for lesions dramatic.
Every twist of a bone
He shows in his own.
He practised it up in the attic.

THE ANANIAS CLUB

Officers
F. L. BUSH President
FREDERICK L. BUSH Vice-President
F. LOUIS BUSH Secretary
FREDERICK LOUIS BUSH Treasurer
BUSH Executive Council

Members
The Osteoblast Staff.

THE GRIND CLUB

Motto:—We love to work.
U got to Grind—Horan. An ax to Grind—Morrell. Wont Grind—Thomas. An occasional Grind—Deeming. Auto Grind—Ammerman. A continual Grind—Eades.
Pledges:—Pierce, Schley, Hopkins, McElwee, Boatright.

THE DUDE KLUBBE

(This is a very select organization as the name indicates, and has consented to be mentioned in the Osteoblast only at a price of \$5.00).
Motto:—First in Fashion—What Matters the Rest.
Colors:—Red Socks.
The Dude:—O'Rourke—Chairman of Committee on Loud Socks.
Active Members:—Jordon, Keckler, Klusmeyer, Cowger, Leer, Dodge, Ames, Eiler,
Committee on Collars:—L. M. Williams. Committee on Features:—C. M. Van Duzer.
Committee on Ties:—Dr. L. von H. Gerdine. Committee on Suits:—R. J. Valentine.
Pledges:—Gandy, Still, Paterson.

10 jokes make one Humor Department
10 Humor Departments make one sick.

FORMIDABLE RIVALS TO GREAT SEWERS OF PARIS

A personally conducted tour thru the great sewers of the body, paved with great slabs of gigantic columns of epithelium. Life lines provided to rescue the unwary from the maddening torrent swirling tempestuously, thru the centers of these deep fascial channels. Patrolmen Leucocytes always on duty to prevent traffic congestion; Side trip thru the Labyrinth of the Liver unsurpassed by that of Mammoth cave. The lofty pillars of the Temple of Karnak are pigmy in size, compared with the vast columns of muscle fibers with their wonderful Egyptian Mosaics.

Extra thrills, free of charge, when great whales of fibroblasts are encountered behind the clothes line of white connective tissue. Football suits are advised to withstand the beating and thumping when this active grampus disports itself.

Number limited. Persons desiring to join the party apply to Dr. Michael A. Lane, Professor of Pathology, American School of Osteopathy.

ITEM

Just before the Xmas holidays Dr. Morrell, B. S., assumed his duties as assistant to Dr. Henry in the Physiology Lecture room at the time of the latter's inability to explain Light Refraction sufficiently, for some of the members of the class in whom Dr. Morrell was particularly interested. We have no doubt but that we shall hear from the doctor again. He is a man who can't be bluffed.

Little Beattie:—"Oh, my bones ache so."

Dorothy:—"Yes, headaches are such a nuisance."

J. R. M. (After course in proctology.):—"I can now successfully treat adenoids."

Bill Betts located another Bill Betts on the way home Xmas. The porter, however, was very nice about it and Bill is well over the attack.

Jimmy:—"I'm not worrying about this stuff, I'm getting the fundamentals."

Emmy Lou:—"Yes, you're getting the fun all right, but I'm not so sure about de-mentals."

There is a tide in the affairs of co-education, which, taken at the flood, leads straight to matrimony.

OUR CITY

It has been said, "If you cannot say anything good of a man, it is better that nothing be said at all." This is good logic, and we will apply it in our bird's-eye sketch of Kirksville, and only speak of the good things.

As to a definition for Kirksville,—it might be called a city, a town, or a village. It lacks about 20,000 population of being strictly in the first class mentioned, but has about 7,000 more people than an absolute wilderness. To us it is the place where Osteopathy was founded, and where it is now dished out to students at \$150.00 per with extra charges for specialties.

It is located in the North-central part of Missouri, and surrounded by a big country, which even to a sober person, must be admitted to be slightly rolling. It is approached by two Railroads, one of which managed to get in, but the other wasn't able.

Almost the first thing calling for notice upon arrival is the numerous improvements compared to the size of the town—many towns of much smaller size being less adequately supplied. The lighting system with its huge dynamos and mammoth engines, the excellent paving around the depressions in the streets, and the sidewalks with their hills and vales are all immense, and almost every home is supplied with a bath-tub of some sort.

On the street at night one is blinded by the glare of light that issues from a double row of cluster lights running the full length of every street, thus causing occasional collisions with telephone poles, etc., but nevertheless adding to the magnificence of the city.

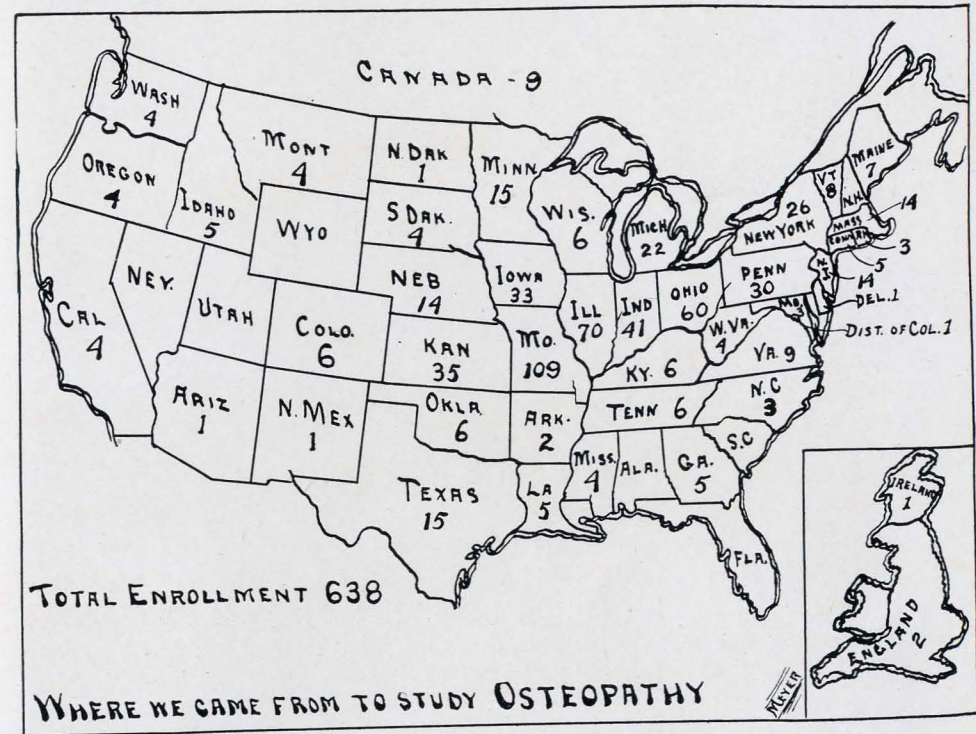

Paving is now complete, First Street being the last. This street leads out past Owensby's pond, so this improvement will surely be appreciated by the students and tourists who make this beautiful spot their summer headquarters; and Mud in Kirksville is a forgotten commodity.

Kirksville boasts of one of the best Opera houses in Adair County! It is supplied with every modern convenience for theater loving people and in it are exhibited some of the best talent of the A. S. O. Frat's.

The town tho, is rather inadequately supplied with Religious and Educational facilities; there being only ten Churches; an \$80,000 High-school building; State Normal School; Herr Goldberg, Teacher of Music and Languages; an Osteopathic College; and two Picture-shows.

We must also mention the excellent service of the Fire-department; they are on the grounds without fail within thirty minutes after the alarm, making an active effort to save the foundations, and front porch. It is only due to a lack of practice that they are not more efficient than they are, for a fire in Kirksville is an almost unheard of necessity.

Politics in Kirksville are a model of uprightness and honesty, for one can plainly see that all taxes and public income goes in the right direction. Recently, due to the activity of some of the citizens, the students were relieved of the duty of voting;

Dr. Henry: "What are the centers in the medulla?"

Wright: "Agglutination center is one."

Dr. Henry: "I didn't get that word."

Wright: "Well, swallowing."

Dr. Gerdine: "There are some Osteopaths who oppose the use of any germicide. They are such strict vegetarians that they oppose the taking of life."

Now, I lay me down to rest
To study I have done my best.
If I die before I wake,
Then I'll have no exams to take.

WHERE'S ALL THE CLASS

There was some exodus before the Xmas vacation, and Prof. Lane said the vamoosers were bum business heads not to stay and take what they had paid for.

We quote from him: "What would you think of a man who went to a place and paid for a shine, then left without getting it? Huh! You'd think he was a funny business man, wouldn't you? Well, that's just what some of you do. You come here and pay to have your heads shined then you leave without getting it." Next time stick around for the shine.

DAFFODILS

Did Kane ever Neal by the Alta(r), Jayne?
When your throat itches, Wykoff.
How many pounds in a Johns ton?
Is the Kid well?
When does Martha Knapp?
What did Mark Wilt?
With an expert Bowman, what could you Pierce?
Who practices the Stew art?
Let Hoyt be your Taylor.
Who is holding Betts now?

Rick: "You have to treat babies different than Human Beings."

Climer, having purchased a Potter's Quiz, is now a fullfledged college student. Other would-be students should follow this enterprising example.

Waggoner: "Which Iliacs, Deeming?"

Deeming: "Coeliac."

OWENSBY'S POND

When the balmy south wind blows,
Across the country green;
When every Prof. from the classroom goes,
And all has been heard and seen;
When every student in dull unrest
Casts off the toiler's bond—
Then give to me my treasured rest,
On the banks of "Owensby's Pond".
For there the sun scarce finds its way
Thru the trees upon the hill;
There near the closing of the day
When everything is still—
There when the golden twilight's nigh
In a maze of memories, fond,
But few who know how lovers sigh
As they slowly leave "Owensby's Pond".
When Seniors muse of caps and gowns
At the time of graduation,
And the "shark" or co-ed frets and frowns,
At the tho't of examination.
When professors dream of wealth and kings,
And fame in the great beyond,—
I sit and think of better things,
On the bank of "Owensby's Pond".

Did you ever notice Templeton's face? If you want to see all the expressions possible to produce on a human countenance, just take a peek at him when asked to name all the muscles of the leg.

Mylander: "I wish Bigsby would give a course in baby feeding; I don't know how to feed a baby."

Dr. Alice: "What is the perineum?"

Ammerman: "It is the tissue surrounding all the abdominal viscera."

Dr. Warner: "For a text you can get Dr. Ashmore and Lovett."

Dr. Waggoner: "I left my Gray on the window sill one night and it rained."
Junior: "Guess I'll see if I can soak up anatomy in the same way."

SHOPS

-R.D. STEPHENSON-

Read on,

dear one, read on; we know you will think that these are only advertisements, and consider your duty done when you have passed your capable criticism on the last article of the last page of the humorous section. Not so; perhaps you do not know, so we will tell you, that were it not for the co-operation of these advertisers, our book would have been as far from attaining a prominent place in your vast collection of dime novels and other choice literature, as a bed-bug in attaining a living on an anemic scare-crow.

Rub your bleary eyes, adjust your glasses, and proceed to read these advertisements. That's what they were put here for. Don't think for a minute that the money paid for them was given, or taken in the spirit of a donation.

It's a mutual proposition. The shop-keepers whose cards appear on the following pages are the ones who cater to the students, tide us over when that long looked-for check is delayed, and they are the ones who support our enterprises; therefore it behooves you to pay attention to these advertisements, investigate them, and memorize them, so that you may be one to return support for support, friendship for friendship, and thus help to maintain the harmony that exists between us.

Go into their shops; get in closer touch with the people who come to our rescue in the time of need. When you need goods in their various lines patronize them; show them you appreciate their co-operation, and in this way you will benefit yourself, benefit our advertisers, and benefit our school; you will help clear the conscience of your fellow students who sold this advertising space, and will help to make the Osteoblast permanent in the years that are to follow.

One thorn of experience is worth a whole wilderness of warning. (In practice.)

If Wade's a farmer why doesn't he plow up his scalp and plant some hair seed?

**Your Patients Will Enjoy
The Pleasant Taste**

The nauseating sweet flavor and "tang" generally found in malted milks form the one objectionable feature to its use as a steady diet in convalescent feeding. The patient's stomach revolts against this peculiar sweetness.

**BORDEN'S
Malted Milk**

IN THE SQUARE PACKAGE

consisting of pure rich creamy milk with extracts of wheat and barley malt, is decidedly different. By our process the sweet taste and "tang" are entirely removed. This makes it a satisfying as well as a non-irritating easily digested food.

**The History of
Malting Milk**

BARON VON LIEBIG originated the process for malting milk in Germany over 50 years ago. Countess von Ebersburg obtained an English patent in 1867 covering von Liebig's process for a preparation in either liquid form for immediate use or a dried state for future use. This patent called for skimmed milk and the product was not as perfect as that manufactured and sold to-day under the name of

**BORDEN'S
Malted Milk**

IN THE SQUARE PACKAGE

This product, while containing all the good features of the von Liebig process and the von Ebersburg patent, uses the best full-cream cows' milk in its manufacture. The improved vacuum process of condensing (without impairment of food value) originated by Gail Borden, the founder of this company, is also used in the manufacture of this Malted Milk which won the

A. S. O. Hospital

KIRKSVILLE, MISSOURI

Ten Reasons Why You Should
Send Your Patients to the
A. S. O. Hospital

The post-operative care is Osteopathic.

The seven house doctors are straight Osteopathic graduates.

The function of the house doctors is to give all cases Osteopathic treatment, which materially decreases the complications.

The surgeon is an Osteopath.

The assistants are Osteopaths.

The nurses are used to nursing with Osteopathic management.

The mortality is very low.

The anaesthetic record is a matter of pride.

No patient has died of the dreaded post-operative pneumonia in the history of the hospital, thanks to Osteopathy and nursing.

If the patient doesn't take Osteopathic treatment after leaving this hospital, it is simply due to not getting sick again.

(Wyckoff)—Don't be afraid to invest in a smile, it's always worth its face value.

Wise, from the top of his head up—Morell.

PHYSICIANS OF ALL SCHOOLS

RECOGNIZE THE SUPERIORITY OF THE BROOKS
APPLIANCE OVER ALL FORMS OF TRUSSES
AND OTHER DEVICES FOR RETAINING RUPTURE

THE INVENTOR
MR. C. E. BROOKS

It is only a matter of a little while before the present day steel spring truss will become obsolete and relegated to the place where it belongs—among the relics of other torturing devices of the dark ages.

We have published a booklet especially for you as a physician. It is called "The Mechanical Treatment of Rupture and Its Relation to the Physician's Daily Practice."

This booklet was written by a physician and carries a message of peculiar interest to physicians. It plainly illustrates the crime of trusses and shows beyond question the immense superiority of the soft air cushion found only on the Brooks Appliance.

Send a postal for this little book. It will only take you ten minutes to read it, and it may be the means of accomplishing much good for your patients and increasing your practice.

Of course it is free. Simply say—"Send me your Physicians' Booklet."

DRUG STORE TRUSSES

Are you sending valuable patients to the drug store to be fitted with a truss? It will surely be a blessing to your ruptured friends, and also a source of income for you, if you will investigate the merits of the Brooks Appliance.

WANTED

Every Osteopath practicing in one of the following states to try to secure an agent for this Company in Missouri, Kansas, Oklahoma, Texas, Iowa, Minnesota, Illinois, Ohio, Pennsylvania, and California.

WHAT WE DO:

1. The only old line life insurance company recognizing Osteopathic examiners—owned and operated by the profession.
2. An ethical way to advertise Osteopathy by carrying it to the general public by a great agency organization.
3. Helps build the practice of a D. O. where an agent can bring hundreds of people to your office for examination that will not know you existed before.
4. Will make Materia Medica recognize the fact that you are qualified to make physical examinations by having a company with a low mortality.
5. Will force recognition from all other life insurance companies.

Your support is solicited to help build a monument of which we will all be proud.

American National Assurance Co.

“THE OLD RELIABLE” THE NORMAL SCHOOL KIRKSVILLE, MISSOURI

This, the oldest of the Missouri Normal Schools, seeks to continue its leadership in the preparation of first-class teachers for public schools of all kinds and grades.

It therefore invites the ambitious young intending teachers to enter its classes and compete in the effort to attain the best intelligence, the widest knowledge, the greatest attainable skill, and the highest moral character.

This “old reliable” School has a unique history, which is hardly equalled by that of any other Normal School or College. Its graduates have long held positions of highest responsibility in Missouri and many other states. These include the state superintendency of schools of Missouri for 20 years; the state superintendency of schools of California, 8 years; the governorship of Iowa, 4 years; the presidency of many Normal Schools; professorships in many institutions; the presidencies of three Normal Schools in 1917; the superintendencies of many city and county school systems; positions in many high schools and elementary schools, colleges, kindergartens, and supervisorships.

The Normal School at Kirksville is a large and many-sided teachers college, with courses extending four or more years above high school.

Enrollment of resident students, 1916	2150
Average daily attendance, 44 weeks, 1916	807
Number enrolled in residence, biennial period, 1915-1916	3200
Number non-resident reading circle students, 1915-1916	1150
Total number resident and non-resident students, 1915-1916, 4350	
Average age of all students, in years	22½

(Note. Practice School children are not counted in these lists.)

The Normal School at Kirksville parallels the best academic and pedagogic courses given in the college union colleges, teachers colleges, and schools of education. It confers an elementary state certificate, based on one year above high school; also diploma for two years, three years, and four years above high school—all culminating in the 120-hour diploma with the degree, Bachelor of Science in Education.

THERE WAS A TIME
NOT SO VERY LONG
ago, when all printing
looked alike to most of
us; it was just printing;
but that time is past and a
new day has dawned.

Most everyone today has a
very highly developed sense
of what is right and proper
in all manner of printing.

It is one thing to appreciate
superior quality and another
to produce it.

To produce it requires men
of skill, industry and zeal
and a good equipment.

We have a corps of efficient
craftsmen who are schooled
in what is right and how to
get the best results.

We have a master printer
who will give your work his
personal attention.

Our equipment is of the best.

There is a glowing sense of
satisfaction in dealing with
people in whom you have ab-
solute faith.

Osteoblast

Athletic Photographer

107½ S. Franklin

Don't take to heart what we've said about you, it's only the truth.

L'Envoi

When all the pictures are printed, retouched and carefully dried,
 When the last long manuscript's finished and the quill is tossed aside,
 When all of the Kale is collected, and all of the ads are paid—
 When all the cuts are finished, and all of the drawings made—
 We shall rest—God knows we deserve it—and list with a knowing laugh
 At the Crabs, Grippers and Critics that flout and rail at the Staff.
 They'll say that we worked for honor, they'll say that we worked for fame,
 But we know they are only guessing, and will smile at them all the same;
 For those who do aren't the talkers, but toil with a contrite heart,
 The ones that do not are the knockers, and nobly play their part.
 And now our task is diminished, until the end is in view—
 And the Osteoblast is finished and the same we submit to you.
 So to Faculty, Seniors, Freshmen, our best of wishes extend,
 Success—good-bye—and thank you, the end, dear friends—the end.

GEORGE.
