

Academic Year 2011 Minimum Computer System Requirements

The computer requirements for the Transitional Doctor of Audiology Program are fairly liberal. The following are specifications that are considered acceptable. You will find that computers with higher processing power and more ram than listed below will be beneficial. That being said – Please note you will most likely encounter problems if you do not have a high-speed internet connection. In the past, we have experience that students attempting to connect via dial-up have become frustrated. Additionally, older operating systems such as Windows 98 have proven to be problematic.

Windows-based Computer:

- 2.53 GHz
- 2GB RAM
- 128 GB Hard Drive
- CDRW/DVDRW
- Windows XP, Vista, or Windows 7
- Internet Explorer and Mozilla Firefox browsers
- Microsoft Office 2007

Apple Macintosh Computer:

- G5 PPC, or any Intel-based Macintosh
- 160GB hard disk
- CD-R/DVD
- MacOS X 10.4 or better
- Safari and Mozilla Firefox browsers
- Microsoft Office 2008 for Macintosh
