WILLIAM L. JOHNSTON COLLECTION

Series 5: Publications and Presentations

- Accession No.: 2006.27.42-5
- Volume: ca. 4.5 linear feet (3 record storage cartons, 3 document boxes)
- Contents: Working papers and final copies of WLJ's book *Functional Methods* (1994), articles, chapters, abstracts, and presentations (posters, speeches, short courses, etc.). For details about specific subseries, see the listings below. For complete publication information, see the Appendix to this series.
- Material was primarily drawn from three boxes labeled "Dad's Published Material," which contained piles of reprints and journals; handouts, overhead transparencies, and similar material from presentations; and working material relating to publications and presentations. There was little or no apparent original order. The series also contains similar material from other boxes, including a set apparently kept in the drawer(s) of WLJ's desk.
- The # column in the listings indicates the item's sequential number in WLJ's CV, where applicable.
- Dates: 1957–2005
- Access: Unrestricted
- Handling: **CAUTION!** All the Johnston papers contain numerous small slips of paper that will fall out if folders are not kept flat on the table. Researchers must also be careful not to disturb the arrangement of groups and subgroups of material, indicated by folded acid-free paper enclosing each batch (see finding aid introduction).
- Copyright and Permission to Publish: Requests for permission to publish material from the collection should be directed to the Curator. The Museum does not claim to hold the copyright for all material in the collection; it is the responsibility of the researcher to identify and satisfy the appropriate copyright holders.
- Suggested Citation: William L. Johnston Collection, Museum of Osteopathic Medicine, ^(SM) Kirksville, Missouri [Box #:Folder #]
- Related Material: Data and working papers relating to specific papers (Research series)
Images used in publications and presentations (Photographs series, esp. slides)
FAXes and computer files for correspondence and drafts of articles and presentations (Professional Activities series)
- Subscripts in the # column indicate cross-references for specific items:
PR = See related presentation material in Presentations section.
PH = See related prints and/or slides in Photographs & Slides series.
CF = See computer files in Professional Activities series (PRF1:26).

Articles and Other Publications (not reprinted in 1998 AAO Yearbook)

The 1998 *American Academy of Osteopathy Yearbook* was dedicated to WLJ and contains reprints of many of his articles (*see* Box PPR5 and the appendix to this series). Final copies of articles that appeared in the yearbook were not included in the collection; however, any related material such as drafts or correspondence was retained. Folders PPR2:7–8 contain articles not included in the AAO yearbook; folders 9–33 contain drafts and working papers for publications, whether or not included in the yearbook.

Articles are arranged in the order they appear in WLJ's CV (i.e., order of publication). Publications not included in the CV were inserted in chronological order and given the suffix B, C, etc. Papers submitted but not accepted for publication are filed at the end of the Articles

<p>Presentations Includes posters and short courses. Arranged by date of the meeting or course; the folder may contain support material beyond those dates. Material related to WLJ's various functional methods courses (AAO CME offering and others) forms a separate division, arranged by first by course title and then chronologically.</p> <p>Lectures and similar presentations to MSUCOM students, residents, and others are filed in the Teaching subseries of the MSU Faculty series. Promotional or explanatory presentations for the PMI (Primary Medical Initiative) or MORNET (Michigan Osteopathic Research Network) are included in those subseries of the MSU Faculty and Professional Activities series, respectively.</p> <p>Plastic overhead transparencies were kept only if they had added markings not shown on the paper originals (which were retained). Some retained overheads were trimmed to remove residual tape. Presentations must have been colorful—transparencies were pink, yellow,</p>

William L. Johnston Publications and Presentations

The list below is adapted from Johnston's CV on the website <http://www.williamljohnstondo.com>. Numbers followed by B or C indicate other publications or presentations added to the list during processing of the papers. Exception: The CV listing for Presentations 27 and 28 grouped all the workshops together; they are separated in this list for clarity and better match to the materials in the collection. Most, but not all, of the listed publications and presentations are represented in the collection.
