

Student D.O. for a Day at ATSU-SOMA

Join us for a typical day in the life of an ATSU-SOMA student

Your day will be spent with a mentor experiencing the following: osteopathic principles & practice, curriculum overview, large classroom setting, small group learning, lab, lunch & an advising session with an Admissions Office representative! *

RSVP required to secure your seat!
Please email: azadmissions@atsu.edu

ATSU-SOMA's Student Government Association encourages pre-medical students to attend ATSU-SOMA DO for a Day. Students should attend who are interested in learning about osteopathic medicine and ATSU-SOMA.

* Schedule subject to change

The primary goal of ***A.T. Still University's School of Osteopathic Medicine in Arizona*** (ATSU-SOMA) is to create exceptional physicians. ATSU-SOMA integrates a unique and innovative curriculum combined with early clinical experiences that prepare students for a valuable and meaningful future in osteopathic medicine. SOMA is looking for students that are eager to be a part of a new generation of osteopathic physicians, students that have a desire to become compassionate and forward thinking doctors, and students that are seeking an exciting alternative to the traditional and routine methods of medical education.

Highlights of the program:

- ATSU-SOMA uses the Clinical Presentation Educational Model which holds that there are approximately 120 different ways that a patient can present to a physician. ATSU-SOMA students learn inductive reasoning skills which will assist in developing the ability to assess and diagnose patients more efficiently.
- Basic sciences are bundled with clinical sciences in order to give our students a more comprehensive and practical foundation for each medical discipline. The overall design of this curriculum emphasizes clinical competencies.
- Osteopathic principles and practices are incorporated into every course, providing distinct training in the value of the healing touch in whole patient care.
- Students spend their first year on the Mesa, Arizona campus learning together in small groups, using real-life patient interactions and simulated clinical experiences.
- Simulation based education is utilized through the use of our 11 Advanced Human Patient Simulators, to challenge and test students' clinical and decision making skills during realistic patient care scenarios.
- Students' education in years two through four will be based at one of the 11 select Distance Sites across the country.
- The second year is spent in Distance Sites and students will have the opportunity to observe patient care first-hand. Students will continue their academic education through small group learning, lead by Distance Site faculty who are practicing physicians, as well as through various distance education technologies.
- In years three and four, students will complete their clinical rotations in hospitals, clinics, and healthcare institutions that are associated or affiliated with their Distance Site.

Dates available for 2018 & 2019:

- September 7, 2018
- September 14, 2018
- October 5, 2018
- October 26, 2018
- November 9, 2018
- November 30, 2018
- December 14, 2018
- January 25, 2019
- February 22, 2019
- March 29, 2019
- April 26, 2019

Seats are limited ~ RSVP is REQUIRED to secure your seat
