Editorial Chat.

Ho for Milwaukee! Ho! Hach der Pabst! Ho! hach der Schlit! Ho! hach der "Bone Doctors!" Hoke Smith! Ho! everybody—come and be with us!! Hock your watch—hock your clothes—hock any old thing, but be sure and be with us!!!

These thirty-day schools of osteopathy on the correspondence plan are the greatest fakes of the age and are destined to bring our science into great discredit if we cannot vanquish them.

First the New York Osteopathic Association, then the New York School, and Tennessee, and everybody is demanding that the osteopathic colleges shall add a third full year to their courses! Correct—let the good work of elevating the osteopathic standard go on!

Our venerable Founder says that if two years are not long enough to make good osteopaths better take ten than mix osteopathic education with the traditions of drug medicine. It will be a cold day when the "Old Doctor" strikes his colors for any sort of a compromise with the outskirts of Calomel, Quinine, Morphine and Whiskey.

A Nut to Crack at Milwaukee.

It is rumored that an application for membership in the A. O. A. will be made at Milwaukee on the part of certain practitioners who were graduated regularly by the Illinois College of Medicine and Surgery during the life of that institution. Some of these practitioners have been conscientious students and are today loyal practitioners of Osteopathy. A number of them have pursued their work on to the point of graduating regularly in medicine and surgery since their two years in Osteopathy. At the time they attended the defunct school there were not less than four founders of A. S. O. in the faculty, yet there were some irregularities about the school, and a number of those graduates have been laboring earnestly to damage the name of the science. As to the personal worth of some of these graduates there is no reasonable doubt. They occupy a queer place before the profession. Already the issue has risen in California and elsewhere about recognizing these practitioners. What will the A. O. A. do about it?

Hard to Distinguish Wolves When They Break into the Fold.

In the last number of THE OSTEOPATHIC PHYSICIAN appeared an advertisement for a book entitled "I Suggest Suggestion and Osteopathy," by "W. I. Gordon, M. D., D. O." Several practitioners have complained against the acceptance of this ad. on the ground that Dr. Gordon is not a graduate of any reputable osteopathic school.

Who this Dr. Gordon is and whether his book is the least bit a suggestion to any known to the editor of this paper, and no responsibility is assumed in the matter. The ad. came to the business manager along with a copy of this book; it looked to the advertising manager like readable literature; he supposed that the work would be interesting to osteopaths whether it met with approval or condemnation; and he inserted the ad. at the usual rates.

On receiving information from several osteopaths in Ohio that Dr. Gordon is not entitled to sign himself "D. O.," the editor has suppressed the ad. and acknowledges his indebtedness for the information. Such incidents go to show the great and growing importance of making and keeping a correct and complete roster of all regular graduates and their addresses. Such a directory has never been compiled and the negligence of both schools and practitioners themselves in assisting in this matter makes the task all but hopeless. THE OSTEOPATHIC PHYSICIAN has prepared for itself by tedious effort and at no small expense what we know to be the most complete and accurate roster of D. O.'s ever printed; this will be given to the schools and practitioners themselves in assisting in this matter makes the task all but hopeless. The OSTEOPATHIC PHYSICIAN has prepared for itself by tedious effort and at no small expense what we know to be the most complete and accurate roster of D. O.'s ever printed; this will be given to the schools and practitioners themselves, in which each graduate is listed.

It is a question of grave importance to us all as to what would be the result of suspending the publication of THE OSTEOPATHIC PHYSICIAN for a month without support from the field. If they are not good advertising propositions for the schools which issue them, it is self evident that they will not be of less value to a practitioner, and at length must be abandoned.

It is a question of grave importance to us all as to what would be the result of suspending the publication of THE OSTEOPATHIC PHYSICIAN for a month without support from the field. If they are not good advertising propositions for the schools which issue them, it is self evident that they will not be of less value to a practitioner, and at length must be abandoned.

Let us Discuss Our Failures With Each Other.

It has long been appreciated by the public, fully as well as by ourselves, that Osteopathic clinic reports in the true sense of the word do not exist. What we call clinic reports and print in our magazines are a hodge-podge of "hot air," and personal advertising in which we grant each other the right to advance rhetorically each his or her personal reputation, just as much as possible. Most of the time these are written—not in the language of clinical reports, but as testimonials, testaments more often of the physician as to his own skill than as regard any definite statement about the patient who is reported to be cured. Often they take the form of an "affidavit of cure" from the patients.

As a profession have we not overdone this proposition and hurt our cause as much or more than we have helped it by competing thus with the patent medicine and advertisement writers? When, after issue after issue, our papers print glowing reports of what we have all done, and at that over our own signatures, isn't it just a little likely that the incredulous inquirer will say: "Well, do these people ever admit failures? Do they know where they do fail to cure?"

The purpose of these remarks, however, is not...
to revise the style of our traditional clinical reports—although I think that could come about with profit to the profession—but to propose that weget together in professional conferences and through the style of clinical reports for our own exclusive perusal and for the advancement of our science.

Let us report to each other our successes, but our failures, too. They are often the result of the preventable circumstances that beset the practitioners in the various classes of our profession. Here is succeeded by the impressive and commodious system of prizes for the encouragement of scientific thought and writing, which will be made public in the next issue of the "Osteopathic Health." It has inaugurated a system of prizes for the encouragement of scientific thought and writing, which will be made public in the next issue of the "Osteopathic Health." It has inaugurated a system of prizes for the encouragement of scientific thought and writing, which will be made public in the next issue of the "Osteopathic Health." THE OSTEOPATHIC PHYSICIAN

A Symposium.

"Should the Osteopath Study Materia Medica?"

"Not!"
says the "Old Doctor"

You request my opinion on the propriety of Osteopaths taking a course in medicine and becoming M. D.'s. I wish to speak my absolute, unconditional disapproval. Some persons who have but little brains give but little attention to Osteopathy, as an engineer should do who manufactures the "Crescent City" (how did Milwaukee, the citadel of Palsf, Schiltz and such celebrities, get such a name?) via Chicago can go into state over the last stage of the jour-

"No!" says Dr. J. H. Sullivan.

The writer recalls how, some years ago, his attention being called towards Osteopathy, he marveled at the proposition that no drugs were ever used in it.

This being true in my case, I think I am warranted in assuming that nine out of ten people who know of Osteopathy will coincide with me when I say, "Osteopathy, a drugless science," owes its almost miraculous growth to this drugless feature. What excuse, then, offers itself to those who for some reason want to be put through the "medical wringer"? For it does act as a wringing machine inasmuch as it squeezes out much of your Osteopathic standing before both the public and your Osteopathic brethren who abhor drugs and daily try to make their people understand the rank hypocrisy of drug practice.

What is the practice of medicine? Those in the ranks of the medical profession who have had the experience which ten or twenty years affords tough at the idea of drugs being effective in diseases. The bleeding just out of medical college is the lowest talker for drugs; the older he grows the less he prescribes; and he soon begins to be loved by his patients because of giving them no medicines. But when you talk to him on this line of thought, then, it logically brings us to the point where he should finally reach the zenith of his glory and ambition by becoming known as a drugless doctor. Hence, then, he is ripe for a course in Osteopathy!

If one hopes to succeed as an Osteopath he must not use drugs. If so, what in the name of all that is Osteopathic does he waste two years for in a medical college, when he should be at work making the lame walk, the blind see and incidentally establishing himself?

The writer does not want to be thought a very unscientific person, but I believe that a course in medicine acts on the Osteopathic brook as does cold cow wallowing around in the brook. Hence she muddles the brook, and raises mud generally.

I have just at hand a circular from an immense chemical establishment, makers of medicinal and toilet preparations.

"Tears are portions of the circular, most interesting to me in this connection is that which reads:

"A very limited list of remedies of demonstrable value are named, for the treatment of such conditions as will assist in bringing about quick, efficacious and permanent results, naturally. Under this head I would name dietetics, hydropathy and physical exercise. The latter is of especial value in deformities and I use it with marked success in my practice."

"Not Medicine, But Surgery," says Dr. Warren B. Davis.

"I do not believe the osteopath needs a knowledge of drug therapies any more, to use a homely expression, than a pig needs two tails."

"Our patients do not want us to explain to them the inefficacy of drugs; they want us to demonstrate the efficacy of osteopathy. Let us therefore spend our energies in perfecting our own system. The longer one practices osteopathy the more thoroughly convinced he becomes that osteopathy is all that it claims to be, and more, and the greater his admiration for the founder of the system, Dr. A. T. Still."

"I do, however, firmly believe that the osteopathic student should be given as special these courses in surgery as is given in the best medical colleges, and that the time is near when our colleges will have a four years' course and teach major surgery degree for a complete course, but not to combine the osteopathic and medical schools. I say, stick to nature's cures and leave drugs to the medical doctor. Fraternally yours,"

E. W. Goetz.

"We can not know Too Much," says Dr. E. W. Goetz.

A medical course from the standpoint that it would enable the osteopath to explain to his patient the inefficacy of drugs" would hardly be sufficient grounds for one giving up the time for such a course.

Patients usually realize the "inefficacy of drugs" when they go to an osteopath for treatment.

On the other hand, one cannot be oversupplied with knowledge of therapeutic and a course in the study of materia medica so far as to know the effects of drugs and not the prescribing of them internally, would be, in my opinion, an advantage.

The osteopath knows that drugs are detrimental to his treatment by interfering with the natural forces of the body on which he depends. By experience I have learned that osteopathic treatment has little or no effect on the patient until the effects of drugs previously taken have been eradicated. Let osteopathic schools improve or add to their curriculum by teaching such branches as will assist in bringing about quick, efficacious and permanent results, naturally. Under this head I would name dietetics, hydropathy and physical exercise. The latter is of especial value in deformities and I use it with marked success in my practice.

"I can recall several instances where blunders were made in diagnosis and treatment by osteopaths which would not have been made if the osteopaths had had a knowledge of major surgery.

"It is this desire for a knowledge of surgery that has induced many good osteopaths to take a course in a medical college, and a knowledge of drugs was not sought nor desired, but was forced upon the osteopath in order to get the M. D. degree, and with it the right to practice surgery should be so desire.

"When our osteopathic colleges teach major surgery, we who have not had that privilege can return and take a post-graduate course.

"The drug doctors themselves are deserting drug therapy, as shown by quotations in recent numbers of Osteopathic Health. Then why should the osteopath study drugs, when he has a system of his own far superior, as demonstrated not only by reason but by actual results?"

Dr. Warren B. Davis, 912 Herman Building, Milwaukee.

"Can't Combine Antagonistic Systems," says Dr. Charles C. Teall.

At one period or another in the career of most Osteopaths—generally just before or after graduation—there is a determination on his part for further study and the addition of M. D. to the D. O. How often this determination is carried into effect is shown by the few who have the degree. More knowledge is to be commended, provided it is the right kind of knowledge; but the idea of accumulating a lot of facts which are not the right kind does not appeal strongly to the M. D. who has the degree. More knowledge is to be commended, provided it is the right kind of knowledge; but the idea of accumulating a lot of facts which are not the right kind does not appeal strongly to the M. D. who has the degree. More knowledge is to be commended, provided it is the right kind of knowledge; but the idea of accumulating a lot of facts which are not the right kind does not appeal strongly to the M. D. who has the degree.

Materia medica should not be taught in the schools, but a chair of Comparative Therapeutics would be of great value to Osteopaths to enable them to feel any cases; also that an intelligent answer could be made to medical complaints. A knowledge of the action of drugs would aid in making a prognosis; also give some idea of the resisting power of the system. The weakness of other systems should be carefully and honestly dwelt upon and Osteopaths could meet the M. D. on his own ground in discussing with patients the relative values of their systems of therapeutics.

"(1) Legal protection.

"(2) A better knowledge of drugs.

"(3) To aid in explaining the inefficiency of drugs.

"(4) The good medical schools are better equipped with clinical material and hospital appliances than are the Osteopathic schools.

"Let us now consider these points in detail.

"(1) In some states a medical diploma would be advantageous under present conditions. In those states Osteopathy does not legally exist. This should not be. He who secures an M. D. degree for this reason shirks his just responsibility to the profession at large.

"(2) To gain a better knowledge of the human body in health and disease is always laudable. The argument is valid if such procedure best accomplishes that result. But a critical study of disease from the medical standpoint yields little Osteopathically. It is an error to spend much time in studying medical therapeutics, and much medical diagnosis as well. The foundation is false. What can we expect of the superstructure? I feel certain that one could better afford an occasional post-graduate course in some of our best schools.

"(3) The third proposition is hardly worth considering, although it is the one most frequently used in defense. The good results of medicine have brought you how many patients? Not one! They come because medicine has failed. Osteopathy is popular because it has done what medicine has not. Patients do not care particularly to know why medicine will not do. They demand rather to know what Osteopathic

"Build up Our Own Schools Instead," says Dr. M. F. Hulett.

"The arguments usually presented in favor of such a project are about as follows:

"(1) Legal. That is the fault of the system of therapeutics; also that an intelligent answer could be made to medical complaints. A knowledge of the action of drugs would aid in making a prognosis; also give some idea of the resisting power of the system. The weakness of other systems should be carefully and honestly dwelt upon and Osteopaths could meet the M. D. on his own ground in discussing with patients the relative values of their systems of therapeutics."

Charles C. Teall, D. O., 1252 Pacific Street, Brooklyn, N. Y.

Dr. Warren B. Davis.

THE CYCLONE MINING COMPANY

Make Your Fortune in Gold!

You can do it if you buy in on the ground floor of the right Property.

THE CYCLONE MINE

is the right property. It is situated six miles from Baker City, Oregon, and is already proven to be one of the best properties in the best gold field of Oregon.

RIGHT NOW IS THE RIGHT TIME

if you wish to take advantage of this opportunity. Each fortnight you wait you will have to pay an advancing figure to possess this stock. Already CYCLONE STOCK HAS DOUBLED ITS VALUE FOUR TIMES IN FOUR MONTHS!!

It will continue to do this steadily if stock stands at par—or far better. It is sure to reach par—there is no gamble on that—and it may one day do ten times better—that is the only thing you gamble on. As an investment you will get four times the value of your money right now. As a gamble you have as good a chance as miners ever did to realize forty times the value of your investment within three years. This proven property is capitalized for $1,000,000 and one issue of Treasury Stock limited to $125,000 is now offered for sale at 25 cents a share. Par value, $1.00. Positively no more of this stock will be put upon the market. With the sacrifice of that amount of stock the Cyclone Company will have all the money needed to complete developments and pay dividends.

The Cyclone Company possesses three claims bearing a very big and very rich ledge only sixty feet below the surface. It is all free milling ore. $250,000 worth of ore has been blocked out with only sixty days of development. The Cyclone lies between the famous Virtue and Flagstaff mines, and on the same vein. These two mines have found their best deposits at a depth of about 1,000 feet, they did not have as much or as good ore as the Cyclone sixty feet below the surface. The Flagstaff pays $75,000 dividends a year, and the Virtue $250,000. The Cyclone is a better mine now than either the Flagstaff or Virtue were at the same depth. The Cyclone Mining Company is ABLY OFFICERED BY SUCCESSFUL CHICAGO BUSINESS AND PROFESSIONAL MEN.

It gives as reference, by permission, the publishers of this paper.

Write us at once for prospectus and other information.

opathy will do. Just as well urge that a minister of the gospel should go on an occasional drinking tour as that we urge others to righteousness. The only valid argument here is that one may have a wider range of knowledge. But granting that this view is true we have to accomplish the same results. We are afraid that all is good in the healing art will spend a lifetime in completing his education, and when there have been too many to devote to acquiring that knowledge. There is too much to learn if we attempt to familiarize ourselves with all theories promulgated. We must specialize in an effort to accomplish results.

(4) In the fourth proposition we can see some justification. Our schools are not what they should be, or might be; but this time alone can remedy. And if we will but try to keep our science pure as an independent system of healing; urge upon schools a better education in every way, a lengthened term, and an efficiency in accord therewith, even this argument must vanish. I am more convinced than ever that the medical opponents will no longer fight Osteopathy directly. In the future it will be a process of assimilation and final strangulation. And this will largely be aided by the effort of the past indicating that we are now giving in acknowledging that they are unable to compete with the so-called ‘regular’ school until adopting its weapons.

Secretary, Dr. G. D. Hulett, Kirksville, Mo.
Treasurer, Dr. F. E. L. Tasker, Orlando, Fla.

LIST OF STATE ORGANIZATIONS.

Under this head we print the names of the State Organizations, the corresponding secretaries and the presidents. Will secretaries of the various associations send us this information? We will carry it at the head of this column.

ARKANSAS:
Dr. W. S. Morris, Little Rock, President.
Dr. H. B. Blackwelder, Hot Springs, Secretary.
CALIFORNIA:
Dr. W. E. Ely, San Francisco, President;
Dr. C. Hardin, Oakland, Secretary.
GEORGIA:
Dr. W. C. Hardin, Atlanta, President.
Dr. E. N. Turner, Savannah, Secretary.
ILLINOIS:
Dr. E. J. McElroy, Chicago, President.
Dr. M. H. Kelly, 504 Masonic Temple, Chicago, Secretary.
IOWA:
Dr. C. M. Proctor, Ames, President.
R. H. Jaques, Cedar Rapids, Secretary.
MINNESOTA:
Dr. W. J. Liffring, St. Paul, President.
Dr. E. E. Williams, Minneapolis, Secretary.
MISSOURI:
Dr. W. D. Hulett, Kansas City, President.
Dr. W. H. Newsam, Kansas City, Secretary.
NEW YORK:
Dr. J. W. Newbold, 256 Elliptic Street, Buffalo, President.
Dr. Charles C. Well, 1352 Pacific Street, Brooklyn, President.
TENNESSEE:
Dr. W. J. Liffring, Chattanooga, President.
Dr. Bessie A. Duffield, Knoxville, Secretary.
WASHINGTON:
Dr. William Snell, Tacoma, President.
Dr. F. J. Foulds, Seattle, Secretary.
WEST VIRGINIA:
Dr. W. E. Ely, Parkersburg, President.
Dr. W. A. King, Livingstone and Treasurer, Dr. W. A. Fletcher, Charleston.
WEST VIRGINIA (IOWA ASSOCIATION):
President, Dr. L. L. Smuller, Davenport, Secretary.

Personal and Professional.

Dr. S. T. Lyne, recently of Elksworth, Kan., has located at Leavenworth.

The Minnesota Osteopaths are planning for a fight for legal recognition before the next legislative session.

Dr. Clarke Bunting has opened handsome offices in the new Century Building, opposite the Post Office, at Kansas City.

Dr. J. C. Price, 176 E. C. O., is reported, has severed his connection with that school and has located in Chicago.

Dr. R. A. Miller, graduate of the A. S. O., announces the opening of his office for the practice of Osteopathy at 176 Euclid avenue, Cleveland, Ohio.

Mrs. J. W. Shavely, D. O., of Albin, Ina., recently toured through the East visiting a number of Osteopaths and reports that all seem to be doing well.

Dr. O. Dennismore and Dr. I. A. Santee announce that they have completed whereby they succeeded to the practice of C. R. Saxe, at Wilkesbarre, Pa., on July 10.

The Osteopathic Schools of California have been incorporated and its headquarters are now the office of its secretary, Dr. W. J. Hayden, 332 West Fifth street, Los Angeles. The A. S. O. will hold its convention in California taking special work in Chicago University. He is making a special study of physiologic entomology. The doctor will occupy the chair of physiology in the A. S. O. next year.

Dr. William Sterling Peirce and Josephine Elizabeth Liffirng were married at Toledo, April 30. They will reside at 130 South West street, Lima, O., where they have been engaged in the practice with Dr. Edward A. Liffirng.

Dr. W. J. Liffring and wife, who have left New York for a trip to Europe, have decided to recommend graduates of the Columbus School of Osteopathy who have been practicing in the state, to the State Board of Examiners for license. The motion was made and urged by a graduate of the A. S. O.

Dr. Chas. C. Teall was recently elected by the New York Osteopathic Society as a delegate to the A. O. A. meeting at Milwaukee. Dr. Teall has offices for the summer at 115 Mason street, Greenwich, Conn., which is about forty minutes' ride from the station.

The Old Doctor was presented with a handsome leather chair by the A. S. O. seniors the other night of the A. S. O. commencement.

Dr. Hildreth and Secretary Warren Hamilton entertained the A. S. O. students at an alfresco gathering June 13th at the former's home in Kirkville. It was thoroughly enjoyable for novel features and good old-fashioned entertainment.

Dr. Bessie A. Duffield of Nashville, secretary of the Tennessee Osteopathic Association, left the first of June for an extended trip through California and Colorado. She will return in August by way of Milwaukee, where she will attend the meeting of the American Osteopathic Association.

The Toledo papers have announced the marriage of Drs. W. J. Liffirng and Claire H. Gorham of that city. Dr. Liffirng and wife were classmates in '97 at the Northern Institute, Minneapolis. Their many friends congratulate them on the matrimonial conclusion of their professional relationship.

Dr. R. A. Kirkpatrick, who was appointed by the judge of probate, Hon. F. W. Webster, Tonia, Mich., to be one of the examining staff of physicians and surgeons of the Criminal Court of the State of Michigan. This is a timely recognition of the efficiency of Osteopathic diagnosis and a deserved compliment to Dr. Kirkpatrick as a practitioner.

Dr. C. W. Proctor, who for the past six years has been a member of the faculty of the American School of Osteopathy, has severed his relations with that institution at the close of the present school year. Dr. Proctor will spend the months of July and August in the office of Dr. T. J. Watson, Pueblo, Col., after which he will choose a location. It is rumored that he will be connected with the Colorado Osteopathic Surgical Association.

Dr. George J. Hulme was unfortunate enough to wrench his spine in treating a heavy-weight patient recently in his New York office. It caused him much distress and Drs. Teall and Hulme of Brooklyn and Dr. Steele of Buffalo were called to his assistance, succeeding in affording him much relief by correcting a lateral curvature of the spine. This experience is an argument, fellow practitioners, for the use of the swing on your "heavy weights."

Dr. F. D. Parker, one of the leading members of the profession at St. Paul, is organizing a party to go to New Mexico and establish an open air sanitarium after the fashion of the Farm Sanitarium at Boulder, Col. The plan for patronizing the same is for patients to be transplanted to live out of doors, sleeping in sanitary arranged tents and by enjoying to the fullest the benefits of a perfect atmosphere a perfect health.

The plan is a good one, but why not go to the Colorado Osteopathic Sanitarium?

Dr. Mary D. Ely, S. C. O., Jan. 1, 1873, has been living in St. Paul, Minn. Since her graduation, has recently joined her mother, Dr. E. M. Ely, S. C. O., and brother, Dr. M. E. B. Ely, S. C. O., in the Ely Osteopathic Infirmary at Rochester, Minn. The Ely have built up a splendid practice in Rochester, in one of the greatest medical strongholds in the United States, famous in part because of St. Mary's Hospital and the Mayo, the well-known surgeons.

Axis Club Ladies Toast Their Seniors.

Every senior of the Axis Club deemed herself lucky on the night of June 18 at Kirksville. First, she was the guest of honor of her sorority. Next her best beau was there beside her. It was a rare night in June. Decorations were in violet and white, the class colors, while cards, dancing and feasting made up the program.

Commencement at the Bolles Institute.

The program of the fourth annual commencement of the Bolles Institute of Osteopathy was held at the First Congregational Church, Denver, Friday evening, June 20th, 1902.

A delightful program was rendered. The address was delivered by Hon. John A. Rush. Degrees were conferred upon the following graduates: Ida M. Andrew, Frank Irwin Furry, Bertha Hilton, Hettie M. Ross and Mae Johnson Work.

The Neuron Society is the Late Comer.

At the Philadelphia College of Osteopathy the "Neuron Society" has been organized by the students in all classes somewhat after the plan of the Atlas Club and the Axis Club at the A. S. O. These are enticing fellowship in the profession and advancing Osteopathy to the foremost rank in the therapeutic world. Brotherhood and sisterhood, with love ideals is a good thing and should be pushed along. Such organizations will help the development of esprit du corps in our profession.

West Virginia D. O. S. Get Together.

The West Virginia Osteopathic Society met for organization at Parkersburg June 14 and proceeded to take out articles of incorporation. We protest against the influence for Osteopathic progress and want the names of all Osteopaths who may locate in the state. Let every state perfect its organization and then our national organization can accomplish things. See the official roster for our state officers. Fraternally, W. A. FLETCHER, D. O., Secretary.

Manchester, Tenn.; Wants D. O. Beamont, Tenn.

An osteopath is wanted at Manchester, Coffee County, Tenn. This is a place of 2,500 people, with a town of 2,000 inhabitants ten miles away. For ten years we have been as to whom to write, address mail to my care.

Your magazine is the best published, and I look forward to the date of its appearance with impatience. Thanking you in advance, I am sincerely yours, Dr. W. B. LEND, Opera House-Building.

Big Graduation at Kirkville.

One hundred and seventy-four graduates gathered on the green at Dr. Charley Still's on June 20th, 1902, to pass the last week of exercises and the beautiful ceremonies attending commencement at the A. S. O. Class day exercises were held the day before in Memorial Hall, when an entertaining program was rendered. At commencement the "Old Doctor," as well as Dr. F. F. Young and Dr. F. J. Fessatt, delivered addresses. Lack of space compels the omission of the healthy looking graduate roster until next issue.

Iowa's State Meet Was Great.

No better meeting of Osteopaths was ever held than that of the Iowa State Association at Des Moines on June 27. Many Missourians were there and did not budge to show that the occasion was greater than any of its predecessors, so it was granted as certain. The gatekeeper counted 175 present, not counting those who made in under the tent, or sat on neighboring fences. Papers were read; discussions were participated in to good profit; and a banquet was held at the Hotel Iowa and was enjoyed in the evening. Great is Iowa, the state of Secretary Shaw, Senator Dolliver, Dr. S. S. Still, and a host of enterprising Osteopaths!

Atlas Club Outdoes Former Celebrities.

Atlas Club fellowship reached the high point of interest in the night of June 17 at Kirksville, when the annual banquet and reception—the seventh formal affair so far held by that society—were held under the rosiest auspices. The Chicago contingent took possession of spacious club rooms in the Dockery building and the banquet was served at Miller's Hall. Dr. Hazzard served as the presidium of jokes and wisdom and these specialists did their stunts in the best style known to polite vaudeville: G. C. Maxwell, "The Atlas Club"; David Reese, "The Class Bello" (Bell); Dr. Young, "The Ladies"; J. H. Murray, Jr., "The Club Dog"; Dr. H. W. Hayes, "Our Seniors"; W. S. Joss, "A Reminiscence." The A. S. O. orchestra gave all that could be asked for in the way of music.

The Kirksville Alumni Reunion.

Old Memorial Hall at Kirksville was ablate with light and color at the alumni reunion of the American School of Osteopathy held its annual love feast. Dr. D. P. Putnam, of Sioux City, la., the retiring president, welcomed the assembly, greeted Dr. Holt Still and delivered the keys of the city. Dr. M. E. Clark read a paper on "Diseases of Women," and Dr. Charles Harkness, M.D., on "The Treatment of Tuberculosis of the Lungs." Dr. Herman F. Goetz, of St. Louis, presented another on the "Diagnosis and Treatment of Functional Nervous Diseases." The recitations of most for the practitioners and extended discussion followed, proving the great value to Osteopaths of getting together. See the roster in this paper for the newly elected officers.

A Feast of Reason and Flow of Soul at the Foot Hills.

The second annual Osteopathic banquet and reunion of the Rocky Mountain practitioners was held at the celebrated Brown Palace, Denver, Saturday evening June 16. Dr. H. Buffum acted happily as toastmaster and these responses were made with forceful rhetoric and great good humor:

The Rocky Mountain people always know how to enjoy themselves.

Philadelphia College Marks an Epoch.

Heartiest congratulations of the profession are due the Philadelphia College of Osteopathy, which on June 26, after three and a half years of hard, earnest work, held its first Commencement exercises, graduating a class of fifteen. Its first class was graduated a year ago, which thus made this school an official member of the Associated Colleges of Osteopathy, and gave it a right to its corporate name. The jubilee attending this commencement, therefore, was the first public and official how to the Philadelphia public. When did our course have been lengthened to three years and the foundation...
The list of graduates were:

Witherspoon Hall, the scene of the exercises, was abuzz all a quiver and the flashlight pictures of the graduates as ‘‘staged’’ would do credit to any literary college.

Success to you, brethren!

Pow Wow of the Illinois Clan.

The Illinois Osteopathic Association met in Peoria, July 4th and 5th. The meeting was well attended and a fine program carried out. Dr. A. G. Hildreth, of the American School, and Dr. S. S. Still, of the Des Moines college, were present. Dr. A. S. Melvin, of Chicago, was elected president; Dr. A. B. Pitts, Bloomington, Vice President; Dr. Mary H. Kelly, Chicago, Sec.-Treas. The next meeting will be held the first Saturday in June, 1908, in Bloomington.

Mary H. Kelly, D. O.,
Secretary.

No Excuses for Absence will be Accepted.

Those Osteopaths who wonder how it is that the medical fraternity work together whenever anything bobs up opposing their cause should know that it is done through the medical societies. It is a question of organization; if we expect our cause to succeed we must be loyal to our national association.

August 6, 7 and 8 is the time and Milwaukee the place where you may show your loyalty to the profession by your presence at the annual meeting.

‘‘Cannot afford it!’’

Borrow the money to come and learn how the successful practitioners are able to earn good incomes. ‘‘Cannot get away?’’

State the conditions to your patients and they will gladly excuse you for one or two treatments knowing that when you return you will be up-to-date, rested and able to give them better treatment. ‘‘Sick?’’

Then come by all means, and let men like Dr. Hildreth examine you and find the cause of your sickness. I will not go farther. There positively is no good excuse for absence and the profession will hear none; so do your duty to Osteopathy, your patients and yourself and attend this meeting, which promises to be the most interesting and best attended in the history of our science.

WARREN R. DAVIS,
Chairman Reception Committee.
912-914 Herman Building.

An Open Letter to D. O. ‘S.

Dear Doctor: Have you ever watched the growth of a sanitarium which is properly con­ducted, and noticed the wealth it means to its stockholders?

Did you ever stop to think that the Osteopaths have no sanitarium of their own, where they may send severe cases and have them treated ac­cording to the doctrines of Osteopathy?

Listen to this, and think what it means to YOU, every one of you.

We have been appointed as the fiscal agents of the Colorado Osteopathic Sanitarium Com­pany, incorporated for $100,000. This company owns 180 acres of the finest land in Colorado, rich in scenery, located at the foot of the ever­lasting hills, adjoining the Colorado University campus. Besides the acreage it also owns the oil and minerals under said grounds.

Such opportunities as are offered to every Osteopath now sending cases to you. Colorado’s climate is suitable for invalids twelve months in the year while northern sanitariums depend on three to six to make their enormous profits, thus giving this company from two to four times the value of northern resorts.

This company can care for and accommodate from 400 to 500 patients; 150 would mean a profit of more than 10 per cent on the capital stock.

Do you want stock in this company at $10 per share, payable either in cash or on the install­ment plan?

Do you want to help in founding a home which will be a credit to your profession and a profit to you as an investment?

Do you want a place to send your bad cases and at the same time get a share either in cash or stock of the money spent for treatment while your patients are under the care of this sanitarium?

For a short time we are selling stock at $10 per share, YOU CAN PAY PART DOWN and the rest in installments.

If you are interested, write us for full partic­ulars. This company is inducted by the lead­ing men in the profession, who are also stock­holders with us.

After the $10 allotment is sold the price will go up. Write to
THE OSTEOPATHIC PUBLISHING CO.
W. M. McCully, 343 Marquette Bldg., Chicago, Traveling Representative.

TELL YOUR WANTS.

Every osteopath who needs an assistant, or a partner, or who wants to dispose of his practice, or buy or sell books, instruments, scholarships or anything of value to osteopathic practitioners, should use the WANT AD columns of The Osteopathic Physician. It will be read by every practitioner in the profession and all the students who hope to join the profession.

Without Drugs.

By Dr. J. Evelyn Wilkes.

What, when medical skill has failed to restore to health all those who ailed? There’s usually one thing must avail—Can bring it down in a little while, however, the fever.

What, when fever rages wild, In advancing age or tiny child?

Osteopathy!

What, when operation is the decree
That the vermicform appendix must not be, This science does not her degree?

Osteopathy!

What can with ease relieve pain, All centered in a bursting brain?

If you but try, you will exclaim—
Osteopathy!

What the past must rightly claim, With others who have won a name, Conspicuous by its worldwide fame—
Osteopathy!

DESIRABLE CHICAGO LOCATION AND PRACTICE FOR SALE.

Because of the need of limiting my practice entirely to my own down-town office I will give my Kenwood location with a neighborhood practice which cannot be transferred down-town, to some reliable osteopath for $100. I have enjoyed a good practice at this office dur­ing the past eighteen months, and the district has been better advertised with osteopathic literature than any other locality in Chicago. A cozy five-room flat at a very cheap rental, especially designed for a physician’s office and family residence. Is located in a refined, home district, on the lake, the most beautiful part of Chicago. Within eighteen minutes of heart of down-town district.

Just the opportunity for one wishing to lo­cate in Chicago, or for a D. O. who wishes to practice here while pursuing post graduate work. If desired I will also give a bargain in furniture. Interested parties should correspond with me at once.

HENRY STANHOPE BUNTING, D. O.,
508, 57 Washington St.

THE OSTEOPATHIC PUBLISHING COMPANY, Fiscal Agents, 343 Marquette Building, Chicago.

Handsome Prizes for Good Articles.

OSTEOPATHIC HEALTH offers prizes worth striving for to the osteopaths who will write the four best articles of the year. These articles must not contain more than 1,200 words and may be as short as 600 words. They must be in thoroughly popular vein, suitable to publish in OSTEOPATHIC HEALTH—which is to say, must be well adapted to interest and instruct the people in Osteopathic theory or practice.

Select your own subject and choose your own method of handling it. Be original.

Everybody in the profession has a chance for one of these prizes. You, as a practitioner, talking with patients every day, knowing what questions they ask and what explanations and arguments best appeal to them, have a better chance at these prizes than the college professors. The contest is open to every graduate of the recognized colleges of osteopathy.

These prize articles will be run in the current number of OSTEOPATHIC HEALTH, together with thirty-six others receiving favorable mention. The committee of award will comprise Dr. J. Martin Littlejohn, Dr. Carl P. McConnell and Dr. Henry Stanhope Bunting.

RULES OF CONTEST.

1. Sign your article with any assumed name you like, but not your own name.
2. Write this assumed name on a sheet of paper along with your real name and seal the envelope.
3. Send the article and this envelope to OSTEOPATHIC HEALTH before September 1.
4. Typewrite the contribution wherever possible. Write on one side of the paper only. Write in simple style, so everybody can understand. "Fine" writing and technical discussions are not wanted.

FIRST PRIZE,
The Library of Natural Therapeutics, 12 Volumes; P. Blakeston's Son & Co. Price, $27.50.

SECOND PRIZE,
Deevor's Anatomies, 3 Volumes: the most perfect text-book and pictorial art that has ever been published; P. Blakeston's Son & Co. Price, $23.00.

THIRD PRIZE,
Butler's Physical Diagnosis, (D. Appleton & Co.) a new and marvelously graphic and original text on Diagnosis, full of ideas to the Osteopath. Pictorially perfect. 87.
