THE OSTEOPATHIC PHYSICIAN

THE OFFICIAL BULLETIN OF THE AMERICAN OSTEOPATHIC ASSOCIATION.

ENTRUSTED JANUARY 30TH, 1913, CHICAGO, ILL., AS SECOND CLASS MATTER, UNDER THE ACT OF CONGRESS MARCH 3, 1879.

VOLUME 4.

CHICAGO, SEPTEMBER, 1903.

Number 4.

WORLD'S FAIR DAY
IS JULY SEVENTH.

The Louisiana Purchase Exposition Recognizes Osteopathy.

WILL MARK A GREAT GATHERING.

Seventh Annual Meeting of American Osteopathic Association Will Meet at That Time in St. Louis—Want 1,200 D. O.'s to Attend.

The Louisiana Purchase exposition has dedicated July 3d to commemorate the life and work in behalf of science and humanity of Dr. Andrew Taylor Still. It will be called "Osteopathic Day," and all the official programmes will flaunt the flag of our profession to the breezes.

It will truly be an epoch in Osteopathic history and—barring too much practice or high water—Father Andrew will be there to greet his own.

Will you be there to exchange greetings with him and share this Osteopathic jubilee? We have sworn to have 1,200 D. O's present and inside the American Osteopathic Association, which will convene in its eighth annual meeting on that occasion. You ought to be one of them. Truly, doctor, you really should.

If you have the price join the association and come. Begin to plan for it ahead.

Meanwhile join the state and the national associations. Help.

The St. Louis Osteopaths are entitled to great credit for their efforts in bringing about "Osteopathic Day" at the exposition. To President Francis, too, is due our praises.

Getting Busy at St. Louis

"The St. Louis Osteopaths are all hard at work. We have had two meetings since the A. O. A. meeting in Cleveland and have appointed two committees and shall soon appoint six more. The two appointed are:

"General World's Fair Committee—Dr. Herman F. Goetz, chairman, Century Bldg.; Dr. Homer Bailey, Odd Fellows' Bldg.; Dr. William Smith, 3229 Washington Ave.; Dr. Minnie Schaub, Carleton Bldg.

"Membership Committee (whose duty will be to solicit and urged every legitimate D. O. here to become a member of the A. O. A.).—Dr. A. M. King, Meroord-Jaccard Bldg.; Dr. J. O. Hatton, same Bldg.; Dr. Genevieve V. Evans, Maryland Bldg."

"We shall also appoint the following committees later on: Press, Music, Entertainment, Receptions, Office and an Information Bureau. Of course all work here will be under the direction of our A. O. A. Executive Board and the Committee on Programme. Your humble servant, being president of the local association, was by motion made ex-officio member of all committees."

"ARTHUR G. HILDRETH, D. O.

"Good work. Keep it going. Ex-President Teall did much to aid and direct the work, and it is now sure that the best arrangements possible will be guaranteed the delegates."

The St. Louis Osteopaths have organized an association. These officers were elected: Dr. A. G. Hildreth, president; Dr. Minnie Schaub, first vice-president; Dr. C. M. Case, second vice-president; Dr. Josephine de France, secretary; and Dr. Alfred Edwards, treasurer. This is the executive committee: Drs. E. E. Saturday, H. E. Bailey and J. O. Hatton. The association is already busy with plans and preparations to entertain the next meeting of the national association.

Thou art th' exponent, great and grand,

The Placebo

Hail, friend of frail humanity! Hail, healer of our ill! With what delight we look on thee, Thou snowy, pearl-like pills! Tenacious comes not in thy wake, Nausea nor vertigo; Nature rebels not though we take "One every hour" or so. For ages thou hast traveled round In saddle-bags galore,

Frederick N. Oulm, D. O.

The wise M. D. with look profound
Has brought thee from his store;
"Expectant symptomatic" and
To cure the halt and hame,
A panacea that every kind
And every "school" may claim.

How many livers thou hast blessed,
How many stomachs saved,
Thou dost not leave a heart depressed,
An appetite deprived;
Feveres have cooled at thy command,
"Fits" vanished suddenly;
Thou art th' exponent, great and grand,
Of psycho-therapy.

The maily may never know
The debt it owes to thee,
But on thy way unambitious,
Angel of charity;
And still, methinks, as through the years
Thou hearest human ills,
Great Asclepius looks and cheers
From the Olympian hills.

LULA CLARK MARKHAM, D. O.

Maysville, Ky.

AGAIN FIGHTING IN ALABAMA.

A. O. A. Takes Up the Battle for the Oppressed.

If You Wish to Help in Alabama You Must Do So To-Day—Next Week Will Be Too Late.

Again the guns boom in Alabama.

At old Montgomery, the Confederate Capital, the Osteopaths are already fighting the organized medical host of the state for existence. The battle line now on is to be short and decisive.

A special session of the legislature lasts three weeks of this month—not longer. It is for constitutional changes, but the D. O.'s expect to get in edgewise and carry the day. It will be a case of parliamentary diplomacy, skirmish fighting, rather than the open and futile appeal to fairness of last session. Prospects are good to win if supported properly by the field.

The American Osteopathic Association leads the fight. Its Legislative Committee comprises Drs. A. G. Hildreth, T. L. Ray and W. J. Neviser. President Hazzard is Commander in Chief. Drs. Norman, Ligon and Barnes are all Major Generals in the field. Old friends and new within the state are supporting our arm. It is a good cause and worth your financial support, doctors. Send 'em a lift to-day—to-morrow may be too late. Here is Field Order No. 1 from headquarters:

The Appeal of President Hazzard

By action of the Association at the Cleveland convention the president was empowered to make any appeal for funds to assist the Alabama Osteopaths in the new struggle which they have decided to make for legal recognition in that state.

The history of the brave fight made by the Alabama Osteopaths against the persecution so rigorously waged by the medical men of the state is known to all. By a state supreme court decision the practice of Osteopathy is held to be the practice of medicine, and Osteopaths must procure from the state board, by examination, a license to practice medicine before they can practice Osteopathy there.

In spite of the defeat of the Osteopathic bill before the last legislature, most encouraging reports come from the local Osteopaths, and there is every reason to hope that a new presentation of the matter to the legislature will be successful.

The time is short, as the legislature convenes in September, and what we do we must do quickly.

This is a matter of vital interest to every Osteopath. The organized opposition that we must meet is stronger now than ever before. From now on the fight that we must make for our rights—perhaps even for our lives—will be fiercer than any we have yet been called upon to wage. A defeat in Alabama is a defeat to the cause; it is a setback to Osteopathy that the profession can ill afford.

Money is needed for every legitimate expense that such a matter entails. The money of Oste-
If You Want to Help Alabama

Dr. A. G. Hildreth, President, A. O. A.;

Mr. Barnes, you have no desire to leave Chattanooga and practice in this state, have you?

Mr. Barnes—"No, sir.

Judge—"We would like to have more such doctors as you in this state; and I hope to have you in the future; but as the technical meaning of the law prohibits the practice of your science, Osteopathy, in the state, it would be best to wait a little while until you can have a police force, to which you might apply to plead guilty to the crime of practicing medicine. Therefore, I release you and your bondsmen from all charges.

The judge, lawyers and grand jurymen got up and personally spoke to Mrs. Barnes and shook their hands and expressed themselves as much as possible that Dr. Hildreth would become legal in the state of Alabama.

And that's what happened to Mrs. Barnes!

Dr. Oium on Centralization of Government

"The greatest of all problems seems to be the question of how to get the Osteopaths throughout the country to join the A. O. A. Every practicing Osteopath should be a part of the whole, and the whole should be the A. O. A. By being properly organized, we could be many times more powerful in legislative and legal battles, which are sure to confront us in the future.

The lack of proper organization was clearly seen by us all last winter, in the limited power of the A. O. A. to take the generalship of the legislative battles, and carry them through to a glorious victory. That power should be vested in the A. O. A. with funds to back it so all our laws could be made more uniform. The only way this can be accomplished will be to devise some means by which a greater number of our profession can be gotten into line. The plan which I wish to suggest is the plan for the A. O. A. to reorganize so as to include all State Associations as branches of the main body, also adopt such a constitution and by-laws whereby all State Associations shall be governed. Let the State membership fee be five dollars (or whatever the A. O. A. may deem advisable), which shall also constitute membership in the A. O. A., without dues. Every member of State Associations would thereby become a member of the A. O. A., for which the States should remit $2.50 per capita, or such amount as may be decided upon.

The greatest amount can be induced to join their State Associations, but cannot be induced to join both. Under such a plan of organization, a great deal more money could be placed in the A. O. A. treasury. I think I am safe in stating that with a little effort from each one of us, the best 2,000 members in each state could be induced to join their State Association. Then, out of 3,200 practitioners, there would have 2,400 members, at $2.50 per capita. This would mean an annual income of $6,000. With a lump sum of that amount in one treasury, this organization would furnish a great deal more for the advancement of the science of Osteopathy and achieve more decisive victories in the legislatures, because no one legislation would be as powerful as it would be if the whole profession were behind it. We have not felt confident we had ample funds to carry through to a successful end. A thing...
"O. H." Has New Features for October.

THE OSTEOPATHIC PHYSICIAN

AMONG THE STATES

Meeting on the Plain

Nebroda had a good State Association Meeting at Grand Island August 26. It was well attended and full of ginge. These offi­
cers were elected for the ensuing year: President, Dr. J. M. Gilmore, of York; vice pres­
dent, Dr. G. H. Hoagland, of Norfolk; secre­tary, Dr. Grace Deegan, of Omaha; treasurer, Dr. Emma Howells, of University Place. The place for the next meeting is Fremont.

Good live discussions were heard on pertinent topics at the conven­tion, of whom over one-half were new members, and the following are the discussors: bowers, Lincoln; free, Alliance; gamble, fremont; hoys, university Place; moss, ashland; richardson, lin­coln; doughty, nebraska; hoagland, Norfolk; davison of lincoln; farwell, omaha; heebou, syracuse; pierce, nobel; van de saan, crete; ireland, central city; cabbage, beatrice; stevenson, Kearney; earl, fremont; thomas, aurora; peterson, lincoln; deegan, omaha; struble, hastings; kilgore, york; run­yan, seward; phelps, edgar; mcCulley, st. paul, field, Millikin, grand island. About one-third of this number were women.

What They Did in Minnesota

(from the Minneapolis journal)

Nearly 200 osteopathic physicians of the state held their annual association meeting Friday, September 4, at the W. C. A. building, min­neapolis. A number of interesting papers were read. Discussions followed. Clinics were a feature.

In the evening "A Jubilee Banquet" was given in the dining parlor of the W. C. A. building. Dr. Edwin C. Pickler was toastmaster. The Minnesota Osteopathic Hospital, Dol­obyn and others furnished the music. The oc­casion was the most important osteopathic so­cial treat in eight years of osteopathic his­tory in this state. The celebration of the pas­sage of the state osteopathic law is the chief reason of the festival at this time.

The toast list included the following:

St. Paul Opens Free D. O. Dispensary

(from the St. Paul Dispatch, June 27.)

A free dispensary is opened in St. Paul by the Osteopathic practitioners of St. Paul, at 138 West Sixth street. On Mondays and Fridays one or more of the well-known Os­teopaths of the city will treat patients free of charge at the dispensary from eight to ten a. m., and from seven to eight p. m. Officers of the alumni association who are in charge of the present are Directors: Dr. E. C. L. Kugel, Dr. J. C. McGinn. The board of directors is composed of Drs. Laura F. Lewis, victoria Anderson, F. J. Davis, C. A. McLaughlin.

Buffalo New Organization

The osteopaths of buffalo, N. Y., have formed an association. An informal meeting was held at the home of dr. a. b. Clark July 29, and on the following Friday evening the first regular session convened at the home of Mrs. Alice and W. A. Proctor, when a con­stitution was adopted and signed by the charter members present.

The following officers were elected: Dr. A. B. Clark, president; Dr. W. A. Crawford, vice-president; Dr. Irene Bissonnette, secretary; Dr. C. R. Mitchell, treasurer. Executive Committee: Dr. C. W. Proctor, Dr. G. H. Hockman, Dr. Karl C. Kugel, Dr. A. B. Clark, Dr. Irene Bis­sonnette. Committee on rules and regulations: Dr. Johanna Barry, Chairman; Dr. W. A. Crawford.

Dr. a. t. still was made an honorary mem­ber.

Meetings are to be held the first Monday even­ing of each month, october to be the annual one. Visiting osteopaths are cordially invited to attend.

Irene Bissonnette,
BUffalo, Aug. 15.
Secretary.

It Is Not Medicine in North Carolina

(from the brooklyn (N. Y.) eagle)

Physicians engaged in the practice of osteo­pathy, and they are many, probably will be pleased to learn of the late court decision in North Carolina. There is a statute in that state which makes it a misdemeanor to practice medi­cine or surgery without a license, and there has long been a doubt if osteopathy came within the provisions of that statute. While the Os­teopath may be inclined to object to being rated as anything less than a physician, or a surgeon, there is a compensation in the fact that he is not bound by the rigid rules, laws and restrictions which regulate the conduct of the regular doctors. The case of state vs. Rie­night, 29 L. R. A., 187, holds that the Os­teopaths are not within the statute regulating the practice of medicine and surgery.

MICHIGAN PRACTITIONER OF THE MONTH

The Michigan Osteopathic Association will hold its annual convention at the hotel Cadil­lac, detroit, September 26, to begin promptly at 10 a. m. The following is the programme: 10:00 a. m. Call to order. Invocation. Address of Welcome, Dr. H. B. Sul­livan. 10:20 a. m. President's Address, "Organizations." Dr. George H. Snow.
10:50 a. m. Symposium: Spinal Curvature: Drs. W. S. Mills, Blanche Reynolds. 11:30 a.m. New Business.
1:30 p.m. Clinics: Drs. F. H. Williams, R. A. Gleason, Claude Schofield, Dr. P. O. Root and Mary Trutlloyd.
3:00 p.m. Symposium: "Diagnos­tics": Drs. Herbert Bernardo, E. E. Schwartz, E. Charles. 4:00 p.m. Final Business Meeting. Report of Committees.
4:30 p.m. Election of Officers.
5:00 p.m. Unfinished Business.
8:00 p.m. Symposium: "Pelvic Diseases and Their Treatment," Drs. Church, Emeline Cully, J. S. Blair, Emelie Greene.
Adjournment

The State Board of Examiners will be present to receive credentials prior to their official meeting at October 19. Festooned with flower and garland.
EDTHE ASHMORE, D. O.
Chairman, Executive Committee.

Away with the Head Mirror. Be Up to Date. Use Direct Illumination (Electric light in cavity)

The Most Perfect and Complete Set of Carl Electrically Lighted Diagnostic Surgical Instruments Ever Constructed, consisting of the following: 1 Case with Battery and Lamp Cords, 1 Tongue Depressor, 1 Auricular and Nasaloscope combined, 1 Dr. E. Flescher Inglis's Laryngoscope combined with Amrtrum and Simms trocar, 1 Dr. E. Flescher Inglis's Oral and Rectal or general diagnostic instrument, 1 Dr. A. R. Ferguson's Proctoscope and Sig­moidoscope, 1 Dr. E. F. Lykken's Urethroscope, 1 Dr. Kelly's Female Urethroscope and Cystoscope combined, (Each instrument has its own lamp.) Complete with Case, Battery and Cords, . $50.00
Or in Case with Cords but without Battery (to use with other lamp) $40.00
Without Kelly Cystoscope, $30.00 least.
The Most Practical and Best Investment a Physician Can Possibly Make. On application, prices quoted on any instrument separately.

It is Surely a Patient- Getter.
The American School of Osteopathy

KIRKSVILLE
MISSOURI

DR. A. T. STILL
Founder of the Science . . . . President

The largest and foremost Osteopathic College in the world. Ten years of successful school work. Number of students exceeds seven hundred. This institution teaches genuine Osteopathy—no adjuncts.

Teaching facilities unexcelled. Thoroughly equipped laboratories in all departments. Clinical advantages unlimited. Faculty composed of fifteen able and experienced instructors who devote their full time to teaching. Anatomy taught in every term—three professors in charge of this department. Special attention given to dissection and to the study of anatomy in general.

Course of study covers a period of two years, divided into four terms of five months each. Classes formed in September and February. Next term opens September 7, 1903.

Obstetrics and Gall Stones

THE OSTEOPATHIC PHYSICIAN

State Board Items
The Montana Osteopathic Board will hold its next examination the first Tuesday in September.

Illinois Osteopaths will make another effort to get representation on the State Board of Health at the next legislature.

A fair examination was reported by the 22 Osteopaths who went before the Illinois State Board of Health July 22, 23 and 24 at the College. About 130 medics also were examined.

The State Medical Board of North Carolina has discriminated against Osteopaths and refused to license a single Osteopath. Here is another ripe field for a special Osteopathic statute.

Eight Osteopaths were admitted to practice by the Ohio State Medical and Osteopathic Board last month. Dr. E. H. Cosner, a June A. O. graduate, is reported to have scored the best average ever made before this board.

The first meeting of the Oklahoma Board of Osteopathic Examination was held at Guthrie July 8. Twenty-two applicants were licensed. Officers of the board are: Dr. Rose, of Oklahoma City, president; J. A. Price, of Perry, secretary, and Dr. J. W. Shade, of Blackwell, treasurer.

No Osteopath can pass the Alabama Medical Board's examination, not even on a general average of 100. Dr. William Osler couldn't pass it, they say, if he masqueraded as an Osteopath. It is such infamy as this that is giving Osteopathy independent statutes and independent state boards all over the union.

Indiana's State Medical Board had a hectic interval last month and granted examinations to Osteopaths at its last meeting—the first since the passage of the Osteopathic law. The test was the same for medics and Osteopaths, barring the latter. Three D. O.'s took the examination and one, it is said, passed.

The Missouri Board of Osteopathic Examiners met in Jefferson City last month to organize. Dr. A. L. McKenzie, of Kansas City, was elected president; Dr. J. H. Crenshaw, of St. Louis, secretary. Those now in practice in Missouri and licensees of other state boards may register under the new law by payment of $1. Others must pass the board's examination.

Michigan's new law became operative September 15. A rush of new graduates into Michigan was reported from Detroit last month, about thirty, it is said, having tried to get credentials under the old law. Our information is that they were successful, but we do not vouch for the accuracy of the statement. Dr. Williams says all arrivals after the date of passing the new law must take the examination. Dr. Rider is reported as dissenting from this opinion and saying that those who register before the new law takes effect get in on the old basis. Who is right? We shall see.

The Osteopaths of the state of Iowa have entered on a campaign with a view to securing representation on the state board of examiners. With this end in view petitions are being circulated in all parts of Iowa asking that Gov. Cummins, when he makes the next appointment on his board, name an Osteopath. The petitions set forth seven reasons why the profession should be represented on this board. Osteopaths hold that inasmuch as the law recognizes the profession as a healing art and public sentiment endorses its practices, that this school should have

The South Pasadena Osteopathic Sanatorium

OWNED BY
THE PACIFIC SCHOOL OF OSTEOPATHY

This Sanatorium is open to the patients of any licensed Osteopath. The patients may have the benefit of the institution, and receive Osteopathic treatment from their regular physician, if he accompanies them; or we will be pleased to provide for their treatment by our staff operators. The rates for room, board, general nursing, etc., are $12 to $25 per week, or $60 to $100 per month.

Every guest room is an outside room. The building has a large veranda running around three sides of it. It is steam-heated and electric lighted; has an electric elevator; in fact, is a thoroughly up-to-date institution, which hopes to merit your approval and confidence.

If you have patients who need a change of climate, or are contemplating a winter's residence in Southern California, we would be pleased to have you commit them to our care. We will be glad to support your ideas with regard to the best treatment for any patients whom you may send to us.

The Sanatorium is under the personal supervision of Dr. D. L. Tasker. When writing for information address:

CHICAGO

Have You Remitted Your Subscription?

Osteopathy is recognized by law and public sentiment as being capable of deciding questions relative to public health.

It has been the long-time custom to have each system of healing whose practitioners are to appear before the examining board represented on such board.

Osteopaths now take such examinations without such representation.

The law tacitly provides for such appointment.

The vital part of the training of an Osteopath is in the principle and practice of Osteopathy, on which there is now no state examination.

The law provides that such an examination shall be held when an Osteopath shall be added to the examining board.

There is a larger number of Osteopathic physicians practicing in the state than in either the homeopathic or electric schools of healing.

Each practitioner throughout the state is asked to get and circulate this petition liberally. State association officers have it in charge.

Dr. S. B. Miller, of Cedar Rapids, is secretary.

Personal and Professional

Dr. Emile L. Green, of Detroit, has resumed practice after a two months' pleasure trip in Colorado and Montana.

Married, at Cleveland, O., June 30th, 1903, Dr. Charles Leroy Richardson to Miss Grace Lottbridge.

Dr. William Robert Pike, who has been so journeying at Long Beach, Cal., in search of health, reports that he is recuperating rapidly and is now resuming practice.

Every Doctor of Osteopathy in New Jersey is a member of the A. O. A. Credit is due Drs. Newinger and Murray. Would that every state had a duplicate of this team!

Dr. Kryn T. Vyverberg recently passed the examination of the Indiana State Medical Board, as the only successful Osteopath. She will continue in practice at Lafayette, Ind.

Dr. Heozie Carter Purdon, assistant secretary of the A. O. A., and Dr. Frederic E. Moore, of La Grande, Ore., were married at the bride's home in Kansas City June 1. They will reside at La Grande.

Dr. J. W. Dixon, of London, O., writes that he planned to attend the last convention, but between a visit to England and a business trip to Mexico, he had to forego that pleasure this year.

He will meet us at St. Louis.

Dr. Charles Bunting, of Kansas City, called on "The O. P." recently on his way to the Atlantic seaboard for a summer trip.

Dr. W. R. Patterson, who for some months has been in practice at Pasadena, Cal., whither he went in search of health, reports that he is improving steadily and in addition is getting established in his new field.

Mrs. Harry Still and Warren Hamilton toured Mississippi, Louisiana, Alabama and Tennessee last month, concluding the outing by climbing Lookout Mountain on wheels (no, not "bikes"—the inclined railway, of course).

Dr. and Mrs. Carl P. McConnell are traveling this summer in the Scandinavian Peninsula. We trust the good doctor will show the Swedes a thing or two that will forever disabuse their minds of any kinship between our system and massage.

The celebrated Dr. Young-diphtheria-coroner's jury-indictment case at St. Paul, was finally disposed of by fining the Osteopath ten dollars for entering the Poschner home while it was under quarantine. No appeal. Not worth the powder.

Dr. Ethel E. Brown, graduate of the American school, class of 1902, has accepted a position in the office of Dr. F. W. Hannush, 134 E. Market St., Indianapolis, where she will engage in Osteopathic practice, paying special attention to diseases of women.

Dr. Elmer D. Jordan, late of Green Bay, Wis., was stricken with a sudden illness while in attendance at the Methodist church at that city June 5 and died a few minutes later in the pastor's study. Appropriate resolutions of respect were passed by the Wisconsin association.

Dr. Troppe B. Larimore, who for three years has practiced at Winchester, Tenn., died at Eve's infirmary at Nashville under a surgical operation August 4. He was an A. S. O. graduate and popular gentleman. Interment took place at Florence, Ala., the old home of the deceased.

Dr. Sprankle came to Dr. Nellie V. Cunningham, wife of the new president of the Illinois Osteopathic association, shortly before the state convention at Bloomington. Resolutions of affectionate respect and sympathy for the bereaved husband and parents were passed at the state convention.

Dr. E. E. Lovell, of Zanesville, O., called upon us this month returning home from a lake trip, after the convention. He bought a skeleton in this city, and says he is going back home to begin the study of Osteopathy all over again, from its first principles up. He is a simonite osteopath.

Dr. Frederic W. Sherburne is traveling in Europe for the summer. He writes us as follows: "Here you are—50 cents for a year of the Osteopathic publication. Frankly, I like it. Keep it up and improve it as you are doing. After five years' practice here, I am going abroad for a couple of months, sailing from New York July 11 on the Kaiser Wilhelm der Grosse, returning the middle of September. Am sorry to miss the convention."
STILL COLLEGE OF
OSTEOPATHY
DES MOINES, IOWA

DR. S. S. STILL
President
DR. GEO. E. MOORE
Vice President
DR. ELLA D. STILL
Superintendent Women's Department

375 Students in attendance; faculty of 17 professors, each a Specialist in his or her department, including 10 graduate Osteopathic Physicians.

Matriculations are already coming in for the special summer post-graduate course.

Full and free dissection to every student.

Its graduates have a record for the largest percentage of victories in State Board examinations.

Its course of study is purely and broadly osteopathic, but progressive and scientific.

Send for our magazine, the COSMOPOLITAN OSTEOPATH, which was resumed under the old name and management April 1st.

Sample copies of the magazine will be sent freely to prospective students.

Address A. B. SHAW, Sec'y and Treas. (Editor of the OSTEOPATH.

Wanted—1,200 D. O.'s at St. Louis

THE OSTEOPATHIC PHYSICIAN
in the Osteopathic of Iowa and its vicinage for receiving stubborn cases and those requiring surgical assistance.

The State of Massachusetts granted to the Massachusetts College of Osteopathy the same privileges relating to dissection as are enjoyed by the medical colleges. Material is abundant with us and in good condition. Our cold storage and dissecting rooms are unsurpassed. Dissection is compulsory and without extra charge, and each student is required to dissect the entire body under the immediate supervision of the instructor.—Secretary of the Massachusetts College of Osteopathy.

The outlook is very bright for the full class at the Atlantic School of Osteopathy. We desire to express our appreciation of the systematic effort you are making to secure the operation of graduates in the association work, and in my opinion the best method of furthering this is to have them all subscribe to such leading osteopathic publications as "THE O. P.," since that will serve to place them in touch with the practical work in general.

W. A. SCHLINGMAN.

Atlantic School Incorporates

[From the Philadelphia Ledger.]

In the list of new Pennsylvania incorporations appeared the following March 17: Atlantic College of Osteopathy in Pennsylvania, capital $50,000; to practice Osteopathy and natural sciences, and to grant degrees in connection with the science. Incorporators, William A. Schlingman, William F. Eidel and George Martin.

The Philadelphia College was likewise incorporated under the New Jersey laws.

Notes on College Work at the A. S. O.

Dr. Warren Hamilton, secretary and treasurer of the American School of Osteopathy, gave the editor a pleasant call recently. He reports prospects good for the full entrance class at Kirksville. "We are refusing entrance to those applicants who cannot show high school preparation or its equivalent," said Dr. Hamilton, "and are making the entrance better each year, in consequence, so that mere numbers is not really a consideration. Yet we expect a class as large as usual in September."

"We will not be ready to open our third year of instruction at St. Louis until next year; as it requires a good deal of preparation to carry out that sort of a programme in another city. We prefer to enter upon it in good shape than begin with inadequate plans. Our third-year course will, therefore, be conducted this year at Kirksville, and it will be a voluntary course until next year, when the new programme is started off on a broad basis at St. Louis. We have a number entered for this third-year class already, and expect it to be quite a feature of our school work this year."

Pacific School of Osteopathy

..Established in 1896...

Well equipped chemical, histological, bacteriological and anatomical laboratories, together with unsurpassed clinical advantages.

The work throughout is thorough and is based upon laboratory methods.

The faculty is composed of specialists in their several lines, who have had wide experience in teaching.

The course of study includes that prescribed by Associated Colleges.

Upon completion of the two years' course the degree—Doctor of Osteopathy—is conferred.

Upon completion of the three years' course the degree—Doctor of the Science of Osteopathy—is conferred.

Excellent opportunities are offered for Post Graduate work.

Tuition, one hundred and fifty dollars per year, payable in advance.

Write for catalogue and further information.

To See Father Andrew and Celebrate
AERO-VIBRANT

IT WILL NOT DO ALL THE WORK OF THE OSTEOPATH
REMOVE LESIONS, OR INHIBIT
BUT IT HAS PROVEN
Muscular Contractures, Inflamed and Anchedled Joints, Goiter, Chronic Conditions of the
Pharynx, Chronic Neuritis, Etc.

The only method by which you can thoroughly stimulate
the spinal and sympathetic nerves its power to stimulate
general systemic processes is prompt and very satisfactory.
Its action upon the vaso-motor
system is one of its greatest merits.

IT IS THE ONLY METHOD
by which you can thoroughly stimulate
the eye itself and the infraorbital nerves.

Do not undersell by
any other method. It is a
patient-getter. I see no
reason why you should
don't buy as a patient
getter. It's a hummer as a patient
getter. Send me 100 copies
right kind of goods! Send me 100 copies at
once. Send me 100 copies at
once.-E. C. Lincoln, D. O., Buffalo, N. Y.

"Please send me 100 copies of the August is­
ssue. Shall increase my monthly contract to that
number. OSTEOPATHIC HEALTH, like
some other things, grows better with age."-Dr. C. H. Grainger, Winston-Salem, N. C.

"In looking over the Osteopathic field litera­
ture in search of the best patient-getter, I see
no way to decide in favor of any other maga­
zine than OSTEOPATHIC HEALTH. I be­
lieve it to be the leader of all. Enclosed
find contract for six months."-Dr. W. L. Wil­
liams, Milan, Tenn.

"June OSTEOPATHIC HEALTH was for­
warded to me here, where I have been nursing
my sick mother. Thanks. I intended to sub­
scribe before, but little things often deter us.
In your article on the schools you did not say
that Col. and Mrs. Conger were the 1st to
go to Des Moines. Is that forgotten? Your
OSTEOPATHIC HEALTH is good."-Mrs. A.
Conger, Akron, O.

"Yours of the 7th with enclosure just re­
ceived. In response I take pleasure in handing
you my signed contract for 125 copies (or more)
for the ensuing year. I am greatly pleased with
OSTEOPATHIC HEALTH as a business-getter,
and propose to expand my mailing list right
along."-Dr. E. G. Goho, Indianapolis, Ind.

I desire to add my word of praise for your
excellent popular journal, OSTEOPATHIC
HEALTH. It is certainly the best means we
have for securing patients and promoting Osteo­
opathy. Your careful editing of this magazine and
evident ability to interpret the public pulse,
etitles you to the support of every live Osteo­
opath. Our patients appreciate OSTEOPATHIC
HEALTH greatly. It will make new friends and
patients for any practitioner who uses it
systematically as field literature."-Dr. Dan L.
Tanker, Los Angeles, Cal.

"I used to inspect OSTEOPATHIC HEALTH
each month before I placed my order, to make
sure it said the right thing at the right time,
and never said the wrong thing. I learned
early months ago that I do not have to take that
trouble, as it is always be counted on to be
up to its own excellent standard, and never say anything that the practitioner has to
explain away or apologize for. Such a service
is truly a comfort to the doctor, and such
promotion as the Osteopathic Publishing Com­
pany renders its patrons would be worth the
price, if it did not pay on the investment—but
does pay. It is money in pocket to the doc­
tor who will use your excellent publication as
field literature on the annual contract plan.
After two years of your service, I am glad to
renew my contract and stand with you to the
end."-Dr. Warren B. Davis, Milwaukee, Wis.

"Let Us Be Osteopaths"

Over 23 years ago I began the study of medicine. Eleven years ago I investigated the claims of Osteopathy, and found that he could, according to what he told me he could, and threw in my lot with him. Since that time I have practiced and taught. I have studied in a student course in medicine, I learned pretty nearly all that was then taught; four years of homeopathic and hospital work in London and other centers certainly ought to have experiment with great knowledge of my profession. With that knowledge, I deliberately let all go, satisfied that in Osteopathy I had indeed found that which I considered of superior merit. I do not deny that drugs are of use, but as an Osteopath I stick to Osteopathy, and let other men give medicine.

Frank S. Betz

City Salesroom, 35 and 37 Randolph St., Facory, Sumnerdale Stations, on the Chicago & Northwestern Railway.

Give "The O. P." Your Opinion.
When it has been said of a Book

That

"It would not only be a good book with which a student might begin the study of medicine, but every boy and girl between the ages of 14 and 20 should read it. It deserves to become popular and sell by thousands."—Dr. J. D. Bueh, Dean of Pullo Medical College, Cincinnati, O.

That

"Dr. Pratt has clothed dry facts in garments that glisten. He entertains while he educates."—Birmingham (Ala.) News.

That

"It instructs more in two hours than one can possibly obtain from any existing library in two months."—Walla Walla, Wash.

That

"It should be adopted as a text book in every school and be found in every house."—Jenncille Daily Gazette.

That

"This book should be studied by every class in physiology. It will give unwonted interest, vivacity and impressiveness to the subject. I shall put this book into the hands of my classes in physiology and will not regard their knowledge of the subject as satisfactory until they have made a careful study of Pratt's 'Composite Man.'"—Geo. Sutherland, Grand Island College.

That

"No one can read it without being a better physician, better acquainted with the subject upon which he has to practice—the human body.

Buy this book for it is a good one."—Medical Century.

Then, surely, you ought to have that book. It is Dr. E. H. Pratt's "Composite Man," of which the Third Edition is now ready. It consists of fourteen anatomical impersonations illustrated by an Osteopath, and each impersonation is illustrated by a figure in color. It is unique in style, but presents its subject in a most entertaining and instructive fashion. Its opening chapter on "The Bony Man" is meat for the Osteopath.

Vol. IV. CHICAGO, SEPTEMBER, 1903. No. IV.

Fairness! Freedom! Fearlessness!

Editorial.

"How to the line, let dhgs fall where they will."

Help in the Alabama fight.

Meet us July 7 at St. Louis!

Now Buffalo is in line. Next city that wants to organize!

We ought to make "Dave" Francis an honorary member.

"Help wanted" ads. are published with out cost in "THE O. P."

It is an inspiration to a week of flagging practice, OSTEOPATHIC HEALTH is.

Help get those 1,000 members in the Association and on to St. Louis next summer.

Mrs. Clarence Barnes had Providence "pulling" for her when she went to Alabama.

It "pulls" patients and that's why its patrons so uniformly renew their contracts—"O. H."

Practitioners should not be later than September beginning the fall campaign of promotion.

The Minneapolis jubilee was like an echo from Cleveland. They are rustlers in the Twin Cities.

Is Secretary Irene Bisonette a bona-fide daughter of Buffalo, or is her name poetic license?

We asked your candid judgment, does not OSTEOPATHIC HEALTH grow better with every issue?

The manager would like to correspond with Osteopaths who are uncertain as to the best means available for promotion.

Write "THE O. P."

Write the editor your confidential suggestions about how "THE O. P." can be improved and made steadily better. It is yet in its swaddling clothes.

We would like you to write us if you encounter difficulties in getting established in practice. Perhaps we can help you get a location, or get started.

Dr. William R. Laughlin is writing a book on Osteopathy. We can't have too many of the right sort. He will give the profession a good one.

If you have admired the contents of "O. H." since June, you must be prepared to like it vastly better for October, November and December. It is improving in every number.

The editor invites subscribers to criticise his publications. In a multiplicity of contexts there is always a way to be found, if one is alert for it. You can't hurt a live man by criticising him. You may help him.

June, 1903, graduates will confer a favor upon "THE O. P." by sending in at once their own addresses and as many of the new locations of their classmates as they know. It is hard to get track of most of them.

One advantage the A. O. A. has over many organizations. When an officer has proven his worth by service in one capacity, he is transferred to another office as soon as his commission expires, thus retaining in the organization that wisdom and efficiency which are based on experience.

The St. Louis Post-Dispatch, August 19, said: "No manipulation was required in getting the Osteopaths a World's Fair Day." But another paper said it was a hard rub on the old school doctors. Any more jokes on our system? Well, we can stand such things—in view of August 7. Let us all be there—1,000 strong!

Credit for pushing this idea of unifying state and national societies is due Dr. F. N. Otum, of Oshkosh, Wis. He drafted a plan before the recent national conclave, and sent it to "THE O. P." and other publications, but it was too late to get into our pre-convention issue. It is still timely, however, and appears in this number.

The Alabamians will renew their fight again this month in the legislature. A short session will give them not many "days of grace." They are going to try. But there are three weeks in which to win or lose. If you wish to help them, send in a subscription at once. Next week it will be too late to help in Alabama.

The profession should lend its influence to build up the few colleges in the field, really doing good work and having enough age back of them to entitle them to identity, rather than sprouting new ones. If a handful of practitioners get together to study what they can do to increase practice, tell them in plain words not to start a college. It is dead promotion for the Osteopath at this late date.

The Osteopathic Physician was designated as the official paper of the Illinois Osteopathic Association at the Springfield meeting. Members will, therefore, look to these columns for official communications relating to the work of the association in the future. Such other state associations as have failed to take this step should do so through a vote of their officers, without waiting for the annual meeting.

Every city, town and hamlet in the United States does not need to witness the founding of a new local Osteopathic "college" in order to replenish the profession. Those now doing business at the old stand are made steadily better. It is yet in its swaddling clothes.

We would like you to write us if you encounter difficulties in getting established in practice. Perhaps we can help you get a location, or get started.

Dr. William R. Laughlin is writing a book on Osteopathy. We can't have too many of the right sort. He will give the profession a good one.

Osteopathy, the judge has repeated of his error and has secured an injunction against the further sale and distribution of this retroactive rubbish. Good enough, Colonel Toney. Now make us an affidavit that you had been drinking, and didn't know what you were talking about, and we will forgive you.

Should be President of a College

[From the Medical Standard.]

A doctor who has recently located in an Iowa town rejoices in the following degree: M. D.; M. E., Ph. G., and D. O., and still he is not happy?

A Just Ruler in Israel

Judge Bilbro, of Ft. Payne, Ala., was too conscientious to let "a good Osteopath" plead equality to the practice of medicine in the meaning of the statutes. He said such a pleading would be a palpable fraud. Such an honest and discerning judge ought to grapple with the supreme court of Alabama.

Dr. Still's Views of a "Mixer"

These "mixers" cannot look for patronity to Dr. A. T. Still. He admits kinship only to thoroughbreds. Have you ever read his fable of the horse, the ass and the mule? Osteopathy is the horse (good horse-sense, you see!), materia medica, the ass, and the mixer—well, he is just a common mule, neither horse nor ass, but a compromise between the two! It is timely to add that the mule is stupid, stubborn and sterile, also, that it may only be a coincidence.

Hope for an Osteopathic Weekly

"We are in receipt of yours of the 2d inst. relative to subscriptions for THE OSTEOPATHIC PHYSICIAN. 'Do we want it?' Most certainly we want the paper, for how can any good, enthusiastic Osteopath be without it? I think it a paper to be encouraged by every true D. O.—a mutual help to all. We, Dr. Lytle and I, look forward to its coming with very great interest and pleasure each month. I trust the time is not far distant when we can have an excellent, good weekly out of THE O. P., equal to any medical journal printed. Wishing your valuable publications—"THE O. P." and 'OSTEOPATHIC HEALTH'—both continued success, I remain, Fraternally yours,

"F. P. WALKER, D. O."

"Cando, N. D., Aug. 13."

Getting Ready for St. Louis Convention

Father Teall, now like Grover Cleveland, just a plain citizen in the ranks, is showing "what to do with our ex-presidents" by getting busy already, helping to make the next annual convention of the A. O. A. a success. While in St. Louis attending the A. S. O. post graduate course, after the convention, he cooperated with Drs. Hildreth, Goetz and others to start the ball rolling, and arrangements are already being made insure the next meeting being the best and largest and best cared for on record. Good work! Let our ex-presidents constitute a standing committee, empowered to help make convention arrangements, and to make each annual family reunion of osteopaths better and better. At last, we find a function for our ex-presidents, and a good one.

A Professional Directory

The Publication Committee of the A. O. A. accepted the proposition of a publisher who is desirous of issuing a complete directory of the profession. The association will give the first edition and pay 10 cents per capita for association members, each of whom will receive a copy, and those not association members may have it for 20 cents a copy. It is proposed to revise it annually. A good scheme. Push it along. But if
If You Like to Read "The O. P."  

THE OSTEOPATHIC PHYSICIAN

undertaken at all, try and do a little better than Brother Bynum's effort, has worn as out-of-date as a last year's bird's nest. A directory is nothing, if not a directory. A directory for the present, and one tenth of its addresses wrong, as was the ease with every line of the Bynum directory, purporting to represent new and successive editions, is nothing less than a fake and the profession does not need any more such. Give us a good directory and receive our blessings, or save those concerned the expense and trouble.

A Word of Praise for Editor Evans

This well-merited recognition of Dr. A. L. Evans' splendid service as editor of THE JOURNAL OF THE ASSOCIATION the past year was the conclusion of the Publication Committee's report at the annual meeting:

"In concluding this part of our report we wish to bear testimony to the zeal, fraternity, courage, tact, economy and intellectual ability with which Dr. Evans has conducted THE JOHNLALnal. As Dr. Evans has fixed his life is more than he. Moreover, he has performed his editorial labors amid the duties incident to a large profession. Correct! No flattery this. Dr. Evans has given us a scientific journal to be proud of. It is gathering constantly strength, and the success of his profession are due him in not stinted terms. Show your appreciation for his tireless service, doctor, by being a subscriber to it and likewise a member of the association which produces it. You should support both.

College President Praises "The O. P."

My Dear Dr. Bunting: You surely deserve great credit for the noble work you are doing to advance the science of Osteopathy. You are the most persistent fellow I ever saw, and I wholeheartedly endorse the thought that your profession are due him in no stinted terms.

You have sent me several complimentary copies of THE OSTEOPATHIC PHYSICIAN, and I frankly confess with much compunction that I laid them aside with but a glance. But on receiving the pre-convention number, I was solicited about the programme of the Convention meeting, and was, thereby, induced to read it more carefully, and the more I read the more convinced I became that "The O. P." is a journal of more than usual importance. It is ably edited and neatly printed, and deserves the unbounded support of every Osteopathic practitioner.

The mistakes of the past are to be noticed, and the inevitable tendency was toward the consolidation of schools now in existence. "Fewer schools and better," was the gospel all believed we ought to preach to practitioners.

People who have not been up against this school litigation little they are undertaking. Osteopathic colleges are not, and cannot now be money-makers. They are money-lost. For a few dollars' expenditure and succeeded without money, is an absurd proposition. Positively foolish.

The only benefit it can show anybody is the old-time coveted honor of "filling a chair," which somehow, looks alluring to the practitioner. It is an ignus fatueus—a will-o' the-wisp. It will disappoint our Kansas City's schools who thought the ambition is laudable and ethical, all right, but it is misguided. The people care nothing more for Dr. A. L. Evans will get the well folks interested and hold them in line against the hour that sickness comes to them. The undid-ill are likely but a small part of your future practice.

The Mistake of the Mushroom College

In our news columns will be found a notice of the proposed founding of another Osteopathic college—this time once again at Kansas City. The list of names cited looks formidable. If there was any demand for creating more Osteopathic colleges, or any occasion for increasing the facilities for Osteopathic instruction in Missouri, the profession might have raised some hope on this latest experiment as a thing that might live and grow; but, unhappily, there seems to be neither demand nor occasion for sprouting another college mushroom.

The promoters of the scheme, nor the loyalty of the promoters, nor the loyalty of the people care nothing more for the mushroom college than for possessing one chance in a hundred to survive.

The Osteopathic Physician is get­
Osteopathy, who thinks that no further missionary work with the general public is necessary, we included a little article taken from the St. Paul Pioneer Press of January 29. It should be read soberly and digested without animosity or resentment. It will furnish the best literature on OSTEOPATHIC HEALTH in his community PERSISTENTLY and CONTINUALLY, he is inviting this fate, and, to that extent, deserves what he is getting. Read this Pioneer Press editorial and meditate:

**Dangerous Hallucinations**

The danger that lies in unscientific systems of healing and in the spread of medical heresies which appeal to the partly informed and those who glory in making it manifest to their fellows that they are too independent a man to accept authority of any kind, has been cruelly illustrated in this city in an instance that is just now attracting attention. A mother and four of her children were taken from the best trained and best equipped hospital in the city, to have nothing to do with the diagnosis of the case, and to be submitted to antitoxin and acetic acid. The man who wrote it, before it was crowded over, it is piquant and interesting, if one considers what it was to have been in September's issue.

**The October Issue of “Osteopathic Health” is a Winner**

If you liked the September number of OSTEOPATHIC HEALTH, you will like the October number still better. That is because it is a better number. Its features are its own condemnation.

"Osteopathy in Childbirth," is the subject of a very clever sketch from the pen of Dr. Robert E. Peckham. This is almost new ground in this respect-in our practice and its practitioners.

"Dyspepsia from Three Standpoints," is a short, but capital paper by Dr. Tasker. It was to have been in September's issue, but was crowded over. It is piquant and strong.

"Three Ways to Put Out a Fire," is a terse and valuable paper in pyrotechnics by Dr. Tasker. It was to have been in September's issue, but was crowded over.

**The A. O. A. and You—**

**The OSTEOPATHIC PHYSICIAN**

Before You Forget, Doctor, Write "The O. P.
THE OSTEOPATHIC PHYSICIAN

The Business End of Practice

Attention, June, 1903, Graduates!

It is important for the June (1903) graduates that we get your addresses at once. We want yours and your classmates'. Of course you will receive the OSTEOPATHIC PHYSICIAN on regular subscription—nearly everybody does—and to send it to you we must first be informed of your whereabouts. If you know the near or distant localities of several of your classmates—even one—will you not oblige us by sending this information to the practitioners whereabout the whereabouts of these new D. O.'s will also be our concern, in order to discover their new locations.

To Forgetful Osteopaths

Somebody will read this, who, despite all our warnings and entreaties, has forgotten to remit 50 cents to THE OSTEOPATHIC PHYSICIAN, to remain in good standing with its regular readers. Is it you? What must we do about it? We hate to cut you off from the list—but how can we help it? We are sending you this Convention Number, despite your having neglected us, as you seem to neglect us, on this yearly concern for forgetting us!—but you must come to terms by next month or pass into the limbo of lost subscribers reserved for those who forget important business.

Rates for Field Literature

For those who have not availed themselves of the advantages offered by OSTEOPATHIC HEALTH as field literature of the best sort, we quote herewith the rates of our service on the various plans at which it can be secured:

For regular concession we recommend the plan of circulating OSTEOPATHIC HEALTH on the yearly contract plan. Hundreds of our practitioners have adopted this plan, after testing the merits of this excellent field organ on other experimental plans. It gives universal satisfaction. Hence, we do not hesitate to recommend it.

Prices on Yearly Contracts

100 copies, magazine, blank, $3.00. Imprinting professional card, $3.25.

There is an initial cost to you of one dollar, in addition to production and electrotyping of your professional card. This cost is not repeated until you wish to change your address. If your card does not demand altering for years, this electrotyping will last for years. With it in stock, we can, every month, print your professional card in your supply of OSTEOPATHIC HEALTH—as in the above quotation—for 25 cents per hundred magazines. Your cost the first month on this plan, therefore, is $4.25, and in subsequent months, $3.25.

With every order of magazine we supply blank manila envelopes for mailing. Do not seal these envelopes in mailing, unless you wish to pay extra postage on your magazine.

We recommend that you order your field literature shipment, according to this yearly contract plan, with envelopes to facilitate mailing. It is not a difficult task for you to address these manila envelopes with the rates of our service on the various plans at which it can be secured:

For the reasons explained above we have recommended this plan.

Remember, that in making out your order, and in revising your list as often as you like up to the last moment of mailing, and be sure of putting each case under the exact plan which you wish to follow.

We guarantee an express rate on orders of 100 copies to any point in the United States, at not exceeding 80 cents. If you prefer us to use direct route to a list of names which you furnish us, we will do this with great care at a cost by the hundred. Prenumerations for 100 stamps, 20 cents for addressing, enclosing, sticking stamps and mailing. We do this addressing entirely by typewriter, so as to secure accuracy. If you follow the latter plan, you should have at least 25 copies sent to you for your center table.

Prices on Six Months' Contract

100 copies, magazine, blank, $3.75. Imprinting professional card, $3.25.

Here, as on the yearly plan, the charge for each individual service, such as electrotyping card and addressing and mailing out from our office, is $3.00.

Prices on "Single Order" Plan

100 copies, magazine, blank, $3.50. Imprinting professional card, $3.75.

Single orders of OSTEOPATHIC HEALTH, without professional card, cost $3.50 per 100 copies.

Other Things Worth Remembering

It is of the utmost importance that new osteopathic practitioners, as well as old practitioners, should remember a number of things that will facilitate service and secure promptness, accuracy and mutual satisfaction on both sides.

Remember that we go to press on the 20th preceding the month of issue, and no changes in professional cards will be accepted after that time.

Remember, that for the purpose of getting magazine copy, you must send it to us before the first of the month. We must have all directions before that date. Orders accepted after that date will follow as soon as possible, taking precedence in the order of their coming to us.

Remember, in sending in orders with money, be sure to send "copy" for your card, with any instructions that may be necessary about the style that you wish followed, and add one dollar to cover the cost of composition and electrotyping your professional card. If you wish, instead of a card—which, we think, is the correct and ethical thing, by the way—to use this inside front page for a full-page advertisement, the printer's charge for composition and electrotyping is two dollars. State if you want express charges prepaid, or if to be sent collect.

Remember, we send no goods C. O. D. We cannot bother with the detail and the risk of mailing. Hence, sign the contract, remit your money and secure your magazine with Bretz's TRAINING, which includes such diseases as laryngitis, pharyngitis, nasal catarrh, bronchitis, pneumonia, pleurisy and the like, which are not remitted. Here is a thing of universal interest to osteopaths. It is a thing of the utmost importance to everyone, but to osteopaths it is a thing of life-saving importance.

Remember, when sending money with your order, to keep your receipt. It is an important receipt, as it is a receipt for your subscription, and is the receipt for your professional card. This receipt is an important one, as it will be used as the basis of your correspondence. Hence, we do not hesitate to recommend it. If you prefer us to mail your order or contract, and return to us promptly.

These Rules Are to Help You

These rules are made necessary for the protection of our subscribers and for the purpose of enabling us to get the magazine out before the first of the month.

To accomplish this requires the rigid adherence on our part to these rules. You will understand this when you comprehend that each order for 100 copies requires a special order to the printer, a separate count, separate binding, and a change in the make-up of the form, which has to be taken off the press each time and printed separately. In brief, each order is printed as a special edition.

If there is anything you do not understand about these explanations, write us. We will take pleasure in answering your questions and making the matter plain to you. We will advise you how to make up your mailing list, and make suggestions about how to build up a prosperous practice, if you ask us to. We are in the field to serve YOU. Make use of our knowledge and patience for the purpose of acquainting the public with the campaign of education to accomplish the still wider acceptance of Osteopathy as the only rational medicine.

Back Numbers

If you want good Osteopathic literature cheap for distribution in your field for campaign purposes, write us for sample copy of the May issue, which, we are selling at $1.50 per hundred. THERE IS NO SPECIAL RATE FOR DISTRIBUTION.

MAY OSTEOPATHIC HEALTH treats of "OSTEOPATHIC RESULTS IN DISEASES OF THE RESPIRATORY TRACT," which includes such diseases as laryngitis, pharyngitis, nasal catarrh, bronchitis, pneumonia, pleurisy and the like, which are not remitted. Here is a thing of universal interest to osteopaths. It is a thing of the utmost importance to everyone, but to osteopaths it is a thing of life-saving importance.

SPECIAL OFFER!"OSTEOPATHIC RESULTS IN DISEASES OF THE RESPIRATORY TRACT," which includes such diseases as laryngitis, pharyngitis, nasal catarrh, bronchitis, pneumonia, pleurisy and the like, which are not remitted. Here is a thing of universal interest to osteopaths. It is a thing of the utmost importance to everyone, but to osteopaths it is a thing of life-saving importance.

WANT ADS.

OPPORTUNITY FOR WOMAN PRACTITIONER. Or Capital City, D. O., to share office with me in one of the best cities in middle west. She will have a chance to build up her own independent practice. New Graduates—Attention. Send your address at once to the editor of "The O. P."

ALL PRACTITIONERS AND STUDENTS USE Hazzard's "Practice of Osteopathy" (2nd Ed.)

Hazzard's "Principles of Osteopathy" (3rd Ed.)

Theory, principles, procedures, details of examination and of treatment, all fully explained.

$3.00 per vol. Send for sample pages A. S. O. BOOK CO., Gen. Agts. KIRKSVILLE, MO.
WHAT PEAT FUEL IS DOING

The Illinois Peat Fuel Company is building its first machine of commercial size at the plant of WHIT & CRAIG, CHICAGO, and is expected to have it operating within sixty days. The company is not making any charge for the first machine, but billing such orders as come in with the small amount of advertising being done, at 25 cents a share. This is the first price at which stock was put on the market. As soon as the machine is a demonstrated success there is every likelihood that stock will be sold to furnish the money to withdraw from the market altogether. Now, while buyers assume the risk, they have a chance to speculate on a basis that ought to make them rich. We urge you to understand that this is a gamble. You may lose your money. We cannot guarantee to us that we will not lose. We who organized the company have put $15,000 of our own money to acquire state rights and build the first machine of commercial size. If you lose your money, we will lose ours. We are in the same boat. No Nichols on the Alcove. We do not expect to lose our money. It should be assumed that we know who we organized this company met all first costs of our own pocket and put the machine on the market. We are offering a share of treasury stock on the market. We have put all our money on the treasury and before we know how successful our machine will be, we offer you the chance to share the risk with us. We will give you your stock on a ground-floor basis, and profits promised make it worth your while to gamble with us. Two things only are in the slightest doubt.

First: Will our process and machine turn out sufficient tons per day to make it the profitable investment that we expect? That is practically your only gamble. If you can briquettes be established. It is a regular industry in Europe. Our process is better, and our financial statement. They are the well-known business men — if your statement is full, WILLIAM SMITH, PERCY H. WOODALL, Franklin, Ky.

A MANUAL OF OSTEOPATHIC GYNECOLOGY

By PERCY H. WOODALL, M. D., D. O.

Professor GYNECOLOGY AND OBSTETRICS

PRICE, PREPAID, $2.50

Address all orders to

PERCY H. WOODALL, Franklin, Ky.

Short Articles Wanted

There is a good field in the Prize Essay contest of OSTEOPATHIC HEALTH for short discussions of single diseases. Most writers in the popular Osteopathic field seem to prefer general dissertations to handling disease in the concrete—one at a time. Why is this? Is it easier to produce a general essay than a specific one? The editor wants a lot of these discussions of special diseases for the pages of OSTEOPATHIC HEALTH the coming year. Such contributions are at a premium. They seem to be hard to get. Such articles are most acceptable from 500 to 600 words in length and should not exceed 750 words. Give some good ideas in the way of single diseases that have interested you recently, clever pens of the profession. Remember always they are designed for the lay readers. Be popular.

Quit Playing Kids

EDITOR "THE O. P."

The statement of Col. A. B. Shaw in the last number regarding adjuncts is cutting it pretty fine. Would any person call a burn a disease? If one cut his hand off, would it be a disease? I think that is looking far enough for argument. It is not discussion we want, but work for union, harmony and educative discussions. Don’t be a lot of kids. Stop quarrelling and get to work. Haven’t we “buzzed” lesions enough to last us several months? Respectfully,

Percy H. Woodall, Franklin, Ky.

价钱 Swing

San Francisco, July 30.

[Smith Wants Your Photograph]

3949 Washington Boulevard, St. Louis, Mo., July 10, 1902.—To Whom It May Concern:

For some special work which I contemplate next year in the World’s Fair city, and perhaps elsewhere, I would be obliged if the following persons would send me their photographs, each with the name, address and office of the individual written on the back thereof:

All of the new officers of the A. O. A.

All of the ex-presidents of the A. O. A. (please put year of office on photo)

All of the presidents of the State Associations of Osteopaths.

These photos I cannot promise to return, but the owners need not begrudge their loss. My work will be for Osteopathy, as it has been in the past so will it be in the future. Respectfully,

W. F. SMITH, D. M. D., etc., D. O.

Is “Convention” Appropriate

EDITOR "THE O. P."

One point I did not have opportunity to raise at the meeting. We are using the word convention. Now contrary to some political or religious bodies use it. Scientific bodies do not. The American Association for the Advancement of Science, the American Physiological Society, all other similar bodies, all the other schools of

THE WILLIAMS

Automatic Self-Adjusting Swing

DO YOU USE ONE OF THE OLD SWINGS?

If you do, send it to me and I will allow you a reasonable price for it on an exchange. Any of the old models taken up if in fair condition.

SPECIAL

I have just made the finest lot of Swings ever put on the market. The leather is selected stock and will be an ornament to any office. If you order a Swing and mention this magazine I will pay express charges. If at the end of thirty days’ trial you are not perfectly satisfied with the Swing send it back and I will refund your money by first mail. I ask no questions, but refund the money as cheerfully as I get it. The Swing is sold for $10.

Dr. R. H. WILLIAMS

New Ridge Bldg., Kansas City, Mo.
medicine do not use it at all. We claim to be scientific. Would it be better comfort with that claim if we observed the custom of similar organizations? Don’t use the word imply a medical profession in a lower scale than that of the scientific profession.

The journal can bring about this by example of the world. What do you think about it? Convention implies a “trade,” rather than a “profession”—just what our friends, the enemy, have been saying of us.

C. M. TURNER HULETT, D. O.

Cleveland, August 1.

Keep Tab on the Mixers

“Dear Dr. Bunting: Under separate cover we send you the El Paso (Ill.) Journal, with the marked ad. of J. M. Mullins, D. O., M. D., there. Dr. Mullins is a ’98 graduate of the A. O. A., and has been at Henry, Ill., since taking the M. D. course at Hahnemann College, Chicago. He, with two others, were refused membership in the Illinois Osteopathic Association at its last annual meeting at Bloomington, as the Board of Directors decided that a physician who gives drugs cannot be a member of the Illinois Osteopathic Association. This ad. should be reproduced in your valued paper, O. P.? We are acting in our duty to keep the public informed. In our postgraduate students, and the profession generally. They have been examined by hundreds of the profession, both osteopathic and medical. We are here to treat all forms of disease, whether acute or chronic. That means the operator must know his machine, his tubes and his peculiarities. We have a room full of pictures of the average body promptly and reliably. As a specialist, PITTS & PITTS, 325 Pennsylvania Avenue, Washington, D. C. We have just added a kindergarten, low resolution. Many a medical studentNever have we had a case where we have had a case of typical eczema, burned or injured none. We have cases of typical eczema, burned or injured none. We have cases of typical eczema, burned or injured none. We have cases of typical eczema, burned or injured none. We have cases of typical eczema, burned or injured none. We have cases of typical eczema, burned or injured none. We have cases of typical eczema, burned or injured none. We have cases of typical eczema, burned or injured none.

Still College X-Ray Laboratory

Established 1899

Examinations and consultations given promptly at the usual business hours.

Osteopathic practitioners and others from distant places can obtain their patients without preliminary notice, relying upon prompt and satisfactory treatment.

We have been engaged in the work of making fluoroscopic examinations and X-Ray Pictures Without Charge for Three Years. We have found, as have others, that one must make a specialty of this branch of practice in order to be successful. The operator must know his machine, his tubes and their peculiarities. We have a room full of pictures of the average body promptly and reliably, as well as definite outlines of tuberculous, consolidated and other infiltrated areas of denser structure than the normal.’

We have been making daily applications of the X-Ray as a healing power for cancers, eczema, tumors, injuries, syphilis, herpes, pemphigus, and other skin diseases, for two years. We have cured, with apparent permanent cures, cases of all these diseases, and have failed in few where we have thus far succeeded in giving the treatment. We have a secret of the profession, both osteopathic and medical. We have never seen any better recoveries or any better radiographs than those of our laboratories. We have a secret of the profession, both osteopathic and medical. We have never seen any better recoveries or any better radiographs than those of our laboratories

We do not say these boastingly, but so that the profession may know of them. Every courtesy extended to the osteopathic and medical professions. Address PITTS & PITTS, 325 Pennsylvania Avenue, Washington, D. C.

How the A. O. A. Grows!

Here is the roster of new members elected to the A. O. A. at Cleveland, and whose membership helped the association to realize its dream of both State and National Associations.

Join the A. O. A.

A recent graduate who has attended the last two meetings of the A. O. A. voices the sentiment of all those present in a recent letter to the treasurer:

I am so glad that I came into the fold very soon after graduation. Since attending the Milwaukee and Cleveland conventions, I am seemed never to miss a future one if I can possibly help it. Every O. D. ought to be a member of both State and National Associations.”

Join now and get the benefit of the last meeting, full report of which will be given through the Monthly Journal of the A. O. A., sent free to members.

The Osteopathic Physician

should promptly report his name, address, degrees and when and where obtained, and whether or not he be a member of his state association, to William R. Dobhyn & Sons, Publishers, Minneapolis, Minn.

Each college should, through its publica­tions, urge its alumni to give all possible assistance to this work. Likewise the college publica­tions should stimulate interest in the en­trep­rise by keeping the matter before the profession.

The several colleges should furnish the publishers with a complete roster of their graduates, and should carefully furnish such other information as might be included in the circular letter sent by the publishers.

IV. The secretaries of the State Osteopathic Associations should send a roster of all the practicing Osteopaths in their states, signifying who are members, in good standing, of the state organizations.

The great amount of exacting work called for by this undertaking can succeed in its object only by the steady attention of all to the above requests. Let each one do his part. Fraternally,

A Peculiar Accident to an Osteopath

[From the Milwaukee Journal.]

Kenosha, Wis., Aug. 5.—Dr. T. T. Parker, a well-known Osteopath, while walking from one Northwestern car to another, stepped on a banana peel, and was thrown from the car, his foot catching on the step. His left arm was thrown under the wheels, one truck passing over the hand, rendering amputation of all the fingers necessary. Dr. Parker is 27 years of age, and only recently graduated. His injury will make it impossible for him to practice his profession.

Dr. Parker studied at the Illinois College of Osteopathy, and at Harvey Medical College, and, it is said, meant to qualify at one of the older colleges this fall. He has our sympathy in his great misfortune.

And Fractures Discussed in September "O. H."
