Our D. O. Degree Sufficient If Educational Qualification Is Made Second To None.

It is time for the colleges to consider the four-year course seriously. If the colleges would give a four-year course that is as good or better than that given by the old schools I believe the question of legislation would be greatly simplified.

The osteopaths have branded themselves as inferior in most states by the laws they have sought. A law that forbids an osteopath to do anything that in his judgment is the best for his patient at that time, certainly is not what it should be. Every osteopath is qualified to take care of contagious and infectious diseases, attend obstetrical cases, do all minor surgical operations, and use antiseptics, anaesthetics, and antidotes for poisons; but how many laws give them this privilege? In most states they are as inferiors in most states by the laws they have sought. A law that forbids an osteopath to use drugs internally or externally is put in. It implies that we are lacking something, and that when they graduated they would expect an enrollment of about 200 students. They saw their enrolment at our colleges would be greatly simplified.

The majority of medical colleges do their work in seven and a half months each year. Our colleges should work their students as hard and require four years of nine months each year.

For reasons stated above it would be difficult to make legislators understand why they should pass a law granting an osteopathic complete recognition on an M. D. degree from a college that did not teach drugs, although technically it should be done; but, on the other hand, almost any legislator could see the justice of giving complete recognition to the D. O. degree provided the educational qualifications were as high or higher than required by the old schools, the only difference being in therapeutics.

In my three campaigns at Springfield the legislators have told me repeatedly that they were in favor of osteopathic therapeutics, but would not pass a law granting an osteopathic complete recognition on an M. D. degree from a college that did not teach drugs, although technically it should be done; but, on the other hand, almost any legislator could see the justice of giving complete recognition to the D. O. degree provided the educational qualifications were as high or higher than required by the old schools, the only difference being in therapeutics.

Dr. F. D. Parker, of St. Paul, Minn., Who Made a Brilliant Success as Organizer for A. O. A. (Page 9)
a complete and independent system of therapeutics our educational qualifications must be second to none. That in order to get legal and popular recognition of the kind we want and deserve we must have as thorough a college course as any system. That the degree of D. O. seems far more practical for us under the circumstances than the degree of M. D., which would be misleading and have no better standing than the former, if the former was backed by as good or better educational qualifications.

Old and New Things in Osteopathy
Glyde Wade Bumpus, A.B., D.O., East Liverpool, Ohio

THAT osteopathy is fast being recognized as a new and complete system of therapeutics, there can be no doubt. At an early day, before legal recognition was afforded us, our practitioners treated only chronic conditions. Today the osteopathic physician treats more acute than chronic diseases. The osteopathic physician of today finds that he must answer questions regarding diet, exercise, psychology, antitoxin, Pasteur treatment, filtration, and in fact everything that is asked any up-to-date physician. He must have a common sense knowledge of these subjects to answer intelligent persons on them. It is to the field of preventive measures that he is especially adapted. He is the Twentieth Century physician.

Dietetics has its place in our practice, but in the treating of disease, can be carried too far by some of our practitioners. First, we should treat our patient and remove any mechanical interference and then we should be in a position to at least advise our patient as to a diet that would not be harmful, if it did not help his condition. We must look to treatment first and then to palliative measures. Osteopathic treatment is of paramount importance in all cases.

Psychology has grown in great favor in the past few years and no one can doubt that it is a great aid in the treatment of disease. This is a field in which we can all well afford to spend some time and study.

Exercise in all its forms is of great importance to us and every osteopath should be quite well versed regarding these measures. We all realize the value of them and we further realize that our work is just practically a continuation of them. We do for our patients what they can not do for themselves. There is no question but that fresh air, wholesome food, applications of heat and cold, and other methods used by our ancestors, are osteopathic and we should not hesitate to use them where indicated as they are a common heritage to all.

As to Serum-therapy, I think the profession as a unit is opposed to the method, but let us not condemn until we have investigated. None of us are perfect in this world and we should not doubt the sincerity of any person until we have positive cause. It is my opinion that these methods should be thoroughly investigated by the profession before our stamp of approval or disapproval is placed upon them. You know it hurts us to see osteopathy condemned without investigation.

As has been stated before, we must be able to explain the value or harm in these different methods, no matter whether we are opposed to them or not. Reading standard text books of these subjects will be of great value to all of us in helping to devise better methods of life, public and private, in our community. This is not especially to make us better osteopaths, but it makes us more valued citizens in our community, because, as a physician we are more competent to advise than is a layman.

When I say that a lesion (bony or otherwise) of short duration is easier to reduce than one of long standing, I feel you will agree with me. Noting the success attained by our early D. O.'s,
it is to be readily seen that they were especially competent operators. They treated only chronic conditions and the worst ones at that. Where did these D. O.'s become competent? Right under the eye of Dr. A. T. Still. He taught them mechanics, anatomy, physiology and common sense. He kept them at work until they became competent. He could not let them go before, for their competency meant the future of the system.

Today we frequently hear the young D. O. say that the old practitioner is not up to date in technique. There is where he is mistaken. No school of osteopathy today is giving a more thorough course in Mechanics and Principles of Osteopathy than was given at the A. S. O. twelve years ago. The early D. O. is successful wherever you find him. He reduces lesions, gives five minute treatments and gets results without resorting to pills. Why is this? I think it is because he studied the body as a machine and mastered its subject.

Today the osteopathic student is taught so much unnecessary information that he loses the idea that the body is a machine. He is taught the use of the knife, the test tube and the microscope, but does he get enough of the genuine osteopathic principles and practice?

Subjects discussed in our publications and meetings as new are electricity, drugs, serotherapy, psychology, diet and hydrotherapy, but are they new?

In looking over the osteopathic publications of ten or twelve years ago we find these same subjects being discussed by such persons as Drs. Smith, Hulet, Bolles, Littlejohn, McConnell, Hildreth, Still and many others.

The September, 1898, Journal of Osteopathy contains an article in Dr. A. T. Still's department, under the caption, "Medical Osteopathy," extracts from which follow:

"Many uniformed persons are asking themselves the question, should drugs and osteopathy go together? Those who ask this question are of the class but little posted in the science of osteopathy. If drugs are right osteopathy is all wrong; if osteopathy is anything in the healing of diseases it is everything and drugs are nothing. This may seem a bold assertion but there is not a true osteopath living who will not back the assertion. The man who pretends to be an osteopath and at the same time uses drugs wants the dollar and is neither an M. D. nor an osteopath. If he must depend on his drugs at all, why not be honest and depend on them wholly and not attach D. O. to his name in order to draw custom.

"Osteopathy and drugs are so opposite that one might as well say white is black as speak of medical osteopathy. You can no more mix medicine and osteopathy than you can oil and water. The man or woman who has this science deeply imbedded in his or her heart and head, who understands its principles, would blush for shame to be called a 'medical osteopath.'

"Nevertheless there are certain schools which pretend to teach medicine and osteopathy. They are said to be the Medical Osteopathic Institutions, which like the bat are neither bird nor beast, and have no classification. They are mongrel institutions, snares, set to capture the unwary and unthinking. No true osteopath can believe in medicine, the very evil it is to regulate. If one wants an osteopath to treat his ailments he wants a true osteopath and not one who is a half and half. If one wants a medical doctor he will secure a graduate from a real medical college, not some half and half who is nothing.

"If you are going to be an osteopath don't be a sham, but a genuine osteopath. Put all your time on the study of the science in some reputable school and when you have graduated have a diploma of which you will not be ashamed, and which the law will recognize and give you its protection.—(Signed) A. T. Still."
THE OSTEOPATHIC PHYSICIAN

In fact orthopedics are our great specialty and we are more competent than other physicians to handle these cases. Treatment in these cases is simpler and to be given by any competent osteopath. We must have confidence in ourselves or others will not have confidence in us.

Osteopathic Offices in the Middle West

F. D. Parker, D. O., St. Paul, Minn.

I recently made a trip covering several cities in the middle west and was greatly impressed with the many offices of our practitioners and their relation to business. Taken as a whole, I think it safe to say that the offices of the osteopathic physicians excel those of the medical profession which I have seen. There is room for improvement. While in all cities I found handsome offices, at the same time I also ran across a number of offices which were dirty and uncleanly furnished. Some of the more modern buildings may be slightly greater, but not because they were not elegantly furnished, but on account of uncleanliness and bad taste in furnishings. The expense of some of the more modern buildings may be slightly greater, but where patronage is not of the best and where reputation is not of the best and where patients generally are not of the better class, the office may be slightly greater, but the difference is a mere bagatelle compared with the difference possible in the incomes. Every one of the buildings was selected as any in the buildings. Some of the newer schools were very neat and above all, scrupulously clean, with an air of prosperity and refinement which can

A Short Story

OUR No. 1 APPLIANCE FOR THE CURE OF SPINAL CURVATURE is made of the best material throughout. The corset part, supported by strips of light featherbone and steel, is shaped to the body and covered with a mercerized silky material, light, strong and durable. The edges, both under the arms and on the hips, are padded, preventing chafing or friction. The back stays are of steel, highly tempered, rust proof, covered with soft leather on each side; eyestays are non-corrosive. The lacing specially woven. The buckles heavily nicked, with protected joints and the straps are of mercerized silk webbing.

Our No. 1 Appliance is light in weight, cool, comfortable, durable and pliable, allowing perfect freedom to the muscles, offers no obstacle to work or exercise, is worn without discomfort and not noticeable under the clothing. Gives a continuous and perfect support to a weak or deformed spine, avoiding all irritation or soreness from unequal distribution of pressure. It removes the weight of the head and shoulders from the spine.

Our No. 1 Appliance is made to order from individual measurements only. For a more complete description, send for our illustrated book covering the whole subject. OUR No. 1 APPLIANCE, with the treatment advised and the exercises recommended, gives speedy results.

PHILO BURT MFG. CO., 141 16th Street, JAMESTOWN, N. Y.
Cleveland, Ohio,

"Madam, I have at least comparable cases of Epilepsy in his family, which is exaggerated by his personality, and he is a willing and sometimes mischievous patient. You may expect at least ten visits a year, and it is your duty to be prepared to cure his 'headache.' There are no not only sensitive to this chronic disease, but in many other conditions."

Dr. Orren E. Smith Makes Notable Addition to Works by Osteopathic Authors

D R. ORREN E. SMITH, of Indianapolis, Ind., is a man with progressive ideas and his ideas have often forced him into the arena of discussion in our osteopathic meetings and publications. He has just issued a contribution to our literature entitled—"Manhood—A Study in Male Vitality," which will take a prominent place among works by osteopathic author. The book treats a subject that is receiving constantly deeper, wider, and more earnest consideration, both by the general public and the medical profession, and Dr. Smith's handling of it in a scholarly manner highly creditable to himself and the educational attainment of the osteopathic profession.

Dr. Smith has an heavy practice and consequently is a very busy man. To produce a kind of this under such conditions is a labor of love and his volume is the product of research, investigation and compilation con-

Every D. O. in the Land

has at least comparable cases of Epilepsy in his family, which is exaggerated by his personality, and he is a willing and sometimes mischievous patient. You may expect at least ten visits a year, and it is your duty to be prepared to cure his 'headache.' There are no not only sensitive to this chronic disease, but in many other conditions.

Sold for cash, or part cash and balance as it is made by the instruments. Your money back if it fails to do the work.

but appeal to the patrons of the different offices.

Of course the ability and personality of the practitioner has to do largely with prosperity, and in my opinion the appearance of the office must be given consideration as well.

Another point, office girls! There are office girls and office girls. In one office on this trip, had I been a patient and treated, I should certainly look the other doctor if I thought him equally capable. This young lady did not know but what I was a patient and I assure you it was a great condensation on her part to advise me that I could eventually see the doctor.

She could hardly have employed better tactics had her intention been to drive me away. I met others who were business to see that I was kept busy and in a good humor until the doctor could be seen, which "will be in just a few moments." In one case I had to make it them for a patient. That kind of young lady is valuable.

Dr. Orren E. Smith of Indianapolis.

Not an adjunct, but a physiological appliance, the embodiment of Osteopathic principles. Invented for the Osteopath, and revised and corrected to meet his needs. The entire body, or any important section of it, can be stretched in the degree desired, and almost continuous illness that had beset him in early childhood. It made him sound and fit to do a man's full part in the world's work.

THE STRETCHER Company, Cleveland, 0.
a medical college but his condition was so bad that the doctors could not "patch him up" long enough to attend lectures, so he had to drop out each time. To find a way to escape from illness became the supreme object and effort of his life.

Osteopathy proved to be the right way.

Fortunately for Dr. Smith it happened in the course of events that his mother took some osteopathic treatments. The very satisfactory results obtained at once interested him. He went to Kirksville, primarily to take treatment, but incidently he matriculated for a course in A. S. O. He was very doubtful as to the benefit that would come to him and considered the course of study simply "a side issue to kill time." To him the system seemed meagre and the contention that the practice of osteopathy could embrace the whole range of curable diseases he considered even ludicrous.

But the unexpected came to pass in his case, as in so many others of physical wreck in which osteopathy came to the rescue. At the end of his two years at Kirksville, Dr. Smith had largely regained his health and was able to graduate with the class he matriculated with. Something the medical schools had utterly failed to do for him.

Dr. Smith was born in Indiana in 1874. He graduated from the A. S. O. with the June, 1903, class. He practiced in Washington, D. C., for about nine months and then returned to Indiana on account of the illness of his father. He located in Indianapolis in October, 1904, and has practiced there continuously ever since.

Dr. Smith is one of the stalwarts in the ranks of association workers. He is active in his efforts to advance the cause and is in demand as a speaker at state and national gatherings. His home state registered its appreciation of his sterling qualities by electing him president of the Indiana Osteopathic Association in 1908.

He is a member of the Atlas Club and of the A. O. A.

At present Dr. Smith is also a prominent member of that notable Indianapolis organization, the Bachelor Brotherhood. Membership in this society is precarious at the best and we would not like to hazard a guess as to how long Dr. Smith will enjoy the freedom of the lodge rooms of the order. As is well known the enemies of this order are in themselves almost irresistible and they have the assistance of a god, small in stature but mighty in power.

In the "Book Review Corner" of this issue "Ye Review Editor" goes through his usual procedure of ripping books up the back and in this instance he pays compliments to the author as being more than a good fellow. Those who would like to know something of the scope of Dr. Smith's book can get a good idea from the review. Alert members of the profession will have this book in their libraries.

Representative Miller of Iowa Will Issue Book on "Medical Trust"

OSTEOPATHS will be pleased to know that the intensely interesting and important articles on "The Medical Trust—The Meanest Trust in the World," by Representative M. C. W. Miller, of Iowa, which appeared in the National Magazine last summer, are to be published in book form. In his crusade against medical monopoly Mr. Miller is doing a great and unselfish work. He has reduced physical violence and financial loss because of his devotion to the interests of the people and the cause of humanity.

Osteopaths everywhere should be with Mr. Miller in this fight, heart and soul.

There is grave reason to believe that the issues of the National Magazine containing this series of articles were bought up or suppressed. Of course, it is not admitted, but it is very easy to surmise that certain interests would be very glad to prevent the public from reading the articles and becoming conversant with the facts set forth, and it is a fact that copies of the magazines of the months covered by the articles were exceedingly hard to get either on the newsstands or by direct order.

To overcome this apparent coup and to supply the demand known to exist, Mr. Miller has assumed the expense of publication in book form. Every osteopath should help to get it distributed, not only for the good it will do itself but also to assure Mr. Miller reimbursement for the expense of the undertaking.

The price for single copies is 25 cents, but very few figures will be made for quantities. Dr. J. U. J. F. Morris, of La Crosse, Wis., has already placed his order for 300 copies. Get your order in early and help push this good work along.
FREE TO DOCTORS
TYREE'S ANTI-SEPTIC POWDER
Has been for years a standard antiseptic highly recommended by the medical profession.

TYREE'S POWDER
is of incalculable value in genito-urinary and rectal practice, whether of a Catarrhal or infected conditions of both male and female, as well as dermatological practice. Prickly Heat, Ulcers, Poison Oak, Hives, Eczema, Sores, etc., and as a wash for the Nose, Throat and Mouth.

It neither pains nor stains. It is odorless and pleasant, economical and effective.

For Samples and Literature, address

EDITORIAL

"How to the line, let chips fall where they will."

A. O. A. SHOULD HAVE ORGANIZER.

The tremendous success of Dr. Parker on his recent trip as field organizer for the A. O. A. has conclusively demonstrated the fact that personal solicitation is the method by which the association can be extended and made to include practically the entire profession.

The splendid work started by Dr. Parker should be followed up vigorously. With the whole profession united in a harmonious and progressive organization osteopathy will make unprecedented advances.

By all means let us put a permanent organizer into the field at once.

FAKE SCHOOL OFFERS COURSE FOR $7.50.

The following letter shows how unscrupulous the hands of the Sub-Committee on Pharmacognosy, and the passage of resolutions, "which would tend to bind the people, as a whole, are losing faith in the whole association, and are willing to receive a guarantee of standards in the Pharmacopoeia which is free from pretense and malpractices, and to rely on the standards set by the profession of medicine, instead of the peddling of two members of the team-Slaughter and Orrison-who played an importunate role to the osteopath that treated my landlord, and a diploma "good in any state" is promoted.

A Peril to the Sick.

An evil more dangerous, because more insidious, than that of patient nostrums lies in the fact that the drugs which are sold to the public under the guise of what are called "medicinal drugs" are often used by doctors in the practice of medicine. It is the testimony of Dr. Henry Kraemer of Philadelphia, a member of the Committee on Revision of the United States Pharmacopoeia, that the Pharmacopoeia which we authorize the dispensers of drugs to use as the standard of the composition of drugs regularly employed in medicine in the United States in 1901, is practically useless as a textbook for the medical profession, and that this condition, "which would tend to bind standards? Why the opposition from The American Druggist, the very periodical that prints this splendid work started by Dr. Parker. Why shall there be no reason why the whole subject of the purchase and sale of vegetable drugs should not be regulated?"

The bare statement of this "expressed desire" is sufficient to rouse the med.ical profession and the public, who are losing faith in the whole association, and are willing to receive a guarantee of standards in the Pharmacopoeia which is free from pretense and malpractices, and to rely on the standards set by the profession of medicine, instead of the peddling of two members of the team-Slaughter and Orrison-who played an importunate role to the osteopath that treated my landlord, and a diploma "good in any state" is promoted.

era. The diploma is on heavy white parchment with a crimson block O in the center, across which is printed in black (carrying out the A. S. O. colors), the name of the player, certificate of his being awarded the O, seasons played in, position on team, and personal description.

The diplomas bear the signatures of the dean of the A. S. O., the president of the Athletic Association, the president of the Board of Control of the Athletic Association and all the members of the A. S. O. faculty. The idea of the "Football Diploma" originated with President Elmer Smith, who was assisted in the designing and painting by James T. Slaughter and R. M. Tuger. The diplomas have made quite a hit with the team, who plan to have them adorn their future office walls.

**Staff Photographer In Lively Stunt—Catches Victims In Woolley West and Snaps New York Bunch**

**In Effete East**

OUR "Snap Shot" man while wandering in the erstwhile "Woolly West" caught two well known D. O.'s out on a ranch in Washington State, and sends us the result of his effort.

The picture was taken at the country home of Dr. F. C. Jones, Knaft-Yar-Glaine Villa, Roselawn Ranch, and shows Mrs. F. C. Jones, Dr. S. S. Still, of Des Moines, Ia., and Dr. F. C. Jones, of Sunnyvale, Wash.

**From Virile West to Effete East.**

"Governor" Bill Smiley, Charlie Hazzard, and "Bill" Buster, who were "shot" by our artist while hunting osteopathic celebrities a few months ago, enjoyed the experience so much that they were just dying to get into the limelight again (or even flash light, for that matter).

Hearing that our sleuth was gum-shoeing in the East they got themselves elected officers of the New York Osteopathic Society feeling sure the "official family" would be cordial sooner or later, and so, here they are again!

The picture shows all the society officers with the exception of the vice-president, Dr. Hugh Russell, of Buffalo.

From left to right they are: Dr. Grant E. Phillips, of Schenectady; Dr. Clarke F. Fletcher, of New York; Dr. Chas. D. Berry, of Rochester; Dr. S. S. Still, of Albany; Dr. J. H. McDowell, of Troy; Dr. Charlie Hazzard, address unnecessary, and Dr. "Bill" Buster, of New York.

Officially they are: Dr. "Bill" Buster, otherwise known as "Dutch," is president of the society, and as his smile indicates, his cares rest lightly on his shoulders.

**THE OSTEOPATHIC PHYSICIAN**

**Dr. Charlie Hazzard** is chairman of the advisory committee, and is getting to be an adept at posing for his picture. Dr. Grant Phillips is secretary. He is a new man in the harness, but is making good. He has no nickname as yet, but he will get one if he trains long in his present company.

**Dr. McDowell,** familiarly known as "Mac," hails from the ancient town of Troy, and is keeper of the strong box, and "Mac" isn't slow if he does come from Troy.

**Dr. Berry** is one of the directors, and while new in the harness of the state society is an old standby. His reputation is varied, however. Of late he has been acquiring a great reputation as an automobilist by contesting the right of way with the trolley car. Get him to tell you about it. He is always delightful (?) to relate his experiences.

**Dr. Clarke Fletcher**, or "Fletch" for short, is the sporty boy in the crowd with his velvet hat. Take it from me! Don't let that unsophisticated look on his face fool you!

**Dr. Bill Smiley**, the "Governor," like Hazzard, needs no introduction. He is all wool and over two yards long, and then some. He is hard to beat any way you take him. If you don't believe it, ask Buster.

**Maximum Membership for A. O. A. Assured If Live Organizers Are Put in Field**

R. F. D. PARKER, of St. Paul, Minn., has completed his trial trip as field organizer for the A. O. A. and the results accomplished are most gratifying to the association and highly creditable to Dr. Parker.

The trip extended over three weeks, covered ten cities, and produced 100 applications. The places visited were: Chicago, Peoria, and Springfield, Ill.; St. Louis, Kansas City, and Excelsior Springs, and St. Joseph, Mo., Lincoln and Omaha, Neb., and Des Moines, Iowa.

In Lincoln and Omaha all the non-members were enlisted, seven and nine respectively. Fourteen members were secured in Kansas City, and ten in Des Moines. In the latter place better results would have been gotten but for the fact that many of the osteopaths were out of the city.

In one of his letters Dr. Parker says:

I think it is safe to say that the trip has proven that the plan is right and that the membership to the association may be limited only by the number in our profession if the field work be properly handled. At least 90 per cent of the profession seen were persuaded to make application, if not a greater percentage. Many were away at the time of the visit. If we can prevail upon 90 per cent becoming members, the balance will "fall over backwards to join the association.

The members of the profession outside of the A. O. A. can be reached only by a promise of a sincere and determined effort on the part of the association to try and do something for the general good of the cause, to drop all personalities, as well as all wrangling and work in harmony. In fact, wash the slate, commence over again and rise above many of the things which we have allowed to disturb general harmony.

[Notice to Publishers! If you have a book worth reviewing that you want praised or blamed on its merits in this column, send a copy to Dr. Ernest E. Tucker, at 18 West Thirty-fourth Street, New York City, and be sure he will give it the books if it deserves sooner. (The publisher expressly disclaims responsibility at law for Ye Book Reviewer's sins of omission, commission or perpetuation.) You've simply got to take chances with his dyspepsia.)

**Manhood—A Study in Male Vitality. Orren E. Smith, D. O. Sentinel Printing Co., Indianapolis.**

Dr. Smith is favorably known to the osteopathic public through numerous contributions to osteopathic publications, and his book is insured a good reception throughout the profession. In an interesting chapter on mechanical treatment he discusses what osteopaths will recognize as osteopathy. Dr. Smith does not hold that osteopathy is in fact, only once does the word "osteopathy" appear in the text, and then in referring a quotation to Hulett's Principles of Osteopathy. The fact that the author introduces himself as an osteopathic physician might be supposed to cover this point, but it would have been better beyond the possibility of question, had he called osteopathy osteopathy, and not mechanical treatment.

The work covers a wide field, but is mainly as its title implies, a study of sex-phenomena in their broader significance. The literature on this subject is increasing vastly and is meeting with a more tolerant reception as the deep importance of the subject comes to be more and more recognized in the awakening consciousness of the race. This country is
THE OSTEOPATHIC PHYSICIAN

awakening to the fact that the subject of sex relations is a fit subject for ideals of a national scope, that the race may be unified and uplifted, it is a blank and uninspiringly study, without agreement, of this most fundamental of the problems of civilization. To this Dr. Smith's book is a contribution.

The book book is original from cover to cover, and Dr. Smith's work is not; in fact, the proportion of the book that is made up of quotations, is repeated by a fraction with a small denominator. But in that, it truly represents the normal progress of any idea, which must be largely old ideas, rearranged for new purpose or with new conclusion; or old facts restated with the new ones added to show the relation of the new to those that are now have. If we would make any criticism at the author's expense it would be that he emulates too consistently the style of Knickerbocker's famous History of New York, which begins with the dawn of creation and brings the narrative down to the settling of New Amsterdam in order to get the perspective that the author feels the importance of his subject requires. But then, would not care to read the work of a man who was not entirely possessed by the importance of his subject. His is an idea, too, that can easily be carried too far, and we believe he has done this thing; but then entitled to a hearing.

Dr. Smith has a gift of phraseology which enables him to get around the debated points, and makes a definition that will be satisfactory to all parties. Thus, he does not speak of bony lesions as "pressing upon and irritating" nervous tissue; instead he says:

"Bony tissue encroaching upon nervous tissue creates a mechanical stimulus to the nervous system which causes fluctuation in function" (italics ours).

The burden of this work may be summed up in these sentences quoted from M. S. IV, (M. S. with the number heads each chapter; which it conceives the author might have explained), p. 95:

"It seems safe to say that we have by no means discovered what it means the author might have expressed, but for is entitled to a hearing.

The idea, that has forced Dr. Smith into the arena, is that we do not possess our ideas but are possessed by them. The idea which forces us into the arena, Where like gladiators we must fight for them.

His idea carries him through all the arenas, even to those of high spiritual significance and his sincere earnestness carries the reader along with him.

Write to the Registrar for catalogue of the Philadelphia College and Infirmary of Osteopathy, and a copy of the Journal.

THE OSTEOPATHIC PHYSICIAN

awakening to the fact that the subject of sex relations is a fit subject for ideals of a national scope, that the race may be unified and uplifted, it is a blank and uninspiringly study, without agreement, of this most fundamental of the problems of civilization. To this Dr. Smith's book is a contribution.

The book book is original from cover to cover, and Dr. Smith's work is not; in fact, the proportion of the book that is made up of quotations, is repeated by a fraction with a small denominator. But in that, it truly represents the normal progress of any idea, which must be largely old ideas, rearranged for new purpose or with new conclusion; or old facts restated with the new ones added to show the relation of the new to those that are now have. If we would make any criticism at the author's expense it would be that he emulates too consistently the style of Knickerbocker's famous History of New York, which begins with the dawn of creation and brings the narrative down to the settling of New Amsterdam in order to get the perspective that the author feels the importance of his subject requires. But then, would not care to read the work of a man who was not entirely possessed by the importance of his subject. His is an idea, too, that can easily be carried too far, and we believe he has done this thing; but then entitled to a hearing.

Dr. Smith has a gift of phraseology which enables him to get around the debated points, and makes a definition that will be satisfactory to all parties. Thus, he does not speak of bony lesions as "pressing upon and irritating" nervous tissue; instead he says:

"Bony tissue encroaching upon nervous tissue creates a mechanical stimulus to the nervous system which causes fluctuation in function" (italics ours).

The burden of this work may be summed up in these sentences quoted from M. S. IV, (M. S. with the number heads each chapter; which it conceives the author might have explained), p. 95:

"It seems safe to say that we have by no means discovered what it means the author might have expressed, but for is entitled to a hearing.

The idea, that has forced Dr. Smith into the arena, is that we do not possess our ideas but are possessed by them. The idea which forces us into the arena, Where like gladiators we must fight for them.

His idea carries him through all the arenas, even to those of high spiritual significance and his sincere earnestness carries the reader along with him.
The Osteopathic Physician

Dr. Pauline R. Mantel Exonerated.

Dr. Pauline R. Mantel, of Springfield, Ill., whose name was mentioned by Mrs. Mary Rutledge, of St. Louis, Mo., in her suit for divorce and $50,000 settlement, has been completely exonerated. At a hearing in St. Louis, Mrs. Rutledge, on the witness stand, admitted that she had no reason to suspect any wrong between her husband and her cousin, Dr. Mantel.

Arrested on Serious Charge.

Dr. W. H. Easter, of Longmont, Colo., named as an osteopath but not on our records or listed in the osteopathic directory, has been arrested with two other Longmont osteopathic practitioners by Dr. C. F. Spring, of Galesburg, Ill., A. Hartman, probation officer, and F. M. Lowe, father of a girl not yet thirteen years of age, who is the alleged victim of the sexual assault and rape. Dr. Easter and the other man, deny the charges.

Fourth District Illinois Meeting.

The Fourth District Illinois Osteopathic Association met February 9th at Bloomington, Dr. M. R. Clark, of Indianapolis, Ind., who was to have been the principal speaker, was unable to attend. However, a banquet was served and an interesting meeting enjoyed. Dr. Dudley H. Shaw, of Decatur, and Dr. Edgar Q. Thawley, of Peoria, conducted clinics. Officers were elected: President, Dr. Edgar Q. Thawley, Peoria; secretary-treasurer, Dr. H. D. Stewart, Fairbury.

H. T. Root Replies to Dr. Sharon.

I am very sorry to note the inconvenience and embarrassment suffered by one of our practitioners while using one of my swings. These swings are used in the infirmary at the A. S. O., and certainly are subjected to as severe usage as they would be by any physician in private practice. This is the first and only swing that has not given entire satisfaction, and even in this instance when trying to reason with the doctor, and admitting that perhaps there might have existed a flaw in the material of this particular swing, I stated that if he would send back the parts I would cheerfully replace with a new swing, but to no avail. It appears to me that the swing must have been improperly used, hence the accident.

The Third District Illinois Osteopathic Association Election.

The Third District Illinois Osteopathic Association held a regular meeting at Galesburg, February 2nd. Officers for the year were installed for 1910: President, Dr. Kathryn B. Rigdway; vice president, Dr. James A. Still; secretary and treasurer, Dr. Jennie Still; censor, Dr. C. F. Spring. Dr. S. S. Still conducted a question box, which brought out discussion on pediatrics, economy, dispensability, etc. At the next regular meeting Dr. F. R. Grow will address the association.—Lot Mosier (Johns) Capital.

The Osteopathic School of Anatomy.

January 14th, in Common Pleas Court, No. 1, Philadelphia, the Harvey School of Anatomy was granted a state charter. The school is composed of osteopathic students and physicians and will work in close connection with the Philadelphia College of Osteopathy. It is proposed to secure recognition from the State Anatomy Board so that bodies can be obtained upon which to teach anatomy. This added facility will enable the Philadelphia College to present a much better course of instruction than heretofore.

A. S. O. Seniors Form Quiz Class.

Seniors at the American School of Osteopathy have formed a quiz class for the purpose of preparing for the state boards and their clinical examinations. They meet in the evenings in the hospital pit where quizzes are given by Dr. George Still. All the subjects taken up by the state boards will be covered by the time the school lets out, and as this is entirely separate from the regular school work, and in addition to it, those taking the quiz course are expecting to have easier sailing with the state boards next spring. Altogether about sixty-five have entered the course.

Dr. George Still Does Much Traveling.

Dr. George Still, of Kirkville, has visited some cases for Dr. D. N. Wilson during January. He was also in Des Moines, January 31st, and in Peoria, Illinois one Saturday, and in St. Louis one day. Altogether since the beginning of the school year in September, Dr. George Still has traveled on professional business, either lecturing or operating or seeing cases, nearly half the distance around the world. On one trip going over 3,000 miles he was on the road only 10 days. He is getting so that he knows the railroad time connections like a postal clerk.

Vaccination Cause of Tuberculosis.

Dr. Hendrick Olson, Rochester, N. Y., sends us the following translation of a Stockholm (Sweden) item appearing in a Swedish paper:

In a letter to the King, sent the other day through the
Bovine Company

RECONSTRUCTIVE FOOD AND TONIC

BOVININE represents the most valuable combination of
Food and Tonic elements known to the medical pro-
tession.

BOVININE has proven clinically to be most valuable
in all forms of Tuberculosis.

BOVININE enables the nerve cell to assimilate its
pecific elements, which it fully supplies.

BOVININE promotes the metabolism of fat and albumin
in muscle and blood, thereby restoring the bodily
health, strength and normal powers of resistance.

BOVININE supplies full and complete nutrition through
its Food and Tonic properties.

THE OSTEOPATHIC PHYSICIAN

Civil department, Officer John Eekengren asks for per-
mission to withhold the vaccination of his children until
a determination that the procedure does not embody the
great risk to their lives that Mr. Eekengren believes it
does.

Especially does Mr. Eekengren hold that vaccination
Anemone individuals resistant. "I am going to seek a
proof in the fact that tuberculous is con
stantly spreading despite the energetic war waged against
it, with constantly improved methods that physicians
have at their disposition.

Denver Association Has Good Discussion.

The Denver Osteopathic Association met Saturday
evening January 16th. The paper of the evening was by Dr.
Payne—subject, "Constitution." The discussion was led by
Dr. Bertha Hilton and was participated in by all the
members present. As this is a city where we who have
had experience both successful and otherwise much interest
was shown and many valuable points were brought out in regard to location of lesions, abdominal treatment, local treatment, diet (fruit being adv "inclusive diet") suggestion, solar plexus massage, exercise, enemas. In regard to the latter hot molasses and milk was recommended for all patients in a very skillful manner. A number of the faculty of the Massachusetts College of Osteopathy as well as students were present by invitation of the members.

Proposed District of Columbia Osteopathic Board.

The District of Columbia, Health Commissioners
will make another effort to obtain legislation from Congress
for the regulation of osteopathy. Corporation Counsel
Thomas has prepared a bill which has met with the
approval of the commissioners, and will be introduced in
Congress. It went to the District Committee of the House
yesterday and was presented by the Clerk of the Osteopathic
examiners to be composed of five physicians in good standing, each of whom must have practiced
osteopathy in the District at least two years prior to
their appointment. All persons desiring to practice osteopathy
must first apply with the board and pass an examin-
ation. Penalty for practicing osteopathy without license is
fixed at not less than $200 nor more than $500, or imprisomnent in the District jail for ten
nor more than ninety days for each offense.

Lively Contest Expected in Ontario.

The Medical and Surgical Congress of Ontario, the New leaders, will
offer strong opposition to the application for the incorporation of a College of Osteopathy by the legislature. The

The Osteopathic Physician largely imaginary he might as well manufacture some
college "history." He says that the sons of Dr. A. T.
T. A. R. O., and so the old doctor withdrew from Kirksville and founded the
Chapel College of Osteopathy. Dr. C. R. C. was in
Washington two years before the passage of the law
and the School of Osteopathy was transferred there. On the advice of the attorney general they refused to grant
him a license since he did not have a
.
Mr. Curry, who was a member of the
Examining Board, expels Mr. R. F. O., Wood-
worth, Washougal, Wash., for further particulars.

Town Wants Osteopath.

Washougal, Wash., is calling for an osteopath. We are
informed that an osteopath locating there could
be of advantage to the town which lies about three miles distant, both towns being about twenty-five miles northeast from Portland. If interested, write C. A. W., Wood-
worth, Washougal, Wash., for further particulars.

Good Meeting in Philadelphia.

The December meeting of the Philadelphia County
Osteopathic Society was held in Odd Fellows Temple,
North Dakota. It was held on January 15th. The paper of the evening was by Dr.
Shepard on "Odds and Ends.

The Osteopathic Association of Washington two years before the passage of the law
and the School of Osteopathy was transferred there. On the advice of the attorney general they refused to grant
him a license since he did not have a

International American Congress of Medicine and Hygiene.

The American Congress of Medicine and Hygiene of 1910 in connection with the first centennial of the May revolution of 1910, under the patronage of His Excellency, the President of the Argentine Republic, will be held May 28th in Buenos Aires, Argentine Re-
public. Several papers on the subject of papers and exhibits from the United States, there has been an agreement by the osteopathic
Dr. H. R. Bynum of Memphis, says:
"The hospital in Minnesota was opened by Dr.
Curry, K. C., on behalf of the

The Osteopathic Society was held January 22d, at the Hotel Rylan,
St. Paul. Dr. George L. Huntington of St. Paul spoke on "Insufficient Mastication," and declared it to be one of the primary causes of disease.
Dr. Clement A. Wool-
son spoke on the diseases of the eye, and Dr. L. S.
Shepard on "ODDS and ENDS."

Osteopaths Should Support This Hospital.

A new hospital is to be erected in Memphis, Tenn., at a cost of $500,000 and to be known as the Baptist Memorial Hospital. An agreement has been reached by which osteopaths will have the same official recognition as members of other schools. In speaking of the pro-
posed hospital Dr. H. R. Bynum of Memphis, says:
"The hospital is Baptist in name only, the Jew works with the Gentile, the Methodist with the Baptist, the Alopah with the Osteopath, all for the good of the Church. You may precede me a little to the

When the evidence is all in I can reserve judgment until then some more time until the case is entirely forgotten," said
Mr. Curry, but we will at any rate
hurry up the bill."

"Well, go on," finally ordered the judge. "I can't prevent you from

After listening to arguments on the part of the two lawyers, he then said, but have decided to reserve judgment.—Toronto (Ont. Can.) Sun, February 4th.
Oreg O. D.'s Have Big Meeting.

The eighth annual meeting of the Oregon Osteopathic Association was held at Portland, January 8th. There was a good attendance and the program was well arranged. A banquet was served in the evening at the Hotel Oregon.

The first meeting was held in the room upstairs from the Hotel Oregon, Dr. E. Northrop, Portland; first vice president, Dr. Lynn E. Hewitt, Longview; second vice president, Dr. C. C. Reid, Portland; treasurer, Dr. Jeanette H. Bolles, Portland; secretary, Dr. Herald G. Greig, Portland. The following papers were presented: Dr. George W. Smith, O. D., Portland: "Acute Anterior Polio Myelitis" (clinic case), Dr. C. Hardin, Atlanta, Ga.; "Rhh Lesions Diagnosis and Correction: The Technique," Dr. C. C. Reid, Portland; "Pathology, Diagnosis and Treatment of the Spinal Line Articulation," Dr. W. L. Nichols, Portland; "Cerebellar Ataxia. Differential Diagnosis and Treatment with Clinic," Dr. John H. Sharp, Hood River; "Osteopathy in Acute Diseases," Dr. Geo. W. Zimmerman, La Grande; "Diabetes Mellitus: Case Reports and Deductions on a Series of Cases," Dr. C. S. Holsington, Pendleton.

Arkansas Osteopaths Have Talk-Fest.

The annual meeting of the Arkansas Osteopathic Association was held at the offices of Dr. C. A. Dodson, at Little Rock, February 1st. It was one of the most enthusiastic meetings ever held in the state. The article said, "The meeting was held in the January number of The Osteopathic Physician was made the subject for discussion and the contributions of the article were submitted by the majority. Dr. L. Cummins of Hot Springs, Dr. Lillian Mohler of Wood Springs, and Dr. Charles E. Ross of Little Rock, were recommended for the Osteopathic State Board of Arkansas. Dr. Phillip Mohler, secretary-treasurer, Dr. Lillian M. Mohler, Pine Bluff. The resources of Arkansas have never been so far developed. This is an excellent field for osteopaths with first class qualifications, who have enough mental and physical energy to succeed anywhere. The state is no place for ignorant or lazy doctors."

Colorado Osteopaths Hold Two Day Convention.

The Colorado Osteopathic Association held its annual convention January 7th and 8th at Denver. There was a strong gathering and much enthusiasm prevailed. Legislation, ways and means, was one of the chief topics of discussion. Dr. M. C. Hardin, of Atlanta, Ga., was a guest of honor and delivered several addresses. The program was full of interesting papers. "Diseases Caused by Innominate Lesions," Dr. E. Wm. Cadwell, Casper, Wyo.; "Cerebral Localization," Dr. M. C. Hardin, Atlanta, Ga.; "Cranial, Bronchitis," Dr. E. Wm. Cadwell, Casper, Wyo.; "Pathology, Diagnosis and Treatment of the Spinal Line Articulation," Dr. W. L. Nichols, Portland; "Osteopathy versus Massage," Dr. M. C. Hardin, Atlanta, Ga.; "Spinal Curvature," Dr. E. Wm. Cadwell, Casper, Wyo.; "Scoliosis: Adjuncts," Dr. Ridley D. Moore, Grand Junction, Colo.; "Osteopathy in Acute Diseases," Dr. M. C. Hardin, Atlanta, Ga.; "Abnormal Obstetrical Cases Handled Osteopathically," Dr. Heste H. McCaul, Paoli; "Another Case of the Lenon Theory," Dr. M. C. Hardin, Atlanta, Ga.; "Epilepsy," Dr. C. G. Christenson, Boulder; "The Functions of the Spine," Dr. M. C. Hardin, Atlanta, Ga. Officers elected were: President, Dr. John T. Bass, Denver; vice president, Dr. H. Hardoy, Laramie; secretary-treasurer, Dr. Ridley D. Moore, Grand Junction; and Flora H. Bolles, Denver.

Twelfth Annual Meeting of Wisconsin Osteopaths.

The Wisconsin State Osteopathic Association will meet at Appleton on February 31st and 2nd. Dr. Geo. Sill, of Appleton, is president, and Dr. E. W. Smith, of Milwaukee, is secretary. It will be a very interesting and instructive meeting. The subjects will be the Effect of Thought Upon the Physical, and The Osteopathic Treatment of Scoliosis, a subject on which he has specialized from an Osteopathic standpoint. He has been conducting clinics in orthopedic and surgery of the nervous system. This will also be illustrated lecturing on previous and successful cases. His subjects will be: The Effect of Thought Upon the Physical, and the Osteopathic Treatment of Scoliosis, a subject on which he has specialized from an Osteopathic standpoint. He will also conduct clinics in mental and nervous diseases.

The "Practical Psychology" illustrated: A Scientific Mind and Body Health Book, 250 pages. Address the original and official publishers of this book, R. S. Barksdale, 2022 N. 1st St., Chicago, Ill. Contact us for more details.

F. J. Stewart, D. O., M. D.
126 State Street, ChICAGO

Confinement his practice exclusively to venereal and skin diseases, and since the time he joined the osteopathic practitioners of their stubborn cases of syphilis, gonorrhea, gleet, chancre, etc., requiring specific treatment. The profession may fear that the patients, the professional interest of those who refer cases to Dr. Stewart and, as well, the interests of osteopathy itself will receive the most careful consideration at the hands of Dr. Stewart. The "O. P. " is named as a reference for the character, equipment, and professional standing of Dr. Stewart.

Spinal Curvature Apparatus.

Various devices in the form of braces have been introduced to assist in overcoming spinal curvature and other spinal troubles. These have been cumbersome and heavy, so much so as to defeat the object for which they were introduced. Some persons have been allowed to go through life with a deformity that might have been corrected by the use of suitable appliances had they been used. In this connection we call attention to the Spinal Curvature Apparatus of Mr. Fitch, who has been so active in preventing atrophy by disease. It yields only so much support as is necessary to prevent any further change and yet sustains and strengthens the weak parts so gradually to restore them to normal formation and development.

The average weight of the series of braces used in India is only 16 ounces. The adjustable principal feature of this brace is the support of the spine and the fact that the person can hold the brace by the adjective position. The Philo Birt Manufacturing Company, Jamestown, N. Y., will gladly send a book of information about spinal troubles and best method of cure.
Lindley and his father, they treated the boy a few days for pneumonia; then they called Dr. Parish from Decatur and the boy was sent to the hospital he was operated on September 13th and died of tetanus. The boy got worse and worse; then after he was operated on, he was operated again and he died of tetanus. The boy was unconscious for three days, and the mother was in a state of shock.

"Phagocytes," Policemen of the Body, Bear Witness to Osteopathic Primer in March Osteopathic Health

OSTEOPATHIC HEALTH for March has some mighty interesting discussions based on deductions of latest scientific investigations. At the same time, the osteopathic principle disclosed by the discoveries of Prof. Metchnikoff is really remarkable.

The article is entitled "Dis ease" reads like a story in a high grade popular magazine. Once started it is sure to be read to the finish. And its good straight osteopathic doctrine from first to last. It's bound to stimulate appreciation of osteopathy.

In the article "Osteopathy Helps While Osteopathic Health, The Primer," Dr. Spencer is quoted as saying that the publication is best yet.-Dr. J. Allen, Los Angeles, Cal. This Primer reads like a story in a high grade popular magazine. For the first time, it makes the patient and the public understand that the osteopathic Health, The Primer, is the best yet.-Dr. J. Allen, Los Angeles, Cal. When the fever subsided and he was paralysed immediately, the boy got worse and worse; then after he was operated on, he was operated again and he died of tetanus. The boy was unconscious for three days, and the mother was in a state of shock.

The Osteopathic Primer a Big Hit—Brief Comment From the Profession

I have just finished reading your February Osteopathic Primer, "The Osteopathic Primer." I wish to compliment you on the way this work explains osteopathy. I consider it the best piece of field literature it has ever been my pleasure to see. This Primer is so simple, so clear, so complete, so full of the right time for treatments and this discussion makes clear the reason why. You can see that the first edition is not in accordance with science. To the average layman this would seem a queer way of putting it, but it's the right time for treatments and this discussion makes clear the reason why. You can see that the first edition is not in accordance with science. The illustrations are a big aid in making things clear to the Jaymen.-Dr. C. E. Helmer, New York City.

I find Osteopathic Health the very best educator in the field, and it is a good patient-getter also.—Dr. S. M. Kellogg, Rocky Ford, Colo.

I have just received my sample copy of the February Osteopathic Health, "The Osteopathic Primer." It is very good—just what I have been wanting. Send me 100 copies.—Dr. Mary McVay, Topeka, Kan.

Osteopathic Health for February, "The Osteopathic Primer," is the last but one. Please send me 200 copies.—Dr. Robert S. Palmer, New York City.

I believe the February number of Osteopathic Health, "The Osteopathic Primer," is the last but one. I do not think its equal has ever been published.—Dr. A. T. Gibb, Fairbanks, Alaska.

"The Osteopathic Primer" idea, with its short, clear applications of osteopathy to particular conditions, certainly ought to fill a long-felt want. It looks like a winner to me. I must have 200 copies.—Dr. E. P. Beadle, Port Chester, N. Y.

The February number of Osteopathic Health, "The Osteopathic Primer," is a mighty good issue.—Dr. Norman D. Wilson, Manhattan, Kan.

Send me 100 copies of the February Osteopathic Health, "The Osteopathic Primer," for future use, as they are too good to pass up even if I cannot use them then.—Dr. H. H. Somers, Dubuque, Iowa.

Have just finished reading the February number of Osteopathic Health, "The Osteopathic Primer." It surely makes the "best book on osteopathy ever clear.—Dr. James R. Maseley, St. Augustine, Fla.

February Osteopathic Health, "The Osteopathic Primer," just received. It is very good. Send me 100 more right away.—Dr. H. A. Price, Alexandria, La.

The February number of Osteopathic Health, "The Osteopathic Primer," is one of the best yet. Kindly send your humble servant 100 copies. As a matter of fact, I never use them, but every success, Dr. Chas. C. Helmer, Montreal, Que., Canada.

A New Year Card That "Warmed the Cockles of Our Heart"

DEAR DOCTOR BUNTING: My New Year's card to you will look like this:

100 O. H. twelve month.
1,000 O. H. January number.
1,000 H. O. November number.

So you see you are getting more than you asked for, but not half what you should have for those two numbers. The January cover is good enough and as for the text itself—well, just right. Keep right on telling the people what Osteopathy is in your own personal way. While it may seem tiresome to the profession, yet it is just what the people want. I am glad to say I do not need to put out anything to "land" patients, as my work already done is doing that. I have all my time engaged, from 9 to 5. That is enough. But it is such a pleasure to hand out Osteopathic Health and by the corner-stone for some of the other girls and boys, I just can't resist it.

Wishing you all the compliments of the season. I am, yours respectfully, CHARLES W. KARR, D. O., Vancouver, B. C., December 31, 1909.

PERSONAL

Dr. Norman C. Hawes, of Gouverneur, N. Y., was the fortunate holder of a ticket entitling him to a $1,250 prize. The January cover is good enough, too. Just right. Keep on telling the people what Osteopathy is in your own personal way. While it may seem tiresome to the profession, yet it is just what the people want. I am glad to say I do not need to put out anything to "land" patients, as my work already done is doing that. I have all my time engaged, from 9 to 5. That is enough. But it is such a pleasure to hand out Osteopathic Health and by the corner-stone for some of the other girls and boys, I just can't resist it.

Patented April 2, 1907.

THE OSTEOPATHIC PHYSICIAN

1/2-Price! Below Cost!

CRAIG'S SECTIONAL ANATOMY AND CHART

Every Line a Life Size Tricolor Horizontal Section

Originally offered at a low price, this will be cut in half until stock is somewhat reduced.—Remainder of edition will then be sold at list price.—Now is your opportunity. The little Skeleton Chart is most highly commended from the field.—Circulars sent.

DR. ARTHUR STILL CRAIG, 3039 Forest Ave., KANSAS CITY, MO.

Craig's Osteopathic All-Purpose Card System Still the Best

SAVE YOUR BACKS, D. O.'S

while "breaking up" the lumbar spine. You need not lift the legs of that 200-pound patient off the end of the table and swing his feet in mid-air at the cost of your own strength.

The Common Sense Treating Table and Adjustable Swing is still better than ordinary tables for many reasons. Osteopaths are known for strength and bright, strong, durable, movable, comfortable, beautiful, and not an expensive table.

We also have a fine line of wooden tables in mission, royalty, and fancy styles with or without the adjustable swing.

KIRKSVILLE, MO.

The February number of Osteopathic Health, "The Osteopathic Primer," just received. It is very good. Send me 100 more right away.—Dr. H. A. Price, Alexandria, La.

The February number of Osteopathic Health, "The Osteopathic Primer," is one of the best yet. Kindly send your humble servant 100 copies. As a matter of fact, I never use them, but every success, Dr. Chas. C. Helmer, Montreal, Que., Canada.

A New Year Card That "Warmed the Cockles of Our Heart"

DEAR DOCTOR BUNTING: My New Year's card to you will look like this:

100 O. H. twelve month.
1,000 O. H. January number.
1,000 H. O. November number.

So you see you are getting more than you asked for, but not half what you should have for those two numbers. The January cover is good enough and as for the text itself—well, just right. Keep right on telling the people what Osteopathy is in your own personal way. While it may seem tiresome to the profession, yet it is just what the people want. Patented April 2, 1907.
Mrs. Fiske, although in grave danger at one time, is now up and progressing nicely.

Dr. C. A. Williams of Coldwater, Mich., has opened an office at Sturgis, Mich., and will practice Wednesdays and Saturdays.

Dr. Lillian V. Briggs has removed from Oelwein, la., to 3311 Main street, Des Moines, la., and will practice September 5th. She has found the climate change beneficial and expects to spend the winter there.

Dr. A. C. Johnson has removed from LaBelle to Kansas City. Mo., to open a practice there. He is very enthusiastic about the opportunities to educate his son and daughter. She is working as a nurse and says the people will have to be shown.

Mrs. Fiske of Boston is still in the dark as to when she will be able to return to practice. Adorning her office are many trophies of his skill. In upper Canada he is well known for his skill in bringing down wild ducks.

Dr. S. A. Norman of Memphis, Tenn., is enjoying a rapidly growing practice and has enlarged his office building and is considering and examining room.

Dr. H. C. Phelps of Palo Alto, Calif., is giving up his private practice there with a view to taking post graduate work at Kirkville.

Dr. W. B. Edwards of Concordia, Kans., has moved into larger offices in a more central location.

Dr. Clinton E. Archom of New York was a visitor in and attended the dinner at the Hotel Monticello.

Dr. Minnie Schau of St. Louis, Mo., has resumed practice after a year's rest and a trip abroad.

Dr. W. C. Dawes of Bucyrus, Mont., suffered a severe accident. He was struck by a snow plow and was the patient of "Santa." His costume caught fire and his band was badly burned. It is now getting along fine, but he is still unable to practice.

Dr. Ida Moore has removed from Ft. Wayne, Ind., to St. Joseph, Mo., where she will practice with her sister, Dr. Eleanor L. Moore.

Dr. F. A. Whiting, dean of the Pacific College of Osteopathy, Los Angeles, delivered a lecture in that city January 5th, before the American Guild. His subject was, "The Artistic Anatomy of the Head." Dr. C. S. Smith of Des Moines, la., has located at Kansas City, Mo. She has also an office in Lawrence, Kans., where she spends Tuesdays and Fridays.

Dr. Helen Ruth of St. Louis has given up her office in the Carleton building and is directing her time in practice the larger Greenville Building.

Dr. Harry Still of Kirkville was severely hurt in an accident, January 10th. He was thrown from a sled of a Cactus, was thrown from a sled, and sustained a broken hip. The part of "Santa" his costume caught fire and his band was badly burned. It is now getting along fine, but he is still unable to practice.

Dr. J. G. Follett, formerly at Springfield, S. D., is now at Osbome, Kan., and reports a splendid practice and continual improvement. Good! That's what we like to hear.

Dr. S. Martin of Xenia, Ohio, has opened a branch office at Jamestown, Ohio, where he will practice Tuesdays and Wednesdays.

Dr. Bertha A. Buddecke and Dr. Arllyone Orr of St. Louis, attended the "Two Georges," Review Week at Kirkville and report that the time was well spent.

Dr. J. A. Barnett of Rogers, Ark., recently made a big impression in his town by his successful treatment of a typhoid case. The patient was the partner of the minister. The patient died. The minister is still well.

Dr. H. F. Morse of Columbia Valley Bank building, Columbia Valley, was recently stricken with the grippe, but after a few days is much better.

Dr. W. W. Satterlee, from 323-324 Herald building, E. E. Pittsburg, Pa., has moved to 206-307 Herald building, E. E. Pittsburg, Pa., to take charge of office for few months or permanently.

Dr. Charles M. LaRue, formerly of Indianapolis, Ind., and Miss Onida May Shepardson of Louisville, Ky., were married January 5th, at the home of the bride's parents. Dr. LaRue is an osteopathic physician for Kirkville, Mo., where they will make their home.

Dr. Dr. P. K. Norman of Memphis, Tenn., is enjoying practice there with a view to taking post graduate work.

Dr. G. S. Nashor, from Ashburna, Ohio, to Hunter, Ohio.

THE OSTEOPATHIC PHYSICIAN

Dr. J. M. Borman, from 802 D street, to 683 E Allegheny avenue, Kensington, Philadelphia Pa.

Dr. T. Herroder from The Ferguson building, to suite 215 Stevens building, Detroit, Mich.

Dr. W. L. Nichols, from Ashland to Marquam building, Portland, Ore.

Dr. Nannie Johnson, from La Belle to Rolls, Mo., Dr. Charles M. La Rue, from Indianapolis, Ind., to 206 E. Jefferson street, Kirkville, Mo.

Dr. Lillian Briggs, from Oelwein, la., to Jewell, Kans.

Dr. Parker and Hayes, from 708 to 304 N. Y. life building, St. Paul, Minn.

Dr. J. B. Wright, from Salina to Hutchinson, Kans.

Dr. C. C. Stock, from South New York street, to 206 E. Jefferson street, Kirkville, Mo.

Dr. J. C. Goodell, from Covina to Palo Alto, Calif.

Dr. Edw. H. Jones, from Osksdale to Collax, Wash.

Dr. H. R. Morse, from Columbia Valley Bank building, to the new Russell-Plough building, Kentenache, Wash.

DISSOLUTION OF PARTNERSHIP.

Dr. W. F. Harlan and Geo. M. Whedley of Grand Forks, N. D., the former remaining at the old location and the latter removing to Portland, Me., after a month or two of traveling through the south.
