Do You Want the "Doctors' Trust" to Be Able to Force Its Opinions on You?

O YOU want government by political doctors? When doctors disagree so constantly, should your choice be abridged by law, or the ruling of a department or bureau? Do you want your health and hygiene to be regulated by an army of United States inspectors under the direction of a medical bureau?

Do you know that there are five bills before the present Congress which, if passed, could be used, and the concealed purpose of which is to give such powers to a national department or bureau or "officer" of health, and that the political doctors are making the final supreme effort to get one of them passed before the close of the present session?

Do you know that the terms of all of the bills are so subtle that such bureau or department could at any time take action according to its interests or prejudices without specific legislation while the moral effect would be to commit the United States Government to the establishment of a system of medicine, denying to the people the right to determine for themselves the kind of medical treatment they shall employ?

Do you know that William H. Welsh, president of the American Medical Association, told the Senate Committee on Public Health and National Quarantine that the Doctors wanted such a National Department of Health for the purpose of interacting the Constitution could be so interpreted as to give such powers to a national government for the purpose of increasing and the other man's begin. The physician's relations with his fellow men are complex and the place where your rights come in contact, the decision of an ethical problem usually depends on its ethical merits he must take into consideration and carefully weigh his duty to the patient, his duty to physicians of his own or other schools with whom he may be in direct or indirect relation on a case, his duty to the general public, his duty to the profession, his duty to himself; and in some instances his duty to his family. Because of this, hard and fast rules of conduct can be arbitrarily followed cannot be laid down and the decision of an ethical problem usually depends more on the character of the physician than upon his allegiance to a code of rules.

We should all strive to be ethical and if we believe that "with the same measure that ye mete, it shall be measured to you again," ethical relations cease to be so unseemly and altruistic as we are wont to look upon them. I thoroughly believe that when the scales are all balanced, no man will have lost by adherence to ethical principles. The conduct of some professional people whom we meet makes us feel sometimes as if we would like to follow David Harum's Golden Rule "Do unto others as they'd like to do to you and do it fast," but if we stoop to the other fellow's methods, we cannot complain if we are repaid with interest.

This is only fragmentary discussion, but I desire to present a few phases of the subject as they occur to my mind.

The fact is often overlooked that the patient has duties to the physician. When he places his case in the hands of a doctor, he should be prepared to place himself unreservedly in his hands. He should frankly tell everything about himself that may have a bearing on the case and answer fully every question. He should follow all instructions to the letter and if unable to do so, it is but right that he should say so. A young lady suffering from a nervous breakdown, who persists in attending dances and keeping late hours when told to keep her appointments, is putting a handicap on his work and retarding or preventing results. A man suffering with acute indigestion wrongs his physician by persisting in eating sausage for breakfast when he has been told to avoid pork products. The osteopathic physician is wronged and handicapped by the patient who declines a doctor's prescription at the time he is taking treatment.

This is but one thing for us to do when we find that instructions are being disobeyed. A frank talk should be had with the patient, the facts should be plainly laid before him, and if he does not agree with exactly what is told, he must be discharged. There should be no compromise. If you disapprove a patient for

Get Busy on Plans for Trip to San Francisco Convention

T HE importance of making your plans for the convention early and of communicating them to a member of the Transportation Committee cannot be overestimated. In order to provide the best accommodations and to arrange for special parties and entertainment it is absolutely imperative that the wishes of the individual members be known well in advance. Railroad agents have to be consulted and many details attended to. It is not possible for the work to be done can not be commenced until there is some data in hand as to the size of parties to be taken care of. Here a dozen routes are carried by you and the members of the Transportation Committee are anxious to assist you in getting the most for your money whichever way you elect to travel, but if you want your cooperation it is up to you to decide now how you want to go and let the committee know. Osteopaths have been conducted party headed by Dr. H. S. Bunting, which will leave Chicago morning of July 16th via the Burlington Route and Northern Pacific Railway for a tour through Yellowstone Park and the Pacific Northwest in their own Special Pullman sleeping cars. The party will travel through a region replete with fine and varied scenery rich in historic incident, and interesting from an agricultural and industrial viewpoint as well. For many miles the route coincides with that followed by those first great explorers of the Northwestern territory, Lewis and Clarke, and is known as "The Scenic Highway Through The Land of Fortune."

A complete tour of Yellowstone Park will be made. Stops will also be made at Butte, Mont., Spokane, Seattle and Tacoma, Wash., and Portland, Ore., where interesting sight seeing trips have been arranged for. Note: Make early arrangements with your family and join the party. It is a valuable trip through Wonderland and The Land of Fortune.

Trip to Alaska Full of Beauty and Interest

W E coast osteopaths feel that in a sense, we are host to all the fraterinity east of the mountains, this summer, so we are thinking of pleasant things for their entertainment. I think the finest trip possible for a tourist is a run up the inside passage to Alaska, every minute of the day and night in view of snow clad mountains and scenery that rivals Switzerland's best. Seals, whales, icebergs and other "ocean" things; stopping at Ketchikan, Juneau, Wrangle, Sitka and Skagway among other historic points in each, the industries, and the native Siwash in his favorite haunts, with his totem poles and peculiar wares for sale; going by rail over the famous White Horse Pass, the most remarkable engineering feat in the world.

We made the trip in June and words can no longer do justice to the osteopathic men who were ideally clean and comfortable. Our meals, five a day, were of Nebraska corn fed turkey, Rocky Ford melons and abundance of other good things.

Boats make excursion trips out of Seattle every six days from June 17 to Aug. 27, a ten day round trip, $10. Transportation, baths, meals, etc., for $66.00 round trip. Those wanting additional information, dates of sailing, reservations, etc., will gladly answer any inquiry, and see that they are provided with literature and data on the subject. Roberts Wimer Ford, D. O., Alaska Building, Seattle.

Utah Osteopathic Association Wants to Entertain Visitors Enroute to San Francisco

T HE Utah Osteopathic Association hopes that as many of the osteopaths as possible will take the opportunity to make a trip to Salt Lake City, on their way to San Francisco in August.

Those who choose the Rio Grande route because of its beautiful scenery will find it as easy to stop in Salt Lake City, on their way to Pacific, will only need to take an hour's ride down here from Ogden.

There are attractive features in and about Salt Lake City, which we hope to be able to show to a lot of you.

Let us know if you are coming. Very sincerely yours,
Osteopathic Association, Mary E. Gamble, D. O., Pres.; Alice Houghton, D. O., Sec.

Notes on a Trip Over the Rockies Via Denver and Rio Grande Railway

AFTER leaving Denver the first point of interest is Palmer Lake, the crest of the divide between the Platte and Arkansas rivers, a famous cattle watering place. Come the Colorado Springs, a city with a population of 30,000. The D. & R. G. suburban service extends to Manitou Springs and other points near by. A trip may be taken to the celebrated mining camps of Cripple Creek and Victor. Manitou has a population of 2,500; it is the Saratoga of the West and marks the entrance to the Garden of the Gods through Cheyenne Canon and the Cave of the Winds. Here the ascent of Pike's Peak (14,109 feet) can be made by cog road. Passing through Pueblo, the Pittsburg of the West, and great center of smelting and steel manufacture, Colorado Springs, where exciting trips have been arranged for.

Make early arrangements with your family and join the party. It is a valuable trip through Wonderland and The Land of Fortune.

(Continued on page 11.)
Illinois Osteopaths Will Gather at Springfield

THE annual convention of the Illinois Osteopathic Association will be held at Springfield, May 25th and 26th. Headquarters will be at the St. Nicholas Hotel and meetings will be in the Senate Chamber. An attractive program has been prepared and special effort has been made to make the banquet an enjoyable feature. The officers have done their part, it is now up to the rank and file of the association to make the meeting a success by turning out a big crowd. Get out to Springfield and rest assured you will be honored and entertained. The program in part will be as follows:

Don't Forget the Big M. O. A. and M. V. O. A. Meeting at Kirksville in June

THE annual meeting of the Missouri Osteopathic Association and the Mississippi Valley Osteopathic Association will be held at Kirksville, Mo., June 2d, 3d, and 4th. Its a big meeting and splendid entertainment has been arranged for. It will repay any osteopath in the middle West to make a special effort to get there. The program in part is as follows: Thursday June 2d. Address of Welcome Dr. A. T. Still, "Laboratory Diagnosis," by Dr. Alma Kinney, Kansas City, Mo., "Acute Infectious Diseases," by Geo. Laughlin, Kirkville, Mo., How to promote and maintain a big meeting. Friday June 3d. "Emergencies." By Dr. Geo. Still, Kirkville, Mo. "Respiratory Tract," By Dr. W. S. Hibbert, Greenville, "Emergencies of the Lying Chamber," with stereopticon views, by Dr. W. M. Smith, Kirkville, Mo. Saturday June 4th, "The Alimentary Tract." By Dr. H. K. Bennet, California, Kas., "Diseases of the Female Petus," by Dr. Jessie Catlow, Boon, Iowa.

Dr. C. N. Ray Wins His Case in Texas

THE State Board of Medical Examiners must issue a license to Dr. C. N. Ray, the young osteopathic physician, who four months ago instigated and carried on the mandamus against the board following that body's action in refusing him a license, according to the decree of Judge R. H. Buck, of the forty-eighth district court May 10th. The second part of the case was held Monday afternoon.

Dr. Ray based his mandamus petition on two grounds. He claimed he had been admitted to the practice of medicine in the state of Missouri, and that the reciprocity agreement between Texas and Missouri entitled him to practice in this state, and that the single paper upon which the examiners gave him a grade less than required was in fact deserving of a passing grade. The court charged that the board had discriminated against the osteopaths taking the examination, which was held in Cleburne June 22 to 24, 1909.

On the temporary hearing Judge Buck granted a temporary license, but revoked the order on the final hearing. The plaintiff secured a new trial through new evidence.

The evidence showed that only in the subject of gynecology had Dr. Ray failed to make a grade of fifty per cent, the examiners giving him only 42 per cent on the paper, and that his average was 74.04 per cent, less than one per cent lower than the required average of 75 per cent.

Six "regular" physicians of Fort Worth, Drs. R. D. Talbot, R. Chambers, W. C. Durringer, Alden Coffey, Charles O. Hook, Lloyd Pollock and J. C. McCoy, made affidavit that they had examined Dr. Ray's paper on gynecology and comparing his answers with the highest medical authorities, found it worthy of a grade of from 75 to 85 per cent. To have passed the examination with the required average the grade needed only to be 54 per cent.

E. V. Allen, ticket agent for the Santa Fe at Cleburne, made affidavit that on the day of the
Save the Children

MAKE a thorough physical examination of every child who comes to you with any disorder. The first step is to rule out any deformity or curvature of the spine, spinal trouble, or conditions that are really results or symptoms of the real cause. Spinal Troubles. By proper care and treatment 90 per cent of these troubles in childhood and youth can be cured.

Our No. 1 Appliance

with the treatment advised and the exercises recommended, will give speedy relief and a permanent and painless cure in all curable cases, and will assure alleviation and an improvement of the conditions in cases which have passed the curable stage. It is light and comfortable to wear, and supplies grateful support to the parts where it is needed. Children urge its return when off for any reason. If not already fully acquainted with its excellence and effectiveness we wish you to become so at once, Doctor. Let us send you an illustrated copy of "Sheldon Method of Curing Spinal Curvature" and other literature covering these conditions. THE OSTEOPATHIC PHYSICIAN

4

PHILo BURT MFG. CO.,
141 17th St., Jamestown, N.Y., U.S.A.

examination he had seen a number of men whom he supposed were members of the board standing on the platform, and that he had heard one of the number say: "We have cut out all the osteopaths and negroes."

Missouri, with which the state of Texas has a reciprocity agreement in the matter of medical certificates, has two examination boards, one "regular" and the other osteopathic, but both are recognized by the Missouri statutes. The state board of Texas has hitherto recognized the certificates issued by the "regular" board of Missouri, but has refused to grant recognition to the certificates issued by the Missouri osteopathic board.

The case has been stubbornly contested and it is expected that the board, through its attorney, James W. Williams, will immediately give notice of appeal. The firm of Smith, Turner, Bradley and Powell represent the plaintiff.

Indianapolis News Reviews State Board Tangle

THE Indiana law, enacted in 1905, providing that the school of osteopathy, in the practice of medicine, shall be represented on the state board of medical examination and registration, has fallen under the ban of the state board of medical examination and registration in Michigan, and the secretary of the Michigan board has written to Governor Marshall to the effect that as long as the osteopaths are represented on the Indiana board the reciprocity agreement between the two states is in danger of being rescinded. By reciprocal agreements between boards of different states, a license issued in one state is good in another state which has such agreement with the issuing state.

The letter attacking the law followed one attacking Dr. John F. Spaurhurst, of this city, who represents the osteopaths on the Indiana board. The first letter, received by the governor, declared that "the man Spaurhurst was incompetent, and that as long as he remained on the board the reciprocal agreement was in danger. The governor, after receiving for specific charges concerning the incompetency of Dr. Spaurhurst, and the letter announcing the law was received in reply, Dr. Spaurhurst not being mentioned in the second letter. On receipt of this letter the governor dropped the Spaurhurst-osteopathic matter as far as Michigan was concerned, it being demonstrated to him that the Michigan board would be more likely to permit members of the osteopathic profession to practice in that state than the osteopath member of the board.

Questions Are Satisfactory.

As a further means of ascertaining whether the presence of Dr. Spaurhurst on the board was inimical to the welfare of the medical profession in the state, the governor has submitted a number of practicing osteopaths of high standing the list of questions on etiology and hygiene; and that on physiology, prepared by Dr. Spaurhurst for the January examination by the state board, representatives having been made to him that the questions were not up to the standard on which the board ought to insist. Report of the governor's letters of inquiry concerning the questions were uniformly to the effect that from the viewpoint of the osteopathic school, the questions were just as sufficient and perfectly satisfactory. The questions were made the subject of a vigorous debate between Dr. Spaurhurst and the other members of the board in a meeting following the January examination, when the session almost broke up in a pitched battle of words. Report of the discussion among the members reached the governor, who ascertained the cause, and set about to determine whether or not Dr. Spaurhurst was at fault.

The governor has satisfied himself that the assault on Spaurhurst was unwarranted, since his work on the board was satisfactory to the school he represents, and since the school has officially endorsed the work of its representative, he regards the Spaurhurst phase of the state board matter a closed incident.

Another Cause of Dispute.

A second cause of friction among the board members, it is understood, is about to be adjusted satisfactorily to the governor. Some time ago a letter was received by the governor from Dr. W. W. Wishard, of this city, who, as president of the council of the Indiana Medical society, held that Dr. S. G. Smelser, of Richmond, appointed by the governor at the time Dr. Spaurhurst was appointed, was not satisfactory to the regular school. The fact that Dr. Wishard wrote as president of the council is said to have displaced a number of the members of the association of regulars, and it is understood a meeting has been arranged to take the question up.

The governor is planning at this time to call the members of the board into a conference with him in his office, where a number of points concerning practices of the board will be discussed. It is understood the governor objects to the amount of money collected by the members for preparing examination questions and grading manuscripts, and that he has collected for their various board meetings, as reported to him. The conference, as planned, will be entirely friendly.

Dr. M. S. Camfield, of Frankfort, whose commission expired April 23, has thus far failed to file with the governor a recommendation from his school, the Eclectic, for reappointment, although he has been recommended by C. N. Brown, of Swizzle, president of the Association of Eclectics for 1909, and Z. T. Hawkins, of Fairmount, president for 1908.

Governor Asked to Choose.

The executive committee of the association, of which Dr. E. B. Shuman, of Waymanville, is president, has submitted the following list of physicians of the association from which the governor is asked to choose Democrats—Dr. Carl G. Winter, this city; Dr. Morse Harrod, Ft. Wayne; and W. D. McConn, of Monticello; Republicans—Dr. W. P. Best, this city; Dr. Orlando S. Coffin, this city, and Dr. G. Robert Hauss, Sellersburg.

Dr. Camfield has filed with the governor a large number of indorsements of a personal nature from members of the school. It now appears that the governor adheres to his present implied intention of selecting the members of the board to succeed Dr. Camfield and Dr. A. A. Spaurhurst, of Muncie, whose commission also expired April 23, the representative of the eclectics will be selected from the list of Republicans, in order to maintain the equally divided partisan balance on the board. Dr. Spurahurst is the only candidate for appointment by the physio-medical association who has been recommended by the association, although Dr. Clark E. Day, of this city, is an applicant, with a number of personal recommendations. Dr. Spurahurst is a Democrat, and if he is reappointed it will make necessary the selection of a Republican from the regular ranks.

It is not probable, however, that the governor will be able to act on the question until next month—Indiana (Ind.) News, May 12th.

Research Work Versus the Research Institute

A MAN told me lately that at the A. O. A. convention at Put-In-Bay, a fellow got up at one of the meetings and talked 6 cm into subscribing $25,000 as an endowment fund for some sort of investigation, but that only the income should be used. Well, that sounded good to me, as I always like to see others give towards what will help me along, and I was feeling pretty pert until last month; I was up to the city and a lot of the boys filled me in about this matter, I found them all sore. They said all they knew about it was the receipts from the man, and that it was a big box of euphonic titles tacked onto a lot of the boys, they did not think the duties tired 'em out very much.

You fellows' claims that you are going to do the work, according to the way they look at it. Dr. Booth sits on the lid and lets nothing, not even information. He is a sort of close corporation, president, directors, a big bunch of euphonic titles tacked onto a lot of the boys, they did not think the duties tired 'em out very much.

The boys say Turner Hulett is all right, only, instead of seeing our immediate needs, he is looking some 17,000 years into the future. It is a good deal like promising the kingdom of heaven.
New Building of Dr. R. R. Norwood, Mineral Wells, Tex., porches supported by massive concrete pillars. It has eighteen ample rooms, seven of which will be used for treating patients.

It is equipped throughout with electric bell and speaking tube service, all connecting with the main office on the first floor. Steam heat is supplied from the plant in the basement. All of the rooms have connecting toilets and lavatories, and each of the treatment rooms are equipped with operating tables and other accessories besides having enameled walls. The other walls throughout the structure are enameled to the wainscoting. Hot and cold water is always on tap at the stationary enameled combination wash stands and cabinets which are in all the rooms. Sun parlors, reception rooms and wide verandas, screened sleeping porches are all embodied in the general scheme for the comfort and treatment of the patients.

The entire profession may well be proud of this splendid testimonial to the efficiency of osteopathy and we heartily congratulate Dr. Norwood on his success and for this worthy expression of his faith in the practice of osteopathy as an institution and the substantial future ahead of it.

Dr. Norwood informs us that they get many patients in Mineral Wells from all the middle and western states. The practice has increased so rapidly of late that it became necessary to give a little, if thought it would go for such sort of work.

Confidently, I rather got the idea that there was an insurgent party being formed to do something radical. Probably the boys have been reading about Uncle Joe and want to try their hands at insuring a little.—A Pessimist, D. O., in The Western Osteopath for April.
An Interesting and Unusual Case Demonstrating Truth of Osteopathy.

R. L. A. BUMSTEAD, of Delaware, Ohio, reports an interesting case of a man injured in an accident. The man lost his memory and was restored by Dr. Bumstead. The local papers covered the incident, but very unfairly made it appear that the restoration of memory was due to a subsequent fall. Dr. Bumstead's summary of the case follows:

History—Man aged 38, thrown from buggy during last fall. No head injury. 2d. was aligning on curbstone, striking point of chin. Fracture of lower jaw, hemorrhage from mouth, nose, and ears. Loss of memory immediately and total loss of consciousness within an hour. In hospital six weeks, treated by best Columbus and Delaware surgeons who finally pronounced him incurable.

Osteopathic examination seven months following accident.

History—Man improved progressively in all ways, except of course, hearing defective. Inability to extend head and ears. Loss of memory immediately and ability to talk and carry on ordinary conversation, but no memory of things before the accident, perfect memory of things before the accident, poor. Hearing defective. Inability to last for their modesty; even members of the profession

A Four Weeks Postgraduate Summer Course, Los Angeles College of Osteopathy, Aug. 8, to Sept. 3, Inclusive

In response to a general interest manifested, the faculty of Los Angeles College of Osteopathy will conduct a postgraduate summer school for the four weeks following the annual meeting of the American Osteopathic Association at San Francisco.

The work will cover the major studies of medical education, given by the professors of largest successful experience of the osteopathic world in their respective classes.

A postgraduate certificate will be conferred on those who satisfactorily do the work of five or more subjects. The work will be so coordinated as that it will apply, with subsequent work, on the three-year, or postgraduate diploma, as desired. The tuition fee is $75.00, being $15.00 per subject, or proportionately for more or fewer subjects, payable in advance.

The number of matriculants accepted for any one group will be so limited that the best personal instruction may be given. In general these groups will be limited to twenty. But, by reason of the technical character of the instruction, in Physical Diagnosis, Technique, Gynecological Clinics, Obstetrical Clinics and Operative Surgery smaller groups will be formed in these subjects.

When these divisions are filled, in order of application, accompanied by matriculation fee of $50.00, no more matriculants will be received.

In the event a matriculant subsequently finds he cannot attend, the advance fee will not be returned, since such a rule would defeat the purpose of the school.

The plans for this postgraduate course have been carefully matured, to the end that the maximum of service may be rendered its participants in the minimum period. There has never been a time when the conditions for a thoroughly practical and useful postgraduate course have been so favorable. The A. O. A. will bring together a large number of the progressive osteopathic physicians of America;--those who insist in keeping abreast of the firing line of osteopathic science.

The schedule of the college buildings, laboratories and hospital will be at the service of the participants, together with all the clinical and laboratory material that can be utilized.

Incidentally, the occasion will afford a realization of a dream common to most normal and red-blooded residents of the east and middle-west,
THE OSTEOPATHIC PHYSICIAN

Eye.. Dr. T. J. Ruddy and Dr. Marrit M. Ring
Technique, Fitting and Grinding
Glasses.. Dr. M. M. Ring
Practical Osteopathic

X-Ray Technique, Diagnosis and Treatment.. Dr. A. B. Shaw

Outline of Courses.
A more detailed outline of courses and work to be done will be mailed on application. The groups will be limited in number, as stated, according to the amount of personal, individual instruction and laboratory work involved;—for example, Dr. Forbes will conduct one class of twenty members each in techniques and in physical diagnosis. He will conduct another of each, limited to ten members, for which there will be an extra charge of $10.00 each. The operative surgery will be individual work on the cadaver, each participant performing the classic operations, major and minor, under the personal instruction of Dr. Los Angeles College of Osteopathy that they will be not only satisfied but enthusiastic for the skill and instruction received in each department.

For particulars address, Dr. A. B. SHAW,
Sec. Los Angeles College of Osteopathy,
321 So. Hill St., Los Angeles, Calif.

Osteopaths Make Their Limitations
Leon B. Hawes, D. O., Adrian, Mich.

The osteopathic physician last month was good. I am glad the members of the profession are thinking for themselves and telling what they think. It seems certain to me that osteopathy will never come any better than the people who are in active practice and if they all air their views on whatever is of interest it will be mutually helpful.

In regard to the limitations that have been imposed on our practitioners I think in the main they are themselves responsible for them. Many of our people have taken it for granted that there never was any necessity for major surgery and that view has found expression in many or most of our state laws. I am sure it is one of the largest mistakes we have made for I agree with some of our people who have complained that when they had a surgical case they had to call on a member of a school directly opposed to our own and very often to our disadvantage; where, if there had been no limiting clauses in our laws such would not have been the case.

I am satisfied that as a school we are as well prepared for surgical work as any school and to allow such limiting clauses to be put in our laws is, to my mind, a disgrace to our profession and I think the sooner we get them removed the better.

One of last month's contributors speaks about the different things he wants to use in his practice, such as anesthetics, antiseptics, optics, etc. Well, I use an antiseptic I do not consider that I am breaking any kind of law in using such or in prescribing such and I do not think it is being made in the District of Columbia. Some concise information on the extent of osteopathic obstetrical practice would be helpful in pleading our cause and for disproving the fallacious arguments used against us.

We would like to have some brief reports from our readers with practical suggestions, stating something of the work of our staff photographer to be in several places at once. The official snap shot artist is a genius all right, but his work is rendered somewhat less arduous by the fact that every D. O. who takes a group picture with a view to sending it to the O. P. immediately and automatically for the time being becomes the Official Photographer. So send us your pictures and help make the picture gallery full of interesting faces.

Let Us Show Our Friendly Feeling
Frederick W. Woodhull, D. O., Philadelphia.

We have one hundred and twenty licensed osteopaths in Philadelphia and on several occasions during the past few years different ones have met with various afflications such as may come to any human being. In some cases these afflications have not been generally known among members of our profession in for us to show the sympathetic and fraternal spirit which we have one for another, or at least not at the time when most needed.

In thinking the matter over, it occurred to me that we should have some method whereby each member of our County Society could be promptly informed of any serious illness or affliction in our ranks. The idea was favorably received by the members of our society and cards were printed for immediate use, as shown herewith. The wording of the card may be improved later on by other members.

In order that the recipient of many notes of sympathy may not be over-burdened by the unwelcome but numerous calls, it has been suggested that he or she may simply send a note of acknowledgement and thanks to our president or secretary, who will announce the same to our members at next meeting.

If any other osteopathic societies are looking after their members better than the P. C. O. S. is doing, we should be pleased to hear from them. We aim to be at least equal to any in the promotion of the best interests of our members and osteopathy in general.

Women D. O.'s "Snapped" by Our Eagle-Eyed Photographer!

O. D.'s have shown themselves particularly anxious to prove osteopathy of our intrepid staff photographer. Lately he swooped down on old St. Louis and caught a group of prominent lady osteopaths.

From left to right, Dr. Bertha A. Buddecke, Dr. Antwanye Orr, Dr. Ella D. Stell and Dr. Nannie J. Chappell.

D. O.'s and got them all happy. Lest there be any trouble about hats being on straight the wily artists artfully got them posed when they were made in the District of Columbia. Some concise information on the extent of osteopathic obstetrical practice would be helpful in pleading our cause and for disproving the fallacious arguments used against us.

We would like to have some brief reports from our readers with practical suggestions, stating something of the work of our staff photographer to be in several places at once. The official snap shot artist

Should you feel so inclined, it would show a friendly and fraternal spirit to write a few words of sympathy, or to call and leave your card.

Showing these little attentions does us all good and we are rarely forgotten by those to whom they are shown.

QUESTION BOX

In our various contests for legal recognition the M. D.'s have shown themselves particularly anxious to prove osteopathy of our intrepid staff photographer. Lately he swooped down on old St. Louis and caught a group of prominent lady osteopaths.

Showing these little attentions does us all good and we are rarely forgotten by those to whom they are shown.

In our various contests for legal recognition the M. D.'s have shown themselves particularly anxious to prove osteopathy of our intrepid staff photographer. Lately he swooped down on old St. Louis and caught a group of prominent lady osteopaths.

From left to right, Dr. Bertha A. Buddecke, Dr. Antwanye Orr, Dr. Ella D. Stell and Dr. Nannie J. Chappell.

D. O.'s and got them all happy. Lest there be any trouble about hats being on straight the wily artists artfully got them posed when they were made in the District of Columbia. Some concise information on the extent of osteopathic obstetrical practice would be helpful in pleading our cause and for disproving the fallacious arguments used against us.

We would like to have some brief reports from our readers with practical suggestions, stating something of the work of our staff photographer to be in several places at once. The official snap shot artist.

Should you feel so inclined, it would show a friendly and fraternal spirit to write a few words of sympathy, or to call and leave your card.

in addition to the original articles. This is a work that could be well taken up by campus cities. Articles best suited for this purpose should not be burdened with technical details, and should be in easy, simple style, the thing that the most casual reader. The regular educational literature of the profession can then be used to give more complete information.

OSTEOPATHY IN THE DELINEATOR.

The Delineator for May can be used by osteopaths to good advantage. Not because of any scientific discussion of the science, but because the thing that is sickening is education, and the safeguarding of the public, and this realisation will have a great influence in our favor in the future.

The opinions of any man, if sincere, and the result of thought and deliberation, are entitled to respectful consideration. At the same time the certain obligation incurred in the public expression of ideas through the medium of the press. This is, that no matter what their kind or quality, these ideas shall be correct. Even Dr. Dodson cannot be utilized to the utmost.

Says Dr. Dodson Presented Faulty Argument

Martin W. Peck, D. O., Lynn, Mass.

In the January issue of THE OSTEOPATHIC PHYSICIAN, Dr. Wm. A. Dodson in which he discusses the teaching of materia medica in the osteopathic colleges. This article was reprinted in the Kirksey Journal of Osteopathy, in a later issue.

The opinions of any man, if sincere, and the result of thought and deliberation, are entitled to respectful consideration. At the same time the certain obligation incurred in the public expression of ideas through the medium of the press. This is, that no matter what their kind or quality, these ideas shall be correct. Even Dr. Dodson cannot be utilized to the utmost.

GOOD WORK.

Under a co-operative plan of sharing expense by the Chicago Osteopathic Association, a series of articles on osteopathy, by George E. Moran, have been appearing in Sunday editions of the Chicago Inter Ocean. The articles have been extensively copied by exchanges and have undoubtedly been the means of giving osteopathy much additional publicity.

The second part of the article is made up of an explanation or apology for the author and for the States that he does not think it would be well for most osteopaths to do what he is doing, although there is a broad and successful practice of ability or lack of it which makes the exception in his case. The special reasons given for this procedure are as follows; the desire to use anesthetic and antisepsis, to improve course in bacteriology, and to become more proficient in diagnosis, and practice of major surgery. These reasons are all good ones and apply to osteopaths to good advantage. Not because of any scientific discussion of the science, but because the thing that is sickening is education, and the safeguarding of the public, and this realisation will have a great influence in our favor in the future.

The opinions of any man, if sincere, and the result of thought and deliberation, are entitled to respectful consideration. At the same time the certain obligation incurred in the public expression of ideas through the medium of the press. This is, that no matter what their kind or quality, these ideas shall be correct. Even Dr. Dodson cannot be utilized to the utmost.
The Modern Medicine Man
W. A. Blackwell, Chicago.

These are days of great achievement both in Science and Art.

When master minds are busy tearing old-time myths apart,
And solving age-long mysteries of earth and air and sky,
But there's one place where they're delinquent, where they come up rather shy.

To call Medicine a science is a travesty on Art.
Its glory comes from itself and not from part; it is drug administration by the artists who can shade.

The poisons in the dose-book that has reputation made.
It is in the field of Medicine, then, we need the brains.

To keep the Van of Progress moving upward on its way;
For, with all its boasted conquests, one can see but little change.

From the list of sterling remedies within the red man's range.

Doctors get their stock of pepin from the stomach of the hog,
It stimulates digestion, keeps your juices on the jog;
And if, perchance, they realize you have a lazy pump,
They'll give you suprarenin and start it on the pump.

If you're troubled with a gallstone and its hold is getting very vague,
They'll give you some Thyroridae from the thyroid glands of sheep;
And when sensitivity sets in and youthful powers decay—Oophorin and Testinid drive all lassitude away.

Must, taken from the glands of deer, lifts indigestion's load.
And certain other ailments yield to extract of the toad;
The ant, potato beetle, black spider, Spanish fly;
And when senility sets in and youthful powers decay—Podo-nitum.

But these are not a starter—see their *list ad infinitum*.

**It Always Follows** (Precedes? an Osteopathic Opportunity)

Submitted by Franklin Fiske, D. O.,
New York City.

Birds will soon be singing
In the blooming trees.
Onions will be springing
Up, and so will peas.
Soon I will be raking
And gathering potatoes.
Back and knees all aching
With the rachitis.

**The Osteopathic Physician**

Our Duty to the "Other Fellow"

William Smith, M. D., D. O., Kirksville, Mo.

If osteopathy is to live and grow it can only do so by the actions of its practitioners; it is up to them by their treatment of their patients and their conduct, that they will be, none less important, their conduct toward their brother osteopaths as seen by their patients, clinical-tenth of the students of osteopathy come as the result of good work done by osteopaths in their families, and the conduct of such osteopaths is closely observed.

Learning something that understanding can quite the contrary; but experience of over thirty years in various lines of medical work has shown much to me, and one of the main factors in the ultimate result of osteopathy I now wish to point out.

Let me at once blurt out the words that I want to say, and you will understand the pathos-terial side of this question; but as the laymen of this country are now urging mission work to the "heathen" in order to promote the commercial interests of the country, so let me take those words as applied to osteopathic practice as the basis of a "business" talk.

Osteopaths of old, you started in practice you found it an uphill fight; you found the "other fellow," in the town where you started. I think of him as an interloper; he regarded that town as HIS; you were lucky if he did not regard the entire county as his private preserve. He sneered at you covertly; he asserted that you did not come from as good a school as he did; if you came from the same school, you had been a practical guarantee from his Alma Mater of his good character, prove to be a bad lot, and such be known to the school at the time that the report came in—well, that school certainly had my hard feeling for it, because I would like to tell the man who gave me the false report my opinion of him.

In observing all reports come in right, now it is up to me to see that my fellow practitioner gets a square deal from me. I do not propose to hand over to him any of my case. I have a case which is not quite satisfied. If osteopathy needs today is PUBLICITY, we are not working some mysterious form of charity without your knowledge. We are simply acting strictly in accordance with the laws of physiology as taught in every text-book of physiology used in the country.

Were I in practice today the more osteopaths I could get into my neighborhood—provided always that they were of good character and proper training; they would be pleased. Every cure they made would help them, naturally, but that would only be the beginning. If osteopathy was a matter of line directly osteopathy would get the praise. Now, that "other fellow" is an osteopath; he is not acting strictly in accordance with the laws of physiology as taught in every text-book of physiology used in the country.

A few weeks later Dr. So-and-So has a case; he returns the compliment. "Mr. B., I must confess that it would give me pleasure to have Dr. Smith see my case. You see, he has had a little longer experience than I have in active practice." I go, confirm his
diagnosis, suggest one or two little points and the patient realizes that here are two men, practitioners of the same school, each not trying to destroy the other and drive him out of practice, but each to help the other and to build the school of teaching which has given him his means of livelihood. Both those patients now realize that they have not only got one doctor, but that they have two, each willing to give to the other of his knowledge, all for the good of the patient.

Brethren, that is the "business side" of medical practice, osteopathy, the "business side" of the Golden Rule, and following that rule you will find that if you do to others as you would wish them to do to you, it can only result in one way, the advancement of our work and the firmer strengthening of the foundation on which we now stand.

I could tell of a man in this State (Missouri) who boasts that eight other men have tried to establish in his town and he has run them all out! Alas! It is true; he has actually done so. How? Very simply. At first his fees were the regular terms for this section. What we in the old country would call a neighbor came in; he called him a rival; at once cut prices to half; held his cases; the other men could not make a living at the reduced prices, so left. Leaving school after two years' expense without income, he had not the resources to fight a man established three years in practice. At once the fees were raised to their old point. This happened twice, two men who started there were driven out by that plan. When a third came, a very strong hint was given that raising again would not be tolerated—of course, not in as many words, but to that effect. Result, that practitioner who has now been in practice in that town for ten years, and is competent and trusted, is treating patients for 75 cents a treatment, or twelve treatments for $8.00, is even forced to "make a reduction on taking a quantity." Had he only acted to the first man on the lines indicated in the earlier part of what I have written, there would be two men there working in harmony, each making far more money than the one making now; jealousy and heart-burning would have been avoided, sleepless nights scheming out plans for the undoing of the other fellow would have been eliminated.

On the other side of the picture I see a young graduate starting practice in Illinois last year, nearly going to the wall, seeking counsel from his "neighbor," not his "rival" and being tided over, carried along financially to the extent of his office rent till he got his feet on the ground. Now both are there. Will anything make those men other than partners in the advance of osteopathy? I reckon not.

Let us all think less for ourselves and more for the great cause we are working for. Let us realize that in numbers there is strength, that the more good men and women we can get within our band the stronger is our position. Then will osteopathy the sooner become a greater power for good for the health of mankind.

It Finished the Doctor.

A gaunt and haggard Scotchen made his appearance in a country village, and was endeavoring to charm the locals to his side with invitations on his haggis. A shaggy haired man opened the front door of a house and beckoned to the visitor. "Gie us a wee bit lilt just oot here," he said, in an accent which told that he also was from the land of the haggis. "My auld mither's in a creitical conditioon," said the doctor's wife, the noo, and says the pipes may save her life.

Up and down in front of the house marched the braw HiJlander, discoumning music that might well have been incidental to a cat and dog fight. Presently the shaggy haired man came out again.

"Gie us the 'Dead March' noo," he said.

"Is the puir auld lady gone?" questioned the piper.

"Na, na, mon; ye've saved mither," came the reply; "but ye've killed the puir doctor."—Boston Transcript.

Philadelphia College and Infirmary of Osteopathy

THE FIRST AND ONLY OSTEOPATHIC COLLEGE which has complied with all the requirements of the Board of Regents of New York. THE ONLY OSTEOPATHIC COLLEGE which requires all students to pursue a four years' course of eight months each. THE FIRST OSTEOPATHIC COLLEGE which requires all students to show evidence of a preliminary education equivalent to a high school course. EQUIPMENT AND TEACHING FACILITIES unexcelled. HOSPITAL AT 1617 FAIRMOUNT AVE. contains three departments: DISPENSARY, SURGICAL, MATERNITY. Practical work in all these departments assured. THE NEW HARVEY SCHOOL OF ANATOMY will be housed in the College Annex, and a new Anatomical Laboratory is being fitted up for it. A NEW CHEMICAL LABORATORY has just been completed and elaborately equipped. Session of 1910 opens Tuesday, September 27. For Catalogue and further information address the Registrar.

1715 N. Broad Street PHILADELPHIA, PA.
Emergency Surgery, for the General Practitioner. By John M., M. D., (P. Blakiston's Son & Co., Philadelphia. $3.50.)

This book is explained by its sub-title, "for the General Practitioner." It is a book brief enough to take on one's summer vacation, where it might be useful; for, in this age, requiring surgery most frequently confront the general practitioner. Surgery in these days is confined as far as possible to hospitals, where alone it can be carried to the highest degree of perfection. The osteopathic profession having very few hospitals has a very weak hold on surgical practice. In many states it is forbidden by law to practice surgery.

But emergencies may arise at any time or place, and no one is forbidden to save life where ever occasion arises, if he is in any way competent to save, rather than to increase the danger. In one small emergency this book might give assistance that would more than repay its moderate cost. The proper way to fight these unfavorable laws and to establish a favorable opinion of osteopathy in surgery is to be an excellent man in emergencies such as arise in the moving incidents of life. Familiarity breeds contempt. The medical man's familiarity with life, especially seeing the hopeless pessimism in the instrumentality he uses in dealing therewith, has bred the contempt therewith that we have all so frequently seen, and with many of them cleaning in that department, and by all the signs of the times it is soon to come. It is necessary first to realize as possible from foulness that are in, and there we may all help.
Osteopaths of Northern Colorado Hold Session.

The semi-annual meeting of the Northern Colorado Osteopathic Association was held at Greeley, April 17th. There was a good attendance.

Ohio Osteopaths Can Treat Contagious Diseases.

In an opinion rendered April 18th by Attorney-General Deitmer of the Ohio Board of Health, osteopaths are not prohibited under the law from treating contagious diseases. However, they are compelled to make report of any case of the same as any other practitioner.—Cincinnati (Ohio) Enquirer.

Osteopath Commits Suicide.

Dr. E. G. Barton, of Bartlesville, Okla., committed suicide April 8th in his room in the Stewart Hotel. In a note addressed to his wife he attributed his action to her wife's lack of sympathy. The body was shipped to Hillsboro, Ind., for burial.

The ninth annual meeting of the Kansas Osteopathic Association will be held May 24th and 25th at the National Hotel, Topeka. There will be a good program and it is hoped Kansas osteopaths will make the biggest convention in the history of the state association. Railroad fares will be pooled.—G. B. Wolf, D. O., secretary.

Osteopath Wanted at MacMadden Healthatorium.

Bernarr Macfadden is looking for an osteopath to do the work I did. I consider the experience very valuable. The osteopath connected with this healthatorium is not compensated. Anyone interested should contact MacMadden Healthatorium, Chicago.—A. Still Craig, D. O.

Antitoxin Kills a Woman.

Minneapolis, Minn., March 29.—(By Associated Press)—Mrs. Gay E. Smith of this city is dead as the result of being inoculated with antitoxin for diphtheria. She died in convulsions five minutes after the antitoxin had been administered by a physician, Mrs. Smith was visiting Mrs. Benjamin Franklin, Jr., who had been ill. While Mrs. Smith was at an interview in the Franklin residence, the physician was called and pronounced Mrs. Franklin's trouble diphtheria. He inoculated both women.

Antitoxin Causes Death.

A case of death from antitoxin occurred here last November. A family of six boys were exposed to diphtheria case next door, which when discovered by the family doctor caused him to inoculate the whole family, in fact all the children in the block. One little fellow, eight years old, had been vaccinated a short time before and came from his play begging to be given the antitoxin. He died in less than half an hour. There has been no death from diphtheria during the past year—Imogene B. Cooper, D. O., Greenville, Miss.

Dr. J. T. Gilbert is bringing Osteopathy strongly to the front in Paducah, Ky. He recently erected a building for his exclusive professional use. The institution is known as Dr. J. T. Gilbert's Osteopathic Infirmary. There are five treating rooms, offices and reception room. Everything is fitted up in accordance with modern ideas of convenience and elegance, electric lights, hot and cold water and telephone connection with each room. The structure is regarded with pride in Paducah and is a credit to the advanced position Osteopathy has obtained in modern therapies. Dr. Gilbert enjoys a splendid practice and we congratulate him on his success and his progressive spirit.

Iowa Second District Meeting.

The regular semi-annual convention of the Iowa Second District Osteopathic Association was held April 24th, at Davenport, with Pres. Frank L. Bly, of Kirksville, Mo., as chairman. The meeting was conducted in a clinic and gave a lecture on "Rib Lesions." Other numbers included: "Menopause," Dr. J. R. Johnson, of Clinton; "Pulvis Irritation," Dr. Sarah S. Brown, of Davenport; "Dental Diseases," Dr. A. B. Haigh, of Burlington. Officers elected were: President, W. W. Douglass; Vice-president, Miss Effie Bartlett; secretary, Dr. Sarah S. Brown, of Davenport; vice-president, Dr. Elmer Stewart, of Clinton; treasurer, C. A. Hitchcock, of Vinton; member of board of trustees, Dr. S. B. Miller, Cedar Rapids. An informal dinner was held at the Davenport hotel.

The OSDP and the American Medical Association are in direct competition with each other. The LSDP is a society for the advancement of osteopathic principles and the maintenance of professional status. The Osteopathic Association of the State of Pennsylvania is a professional organization of osteopathic physicians, established for the purpose of promoting the professional advancement of the osteopathic profession in Pennsylvania and for the protection and development of osteopathic education. The American Medical Association is a professional organization of physicians, established for the purpose of promoting the professional advancement of the medical profession and for the protection and development of medical education. **District of Columbia Committee Hears Arguments.**

The bill to regulate osteopathy in the District of Columbia was given a hearing by the sub-committee on May 28th and 29th. The arguments were presented by Dr. George M. M. Watson, of Washington; Dr. John D. Thomas, of Washington; Dr. Fred T. gravel, of Philadelphia; Dr. A. E. S. Anderson, of Washington, and the Hon. James T. Lloyd, member of Congress from Maryland. Attorney George H. Shibley also made a rebuttal of arguments offered against the bill. The statements and rebuttal have been put into pamphlet form by the governing council.

---

**Phila. County Meeting.**

The regular meeting of the Philadelphia County Osteopathic Society was held in College Hall, North Broad and Fourth Streets, April 28th. He explained very explicitly our methods of diagnosis and treatment to the audience present.

---

**Osteopathic Gather at Joplin.**

The Southwestern Missouri and Southeastern Kansas Osteopathic Association met in regular session at Joplin, Mo., April 28th. Dr. Lloyd D. Gass, of Joplin, presented a case of valvular heart trouble for examination and discussion, which produced an interesting discussion. Dr. Orren E. Smith, of Kirksville, Mo., was invited to appear before the State Board of Registration in Medicine.-G. W. Groe, D. O., Secretary.

---

**Must Await Result of Trial.**

The appellate division of the supreme court in Brooklyn, April 25th, handed down a decision upholding the convictions of Justice Craig and dismissing the writ of error to the Supreme Court, requiring a writ of habeas corpus. The case is still pending.

---

**There is a growing interest in osteopathy among the American people.**

It is a recognized fact that osteopathy is one of the best cures for the sick and the sick and the sick. It is a service to society. The osteopathic profession is one of the best cures for the sick and the sick.

---

**He Wants a Professional Directory.**

Members of the Osteopathic fraternity, look out! Can't we do something for ourselves? Don't we need a new Directory? Of course, we do. It is time that we started thinking about it. The old Directory was not up-to-date. It is time for a new one. The Directory should be up-to-date. Let us remember that we are building a new Directory. The old Directory was not up-to-date. It is time for a new one. The Directory should be up-to-date. Let us remember that we are building a new Directory.

**DR. ARTHUR STILL CRAIG, 3039 Forest Ave., KANSAS CITY, MO.**

Craig's Osteopathic All-Purpose Card System Still the Best
Nutrition in Anaemias.
Defective or unsuitable food supply is one of the most frequent causes of anaemia. It is clearly manifested that not only must we see that there is an adequate and suitable supply of food, but we must look also for the digestive and assimilative capacities in order to obtain the benefit of the iron which it contains. The digestive secretions in these cases are apt to be defective both in quantity and quality. The gastric mucous membrane is atonic and enfeebled, and digestive and assimilative secretions are at low ebb, sometimes entirely abolished; in other words, absorption is defective, which malnutrition, malassimilation and faulty metabolism are frequent causes of anaemia. It is clearly manifested that it is necessary in any rational treatment of these cases to awaken digestive, absorptive, and generative functions, to increase them to physiological activity. The atomic, enfeebled condition of the digestive mucous membrane must be remedied. The abrogated digestive and assimilative functions must be coaxed into a proper performance of their duty by some which has a direct selective influence upon them. Until this is accomplished, ordinary food, the natural restorative as well as the natural source of iron cannot be utilized. With restored activity of the digestive and assimilative processes, the absorption of iron and food is assured. The stimulant and restorative action upon the digestive system is one of the essential features. The use of Bovinine has been shown in many cases and it is indicated as the only rational remedy to restore the atomic, enfeebled digestive powers, and raise the blood to normal quality. Bovinine, being perfectly preserved arterial blood's blood, must of necessity contain every element of nutrition in the proper proportion. One strong point in its favor is in the treatment of anaemia that it is required hardly any digestion, but is immediately ready for assimilation, thereby giving the stomach absolute rest. —The Bovinine Company.

Myths and Delusions Regarding Osteopathy

He Asked His Doctor
How a Slipped Rib Made an Invalid

A Broadside Against Prevailing Myths Regarding Osteopathy

E VERY osteopath in the country is daily losing patients because people who otherwise come for treatment are obsessed with some foolish, totally false idea concerning the science or its mode and method of treatment. You know it's true, Doctor! Everybody intimately associated with the profession knows that it's true. The practical consideration is how to overcome the condition.

The June number of Osteopathic Health is designed to meet the need for information along this line. Properly used it will do a great deal to wipe out myths and delusions regarding osteopathy in your community. It would be a splendid thing for you if you could place a copy in every home in your community.

Another big feature of the June Osteopathic Health is the story of a slipped rib. It's a dandy! Interesting as a fairy tale and absolutely compels an appreciation of osteopathy. It is a true story and could have been made stronger than it is, but we purposely stated the facts conservatively.

No osteopathic physician can really afford to get along without a piece of osteopathic promotion literature. Deliveries can be made at once; we shall be pleased to have your order.

We are sure you would be much pleased with one.

We can do no more than make the offer, it is up to you to do the accepting. Many have bought many more.

The supply is only limited and whether we get any more will depend on the number of re-
The Consensus of Osteopathic Opinion Supports Our Contention—

That the Stretcher will produce a condition of muscular relaxation more thoroughly distributed and equalized than can be done by hand or other mechanical means. This makes possible the most minute diagnosis of osseous or muscular conditions; correction of lesion or displacement is easier, more definite, more thorough and more permanent; many a vertebral condition has responded under the stretch after successfully resisting all other means of correction. The Stretcher holds the patient in the extended condition under any desired degree of tension for a sufficient period of time to allow Nature to come in and do her reparative work. Osteopathic medicine is infinitely more effective when applied with all osseous, or contracted pressure, removed from nerves, cartilages and articulating surfaces, and no one longer questions the therapeutic value of the simple and thorough stretch. The Stretcher has wrought in cases of curvature, Parrot's disease, rheumatism, lumbago, paralysis, locomotor, asthma, insomnia and deafness, miracles as great as any recorded. It is labor-saving, practice-building and success-assuring; not an adjunct, but a part of your medicine. We are putting more money in its manufacture than ever before. It is handsome in appearance and mechanically perfect, and we give you the benefit of these improvements at even a reduced price. Our sales to physicians double once every two months. We positively guarantee its practicability to any osteopathic physician. When answering this ad see that the Osteopathic Physician gets the credit.

The American School of Osteopathy
KIRKSVILLE, MISSOURI

DR. A. T. STILL, Founder of the Science, President

The largest and foremost Osteopathic College in the world. Fourteen years of successful school work. Number of students exceed seven hundred. This institution teaches genuine Osteopathy—no adjuncts.

Teaching facilities unexcelled. Thoroughly equipped laboratories in all departments. Clinical advantages unlimited. Faculty composed of able and experienced instructors who devote their full time to teaching. Anatomy taught in every term—three professors in charge of this department. Special attention given to dissection and to the study of anatomy in general. New hospital for the use of the school now in operation.
