Council on Education for Public Health Adopted on March 8, 2021

REVIEW FOR ACCREDITATION

OF THE

MPH PROGRAM

AT

AT STILL UNIVERSITY

COUNCIL ON EDUCATION FOR PUBLIC HEALTH

SITE VISIT DATES: October 19-20, 2020

SITE VISIT TEAM:

David Gregorio, PhD, MS – Chair Patrick Maloney, MPAH, CHO, RS

SITE VISIT COORDINATOR: Zeinab Bazzi, MPH

CRITERIA:

Accreditation Criteria for Schools of Public Health & Public Health Programs, amended October 2016

INTRODUCTION

A.T. Still University of Health Sciences (ATSU), a private, non-profit university, is the founding institution of osteopathic medicine, established in 1892 by Andrew Taylor Still. ATSU comprises two campuses (Kirksville, Missouri and Mesa, Arizona) with four schools and two colleges. The four schools include dentistry and oral health (Arizona), health sciences (Arizona), dentistry and oral health (Missouri), and osteopathic medicine (Missouri), and the two colleges include graduate health studies (Missouri) and osteopathic medicine (Missouri).

The university offers a total of 12 doctoral degrees, 11 master's degrees, 16 certificate programs, and two post-professional doctoral degrees. The student body includes 3,857 students. The university employs 760 faculty members and 1,162 staff members. ATSU is regionally accredited by the Higher Learning Commission and the university also responds to specialized accreditors in areas such as athletic training, audiology, occupational therapy, physician assistant, physical therapy, and neuroscience, among others.

The university's public health program admitted its first cohort in 1999 and graduated its first two students in 2003. The MPH program is housed in the College of Graduate Health Studies, in the Department of Public Health. The program offers two MPH concentrations, both fully-distance based; the generalist concentration currently enrolls 157 students and the dental concentration enrolls 94 students.

The program's initial accreditation review in 2014 resulted in an accreditation term of five years. The program has completed interim reporting, based on annual report submissions, in 2017, 2018, and 2019. The Council accepted all interim reports. Due to COVID-19-related restrictions on travel and gatherings, this site visit was conducted via distance technology, with all attendees participating via the Zoom platform with video. The distance-based visit will be followed by an on-campus visit when it is safe to do so, within one year of the accreditation decision resulting from this visit.

| Instructional Matrix - Degrees and Concentrations | | | | | | | |

A1. ORGANIZATION & ADMINISTRATIVE PROCESSES

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|-------------------------|------------------|
| | Met | | | |
| Designates appropriate committees or individuals for decision making, implementation Faculty have opportunities for input in all of the following: degree requirements curriculum design student assessment policies & processes admissions policies & decisions faculty recruitment & promotion research & service activities Ensures all faculty regularly interact with colleagues & are engaged in | | The program is led by a department chair who reports directly to the college's dean. Organizationally, the program operates comparably to the other five programs under the leadership of the dean. The program maintains a committee structure (curriculum, accreditation, research, faculty affairs) guided by program faculty with input from other stakeholder groups including alumni, students, and staff. The program's descriptions in the self-study of committee responsibilities indicate that faculty have ample input regarding the program's degree requirements, curriculum, student assessment, faculty recruitment and promotion, research, and service. Influence by the program on admissions decisions, by contrast, is somewhat limited as admissions decisions are centralized within the College of | | |
| ways that benefit the instructional program | | Graduate Health Studies. The MPH Curriculum Committee is responsible for developing, writing, reviewing, and editing degree requirements regarding the program's curriculum. The program director serves as the committee chair, and members include all full-time faculty, and one representative each representing adjunct faculty, community stakeholders, students, and alumni. The committee meets monthly to review the curriculum to ensure currency and alignment of learning objectives and competencies. Before implementation, all proposed | | |

| course revisions must be approved by a majority of MPH | |
|--|--|
| Curriculum Committee members through a vote. Faculty, | |
| during the site visit, affirmed their involvement in defining | |
| the program's curriculum. | |
| | |
| The Accreditation Committee is responsible for ensuring | |
| that the curriculum aligns with CEPH requirements. Like | |
| the MPH Curriculum Committee, the program director | |
| serves as the committee chair, and members include all | |
| full-time faculty, and an adjunct, community, student, and | |
| alumni representative. | |
| | |
| The Research Committee advises the dean on aspects of | |
| the program's research activities and includes all full-time | |
| faculty and some adjunct faculty members. The | |
| department chair works with each individual faculty | |
| member to determine how much time the faculty member | |
| plans to spend on research and service in the coming | |
| academic year. The Research Committee identifies new | |
| projects/collaborations for student involvement. The | |
| Research Committee has also undertaken a reexamination | |
| of the curriculum to consider how methods may be further | |
| embedded within the curriculum. | |
| | |
| The Faculty Hiring Committee oversees the hiring of | |
| adjunct and full-time faculty. This committee consists of | |
| the department chair, one full-time faculty member from | |
| the MPH general concentration, one full-time faculty | |
| member from the MPH dental concentration, and the | |
| practicum coordinator. For a full-time faculty hire, all full- | |
| time faculty are invited to participate in the interview | |
| process after the committee identifies candidates meeting | |
| the necessary criteria and qualifications. | |
| | |

| The College of Graduate Health Studies establishes | |
|--|--|
| admissions requirements and reviews applications to the | |
| program. The college's Admissions Office consults with | |
| program leaders in cases of uncertainty. As part of the | |
| application process, candidates are required to complete | |
| an essay regarding their interest and background relevant | |
| to public health. Public health faculty review the essay for | |
| evidence of critical thinking and good writing. Decisions by | |
| the College of Graduate Health Studies are final. | |
| | |
| The self-study notes that some public health faculty | |
| participate in institutional committees such as the Benefits | |
| Committee and the Student Scholarship Committee. | |
| | |
| In addition to the committee meetings mentioned above, | |
| faculty meet twice a month for department meetings. The | |
| program provided several transcriptions of meeting | |
| minutes that show evidence of faculty interaction. | |
| Although some adjunct faculty have been present at public | |
| health faculty meetings, the program noted that engaging | |
| adjunct faculty is difficult due to their varying geographic | |
| locations and other responsibilities. | |
| | |
| During the site visit, the program faculty expressed their | |
| support and confidence in the program chair and dean, | |
| who they say actively encourage their input in program | |
| decision making. | |
| | |

A2. MULTI-PARTNER SCHOOLS & PROGRAMS

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--------------------|-----------------------|--|-------------------------|------------------|
| | Not Applicable | | | |

A3. STUDENT ENGAGEMENT

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|---|---|
| | Met with Cor | nmentary | | |
| Students have formal methods to participate in policy making & decision making | | Student representatives sit on the MPH Curriculum Committee and the CEPH Accreditation Committee. Over the last three years, two student representatives have served on each committee and have voting rights on the | Student engagement in decision- making committees has been increasing over time. The program has been more diligently identifying | The Council appreciates the program's response regarding student engagement in decision making. |
| Students engaged as members on decision-making bodies, where appropriate | | committees. However, the program shared that student participation on these committees is "neither consistent, nor abundant." The commentary relates to limited student engagement in decision-making activities. The self-study acknowledges that "enticing [students] to spend additional time outside of classwork has not been as effective as hoped" and that engaging students with program faculty and other stakeholders is a challenge. | students early in their MPH program who are interested in providing feedback. The PH program chair works with the academic advisor to identify interested students. A welcome letter sent to students when they are accepted into the MPH program encourages them to contact their advisor if they are interested in participating in decision-making committees. Students are also invited to join the MPH Facebook Student and Alumni group. This group has been | |
| | | | identified as an additional opportunity to reach interested students. As such, opportunities to | |

| participate in decision making- bodies will be posted on the Facebook group page. | |
|---|--|
| | |

A4. AUTONOMY FOR SCHOOLS OF PUBLIC HEALTH

| Criterion Elements | Compliance | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--------------------|----------------|--|-------------------------|------------------|
| | Finding | | | |
| | Not Applicable | | | |
| | | | | |

A5. DEGREE OFFERINGS IN SCHOOLS OF PUBLIC HEALTH

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--------------------|-----------------------|--|-------------------------|------------------|
| | Not Applicable | | | |

B1. GUIDING STATEMENTS

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|---|---|-------------------------------------|
| | Met | | | |
| Defines a vision, mission statement, goals, statement of values | | The program articulates a vision "to be a leader in educating and empowering a diverse student population to promote health and reduce disparities in | goal was added and approved by the | |
| Taken as a whole, guiding statements address instruction, scholarship, service | | underrepresented communities locally and globally." The program's vision is consistent with the ATSU Board of | committees. The goal is as follows: To prepare graduates that have | information that warrants a finding |

| Taken as a whole, guiding | Trustees' 15-year vision, which focuses on being "th | e and ability to apply, the public | team's finding of met with |
|--------------------------------------|---|------------------------------------|----------------------------|
| statements define plans to 1) | preeminent university for health professions." | health competencies attained | _ |
| advance the field of public health & | | through the MPH curriculum. | |
| 2) promote student success | The program defines a three-part mission: "to prepare | a | |
| | diverse population of public health professionals for | r Attainment of this goal will be | |
| Guiding statements reflect | careers in public health; to inspire a commitment t | o measurable from data collected | |
| aspirations & respond to needs of | lifelong learning; and to strengthen and diversify th | e with the graduate and alumni | |
| intended service area(s) | public health workforce by providing opportunities to nor | - surveys as per the response to | |
| Guiding statements sufficiently | traditional students through innovative distance learning | " section B4. | |
| specific to rationally allocate | Site visitors found that these guiding statement | S | |
| resources & guide evaluation of | appropriately reflect the respective missions of ATSU an | d | |
| outcomes | the College of Graduate Health Studies. | | |
| | | | |
| | The program has identified four goals: | | |
| | Recruit and retain diverse and qualified students | | |
| | Enhance student education through best practice | S | |
| | of online education | | |
| | Sustain qualified faculty and staff | | |
| | Create opportunities for public health research | h | |
| | and service | | |
| | | | |
| | The program has adopted six values: leadership, integrit | | |
| | scholarship, diversity, interprofessional education, an | | |
| | innovation. These values underscore how and why publ | | |
| | health education occurs at ATSU. | | |
| | Reviewers noted that a goal statement that explicit | | |
| | identifies the intended outcome of an ATSU MPH degre | | |
| | would be valuable in directing future program growth an | | |
| | development. Such a program goal would be importan | | |
| | for example, in guiding selection of evaluation metrics t | | |
| | determine the effectiveness of the curriculum. Moreove | | |
| | such a goal would provide important insight for | | |
| | such a goal would provide important insight it | // | |

| | prospective students as to what the program is preparing graduates to be. | |
|--|---|--|
| | | |

B2. GRADUATION RATES

| degree. The program reports the following graduation rates: 2014-15: 77% 2015-16: 64% 2016-17: 64% Students in the 2015-16 cohort and all more recent cohorts still have attrition rates that are low enough to potentially meet the minimum threshold of 70%. Although the official maximum time to graduation for MPH students is five years, the program (and college) allows students to continue in the degree program for longer than five years. For example, nine students from the 2015-16 cohort are | Click here to enter text. | |
|---|--|---|
| | 2014-15: 77% 2015-16: 64% 2016-17: 64% | degree. The program reports the following graduation rates: 2014-15: 77% 2015-16: 64% 2016-17: 64% Students in the 2015-16 cohort and all more recent cohorts still have attrition rates that are low enough to potentially meet the minimum threshold of 70%. Although the official maximum time to graduation for MPH students is five years, the program (and college) allows students to continue in the degree program for longer than five years. For example, nine students from the 2015-16 cohort are |

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|---|--|
| | Partially Met | | | |
| Collects, analyzes & presents data on graduates' employment or enrollment in further education post-graduation for each public health degree offered | | through an alumni survey. For the 2016-17 cohort, 84% of students with known outcomes (n=13) were employed or continuing education; 91% of students with known outcomes (n=12) were employed or continuing education in 2017-18, and 87% of students with known outcomes (n=24) were employed or continuing education in 2018-19. Of the 2016-17 cohort, 76% of graduates (54 individuals) had an unknown outcome; 83% of the 2017-18 graduates (69 individuals) had unknown outcomes; and 56% of the 2018-19 graduates (31 individuals) had unknown outcomes. The concern relates to the high rates of alumni with unknown post-graduation outcomes. The program does not know the post-graduation outcomes of most of its graduates. | As noted in the self-study, the PH program has modified the method of delivery, added incentives, and changed the survey reminder notification process. The response rate has increased significantly due | The Council appreciates the program's response regarding plans to improve data collection. |
| Chooses methods explicitly designed to minimize number of students with unknown outcomes | | | to these modifications. We will continue to monitor this progress and adapt as necessary. In addition, | |
| Achieves rates of at least 80% employment or enrollment in further education for each public health degree | | | we will inform our students about the survey and its role in our accreditation half-way through their program, and again at the time of their graduate exit survey. These announcements will let the students know to expect the survey and that completion of the survey will not only help us improve our program, but will also aid our accreditation process. | |
| | | The program collects information through a survey and has struggled with low survey response rates. The program has implemented changes to increase survey responses and to track students more effectively. For example, in 2020, the program moved the alumni survey to the same platform as the graduate survey so that alumni would be more familiar with the format; public health alumni now receive the survey separately from alumni from other | | |

| programs; and the program follows up with the graduates | |
|---|--|
| | |
| who do not respond to the survey. In addition to receiving | |
| a two-week reminder if they have not yet completed the | |
| survey, the program follows up with students individually | |
| via phone at 12 months post-graduation. The program has | |
| also begun to offer a drawing for two Amazon gift cards as | |
| an incentive to encourage graduates to be responsive. | |
| Since these changes were implemented in summer 2020, | |
| the program has begun to see higher rates of known | |
| outcomes. | |
| | |
| Additionally, to improve the response rates, the program | |
| is making modifications to the method of delivering the | |
| survey. The alumni survey of the 2017-2018 graduates | |
| originated with the return email address of CGHS's data | |
| analyst, a person that the students would not be familiar | |
| with. The alumni survey of the 2018-2019 graduates, | |
| which will launch in fall 2020, will appear to originate from | |
| the public health department chair. | |

B4. ALUMNI PERCEPTIONS OF CURRICULAR EFFECTIVENESS

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|------------------------------------|-----------------------|--|--------------------------------------|------------------------------|
| | Partially Met | | | |
| | | | | |
| Defines qualitative &/or | | The program historically collected data regarding alumni | Changes have been made to address | |
| quantitative methods designed to | | perceptions of the curriculum through the alumni survey | this concern. Both the graduate exit | program's response regarding |
| provide meaningful, useful | | sent out every summer. The survey asked alumni whether | survey and alumni survey have been | improvements to alumni data |
| information on alumni perceptions | | the overall curriculum prepared them for their career but | amended and now include | collection practices. |
| Documents & regularly examines its | | did not ask about competency attainment specifically. At | questions directly related to degree | |
| methodology & outcomes to ensure | | the time of the site visit, the program was in the process | of competency attainment | |
| useful data | | of developing a new alumni survey, and the first | (graduate exit survey) and degree of | |

| Data address alumni perceptions of | administration will be to 2018-19 graduates at the end of competency application in the | |
|---|--|--|
| success in achieving competencies | fall 2020. The new survey will ask alumni to rate how well workplace (alumni survey). Surveys | |
| Data address alumni perceptions of usefulness of defined competencies in post-graduation placements | prepared they feel regarding larger skill sets such as critical thinking, interprofessional collaboration, and cultural proficiency with examples of individual skills within each larger skill set. In the previous iteration of the survey, which did not ask competency specific questions, 92% of respondents from 2012 14 to 2017 18 answered that the pregram propared | |
| | 2013-14 to 2017-18 answered that the program prepared them for their professional career, and about 48% of alumni received advancements, bonuses, or promotions as a direct result of obtaining their MPH.Scale (1-5). Competencies will be categorized based on CEPH thoroughly analyzed upon collection. | |
| | The concern relates to the absence of data addressing alumni perceptions of success in achieving the competencies and applying competencies in the workplace. | |

B5. DEFINING EVALUATION PRACTICES

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|---|---|
| | Met with Com | imentary | | |
| Defines sufficiently specific & appropriate evaluation measures. Measures & data allow reviewers to track progress in achieving goals & to assess progress in advancing the field of public health & promoting student success | | The program's evaluation plan includes three measures for the goal related to students, four measures for the goal related to instruction, four measures for the goal related to faculty and staff, and six measures for the goal related to research and service. | Based on feedback and measurability, the mission has been revised and approved by the CEPH and Curriculum Committees. The updated mission is: ATSU's MPH Program is committed to educating | Council appreciates the responses from the program and the university president regarding its revised mission statement. Since the revised mission statement does not include the aspects that gave rise to the team's concerns about |

| Defines plan that is ongoing, | For example, in support of its goal to recruit and retain | culturally diverse public health | measurability, the response |
|--------------------------------------|--|---------------------------------------|---|
| systematic & well-documented. | diverse and gualified students, the program monitors the | professionals who demonstrate | addresses the area of |
| Plan defines sufficiently specific & | number of students recruited from under-represented | strong ethical standards, are | noncompliance identified in the |
| appropriate methods, from data | minorities. The program also tracks data regarding student | • | team's report. The Council acted to |
| collection through review. | retention and graduation rates. | dedicated to social justice, advocate | change the team's finding of |
| Processes have clearly defined | | for the under-represented, and | partially met to a finding of met with |
| responsible parties & cycles for | In support of its goal to enhance education through best | advance social equity to improve the | commentary. |
| review | practices of online education, the program monitors the | health of the communities they | connentary. |
| | number of Quality Matters (QM)-certified courses and | serve. | The commentary relates to the need |
| | data pertaining thereto. The information communicated | Evaluation of this mission will | for the program to ensure that its |
| | to the program director is used in periodic faculty reviews | | evaluation measures fully capture all |
| | and by the Curriculum Committee to evaluate program | include competency attainment, as | aspects of the revised mission |
| | courses and their content. | well as assessments and student and | statement. The program's response |
| | | course surveys. Further in depth | to the team's report indicates that |
| | In support of its goal to sustain qualified faculty and staff, | evaluation will include the number | the program will track the revised |
| | the program tracks the number doctorally-trained full- | of students that participate in | mission through "assessments and |
| | time and adjunct faculty, as well as faculty participation in | service activities and our annual | student and course surveys." The |
| | professional development activities. The program also | "MPH Day of Service" (post COVID), | Council infers that this statement |
| | monitors the number of community projects program | graduate and alumni surveys, focus | refers only to the revised aspects of |
| | faculty participate in each year, which is monitored by the | groups, and Delta Omega Honor | the program's mission and expects |
| | department chair who is responsible for collecting the | Society service activities. | that the program will also continue |
| | data. | | tracking measures in place at the |
| | | | time of the site visit, such as faculty |
| | The self-study identifies several student-focused | | participation in professional |
| | procedures for program evaluation (e.g., self-evaluation at | | development activities, faculty |
| | the start of the program, midterm evaluation of course | | participation in community projects, |
| | instructors, end-of-course evaluations) that indirectly | | etc. |
| | align with program evaluation practices. | | |
| | | | |
| | The concern relates to the opportunity to clarify the ways | | |
| | in which the program intends to track its progress against | | |
| | certain aspects of the mission, namely 'preparing, inspiring | | |
| | or providing opportunities for public health careers. | | |
| | During the site visit, program leaders and faculty | | |

| acknowledged the need for more explicit measures to assess this aspect of the mission and noted that the program is currently redesigning their evaluation plan and assessment processes through a review process. | |
|---|--|
| | |

B6. USE OF EVALUATION DATA

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|---|-------------------------|------------------|
| | Met | | | |
| Engages in regular, substantive review of all evaluation findings, including strategic discussions. Translates evaluation findings into programmatic plans & changes. Provides specific examples of changes based on evaluation findings (including those in B2-B5, E3-E5, F1, G1, H1-H2, etc.) | | The self-study describes a recurring process for updating the curriculum, in which all courses are reviewed every three years by the MPH Curriculum Committee. During the site visit, reviewers learned that the program's online learning model has shifted over time toward more experiential learning opportunities for the adult learners who enroll in the program. Such changes to the curriculum emphasize presentations and mock tabletop exercises. Assessment of curriculum effectiveness relies heavily on students' end-of-course survey responses and course grading. The MPH Curriculum Committee reviews the data and provides suggestions for improvement to the instructional designer and subject matter expert; after the course is revised, the committee re-assesses the syllabus to ensure that all areas of concern were addressed. For example, the program redeveloped the BIOS 7000 course, which has been revised three times over the previous five years to address to student concerns. The concerns were related to the textbook that was assigned and the | | |

| structure of assessments. The textbook has been replaced, and the course addresses SPSS with new assignments. |
|---|
| Another example of a change based on evaluation data relates to student retention. The program's problematic graduation rates led it to adopt a more assertive advising style, as described by program faculty. Students now receive routine wellness checks to maintain better connection with the program, which allows faculty to closely monitor students, specifically those more at-risk of withdrawing. |

C1. FISCAL RESOURCES

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|---|-------------------------|------------------|
| | Met | | | |
| Financial resources currently adequate to fulfill stated mission & goals & sustain degree offerings Financial support appears sufficiently stable at time of site visit | | Site visitors determined that the program's financial resources are currently adequate to fulfill its stated mission and goals and to sustain its degree offerings. The program follows the university's operating procedures for requesting, securing, and using fiscal resources. The budget development process spans a six-month timeframe and requires input from all schools, departments, deans, and vice presidents. Budget managers begin by submitting budget requests for new positions, new programs, and initiatives, and prioritization is given to accreditation, mission and vision, and strategic initiative fulfillment. | | |
| | | revenue to be self-supporting and to cover its portion of | | |

| required university support (overhead) expenses. | |
|---|--|
| Operating costs are funded primarily through tuition and | |
| fee revenue, which produce approximately 90% of | |
| budgeted revenue. The remaining 10% of operating | |
| revenue is from investment income, operating leases, | |
| auxiliary enterprises, and clinical services. | |
| | |
| Expenditures on faculty and staff salaries (with fringe | |
| benefits), miscellaneous operating expenses, | |
| memberships and dues, and travel were approximately | |
| \$1.1 million for the 2019 fiscal year. Tuition revenue | |
| during this period was \$2.9 million. | |
| | |
| Public health faculty salaries are paid from tuition | |
| revenue. If a faculty member receives a research grant that | |
| covers a portion of his/her salary, the salary savings are | |
| reinvested into the department through the annual | |
| budget process. For research grants, 25% of the indirect | |
| costs are allocated for general department expenditures | |
| such as purchasing equipment and supplies. The | |
| remaining 75% of the indirect cost is applied to meet the | |
| | |
| university's cost of maintaining and administering | |
| programs and facilities. | |
| The Office of Sponsored Programs offers an internal grant | |
| for faculty that is university funded, for travel to | |
| | |
| professional conferences or meetings. | |
| The department chair can request additional funding up to | |
| \$5,000 from the dean, and these funds are added to the | |
| next fiscal year when expenses are submitted by the dean | |
| to the university. For funds exceeding \$5,000, the | |
| department chair must send a request during the budget | |
| | |
| cycle (fall of each year). For example, a request for a new | |

| faculty member would be submitted during this process. The request is reviewed by the college dean, then by the senior vice president for academic affairs, and the final decision is made by the university president. The program does not directly fund student support; the university offers four partial scholarships, each offering an award to one student per school or college every academic year, and program students are eligible for these. Students can apply to an endowment fund that reimburses the cost of the CPH exam. The endowment also covers the lifetime dues for Delta Omega graduate inductes. Since the funding from the endowment is limited, the chapter plans to begin fundraising to cover dues through the chapter instead of the fund. Fundraising will also allow the chapter intseed of the fund. Fundraising will also allow the chapter it os sponsor a student to travel to the APHA conference. During the site visit, faculty and staff did not express any concerns related to fiscal resources. Faculty shared that | |

| | | program. | | |

| | At the time of the site visit, program faculty noted that | |
|--|---|--|
| | staffing and personnel resources were adequate to | |
| | support administrative and education functions. | |

C4. PHYSICAL RESOURCES

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|-------------------------|------------------|
| | Met | · | | |
| Physical resources adequate to fulfill mission & goals & support degree programs Physical resources appear sufficiently stable | | The program has adequate physical resources to fulfill its mission and goals. The program is offered fully online, and faculty work remotely. The program's administrative offices are housed on ATSU's Missouri campus, which include office space for administrative support personnel, instructional designers, and the academic advisor. Students in the dental program are residential at both campuses and have access to university shared spaces. ASTU's commitment to online resources is further discussed in Criterion C5. | | |

C5. INFORMATION AND TECHNOLOGY RESOURCES

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|-------------------------------------|-----------------------|--|-------------------------|------------------|
| | Met | | | |
| Adequate library resources, | | As an online program, adequate online resources, | | |
| including personnel, for students & | | specifically library resources, are essential and a main | | |
| faculty | | priority for the program and the college. The self-study | | |

| Adequate IT resources, including | describes a robust online library program, ATSMlib, which | |
|----------------------------------|--|--|
| tech assistance for students & | includes complete library and multimedia resources that | |
| faculty | include evidence-based resources and services needed to | |
| | support student studies and faculty teaching and research. | |
| Library & IT resources appear | Faculty and students can access ATSMlib through a single | |
| sufficiently stable | search engine, OneSearch, that houses all the resources in | |
| | the library system. | |
| | The library's collection includes an abundance of resources | |
| | specific to areas of public health including evidence-based | |
| | interventions, measurement instrument resources, special | |
| | population resources, and environmental science and | |
| | toxicology, among others. Direct link research resources | |
| | include PubMed, Ovid Technologies, EBSCO-CINAHL, | |
| | Theme Electronic Book Library, and ProQuest dissertations | |
| | and theses. An online librarian provides exclusive service | |
| | to the online community. | |
| | ATSMLib also provides a full range of mediated services, | |
| | including training and assistance in subject searching; | |
| | strong document delivery and interlibrary loan services; | |
| | and one-on-one, small-group, classroom training in | |
| | effective use of ATSMLib's resources and collections; as | |
| | well as web-based research tutorials. A weekly research tip | |
| | email keeps online students connected with library | |
| | services and the online librarian. The library also provides | |
| | library resources and support for ATSU alumni and | |
| | preceptors via special websites providing access to select | |
| | evidence-based resources and library services including | |
| | free documents. | |
| | During the site visit, faculty and staff praised ATSU's | |
| | commitment to IT providing the necessary IT resources and | |
| | noted that they have access to all the resources required | |

| | | to deliver quality distance education. Students also praised the 24/7 help desk for its commitment to helping them troubleshoot technological issues at any point in time. | | |
|--|--|--|--|--|
|--|--|--|--|--|

D1. MPH & DRPH FOUNDATIONAL PUBLIC HEALTH KNOWLEDGE

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|---|-------------------------|------------------|
| | Met | • | | |
| Ensures grounding in foundational public health knowledge through appropriate methods (see worksheet for detail) | | The program ensures that students are grounded in foundational public health knowledge primarily through PUBH 5000: Introduction to Public Health Concepts for generalist students and PUBH 5050: Introduction to Dental Public Health for dental public health students. Reviewers were able to validate coverage of all learning | | |
| | | objectives through course syllabi, as shown in the D1 worksheet. | | |

D1 Worksheet

| Foundational Knowledge | Yes/CNV |
|--|---------|
| 1. Explain public health history, philosophy & values | Yes |
| 2. Identify the core functions of public health & the 10 Essential Services | Yes |
| 3. Explain the role of quantitative & qualitative methods & sciences in describing & assessing a population's health | Yes |
| 4. List major causes & trends of morbidity & mortality in the US or other community relevant to the school or program | Yes |
| 5. Discuss the science of primary, secondary & tertiary prevention in population health, including health promotion, screening, etc. | Yes |
| 6. Explain the critical importance of evidence in advancing public health knowledge | Yes |
| 7. Explain effects of environmental factors on a population's health | Yes |
| 8. Explain biological & genetic factors that affect a population's health | Yes |
| 9. Explain behavioral & psychological factors that affect a population's health | Yes |
| 10. Explain the social, political & economic determinants of health & how they contribute to population health & health inequities | Yes |
| 11. Explain how globalization affects global burdens of disease | Yes |
| 12. Explain an ecological perspective on the connections among human health, animal health & ecosystem health (eg, One Health) | Yes |

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|--|---|---|
| | Met | | | |
| Assesses all MPH students, at least once, on their abilities to demonstrate each foundational competency (see worksheet for detail) | | The program addresses the 22 foundational competencies through core and concentration courses. The program has eight core courses that all students take in addition to six courses per concentration. All students also complete a public health practicum. The program maps the 22 foundational competencies to a mix of core courses and concentration courses for each of the two concentrations offered. The core courses address community health, environmental health, biostatistics, epidemiology, health policy and politics, and program development, among others. Students in the joint MPH programs complete all required courses. The concern relates to reviewers' inability to validate an appropriate assessment for competency 16. The assessment asks students to reflect on leadership style rather than applying leadership principles by developing their own strategies or approaches to a given scenario. | This issues has been resolved: Competency 16, in EPID6100- Epidemiology, Module 9. Leadership During Crisis Announcement. You are the lead epidemiologist for your state public health department. Based on what you have learned in this course, make a 5 minute video press release on Zoom (posting the link in the discussion board). The target audience is the constituents of a community of your choice – be sure to identify the community by name. In the press release, explain the vision of your epidemiology department, explain how your department fosters collaboration (name collaborative partners), and how your department helps guide the decision-making of our government agencies and decision makers. Be sure to include the principles of leadership, governance, and | The Council acknowledges the program's response concerning the updating of an assessment to address foundational competency 16. Based on the information provided, the Council was able to validate compliance with this criterion. Therefore, the Council acted to change the team's finding of partially met to a finding of met. |

D2. MPH FOUNDATIONAL COMPETENCIES

| | management in your press release relative to your department. See Attachment A. | |
|--|--|--|
| | Competency 16 is also present in multiple courses. Please let us know if further examples are requested. | |

D2 Worksheet

| MPH Foundational Competencies | Yes/CNV |
|--|---------|
| 1. Apply epidemiological methods to the breadth of settings & situations in public health practice | Yes |
| 2. Select quantitative & qualitative data collection methods appropriate for a given public health context | Yes |
| 3. Analyze quantitative & qualitative data using biostatistics, informatics, computer-based programming & software, as appropriate | Yes |
| 4. Interpret results of data analysis for public health research, policy or practice | Yes |
| 5. Compare the organization, structure & function of health care, public health & regulatory systems across national & international settings | Yes |
| 6. Discuss the means by which structural bias, social inequities & racism undermine health & create challenges to achieving health equity at organizational, community & | Yes |
| societal levels | |
| 7. Assess population needs, assets & capacities that affect communities' health | Yes |
| 8. Apply awareness of cultural values & practices to the design or implementation of public health policies or programs | Yes |
| 9. Design a population-based policy, program, project or intervention | Yes |
| 10. Explain basic principles & tools of budget & resource management | Yes |
| 11. Select methods to evaluate public health programs | Yes |
| 12. Discuss multiple dimensions of the policy-making process, including the roles of ethics & evidence | Yes |
| 13. Propose strategies to identify stakeholders & build coalitions & partnerships for influencing public health outcomes | Yes |
| 14. Advocate for political, social or economic policies & programs that will improve health in diverse populations | Yes |
| 15. Evaluate policies for their impact on public health & health equity | Yes |
| 16. Apply principles of leadership, governance & management, which include creating a vision, empowering others, fostering collaboration & guiding decision making | Yes |
| 17. Apply negotiation & mediation skills to address organizational or community challenges | Yes |
| 18. Select communication strategies for different audiences & sectors | Yes |
| 19. Communicate audience-appropriate public health content, both in writing & through oral presentation | Yes |
| 20. Describe the importance of cultural competence in communicating public health content | Yes |
| 21. Perform effectively on interprofessional teams | Yes |
| 22. Apply systems thinking tools to a public health issue | Yes |

D3. DRPH FOUNDATIONAL COMPETENCIES

| Criterion Elements | ComplianceTeam's Evidence for Compliance FindingFinding | School/Program Response | Council Comments |
|--------------------|---|-------------------------|------------------|
| | Not Applicable | | |

D4. MPH & DRPH CONCENTRATION COMPETENCIES

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|--|---|---|
| | Met | | | |
| Defines at least five distinct competencies for each concentration or generalist degree in MPH & DrPH. Competencies articulate an appropriate depth or enhancement beyond foundational competencies Assesses all students at least once on their ability to demonstrate each concentration competency If applicable, covers & assesses defined competencies for a specific credential (eg, CHES, MCHES) | N/A | The program's two concentrations each have five distinct concentration competencies that are appropriate for the degree. The concentrations' competencies are mapped to five concentration-specific courses. The concern relates to concentration competency three in the dental concentration, in which the assessment opportunity overlaps with that of foundational competency 22. The description of the specific assessment of this competency, "apply systems thinking tools to compare the U.S. oral healthcare system to the oral healthcare system in a country of your choice," is identical to the assessment of foundational competency 22. The program was not able to demonstrate that students achieve a higher level of performance through the concentration-specific assessment. | This issue has been resolved: Competency 3, in MPHD3- SHMG6000: Global Health, Module 1. M1 Discussion. Select a single health condition or disease and take a stance on the following: Is health better in developing countries or developed countries? Evaluate and apply evidence to address individual and population health issues. In response to your peers, state why you agree or disagree with their post and provide evidence to support your stance. See Attachment B. | address dental concentration competency 3. Based on the information provided, the Council was able to validate compliance with this criterion. Therefore, the Council acted to change the team's finding of partially met to a finding of met. |
| | | | Competency MPHD-3 is also present in multiple courses. Please let us | |

| | know if additional examples are requested. | |
|--|--|--|
| | | |

D4 Worksheet

| MPH Generalist Concentration Competencies | Comp statement acceptable as written? Yes/No | Comp taught and assessed? Yes/CNV |
|--|--|---|
| 1. Analyze significance of public health journal articles. | Yes | Yes |
| 2. Use theory, principles, and perspectives to analyze ethical dimensions of public health problems. | Yes | Yes |
| 3. Apply health behavior models to address public health problems. | Yes | Yes |
| 4. Demonstrate approaches to assess, prevent, and control environmental and/or occupational health hazards. | Yes | Yes |
| 5. Evaluate organizational structures, culture, and political factors to initiate and sustain organizational change. | Yes | Yes |

| MPH Dental Concentration Competencies | Comp statement acceptable as written? Yes/No | Comp taught and assessed? Yes/CNV |
|---|--|---|
| 1. Integrate social determinants of health into dental public health practice. | Yes | Yes |
| 2. Demonstrate ethical decision-making in the practice of dental public health. | Yes | Yes |
| 3. Apply and evaluate evidence to address oral health issues for individuals and populations. | Yes | Yes |
| 4. Lead collaborations on oral and public health issues. | Yes | Yes |
| 5. Evaluate systems of care that impact oral health. | Yes | Yes |

D5. MPH APPLIED PRACTICE EXPERIENCES

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|-------------------------|------------------|
| | Met | | | |
| All MPH students produce at least 2 work products that are meaningful to an organization in appropriate applied practice settings Qualified individuals assess each work product & determine whether it demonstrates attainment of competencies All students demonstrate at least 5 competencies, at least 3 of which are foundational | | Students are required to complete a 180-hour planned, supervised, competency-based, and evaluated applied practice experience (APE). After identifying and receiving program approval of a site and preceptor, students work collaboratively with their site preceptors and the practicum coordinator (full-time faculty member) to complete the APE learning agreement. After the learning agreement is approved by the practicum coordinator, it is signed by the student and site preceptor and submitted online. This document requires a project description as well as a list of each product to be created (minimum of two), a list of primary tasks required in the creation of each product, and a list of competencies each product will | | |
| | | demonstrate (minimum of five total, three of which must be foundational). In addition, students must keep a time sheet of all hours spent on the APE. To assess the APE for each MPH student, the practicum coordinator, a second MPH faculty member, and the site preceptor evaluate products for successful demonstration of the competencies stated in the learning contract. If the quality of the products is insufficiently developed, the faculty and preceptor give the student feedback and guidance on how to improve them. Similarly, if a minimum of five competencies are not demonstrated, the student is required to improve or expand the products or generate additional products for the site. Once the products are acceptable, based on the judgment of the two faculty | | |

| members, the student must upload them into Canvas, where they are formally approved. | |
|---|--|
| The program has developed templates for students to follow to ensure that they address all requirements. In | |
| addition, the forms set benchmarks that keep students on | |
| track for pre-, mid-, and post-review of APE projects. The program also provides video introductions to give students | |
| additional guidance on selecting and confirming APE projects. | |
| The self-study notes that as an online program, students | |
| have an expanded wealth of potential APE locations and | |
| sites. The self-study also acknowledges that some students feel stressed to identify sites on their own. The program | |
| continuously evaluates and refines its process and | |
| procedures, including continued development of specific | |
| and detailed instructional/informational guides. | |
| The current curriculum, including these APE requirements, | |
| went into effect in fall 2019. The program was able to | |
| provide three completed APE samples from students in the general concentration and two samples from students | |
| in the dental concentration. Reviewers were impressed | |
| with the quality of work products in the samples and noted | |
| the evident value to community sites. | |
| Some examples of practicum sites include the County of | |
| San Luis Obispo Health Agency, Victim Intervention | |
| Program/Rape Crisis Centre at Parkland Hospital, and the Kern County Public Health Department. The student | |
| samples of work products included a series of education | |
| PowerPoints for a public health agency's community | |
| courses, an infographic on identifying fall risks for an | |

| organization's website, informational handouts, a trivia quiz and fact sheet for victims of rape and sexual assault, and a recommendation report for a health center to improve quality of health care services. | |
|--|--|
| During the site visit team's discussions with faculty and students, reviewers were able to validate adequate and appropriate supervision and assessment of APE work products. Faculty, staff, and students noted that students have been successful in identifying public health related practicum sites that meet program needs. | |

|------------------------------------|---|--|
| validates demonstration & | responsible for overall coordination of the experience. | |
| synthesis of specific competencies | | |
| | After the student and the student's assigned faculty | |
| | advisor agree on the type of final written document to be | |
| | developed and the specific competencies to be | |
| | demonstrated, students complete the ILE final document | |
| | agreement form and submit it via Canvas; the faculty | |
| | advisor and practicum coordinator must formally approve | |
| | it. The final version of the ILE can take the form of a project | |
| | report, research paper, program evaluation, grant | |
| | application, policy brief/analysis, training manual, or | |
| | curricular resource, among other options. The faculty | |
| | advisor and a second MPH faculty member review the | |
| | document. Reviewers use a rubric for grading to ensure | |
| | standardization in assessment of the ILE products. | |
| | The updated curriculum, including the ILE requirements, | |
| | went into effect in fall 2019; therefore, no students had | |
| | completed the ILE at the time of the site visit, but some | |
| | students were in the process of completing their ILE. The | |
| | site visit team was able to verify the ILE requirements | |
| | through review of the ILE rubric and detailed ILE guidelines | |
| | document. | |
| | During the site visit, students' comments indicated their | |
| | reliance on and appreciation of faculty support throughout | |
| | the ILE project, stating "I don't think I could have | |
| | attempted my ILE without the advice I received." | |

| Instructional methods support regular & substantive interaction between & among students & the instructor Curriculum is guided by clearly articulated learning outcomes that are rigorously evaluated | | The program is offered solely in an online format. Online instruction primarily occurs asynchronously, with some exceptions. In PUBH7500: Development of Community Based Programs, students are required to prepare a presentation for their peers that is followed by a question and answer session. In the biostatistics course, instructors often hold synchronous mentoring sessions for groups of | Click here to enter text. | |
| Curriculum is subject to the same quality control processes as other degree programs in the university Curriculum includes planned & | | students. All courses are delivered using the Canvas LMS. The online MPH program is well-suited to working professionals and non-traditional students. The program also allows students in ATSU's dental and osteopathic | | |
| evaluated learning experiences that are responsive to the needs of online learners | | medicine programs to pursue public health degrees in an effort to develop perspectives that will be beneficial to these students' future patients and communities. The | | |
| Provides necessary administrative, information technology & student/faculty support services | | program supports regular and substantive interaction between and among students and faculty through video conferences and virtual gatherings as well as weekly | | |
| Ongoing effort to evaluate academic effectiveness & make program improvements | | discussion board posts and similar interactions. | | |

Processes in place to confirm student identity & to notify students of privacy rights and of any projected charges associated with identity verification The program provides administrative support, IT, and student support through numerous mechanisms at the university level. The ITS helpdesk is the central point of contact for issues concerning technology; support staff work with students to resolve technology problems and answer questions. In-house technicians are available to assist during business hours, and an outsourced call center assists with issues during evenings, weekends, and holidays. The university portal allows students to access all online resources, such as career services, the university writing center, counseling services, enrollment services, ITS, student affairs, among others. Students reported general satisfaction with institutional supports (e.g., IT, library, counseling, etc.) related to their curriculum. Academic advisors serve as the main point of contact for students and are familiar with all university services (e.g., university writing center, financial aid, and the university ESL services) to direct students Academic rigor of the MPH degree is primarily addressed through a review process that each course goes through every three years, at which point the associate dean for academics and assessment summarizes grade distribution, student feedback, and overall Carnegie unit content for the MPH Curriculum Committee to review. The MPH program verifies student identity through various mechanisms throughout a student's engagement with the university. Each student is provided with a unique student login identification and password. This is the only mechanism by which students access student services and online courses. As students communicate with university admissions, registration, and payment departments,

| | personally identifiable information is used to verify student identity. | |

E1. FACULTY ALIGNMENT WITH DEGREES OFFERED

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|--|---------------------------|------------------|
| | Met | | | |
| Faculty teach & supervise students in areas of knowledge with which they are thoroughly familiar & qualified by the totality of their education & experience Faculty education & experience is appropriate for the degree level (eg, bachelor's, master's) & nature of program (eg, research, practice) | | The program's curriculum is delivered by six full-time and 27 adjunct faculty. All full-time faculty hold terminal degrees in disciplines of dentistry and/or public health. Nearly all hold American Board of Dental Public Health (ABDPH) or Certified in Public Health (CPH) credentials. Program faculty have academic training and experience in health policy, health services, epidemiology, behavioral sciences, and clinical dental practice. Dental public health faculty are required to have a dental degree (DDS or DMD). Adjunct faculty who support the dental concentration are working in public health and possess a dental degree and/or a PhD. Many of these adjunct faculty also have an MPH, and four are board certified in dental public health. All but three of the adjunct faculty supporting the MPH general concentration have doctoral degrees; two of these supporting faculty members have MPH degrees, and one is in the dissertation stage of a doctorate in health education. | Click here to enter text. | |

E2. INTEGRATION OF FACULTY WITH PRACTICE EXPERIENCE

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|-------------------------|------------------|
| | Met | | | |
| Employs faculty who have professional experience in settings outside of academia & have demonstrated competence in public health practice Encourages faculty to maintain ongoing practice links with public health agencies, especially at state & local levels Regularly involves practitioners in instruction through variety of methods & types of affiliation | | The program faculty have a broad variety of experiences in public health practice and settings outside academia. Primary faculty have practice experience in areas including epidemiology and emergency preparedness and have worked in community health centers as clinicians, directors, and program planners. One faculty member also has leadership experience in health care ethics as an ethics advisor for the Donor Network of Arizona. Faculty members also include a former state dental director (Wisconsin); a former chief of the Bureau of Epidemiology and state epidemiologist (Delaware); and a dental officer in the US Army Dental Command who retired as a colonel and served as the chief of the dental branch of TRICARE, where he also served as a consultant to the US surgeon general, US Army surgeon general, and assistant secretary of defense for health affairs on issues pertinent to dental public health. The program's adjunct faculty also have diverse public health experience. Four adjunct faculty founded their own business or charity, including a public charity dedicated to improving outcomes of underrepresented elementary school children through elimination of food and medical insecurity; a consulting firm to elicit change, improve quality outcomes and deliverables, human resource | | |
| | | assessment, development and training, grant writing, new program development, and curriculum revision; and a | | |

| consulting firm in social media and promotion of health | |
|--|--|
| literacy and overall wellness, particularly in minority and | |
| disadvantaged populations. Other adjunct professional | |
| roles include the CEO of two rehab hospitals and the | |
| director of oral health at the Texas Health Institute. | |
| | |
| Faculty members have public health experience across | |
| five continents, particularly in the countries of Cambodia, | |
| Costa Rica, Finland, Germany, Greece, Honduras, India, | |
| Italy, Nigeria, Panama, South Korea, and Vietnam. They | |
| have also worked with a variety of underserved | |
| populations within the United States, including Asian, | |
| Black, Creole, Hispanic, Puerto Rican, physically and | |
| developmentally disabled, homeless, low-income, recent | |
| immigrants, Indigenous, and LGBTQ. For example, a | |
| faculty member currently works as a research associate | |
| for the Center of American Indian Community Health at | |
| the University of Kansas Medical Center. | |
| | |
| During the site visit, reviewers were able to validate that | |
| faculty establish practice links with state and local public | |
| health agencies. However, faculty noted that as a | |
| primarily online program, establishing these linkages is | |
| challenging. | |

E3. FACULTY INSTRUCTIONAL EFFECTIVENESS

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|---|-------------------------|------------------|
| | Met | | | |
| Systems in place to document that all faculty are current in areas of instructional responsibility Systems in place to document that all faculty are current in pedagogical methods Establishes & consistently applies procedures for evaluating faculty competence & performance in instruction Supports professional development & advancement in instructional effectiveness for all faculty | | The program's full-time faculty are required to complete and commit to an annual faculty development plan. Adjunct faculty are required to update professional records twice a year. ATSU provides access to a range of presentations on professional development in instructional effectiveness. New faculty must complete a faculty orientation course that provides them with an overview of the university and college missions and priorities. During the orientation, faculty are also provided with an overview of different pedagogies and theories on instructional effectiveness and student engagement, among other relevant topics. The program has several procedures to evaluate faculty instructional effectiveness. For example, the department chair reviews course instruction at least once, and often several times, during an academic block (equivalent to a quarter term). In addition to periodic checking, the department chair gets a report at the end of each week and at the end of each course. The report includes degree of participation in discussions, excerpts from those discussions, whether weekly discussions were posted in a timely fashion, whether grades for each module were posted in a timely fashion, and excerpts from student evaluations pertinent to the instructor's performance, including whether the instructor was courteous and gave useful feedback. | | |

| | |
|--|--|
| The program also evaluates instructional effectiveness by | |
| conducting annual evaluations for full-time faculty and | |
| quarterly evaluations for adjunct faculty and by reviewing | |
| student evaluations. Questions in the student evaluation | |
| for each course include assessment of the amount and | |
| quality of instructor-learner interaction as well as | |
| whether the instructor was able to demonstrate above- | |
| average knowledge of the subject. | |
| | |
| The university uses Quality Matters (QM) for continuous | |
| improvement of online course design and delivery. The | |
| QM subscription allows the college to facilitate the | |
| Applying the QM Rubric (APPQMR) workshop, which all | |
| full-time and adjunct faculty are encouraged to complete. | |
| The subscription provides access to the fully annotated | |
| QM higher education rubric and delivers discounts on | |
| other professional development courses and workshops. | |
| In addition to the QM subscription, the college absorbs | |
| the cost for the APPQMR course for all full-time and | |
| adjunct faculty. Several of the program's leaders and | |
| faculty are certified. The ATSU Learning Center also offers | |
| workshops and seminars throughout the year. | |
| workshops and seminars throughout the year. | |
| Full-time faculty receive \$2,500 per year for professional | |
| development-related activities (e.g., travel, registration, | |
| | |
| books, software). Additionally, the university offers all | |
| full-time and adjunct faculty a 50% discount on tuition for | |
| all courses in any ATSU program. | |
| Charlen to and a second section of a second sector in the least of the second s | |
| Student and peer evaluations play a vital role in decisions | |
| about faculty advancement. In promotion to the rank of | |
| associate professor, the candidate must exhibit teaching | |
| effectiveness as evidenced through student and peer | |
| evaluations, and development of new educational | |

| | T | |
|---|---|--|
| programs or teaching materials. In promotion to the rank | | |
| of professor, the candidate must exhibit ongoing | | |
| innovation in teaching resulting in improved student | | |
| outcomes. | | |
| | | |
| The program tracks three indicators related to faculty | | |
| instructional quality. In the category of faculty currency, | | |
| the program uses QM as a resource for external review. | | |
| At the time of the site visit, three courses had achieved | | |
| QM certification, and the department intends to have two | | |
| to three courses certified each year going forward. | | |
| | | |
| In the category of faculty instructional technique, student | | |
| satisfaction with instructional quality is assessed through | | |
| the end-of-course evaluations. Evaluations ask several | | |
| faculty assessment questions related to faculty | | |
| knowledge of subject area, faculty feedback to students, | | |
| added value, and course discussions. Data from the past | | |
| | | |
| three years show that the average satisfaction score for | | |
| each area was 4.5 or higher out of a maximum of 5. | | |
| In the estension of measure level entermore the measurement | | |
| In the category of program-level outcomes, the program | | |
| began requiring grading rubrics for all courses in 2015. | | |
| Students are introduced to rubrics in the orientation | | |
| course and reminded of their purpose in the welcome | | |
| videoconference held at the beginning of each term. The | | |
| program encourages faculty to put feedback directly into | | |
| the rubric to remind students to check for the rubric while | | |
| completing any assignment. | | |

E4. FACULTY SCHOLARSHIP

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|--|-------------------------|------------------|
| | Met | | | |
| Policies & practices in place to support faculty involvement in scholarly activities Faculty are involved in research & scholarly activity, whether funded or unfunded Type & extent of faculty research aligns with mission & types of degrees offered | | The program identifies faculty research as essential to its mission. All full-time public health faculty are expected to contribute to research to some degree. Depending on each faculty member's interests, expertise, and overall departmental objectives, annual assignments include 10%-60% of time dedicated to research and scholarly activities. Starting in 2013, the department reduced faculty loads from three courses per term to two courses, to provide faculty more time to develop their research. | | |
| Faculty integrate their own experiences with scholarly activities into instructional activities | | Full-time faculty status is only granted to those who perform research and scholarly activities. | | |
| Students have opportunities for involvement in faculty research & scholarly activities | | The program's dedication to research is consistent with the broader university's expectations; thus, faculty have access to an abundance of resources. Some of these university resources include financial support for scholarly activities such as attending conferences and creating, publishing, and disseminating newsletters and other research-related publications, documents, and materials. The university also funds salaries of research faculty and staff and provides funding for initial research project development through competitive internal grants. In addition, the university manages several intramural funding programs for faculty and students such as the ATSU Strategic Research Fund, which provides seed money to support small studies to collect pilot data. The Department of Sponsored Programs also provides staff support to public health faculty and students through | | |

| funding, statistical support, and support in development | |
|---|--|
| and submission of manuscripts. | |
| | |
| The college's Research Webinars Initiative, sponsored by | |
| the Department of Public Health, has become a | |
| university-wide resource since 2014. These webinars help | |
| faculty keep abreast of developments in the field of public | |
| health, share knowledge gained from their ongoing | |
| research activities, and network with outside speakers. | |
| research detwices, and network with outside speakers. | |
| The self-study notes several examples of faculty-initiated | |
| research projects on subjects such as low-birth-weight | |
| deliveries, vaccine hesitancy, and geographical | |
| dimensions of oral health. The self-study also notes | |
| several examples of extramurally funded projects (case | |
| | |
| studies of community interventions, funded by CDC), | |
| training awards (oral health workforce training, funded by | |
| HRSA), and community-based projects (Connecting Kids | |
| and Health Information, a collaboration with YMCA). | |
| | |
| The program focuses on integrating faculty research with | |
| the public health curriculum, and there has been a | |
| consistent effort to incorporate principles of research | |
| design and execution within program courses. In 2013, | |
| the MPH Research Committee developed a rationale and | |
| set of guidelines to assist faculty members in integrating | |
| research into their courses. The underlying premise is that | |
| research must be integrated into the classroom to provide | |
| students with valuable tools for their careers in applied | |
| public health practice. | |
| | |
| Faculty encourage students to participate in their | |
| research and to pursue research of their own. One | |
| student turned her completed practicum into a research | |
| staatent tarried her completed practically into a rescurer | |

| project with support from a faculty member. She studied | |
|--|--|
| the oral health needs of 76 female jail inmates in Phoenix, | |
| presented her findings at the APHA annual meeting, and | |
| won first prize among students at the National Oral Health | |
| Conference. Another example is a group of faculty | |
| members who are working on developing a proposal for a | |
| federal grant for their research on improving mind, body, | |
| and spiritual wellness through cultural connections. The | |
| group is currently looking to have an MPH student join | |
| their team to develop a diabetes intervention for the | |
| program. | |
| | |
| The program has identified four outcome measures to | |
| track its success related to faculty research and scholarly | |
| activities: 1) number of professional presentations by full- | |
| time faculty, 2) number of peer-reviewed publications | |
| submitted by faculty, 3) number of publications by faculty | |
| accepted, and 4) percentage of full-time faculty who are | |
| participating in research and scholarly activities. All | |
| targets for each outcome measure were met or exceeded | |
| for each of the last three years. For example, the program | |
| set a target of three professional presentations by faculty | |
| each year, and the outcomes for the past three years have | |
| been 21 (2016-17), 17 (2017-18), and five (2018-19). | |

E5. FACULTY EXTRAMURAL SERVICE

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|---------------------------|------------------|
| | Met | | | |
| Defines expectations for faculty extramural service Faculty are actively engaged with the community through communication, consultation, provision of technical assistance & other means | | The program has a strong commitment to faculty extramural service. This commitment is reflected in the program's guiding statements, faculty handbook, and annual professional development reviews for faculty, and is a core intuitional value addressing leadership in community health and social responsibility. The college offers faculty members an annual stipend of \$2,500 for faculty development. These funds may be used for professional membership dues and travel to and from professional meetings and conferences. Faculty are encouraged to pursue leadership positions within their professional organizations. The university and college provide rewards for participation in meaningful activities for these organizations. These rewards include advances in faculty rank, awards for service, and time to participate in these activities. The program noted that since public health faculty are dispersed across the United States, faculty have a unique opportunity to develop service-related public health activities across the country and to participate in many different ongoing public health activities at multiple levels of public health. Faculty members serve on community boards, review journal articles, serve as members of community-based committees, and volunteer their time for community service to improve health. | Click here to enter text. | |

| The program outlines numerous examples of community and professional activity by faculty and staff in the self- study. For example, in 2013, the dean of the college met with and formed a partnership among the university's public health faculty and 16 local county health departments composing the Northeast Missouri County Healthcare Group, also known as Troop B. After the Troop B partnership was formed, this gave students the opportunity to focus their health communications campaign projects on the 16 counties involved in the partnership. This also led to the redesign of the environmental health course to focus on these populations, and students designed campaigns to bused by each of the counties. The redesigned course began in Fall 2020 and in 2021, and the course wile pressessed based on how accessible the materiak are for use in Troop B. Faculty have also participated in service to organizations such as the Susan G. Komen Breast Cancer Foundation, Day for Special Smiles, Smiles Beyond Bars, Coconino Humane Association, and Flagstaff Family Food Center. All faculty members belong to professional organizations appropriate for their specialismics, including the American Public Health Association (PAHA). Societ or Public Health Education (SDPHE). National Rural Health Association, Center for Public Health Dentistry (AAPHD). Association of Military Surgeons of the United States, Society for Epidemiology, among others. Many have served in leadership roles in these organizations and have received awards for their services of the United States, Society for Epidemiology, among others. Many have served in leadership. | | |
|---|--|--|
| study, For example, in 2013, the dean of the college met with and formed a partnership among the university's public health faculty and 16 local county health departments composing the Northeast Missouri County Health Acter Group, also known as Troop 8. After the Troop 8 B partnership was formed, this gave students the opportunity to focus their health communications campaign projects on the 16 counties involved in the partnership. This also led to the redesign of the environmental health course to focus on these oppolutions, and students designed campaigns to be used by each of the courties. The redesigned course began in Fail 2020 and in 2021, and the course will be reassesed based on how accessible the materials are for use in Troop 8. | | have received awards for their service and leadership. | |
| | | |

| Faculty members bring these experiences into the | |
|---|--|
| classroom as they design the curriculum and individual | |
| courses. Faculty members observe asynchronous student | |
| discussion forums daily and participate frequently to help | |
| stimulate and focus discussions. Through these online | |
| conversations, faculty share their experiences to provide | |
| context for the discussion topic. For instance, one faculty | |
| member uses his experience as a member of the ASTDD | |
| to connect students with the organization, and two dental | |
| public health residents developed white papers for the | |
| ASTDD for their practicum projects in 2018-19; both | |
| papers were published on the ASTDD website. Another | |
| faculty member is stationed at Travis Air Force Base and | |
| discusses the coronavirus quarantine order on base and | |
| perceptions of military families living in on-base housing | |
| during the quarantine with students; she has also helped | |
| students learn to track the coronavirus outbreak as it | |
| occurs in real time. | |
| | |
| The program has chosen three indicators that provide | |
| meaningful information related to service, including | |
| percent of full-time faculty participating in extramural | |
| service, number of community-based projects, and | |
| public/private or cross-sector partnerships for | |
| engagement and service. Although faculty are not | |
| required to participate in service, they recognize that it is | |
| required for promotion; thus, 100% of faculty have | |
| participated in extramural service each year over the last | |
| three years. | |
| | |
| Reviewers noted the program's strong commitment to | |
| service. During the site visit, faculty expressed that the | |
| \$2,500 annual funding has been adequate for professional | |
| and related activities, though the current COVID | |

| | pandemic has limited opportunities for attending many | |
|--|---|--|
| | professional conferences and related events. | |
| | | |

F1. COMMUNITY INVOLVEMENT IN SCHOOL/PROGRAM EVALUATION & ASSESSMENT

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|--|---|---|
| | Partially Met | | | |
| Engages with community stakeholders, alumni, employers & other relevant community partners. Does not exclusively use data from supervisors of student practice experiences Ensures that constituents provide regular feedback on all of these: • student outcomes • curriculum • overall planning processes • self-study process Defines methods designed to provide useful information & regularly examines methods Regularly reviews findings from constituent feedback | | The program solicits feedback from community members through the Curriculum and CEPH Committees. The Curriculum Committee has three community members and an alumnus, and the CEPH Committee has two community members and an alumnus. These members provide the program with feedback and have voting rights. Based on a review of meeting minutes, site visitors confirmed that community partners and the alumni representative have provided feedback about the vision, mission, values, goals, evaluation measures, and the self- study during CEPH Committee meetings. The self-study indicates that the program assesses changing practice and research needs through faculty attendance at yearly development activities such as conferences. The self-study also notes that the program collects data related to graduates' ability to perform competencies in an employment setting through preceptor evaluations after students complete the APE and through students' evaluations of their experiences. The first concern relates to the program not collecting community feedback regarding changing practice and research needs. The program relies on faculty attendance to external conferences and meetings to gather | In response to this feedback, the PH program has established a public health advisory committee consisting of managerial public health professionals, academics, alumni in positions to hire, manager and employers of ATSU CGHS MPH alumni, and other individuals involved in employing public health graduates and professionals. This advisory committee will meet annually and is chaired by public health senior faculty, Dr. Jaana Gold, and vice-chaired by MPH department chair Dr. Mary-Katherine McNatt. The advisory committee provides feedback to the program on, but not limited to, curriculum, course objectives, competency delivery and attainment, program outcomes, graduate outcomes, program delivery, evaluation methods, etc. | The Council appreciates the program's response regarding the development of a public health advisory committee and plans to collect employer information from MPH graduates. |

| | information on trends in public health practice. The program's external stakeholders have only been invited to provide feedback on the program's guiding statements and self-study process. The second concern relates to the program's reliance on APE preceptors to assess graduates' ability to perform competencies in a post-graduation setting. The program does not collect feedback related to student outcomes from employers or other relevant constituents, as required by this criterion. | and in their alumni survey, will be asked to identify employers who may be willing to participate in this advisory committee. Additionally, alumni may email their employers name and contact information at any time as a potential participant. | |
|--|--|---|--|
|--|--|---|--|

F2. STUDENT INVOLVEMENT IN COMMUNITY & PROFESSIONAL SERVICE

| Criterion Elements | Compliance | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|------------|--|---------------------------|------------------|
| | Finding | | | |
| | Met | | | |
| | | | | |
| Makes community & professional | | The program introduces students to community and | Click here to enter text. | |
| service opportunities available to all | | professional service opportunities through the curriculum | | |
| students | | and through announcements in the student corner of the | | |

| is performed outside of an academic | | of Delta Omega, which consists of alumni and recent | | |
| setting &/or the importance of | | graduates who have demonstrated a history of service to | | |
| learning & contributing to | | the community. The chapter is in the process of putting | | |
| professional advancement of the | | together its mission, vision, goals, and bylaws. Once goals | | |
| field | | are finalized, the chapter will begin strategizing how to be | | |
| | | more productive. While primary goals have yet to be | | |
| | | voted on, goals are likely to consist of service activities | | |
| | | centered on raising money for Corbin's Legacy Back to | | |
| | | School Day, and raising enough money to start mentoring | | |

| and sponsoring students to participate in Delta Omega's poster session at the annual APHA meeting. | |
|---|--|
| Examples of community service opportunities available to public health students include advocating to Congress about health policy and volunteering at Muslim Community Support Services, the Special Olympics, and Give Kids a Smile. Reviewers validated that community service opportunities expose students to the importance of learning and contributing to professional advancement of the field. | |
| During the site visit, students shared that opportunities are available, but students need to be proactive to be involved in such service activities. Students also shared that the program faculty encourage them to seek out opportunities in their local communities. | |

F3. ASSESSMENT OF THE COMMUNITY'S PROFESSIONAL DEVELOPMENT NEEDS

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|--|--|------------------|
| | Met with Con | nmentary | | |
| Defines a professional community or communities of interest & the rationale for this choice Periodically assesses the professional development needs of individuals in priority community or communities | | The program's professional communities of interest are 1) dentists providing clinical or other dental services to underserved populations and 2) members of professional organizations that the program's faculty have developed connections with. The rationale for the first community of interest is that the program offers a dental public health concentration; dental public health faculty have strong ties to professional organizations; the department has partnerships with ATSU-Arizona School of Dentistry and Oral Health and ATSU-Missouri School of Dentistry & Oral | Since the PH program is not physically located in any one community, the program will continue to rely on formal and informal relationships and partnerships established by the faculty to continue to fulfill this criterion. However, we will, when appropriate, endeavor to collect data by formally surveying some of | |

| Health; and that this professional community allows | those relationships to determine | |
|---|--|--|
| faculty to connect to others in their field of interest and | needs and to request evaluation | |
| also participate in professional development | after professional development | |
| opportunities. The rationale for the second community of | delivery. Specifically, the program | |
| interest is the program faculty's interest in connecting | will continue to partner with the | |
| with practitioners in their communities and addressing | Urban InterTribal Center of Texas | |
| professional development needs uniquely met through | and intends to formally survey them | |
| their specific skill sets. | to determine their professional | |

| Arizona (DNAZ) to assess professional development needs | in May 2020. The university | |
| related to the end-of-life care and decision making. | community will be surveyed to | |
| Identified professional development needs related to | determine which public health | |
| policy development, resource allocation, community | topics they would like to be covered, | |
| relations, and clinical ethical dilemmas. The same faculty | and a post-presentation satisfaction | |
| member also met with the director of pediatric intensive | | |
| care at the Community Medical Center in Missoula, | - | |
| Montana to discuss professional development needs. The | regarding the HRSA oral health | |
| faculty member determined that the hospital does not | workforce trainings will be more | |
| have active consulting services related to ethics. | diligent and thorough. | |
| | 5 | |
| Another faculty member conducted a survey through the | | |
| HRSA oral health workforce grant about Florida dental | | |
| providers' attitudes, knowledge, and practices related to | | |
| obesity; dental caries and sugar-sweetened beverages; | | |
| and overall professional development needs in 2019. The | | |
| results of this survey are intended to inform future | | |
| trainings. | | |
| trainings. | | |
| The commentary relates to the limited data produced that | | |
| allows the program to identify the professional | | |
| | | |

| development needs of the community on a periodic basis | | |
|--|---|--|
| Two program faculty members have leveraged thei | | |
| existing activities to assess professional developmen | | |
| needs but assessing workforce needs is not firmly | , | |
| established as a program priority. Without data or a | | |
| process to periodically assess the needs of the program' | | |
| identified communities of interest, the program relies or | | |
| individual requests to deliver training opportunities to the | | |
| workforce. | | |

F4. DELIVERY OF PROFESSIONAL DEVELOPMENT OPPORTUNITIES FOR THE WORKFORCE

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|--|-----------------------|---|-------------------------|------------------|
| | Met | | | |
| Provides activities that address professional development needs & are based on assessment results described in Criterion F3 | | Faculty members develop and carry out professional development activities based on the feedback mechanisms described in Criterion F3. One faculty member has given presentations on how to handle staff discomfort related to legal requirements around end-of-life decision making, including ethical issues of withholding to DNAZ staff. Approximately 40 people attended each presentation (2015, 2016, 2017, and 2020). Another faculty member is developing training materials for Florida dental providers and community partners on common risk factors for childhood obesity and dental caries and will disseminate the trainings and tools to the state. She has five in-person trainings planned between October 2020 and December 2021. | | |

| | 1 | |
|---|----------|--|
| Another faculty member develops and presents | | |
| continuing education for dental educators and dental | | |
| providers. For example, she was scheduled to present a | | |
| workshop at ADEA2020 (American Dental Education | | |
| Association) on oral health, which was moved to next year | | |
| due to the pandemic. During that workshop, she also plans | | |
| to assess how educators are assessing evidence-based | | |
| dentistry competency in their schools. She also will | | |
| present a continuing education seminar to dentists and | | |
| hygienists in Michigan in 2020. | | |
| | | |
| The program faculty have also delivered several | | |
| presentations to local communities related to the COVID- | | |
| 19 pandemic. All the presentations were also recorded to | | |
| serve as a resource. | | |
| • Public health ethics and the COVID-19 pandemic, | | |

| strategies | subject matter experts and instructional designers | |
| Perceptions of climate regarding | collaborate during the revision process for each course to | |
| diversity & cultural competence are | ensure that current events and topics addressed in the | 1 |
| positive | curriculum consider viewpoints of a variety of populations | ; ; |
| | and that assessments allow students to consider | · |
| | viewpoints of underserved populations. Site visitors | |
| | learned from administrators, faculty, and students that the | |
| | subject of diversity and inclusion is considered central to | |
| | the program. Faculty provided several examples of how the | |
| | subject is addressed (e.g., ethics, oral health disparities, | , |
| | IRB, global health cultures, language/signage). Although | |
| | the program does not use guest lecturers in courses due to | |
| | the format of instruction, speakers in the college's webinar | · |
| | series are often from underrepresented populations. | |
| | | |
| | | |

| | The university conducts a climate survey; however, data | |
|--|---|--|
| | are not stratified by college or program. The program | |
| | reports that there are no plans to administer its own | |
| | climate survey due to its small size. However, the program | |
| | requests feedback from all faculty at the beginning of each | |
| | term during the faculty meeting. Feedback specific to | |
| | diversity and inclusion is also requested from students | |
| | twice per course and in their graduation survey. | |
| | | |
| | The program collected comments from faculty, staff, and | |
| | students on diversity and inclusion by sending an email in | |
| | February 2020. One faculty member said that "the diversity | |
| | of our students (racially, culturally, demographically) | |
| | allows a greater variety of values, experiences, and | |
| | perspectives to be expressed in the course discussions." A | |
| | student shared that "students are encouraged to be their | |
| | authentic selves in discussion boards and through | |
| | coursework, which promotes diversity and creates an | |
| | inclusive culture that advances performance and growth." | |

H1. ACADEMIC ADVISING

| | academically can work with academic advisors to adjust | |
| | the course load. | |
| | To remain in good standing, all MPH students must | |
| | maintain a 3.0 GPA. If a student's GPA is below 3.0 at the | |
| | end of the semester, the academic advisor notifies the | |
| | department chair, who places the student on academic | |
| | probation. The chair then sends a letter via certified mail | |
| | to the student, explaining why the student is on academic | |
| | probation and the necessary academic performance | |
| | required to remove the probationary status. The | |
| | academic advisor is responsible for contacting students | |
| | placed on probation on the same day the letter is sent to | |
| | ensure that the student understands the probation terms, | |
| | to determine the reason(s) the student is struggling | |
| | academically, and to encourage appropriate measures, | |
| | including time management or use of university writing | |

| center, to help a student raise his/her GPA to the 3.0 | |
|---|--|
| minimum. | |
| minimum. | |
| | |
| Students are enrolled in an orientation course located in | |
| Canvas. While orientation is not required to start courses, | |
| academic advisors encourage students to complete the | |
| orientation to increase their chances for success in the | |
| program. The orientation course is arranged into | |
| 10 modules, similar to the MPH courses; in each module, | |
| students practice using various LMS tools, including quiz, | |
| paper submission, discussion, journal, wiki, and blog. In | |
| one module, students learn about rubrics, where to check | |
| their grades, and how to find feedback, both within the | |
| - | |
| rubric and within the assignment. | |
| The program's graduate evit surveys indicate a high level | |
| The program's graduate exit surveys indicate a high level | |
| of satisfaction with academic advising. A 92% | |
| satisfied/very satisfied rating was found in the 2019-20 | |
| student survey; this is an 11% increase from previous | |
| years. | |
| | |
| Students who met with the site visit team expressed a | |
| high level of satisfaction with academic advisors. | |

H2. CAREER ADVISING

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|---|---------------------------|------------------|
| | Met | | | |
| Students have access to qualified advisors who are actively engaged & knowledgeable about the workforce & can provide career placement advice Variety of resources & services are available to current students | | The college's career services are available to all public health students and alumni. The career services coordinator assists with the preparation and refinement of CVs, resumes, and cover letters. The college also provides free user memberships to CareerShift, a job aggregation and professional networking platform, to all students and alumni. | Click here to enter text. | |
| Variety of resources & services are available to alumni | | In 2018-19, the college rolled out an alumni mentorship program. This program matches graduates with current students by field of interest. Alumni mentors may share their on-the-job experiences with current students, assist in networking, and provide individual career advice and support. Alumni mentors are volunteers who are identified through the annually administered alumni survey. Students seeking career advice are also encouraged to speak with their professors. | | |
| | | In 2017, an MPH graduate worked with the career services coordinator on three drafts of a resume and cover letter to pursue an instructor position in dental public health. One student worked with career services to improve her resume to apply for a job with a health insurance agency. The program reported that since students often are employed by the time of graduation many do not utilize career services. Of students who do use the services, 61% reported being very satisfied or satisfied with career | | |

| advising in 2016-17, 46% in 2017-18, and 54% in 2018-19. During the site visit, reviewers discussed the low ratings with faculty and program leaders; faculty and staff expressed that they are aware of these ratings and believe that they are related to the online nature of the program and that most of the public health students are already employed and not needing or seeking career assistance. | |
|---|--|
| Students who met with the site visit team did not express any concerns related to career advisement. Some students noted that career advisement has also been addressed by their academic advisors. | |

H3. STUDENT COMPLAINT PROCEDURES

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|--|---------------------------|------------------|
| | Met | | | |
| Defined set of policies & procedures govern formal student complaints & grievances Procedures are clearly articulated & | | The program follows well-defined student complaint policies and procedures that are published in the institution's student handbook. Administrators, faculty, academic advisors, and support staff all have established | Click here to enter text. | |
| communicated to students Depending on the nature & level of each complaint, students are encouraged to voice concerns to | | roles and responsibilities to address possible student complaints. The procedures are clear and outline a process of | | |
| unit officials or other appropriate personnel | | addressing complaints from a verbal interaction and written process escalation to formal review with department chairs to the dean and administration, if | | |
| Designated administrators are charged with reviewing & resolving formal complaints | | needed. Complaints that escalate have established timelines that the administration must follow to address student concerns. Academic advisors have an added role | | |

| All complaints are processed & documented | in this process; they act as advocates or intermediaries for students, if needed. | |
|---|--|--|
| | To date, the program has not had any formal complaints submitted to the institution. | |

H4. STUDENT RECRUITMENT & ADMISSIONS

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---------------------------------------|---|--|---------------------------|------------------|
| | Met | | | |
| | | | | |
| Implements recruitment policies | | Recruitment activities for the MPH degree include a | Click here to enter text. | |
| designed to locate qualified | | variety of avenues designed to attract potential students, | | |
| individuals capable of taking | | including the program website, a video from the | | |
| advantage of program of study & | | department chair, and a request for information form. | | |
| developing competence for public | | Enrollment representatives attend professional | | |
| health careers | | conferences appropriate to the field, as well as graduate | | |
| Implements admissions policies | | fairs, which display advertising banners and allow for | | |
| designed to select & enroll qualified | | personal one-on-one connections and distribution of | | |
| individuals capable of taking | | pertinent information. Other avenues used include Google | | |
| advantage of program of study & | ads, LinkedIn, Facebook, Reddit, and other means of | | | |
| developing competence for public | | attracting prospective students through digital marketing. | | |
| health careers | | | | |
| | | The program has clearly established guidelines for | | |
| | | admissions that requires a minimum 2.5 GPA, transcripts, | | |
| | | and an essay. The essay is an important indicator of the | | |
| | | prospective student's writing skills, which are important | | |
| | | for success in an online program. Students with a 2.3 to | | |
| | | 2.4 GPA are given the option to take two courses as a non- | | |
| | | degree seeking student. If these students demonstrate a | | |
| | | minimum 3.0 GPA in each course, they can officially apply | | |
| | | and be accepted into the program. | | |
| | | | | |

| The program identifies GPA as a meaningful measure to demonstrate its success in enrolling a qualified student body. The program's target for percentage of students accepted who meet or exceed the minimum GPA is 95%; the program has exceeded the target for the last three years. | |
|--|--|
| During the site visit, program leaders, faculty, and staff expressed their commitment to recruiting students from the underserved populations; this was also evident to reviewers after review of promotional and recruitment materials found on the program's website. The program's efforts align with the university's strong commitment. ATSU has received the Health Professions Higher Education Excellence in Diversity (HEED) Award from INSIGHT Into Diversity magazine for three consecutive years in a row. Only 24 health professions schools received the HEED award. | |

H5. PUBLICATION OF EDUCATIONAL OFFERINGS

| Criterion Elements | Compliance Finding | Team's Evidence for Compliance Finding | School/Program Response | Council Comments |
|---|-----------------------|--|---------------------------|------------------|
| | Met | 1 | | |
| Catalogs & bulletins used to describe educational offerings are publicly available | | Site visitors reviewed the program and university's publications of educational offerings and found them to be clear and to present the required information necessary | Click here to enter text. | |
| Catalogs & bulletins accurately describe the academic calendar, admissions policies, grading policies, academic integrity standards & degree completion requirements | | for students. All materials are available online for potential and current students to review and reference, including the academic calendar, admissions policies, grading policies, academic integrity standards, and degree completion requirements. | | |

| Advertising, promotional & | Most of this information | on is also included in the student | |
|-------------------------------|--------------------------|------------------------------------|--|
| recruitment materials contain | handbook provided to a | ll MPH students. | |
| accurate information | | | |

AGENDA

A.T. Still University College of Graduate Health Studies (ATSU-CGHS) Master of Public Health Program

Sunday, October 18, 2020

5:00 pm EDT, 4:00 pm CDT, 3:00 pm MDT, 2:00 pm PDT Site Visit Team Executive Session 1

Monday, October 19, 2020

9:45 am EDT, 8:45 am CDT, 7:45 am MDT, 6:45 am PDT Site Visit Team Executive Session 2

| 10:15 am EDT / 9:15 am CDT / 8:15 am MDT / 7:15 am PDT Program Evaluation | | |
|--|--|--|
| Participants | Topics on which participants are prepared to answer team questions | |
| Donald Altman, DDS, DHSc, EdD, MPH, MBA, MA, dean & professor | Guiding statements – process of development and review? | |
| Mary-Katherine McNatt, DrPH, MPH, chair & associate professor | Evaluation processes – how does program collect and use input/data? | |
| Jim Farris, PT, PhD, associate dean, academics and assessment, & professor | Resources (personnel, physical, IT) – who determines sufficiency? Acts when additional resources are needed? | |
| | Budget – who develops and makes decisions? | |
| Total participants: 3 | | |
