

2022 Quick Facts >>

Over the past 5 years MAHEC has:

- Presented 4,067 Health Careers Education Recruitment and Training Programs – touching 86 counties in Missouri
- Connected with more than 48,000 Health Career Recruitment participants in those counties
- Coordinated 14,731 medical student clinical training experiences, 78% of which took place in Health Professional Shortage Areas (HPSAs) and Medically Underserved Communities (MUCs)

This past year, MAHEC:

- Touched 4,606 Health Careers Recruitment Prospects, 210 of whom completed 20 or more hours of career preparation
- Supported the community-based clinical training of 586 medical students, 411 of whom completed 120 or more hours of training
- Placed medical students in 429 different clinical training sites located in 54 of Missouri's 115 counties; of these, 339 are located in Medically Underserved Communities (MUCs) or Health Professional Shortage Areas (HPSAs), and 189 in rural areas

To date, 1,460 MAHEC participants have gone on to healthcare careers in the state of Missouri, 56% of which are in primary care disciplines.

Missouri's Healthcare Workforce Crisis >>

Like many states, Missouri continues to face a critical shortage of healthcare providers

- Missouri ranks 40th in the nation for physical health, 44th for behavioral health, and 42nd for overall health outcomes¹
- There are currently 327 primary care HPSA designations in the state and 491 primary care practitioners are needed to remove these designations²
- Missouri's rural population is older, poorer, and suffers from higher rates of chronic diseases compared to metropolitan populations^{3, 4}
- The rural physician shortage is complicated by an aging physician workforce - rural primary care physicians are older than their urban counterparts by more than 6 years^{4, 5}
- The ongoing pandemic could result in older physicians choosing to leave the field early⁶
- Only 21.5% of Missouri medical school graduates remain and practice in the state due in large measure to a shortage of available residency slots^{4, 7}

The Missouri Area Health Education Centers Answer >>

- Increasing the number of healthcare providers providing care to underserved populations requires a longitudinal pipeline nurturing students each step of the way
- MAHEC network programming provides the needed pipeline stretching from grades 9-16 through health professions education and into practice, with a focus on rural, underserved, and minority students
- MAHEC brings together the resources of health professions education programs and community-based organizations to recruit, train, and retain healthcare professionals
- Participants in MAHEC programs are returning to Missouri communities to practice – to date, more than 1,400 have gone on to healthcare careers in the state
- MAHEC's partnerships, infrastructure, and outcomes make it essential to increasing and improving Missouri's healthcare workforce

MAHEC Youth Recruitment Activities

- Inform youth from healthcare underserved communities and populations about opportunities in health careers
- Foster their interest in becoming healthcare providers
- Help prepare them to enter health professions training

AHEC Scholars Program

- A multi-year educational program designed to prepare interprofessional teams of health professions students to practice in rural and/or underserved urban settings
- Includes, but is not limited to, students in medical, dental, pharmacy, nurse practitioner, nursing, physician assistant, social work, physical therapy, occupational therapy, and public/population health programs
- Focus is on six core topics: interprofessional education, behavioral health integration, social determinants of health, cultural competency, practice transformation, and current and emerging health issues

MAHEC Clinical Training Activities

- Support the training of medical, nursing, oral health, and other health professions students, and medical residents in healthcare underserved communities
- Facilitate preceptor and underserved training site identification and development
- Provide opportunities for students to learn about and engage in the community

MAHEC Participants Choose Primary Care and Missouri

Studies show that retention rates are highest for physicians who complete both their medical school education and residency in the same state.^{2,7}

Over the past 12 years,

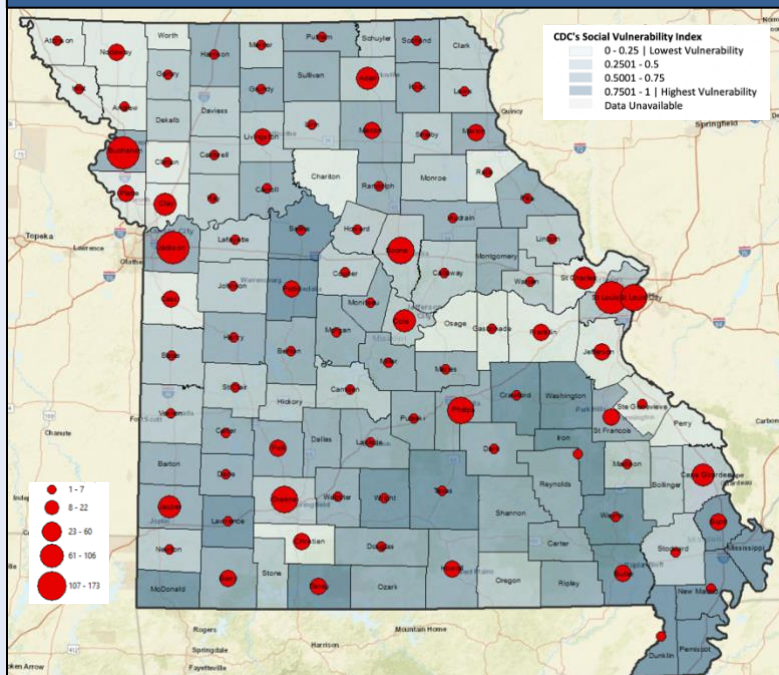

- 2,068 MAHEC participants have matched into primary care residencies
- 809 have completed residencies in Missouri
- 520 have completed primary care residencies in Missouri

This past year,

- 180 MAHEC participants began primary care residencies
- 79 began residencies in Missouri
- 41 began primary care residencies in Missouri

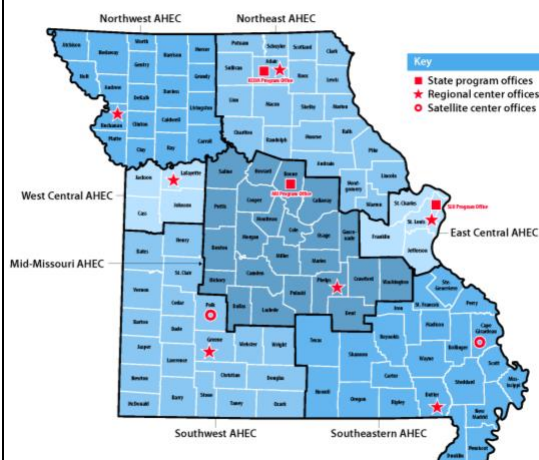

On average, approximately 172 MAHEC participants choose to train in primary care residencies each year.

Employment Locations of MAHEC's Prior Students

At least 1,460 MAHEC participants have gone on to healthcare careers in 89 of Missouri's 115 counties; 81 of the counties are Primary Care Health Professional Shortage Areas (HPSAs).
