

Examination and Intervention Strategies for Common Orthopedic Conditions around the Elbow, Hand, and Wrist

August 26, 2017
Saturday 9:00 a.m.-5:00 p.m.

Sponsored by the Orthopedic Physical Therapy Residency program at A.T. Still University, Department of Physical Therapy

Featured topics for the general orthopedic clinical practice, including tendinopathies, peripheral nerve entrapments, and fractures, this course emphasizes clinical reasoning developing the participants' skills that can be applied Monday morning in the clinic

This course includes ample lab time with a strong instructor participant ratio.

Instructor: Kathy Petkovsky, PT, CHT, with ATSU residency faculty, will be assisting in the lab.

Cheri Hodges, PT, DPT, OCS, FAAOMPT, will be a lab instructor for the manual therapy lab portion of the course.

Intended audience: Physical therapists

.7 CEUs (or seven contact hours) awarded at time of course completion

Course objectives

After taking this course, the participant will be able to do the following

1. Assess the elbow, wrist, and hand regions for common injuries and conditions
2. Review current best evidence for examination and management of conditions in the region of the elbow, wrist, and hand
3. Apply improved examination and intervention strategies

Additional questions, email Cheri Hodges at chodges@atsu.edu.

Instructor

Kathy Petkovsky, PT, CHT, received her bachelor of science degree in physical therapy from SUNY in Buffalo, N.Y. Beginning her career in neuro rehab, she soon found her calling with hand therapy and received her certification in 1992.

Since then, Petkovsky earned her MS in medical information systems from ATSU in 2001 and has developed continuing education courses for hand therapists with emphasis on the wrist and elbow. She is adjunct faculty at ATSU and continues occasional lecturing in the Physical Therapy program.

Cheri Hodges, PT, DPT, MAppSc, OCS, FAAOMPT
