Military Friendly

Named to the 2016 list of Military Friendly Schools®, ATSU is among the top 20 percent of colleges, universities, and trade schools in the country doing the most to embrace America's military service members, veterans, and spouses as students and ensure their success on campus.

ABOUT ATSU

History

Established in 1892 by Andrew Taylor Still, DO, the founder of osteopathy, A.T. Still University (ATSU) began as the nation's first college of osteopathic medicine and has evolved into a leading university of health sciences. Today we offer multiple master's degrees across allied health disciplines, and doctorates in health education, physical therapy, audiology, dental medicine, health administration, health sciences, athletic training, occupational therapy and osteopathic medicine. Our graduates are routinely awarded competitive residencies or positions and receive superior evaluations and references. They are trained at a level that clearly distinguishes them from their peers.

Ranking and Leadership

ATSU's Kirksville College of Osteopathic Medicine (ATSU-KCOM) has a rich history of providing leadership for comprehensive medical education, research, and healthcare. ATSU's people are demonstrated leaders in healthcare. The chair of the Doctor of Athletic Training program also serves as

commissioner for the Commission on Accreditation of Athletic Training Education. ATSU's president was named NBA Physician of the Year prior to accepting his position at ATSU.

Locations

ATSU's Missouri campus is located in Kirksville, a growing northeast Missouri community of nearly 20,000 residents. Within easy driving distance of major cities such as St. Louis, Kansas City, and Des Moines, Kirksville offers a variety of cultural and recreational activities that appeal to a wide range of tastes.

ATSU's Arizona campus is located in Mesa, a sprawling urban environment, just minutes from Phoenix. The Valley of the Sun offers breathtaking sites, cultural events, and numerous attractions for students to enjoy.

Technology and Research

In 2007, ATSU-KCOM opened the Connell Information Technologies Center, a 55,000-square-foot, \$12.5 million building. The educational technology available in this building gives our students an enormous advantage inside and outside the classroom.

ATSU's Arizona School of Health Sciences (ATSU-ASHS) shares the campus with two interdisciplinary research laboratories – the Interdisciplinary Neuromuscular Research Laboratory and the Interdisciplinary Metabolic Research Laboratory.

Alumni

ATSU-KCOM graduates represent a diverse group of osteopathic physicians practicing in every state and several foreign countries. They span all medical specialties and sub-specialties and comprise approximately a quarter of all practicing osteopathic physicians.

Alumni from ATSU-ASHS' athletic training program practice throughout the country and are employed in a variety of professional, collegiate, secondary school, clinical, and academic settings.

osteopathic medicine

(DO DEGREE)

The ATSU-KCOM Still Scholars program provides outstanding sophomore-level undergraduate students the opportunity to reserve early admission to the College. ATSU-KCOM selects qualified applicants* who share the common goal of becoming a doctor of osteopathic medicine (DO).

*Articulation agreements are in place with various undergraduate institutions across the United States to help pre-screen qualified applicants; however, students from any four-year accredited undergraduate institution in the United States may apply. Students representing schools that have an agreement with ATSU-KCOM receive priority consideration in the selection process.

Students accepted into the Still Scholars program are not required to take the Medical College Admissions Test (MCAT) and reserve a seat in ATSU-KCOM's entering DO class after successfully completing the Still Scholars program pre-matriculation interview and their bachelor's degree. Students focus on leadership experiences, internship opportunities, and prerequisite and elective course work during their remaining college years. In addition, students have the unique opportunity to participate in student mentoring and professional development.

Application Eligibility

Students must meet the following requirements:

- Be enrolled full time at a participating college or university or enrolled full time at a four-year regionally accredited college or university
- Have a science and cumulative GPA of 3.4 or higher
- Have completed at least 75 percent of prerequisite coursework required for entry into ATSU-KCOM's DO program
- Have received a B or higher in all prerequisite courses (B- is not accepted)
- Have clinical shadowing or volunteer experience
- Have demonstrated experiences in community service, especially those experiences that benefit underserved populations
- Are of sophomore-level status (approximately 45 semester credit hours, or equivalent, completed)
- Have demonstrated leadership experiences (preferred)

How to Apply

Students may enroll in any major, provided at least 75 percent of ATSU-KCOM's entry requirements are met by the date of application and all requirements are met

by the designated year of application. Students may apply for admission to this program after completing three semesters (approximately 45 credit hours).

If a student is from a school that has an articulation agreement with ATSU-KCOM, pre-health advisers at participating schools review applications and select students who meet program criteria in the spring of each year. Students should submit a program application, official transcripts, and letters of evaluation to their pre-health adviser by the deadline.

Students at institutions without articulation agreements can download application materials at atsu.edu/stillscholars and submit it with all required documents by June 1 following their sophomore year of college. Qualified students are invited to interview with the selection committee the following fall.

Any Restrictions?

All prescribed courses in the applicants' baccalaureate program must be taken at a participating undergraduate institution or a regionally accredited undergraduate institution in the United States. Any deviation from the required

courses requires written approval from the pre-health adviser and/or ATSU Admissions. Participants must complete graduation requirements as a full-time student and have graduated no more than one year prior to matriculating to ATSU-KCOM. Still Scholar students have an exclusive agreement with ATSU-KCOM and agree not to apply to another medical school unless rejected or formally withdrawn from this program. ATSU-KCOM reserves the right, at any time, to reject a student from this program.

In addition, acceptance will be withdrawn if:

- Application is made to another medical/osteopathic school
- Inactivity in required activities, stated deadlines, or failure to complete program requirements occurs
- Academic, ethical, or moral violations occur
- MCAT is taken, and the student scores a 499 or less
- Notification is received from student that career plans changed
- Early graduation occurs less than two years from student's application date

osteopathic medicine

(DO DEGREE)

At ATSU, we believe in applicants who demonstrate a commitment to the whole-person experience, who have a selfless passion to serve, and who are congruent to the osteopathic philosophy. Making an early decision to apply exclusively to ATSU-KCOM is the beginning of an exciting journey to become the selfless healer you are meant to be.

The Early Decision Program is a service for highly qualified medical school applicants who have made a definite decision that ATSU-KCOM is their first choice among medical schools. There is a formal application process as well as interviews and prerequisite course requirements to be part of this program.

Application Eligibility

To be considered, applicants must agree to apply only to ATSU-KCOM until an early decision notification and must meet the following requirements:

- A minimum GPA of 3.5 both cumulative and in the sciences (biology, chemistry, physics)
- Have taken the Medical College Admissions Test (MCAT) and earned a composite score of 504 or higher
- File the American Association of Colleges of Osteopathic Medicine Application Service (AACOMAS) application and supporting credentials by Aug. 1
- File all secondary materials with ATSU-KCOM by Sept. 15
- Submit letter of intent by Aug. 1 indicating the applicant is applying only to ATSU-KCOM and wishes to be considered for early decision
- Withhold all applications to other medical schools until early decisions are made by ATSU-KCOM

Procedures for Applying to the Early Decision Program

- 1 Applications are available through AACOMAS on May 1. To contact AACOMAS, write:
5550 Friendship Boulevard, Suite 310
Chevy Chase, MD 20815-7231,
phone 301.968.4190, www.AACOM.org
- 2 Application, transcripts from all institutions attended, and MCAT scores must be received by AACOMAS by Aug. 1.
- 3 Secondary materials must be received by ATSU-KCOM Admissions by Sept. 15. Secondary materials include: application; \$70 application fee; letter of intent; letter of evaluation from premedical advisory committee, premedical adviser, or science faculty member; and a letter of evaluation from a physician or employer.
- 4 Interviews are conducted in early fall for applicants deemed qualified by the Admissions Committee.
- 5 Notification of status is made within two weeks of interview.
- 6 If accepted, a \$1,000 non-refundable tuition prepayment is required by Dec. 14.
- 7 Applicants not accepted for early decision are automatically returned to the regular applicant pool for later evaluation.

athletic training

(MS DEGREE)

The Athletic Training Still Scholars program provides outstanding students the opportunity to receive early admission to ATSU-ASHS. The School works in collaboration with various undergraduate colleges to identify and select qualified applicants who share the common goal of graduating with an athletic training degree.

Students accepted into the Athletic Training Still Scholars program receive a reserved seat pending acceptance into ATSU-ASHS' post-professional athletic training program and receive the following benefits:

- Reserved placement in the athletic training program with special recognition as an Athletic Training Still Scholar
- Priority graduate assistantship placement pending final verification of all requirements for graduate assistantships (Board of Certification (BOC), Arizona state licensure, etc.)
- Eligibility for travel funds to return to their undergraduate institution to discuss their experiences as a graduate student at ATSU

Application Eligibility

Students must meet the following requirements:

- Be enrolled full time at a participating college or university
- Demonstrate BOC certification as an athletic trainer or completion of all eligibility requirements to sit for the BOC certification examination

How to Apply

Students are eligible to apply if they matriculate from a partnering institution and complete and submit a primary athletic training application and Still Scholar supplemental form, as well as letters of evaluation. Students may apply their senior year.

We have a rolling general admissions process. However, because positions and graduate assistantships are competitive, it is recommended Athletic Training Still Scholars apply as early as possible and no later than March 1.

diversity means more than hue at ATSU

A.T. Still University is deeply committed to an educational and collaborative environment embracing cultural proficiency. ATSU believes excellence requires understanding, affirming, and valuing human difference. ATSU supports students who learn and serve in diverse, underserved, urban, and rural communities across America. ATSU's alumni also practice, work, and volunteer across the world.

Meet ATSU's diversity leadership at: atsu.edu/diversity

National Center for American Indian Health Professions

The American Indian and Alaska Native communities are among the most underserved in terms of healthcare. To help address this great need and build on its long tradition of working closely with these communities, ATSU created the National Center for American Indian Health Professions as a way to develop outreach to American Indian and Alaska Native high school and college students, with the goal of sparking interest in healthcare careers. For more information, visit: atsu.edu/american-indian

Financial Aid

financialaid@atsu.edu
866.626.2878, ext. 2529

Financial Services assists accepted students in developing comprehensive and individualized support packages, including private and federal loans, scholarships, grants, and work-study programs.

In addition, the athletic training program sponsors a variety of funded graduate assistantship opportunities for BOC-certified and Arizona Board of Athletic Training state licensed athletic trainers. Numerous graduate assistantships are available at local high schools and colleges and generally require 20-30 hours of work/week. Funding for graduate assistantships ranges from approximately \$8,000 to \$16,000 annually (=\$11,695/year). Tuition waivers are not available, and the graduate assistantship employer pays funding directly to the student. Applicants interested in obtaining a graduate assistantship are encouraged to complete the admissions process early and to sit for the BOC certification exam in April or June.
