I wish to thank all of you for fulfilling our obligation as physicians to educate the next generation of physicians. This document is to inform you about the expectations for our students, and the work they are required to complete during this clerkship. I am always happy to hear from any of you, so if you have questions or comments, please contact me.

The Pediatrics OMS III clerkship is designed to provide the student with an overview of the clinical specialty of Pediatrics.

Course Goals:

Develop competence to do a newborn, infant, child and adolescent well-child complete evaluation, provide age appropriate immunizations and screening evaluations, have an appropriate discussion with the parent (and child, if appropriate), and provide information and recommendations.

Identify abnormalities in the well-child evaluation and develop an appropriate plan to diagnose and treat the problem(s) causing the abnormalities.

Demonstrate knowledge of common acute and chronic conditions including their main signs and symptoms, diagnostic tests, and treatment including medication appropriate to the level of training.

Identify common pediatric illnesses and develop an appropriate treatment plan for these illnesses.

Textbook:

Nelson Essentials of Pediatrics: With Student Consult Online Access, 7th Ed, 2015.

Authors: Marc dante, et al.

Publisher: Saunders Elsevier

Note: Available on-line and free through the A.T. Still Memorial Library (Arizona Catalog)
